

JINGZHANG IN SITU: From the Built Park to Three Working AI Urban Interfaces

JINGZHANG IN SITU

Overview map: twelve lived sections

01

River testbed

R&D · validation · safety

02

Open campus ground

translation · talent life

03

Four-quadrant room

market · civic exchange

* Provisional rough geometry; not an official redline. Full recomputation follows official data.

OPEN GROUND

Land use: KEEP / OPEN / INTENSIFY

A

KEEP

buildings, trees, daily services

B

OPEN

park edge, courts, station entries

C

INTENSIFY

activity before floor area

* Provisional rough geometry; not an official redline. Full recomputation follows official data.

Key areas: three urban-form prototypes

1

AS-IS

edge, gap, ground, shade

2

PLAN

keep, open, intensify

3

SECTION

movement, canopy, service

4

OPERATE

owner, hours, care, exit

* Provisional rough geometry; not an official redline. Full recomputation follows official data.

Mobility and blue-green public space

N-S

Heritage-park walk

continuity before icons

E-W

Twelve lived sections

crossing, cycle, access

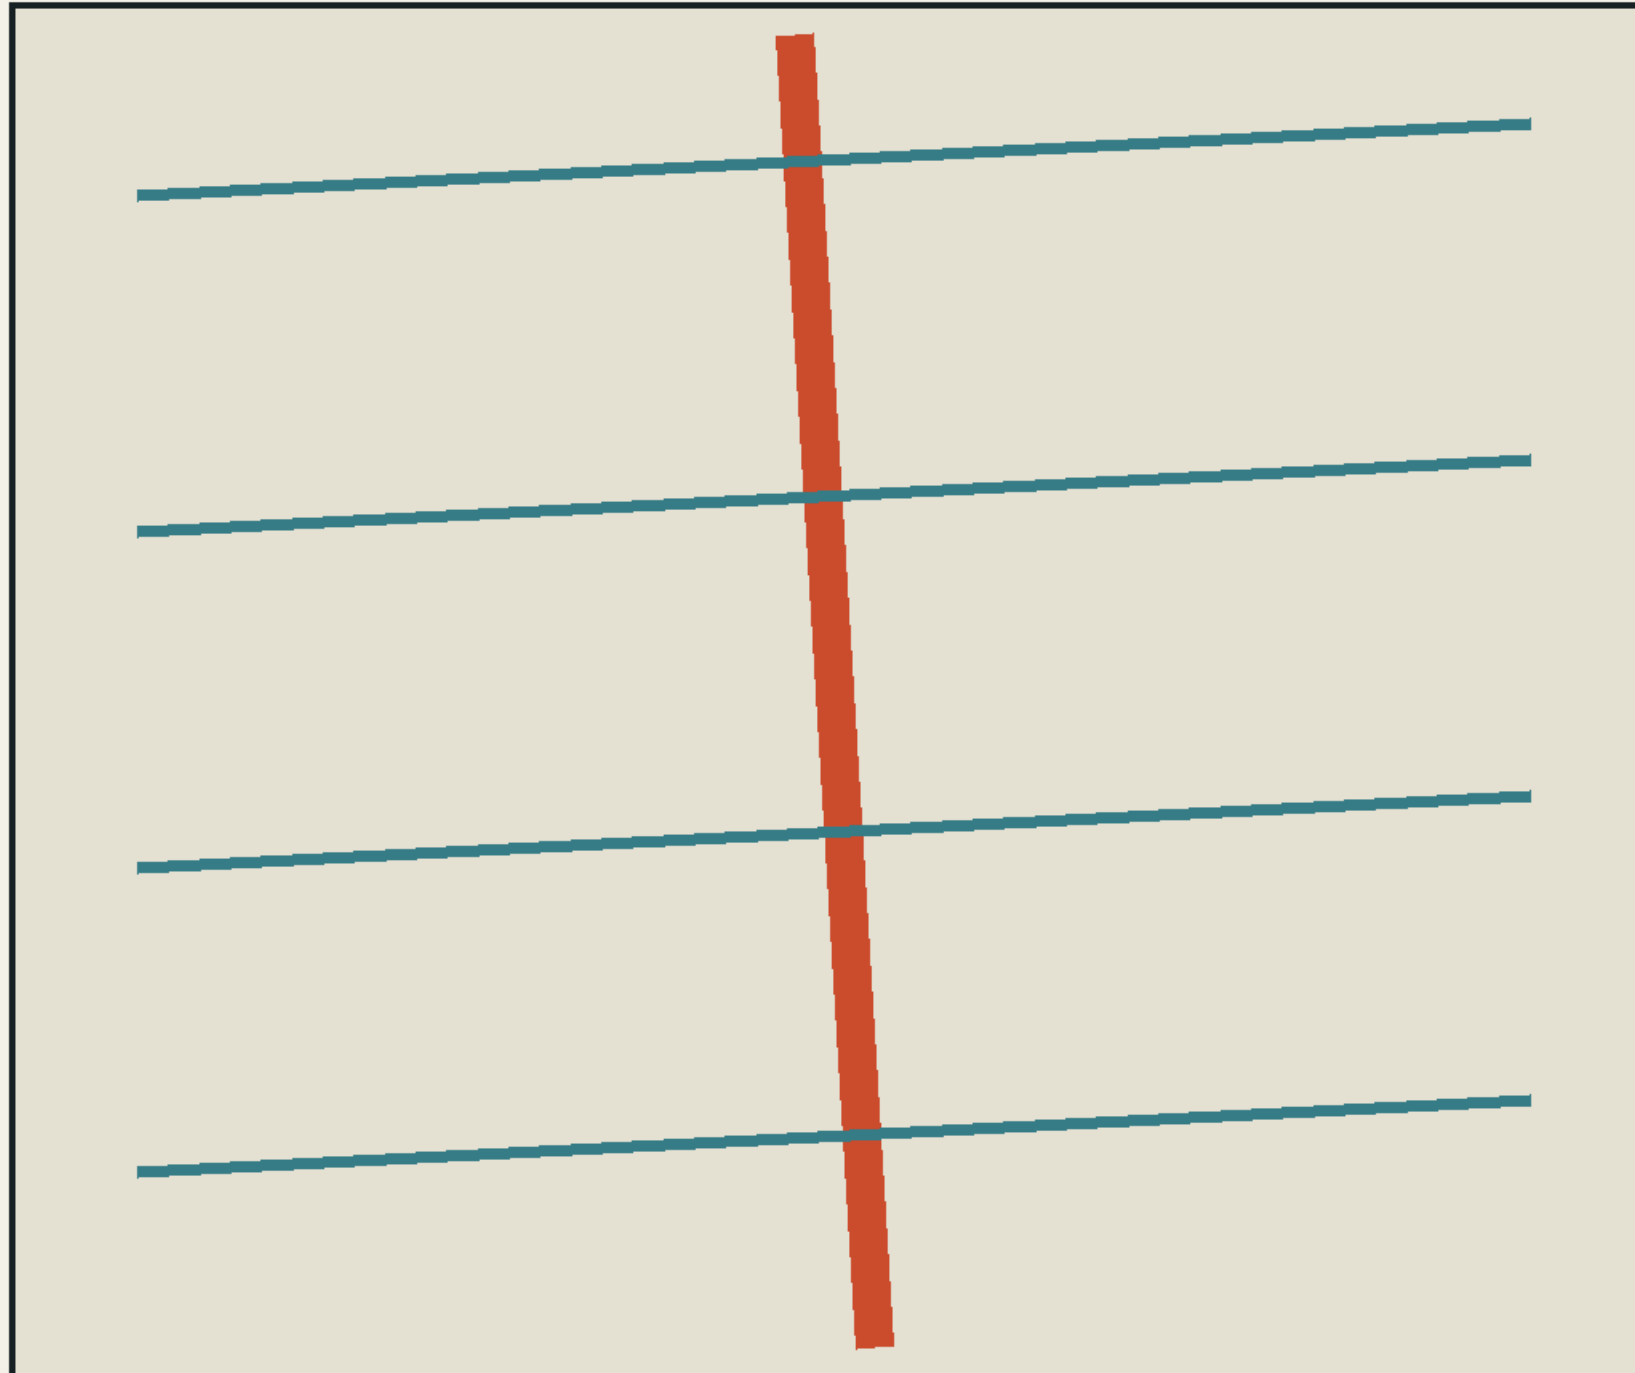

24H

Human fallback

low-tech route and appeal

* Provisional rough geometry; not an official redline. Full recomputation follows official data.

Core metrics and task coverage

11.41

km² design scope*

provisional geometry

12.34%
