

## Key areas: Visual Hub - Signage Gallery - Narrative Hall

Each node carries source, version, test status, human contact, and withdrawal method

CONCEPT / PROVISIONAL

Source: package geometry + metrics.json; not an official redline; recalculate after official data.

3 anchors

## Identity overview: three nodes, internal units, and external network

East-west narrative stitching / north-south through-connection; all space is provisional concept geometry

CONCEPT / PROVISIONAL

### Three scope levels

Coordinated research · about 43.6 km²

Overall design · 11,412,825 m²

Key areas · about 368.4 ha

### External coordination (separate)

AI ecosystem map: elements, actors, and gates

The identity layer is not an established partnership; unsupported edges are dotted and verification pending

CONCEPT / PROVISIONAL

Source: package geometry + metrics.json; not an official redline; recalculate after official data.

7 elements / 6 actors

VIS·JZ visual identity: three concept directions and touchpoints

Dot / folded line / open frame; all require rights, bilingual, and legibility tests

CONCEPT / PROVISIONAL

Touchpoints

Source: package geometry + metrics.json; not an official redline; recalculate after official data.

concept only

## Mobility, slow movement, and blue-green public space

Stop - turn - arrive - review-back; scale is schematic, not a road redline

CONCEPT / PROVISIONAL

### Legend and human service

- Blue-green narrative
- Slow-mobility axis
- Three nodes
- Human fallback
- Verification pending

A 48-hour receipt is a self-set service target, not a statutory deadline. Personal location, camera identification, and continuous trajectories are excluded.

Source: package geometry + metrics.json; not an official redline; recalculate after official data.
