

PARALLAX JING-ZHANG

TURNING DISAGREEMENT INTO A PUBLIC DESIGN RESOURCE

One city, more than one answer. Models, professional judgement, operational feedback and lived experience are made visible, comparable and revisable.

DISAGREEMENT BECOMES A WALKABLE URBAN INTERFACE

Uncertainty moves from the footnote into public space. Every display must show who benefits, who does not, when humans review it, and how the project can stop.

PARALLEL LINES

3 / 5 / 12

YARDS / WINDOWS / SCENARIOS

FROM OVERALL STRUCTURE TO THREE KEY AREAS

The same parallax review applies across three scales. Concept cells cover the provisional design extent without pretending to be statutory redlines.

01 Model Divergence Yard

Compare outputs, latency, energy and failure envelopes

02 Civic Parallax Forum

Researchers, experts, operators and residents read one question

03 Adoption Afterimage Market

Compare promises, real burdens, beneficiaries and exit choices

Statutory redlines, FAR, height, statutory green ratio, road sections, utility capacity and building-by-building decisions await official data.
