

Concept rendering (AI-generated illustration). Not a photograph, survey or approved scheme; generation method and prompt are recorded in report/copyright_statement.md

JING-ZHANG HANDOVER LINE

HANDOVER LINE

Intelligence moves. Responsibility stays visible.

**Human takeover is not a fallback.
It is public infrastructure.**

01 Research to validation

02 Validation to open source

03 Capability to the city

04 The city hands problems back

One line · three handover grounds · two wings · twelve reversible scenarios

NORTH / Zhongzhiyuan

Build to Verify

Red-team desk, robot right-of-way sandbox, edge-energy station; every test batch leaves a version, an accountable role and a stop record.

MIDDLE / AI Origin

Verify to Share

Result relay, licensing and withdrawal, human counter; anything published states source, licence, accountable role and how to withdraw it.

SOUTH / Dazhongsi

Share to Serve

City Handover Hall, Century Logbook, oral-history booth; ordinary passage is never conditional on spending or installing an app.

Each red line has a standing basis: stoppable (Generative AI Interim Measures Art. 14), contestable with a published feedback timeframe (Art. 15), human handling retained in public services (Barrier-Free Environment Law Art. 39).

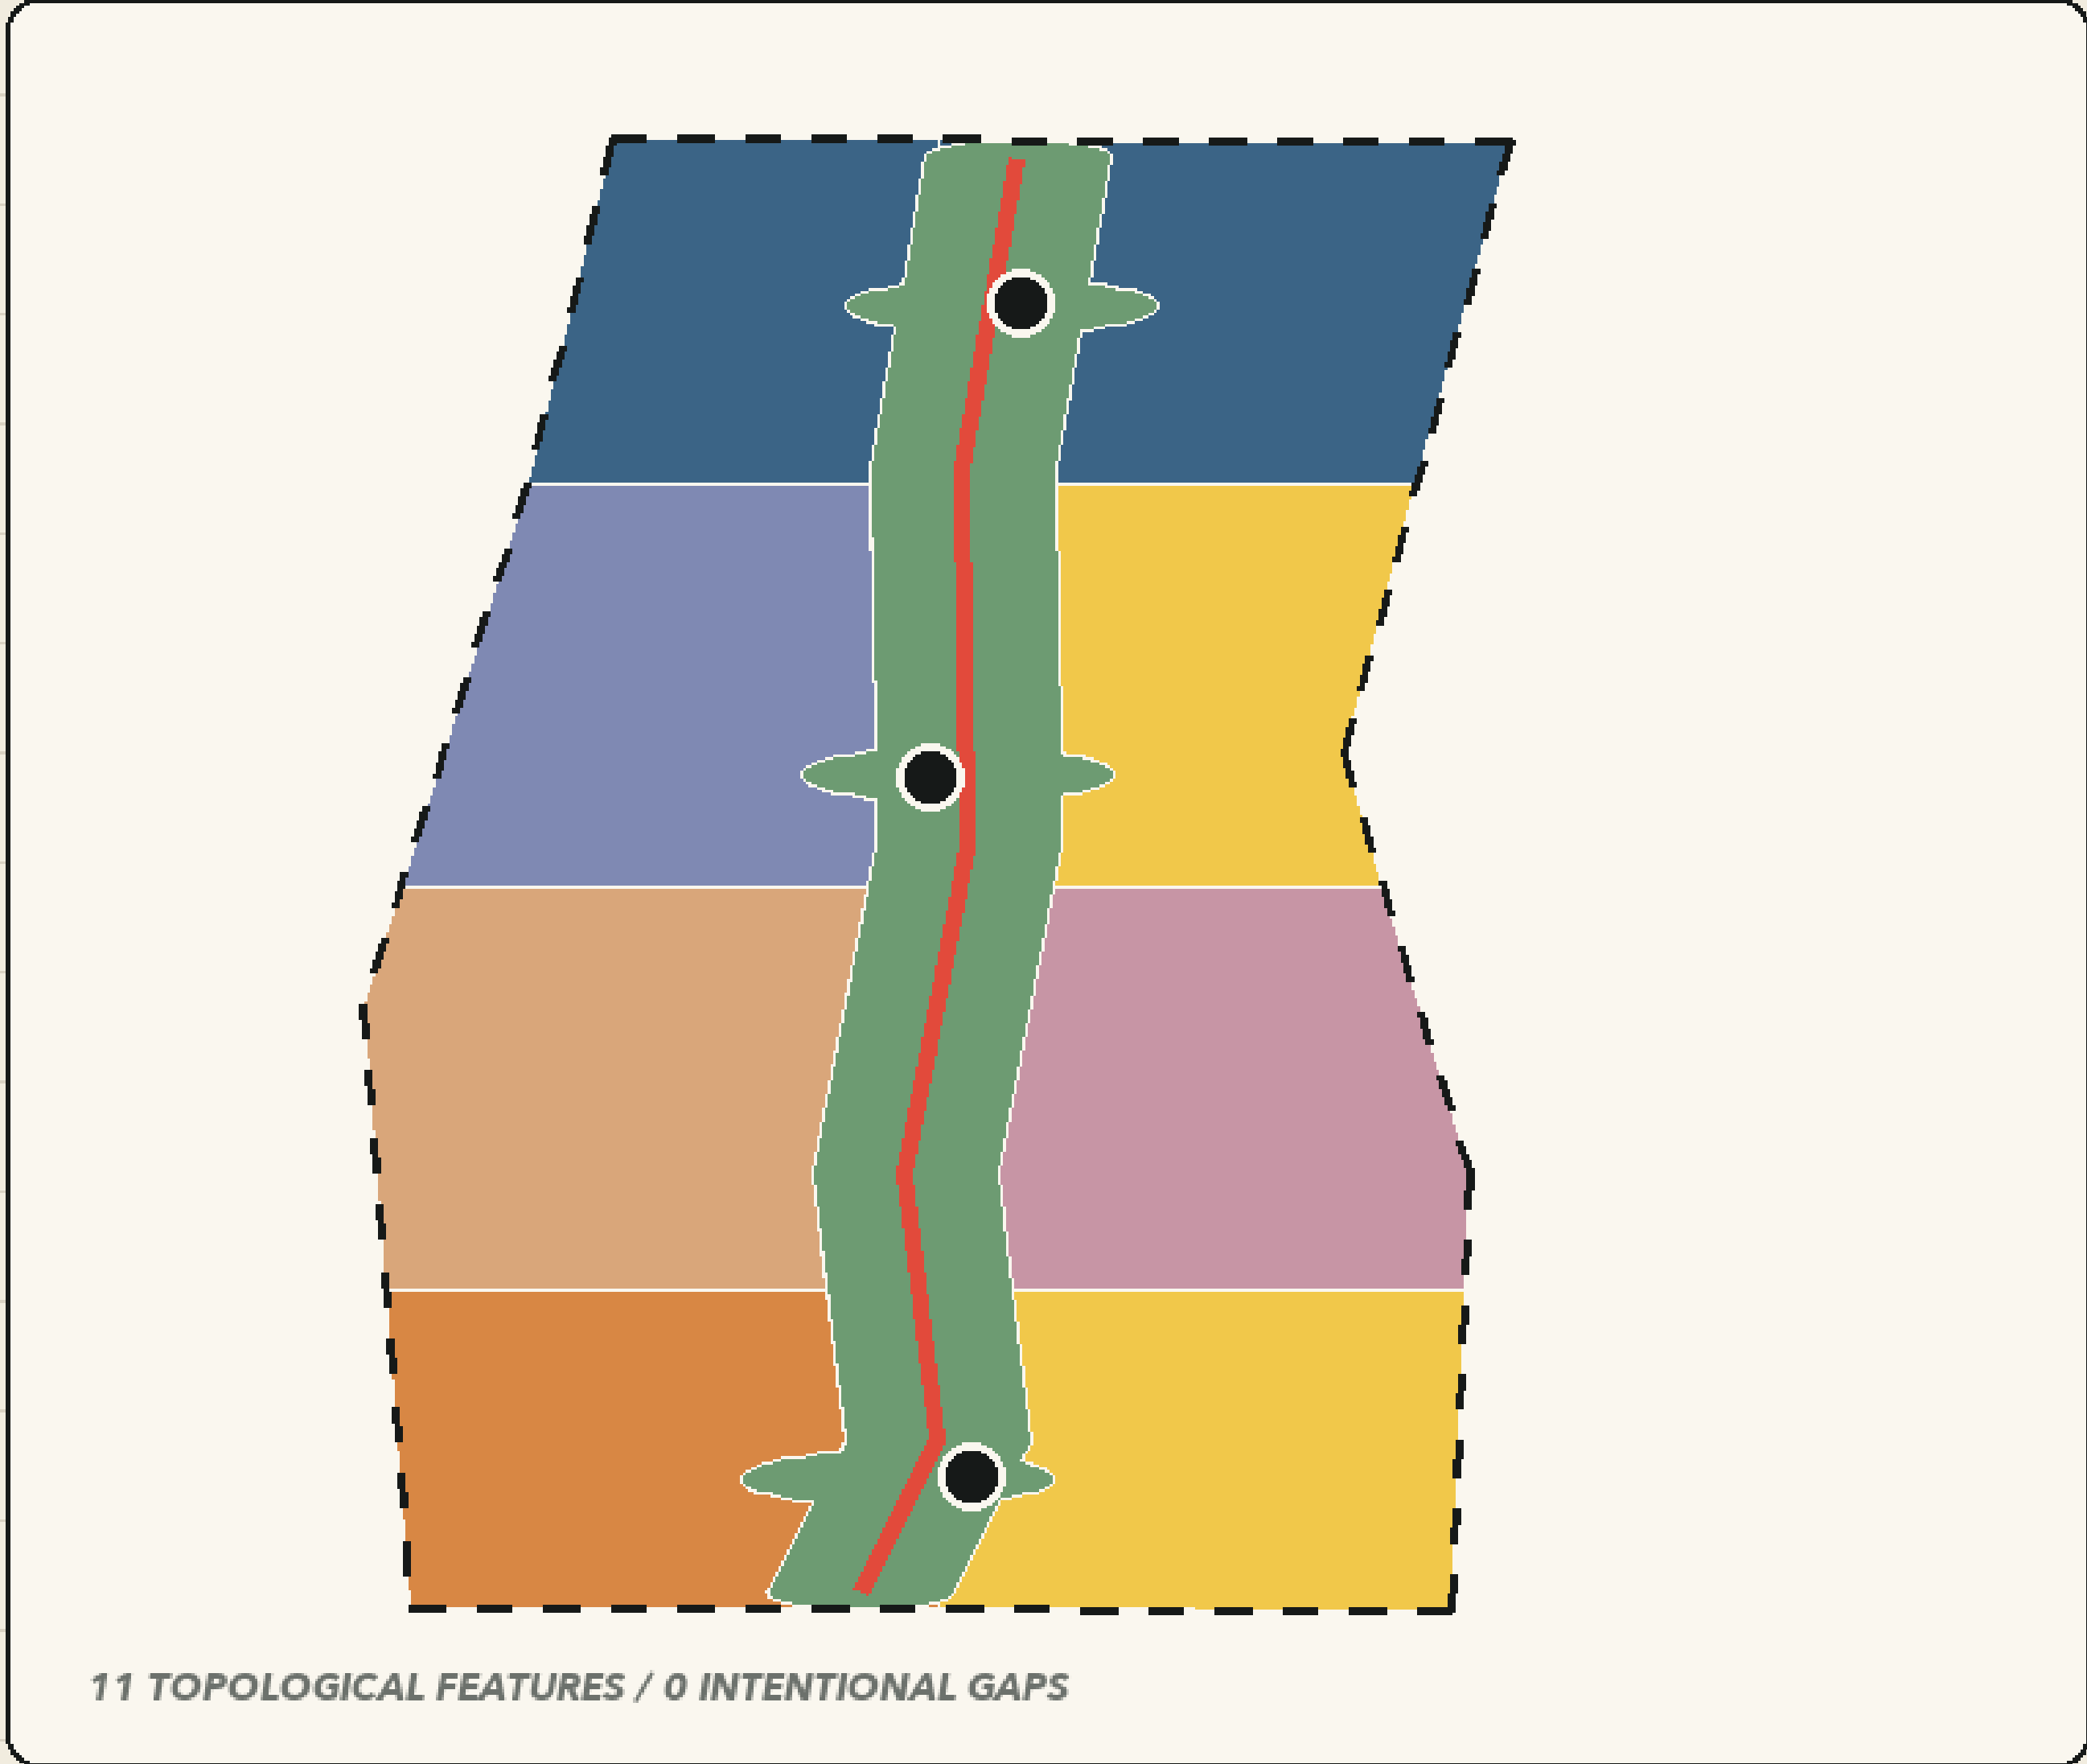

Three scopes, land-use topology and key areas

Full coverage without statutory fiction; three yards, three shifts of duty

JZ / 02

FULL COVERAGE, NO STATUTORY FICTION

Topological land-use partition + three scopes + three yards / two wings

LAND USE

- 0802 R&D / validation
- 0804 Learning / open source
- 05 Tech services / business
- 0701 Talent living
- 0702 Community service
- 0803 Culture / civic service
- 1401 Continuous parkland

43.6 km² → **11.4 km²** → **3 YARDS**
RESEARCH **OVERALL DESIGN** **KEY AREAS**
Industry + future city *Spatial + delivery system* *Detailed validation*

Design recommendation: all zones recalculate when official boundaries arrive; no ownership or statutory land-use claim.

Data: land_use.geojson and site_boundary.geojson; codes from the public MNR subset

JING-ZHANG HANDOVER LINE / v1.0

JZ / 03

THREE HANDOVER YARDS, THREE SHIFTS OF DUTY

Each key area links programme, space, scenario, human takeover and delivery gates

01

BUILD²VERIFY YARD

- Public validation street
- Model red team / robot sandbox
- Physical stop by safety staff

PROVISIONAL KEY AREA

02

VERIFY²SHARE YARD

- Public handover table
- Research relay / translation
- Licence, withdrawal, human desk

PROVISIONAL KEY AREA

03

SHARE²SERVE YARD

- Century logbook
- Oral history / AI-native service
- Non-commercial access / no-AI service

PROVISIONAL KEY AREA

Key-area geometry is provisional; detailed strategies are directions for professional development

JING-ZHANG HANDOVER LINE / v1.0

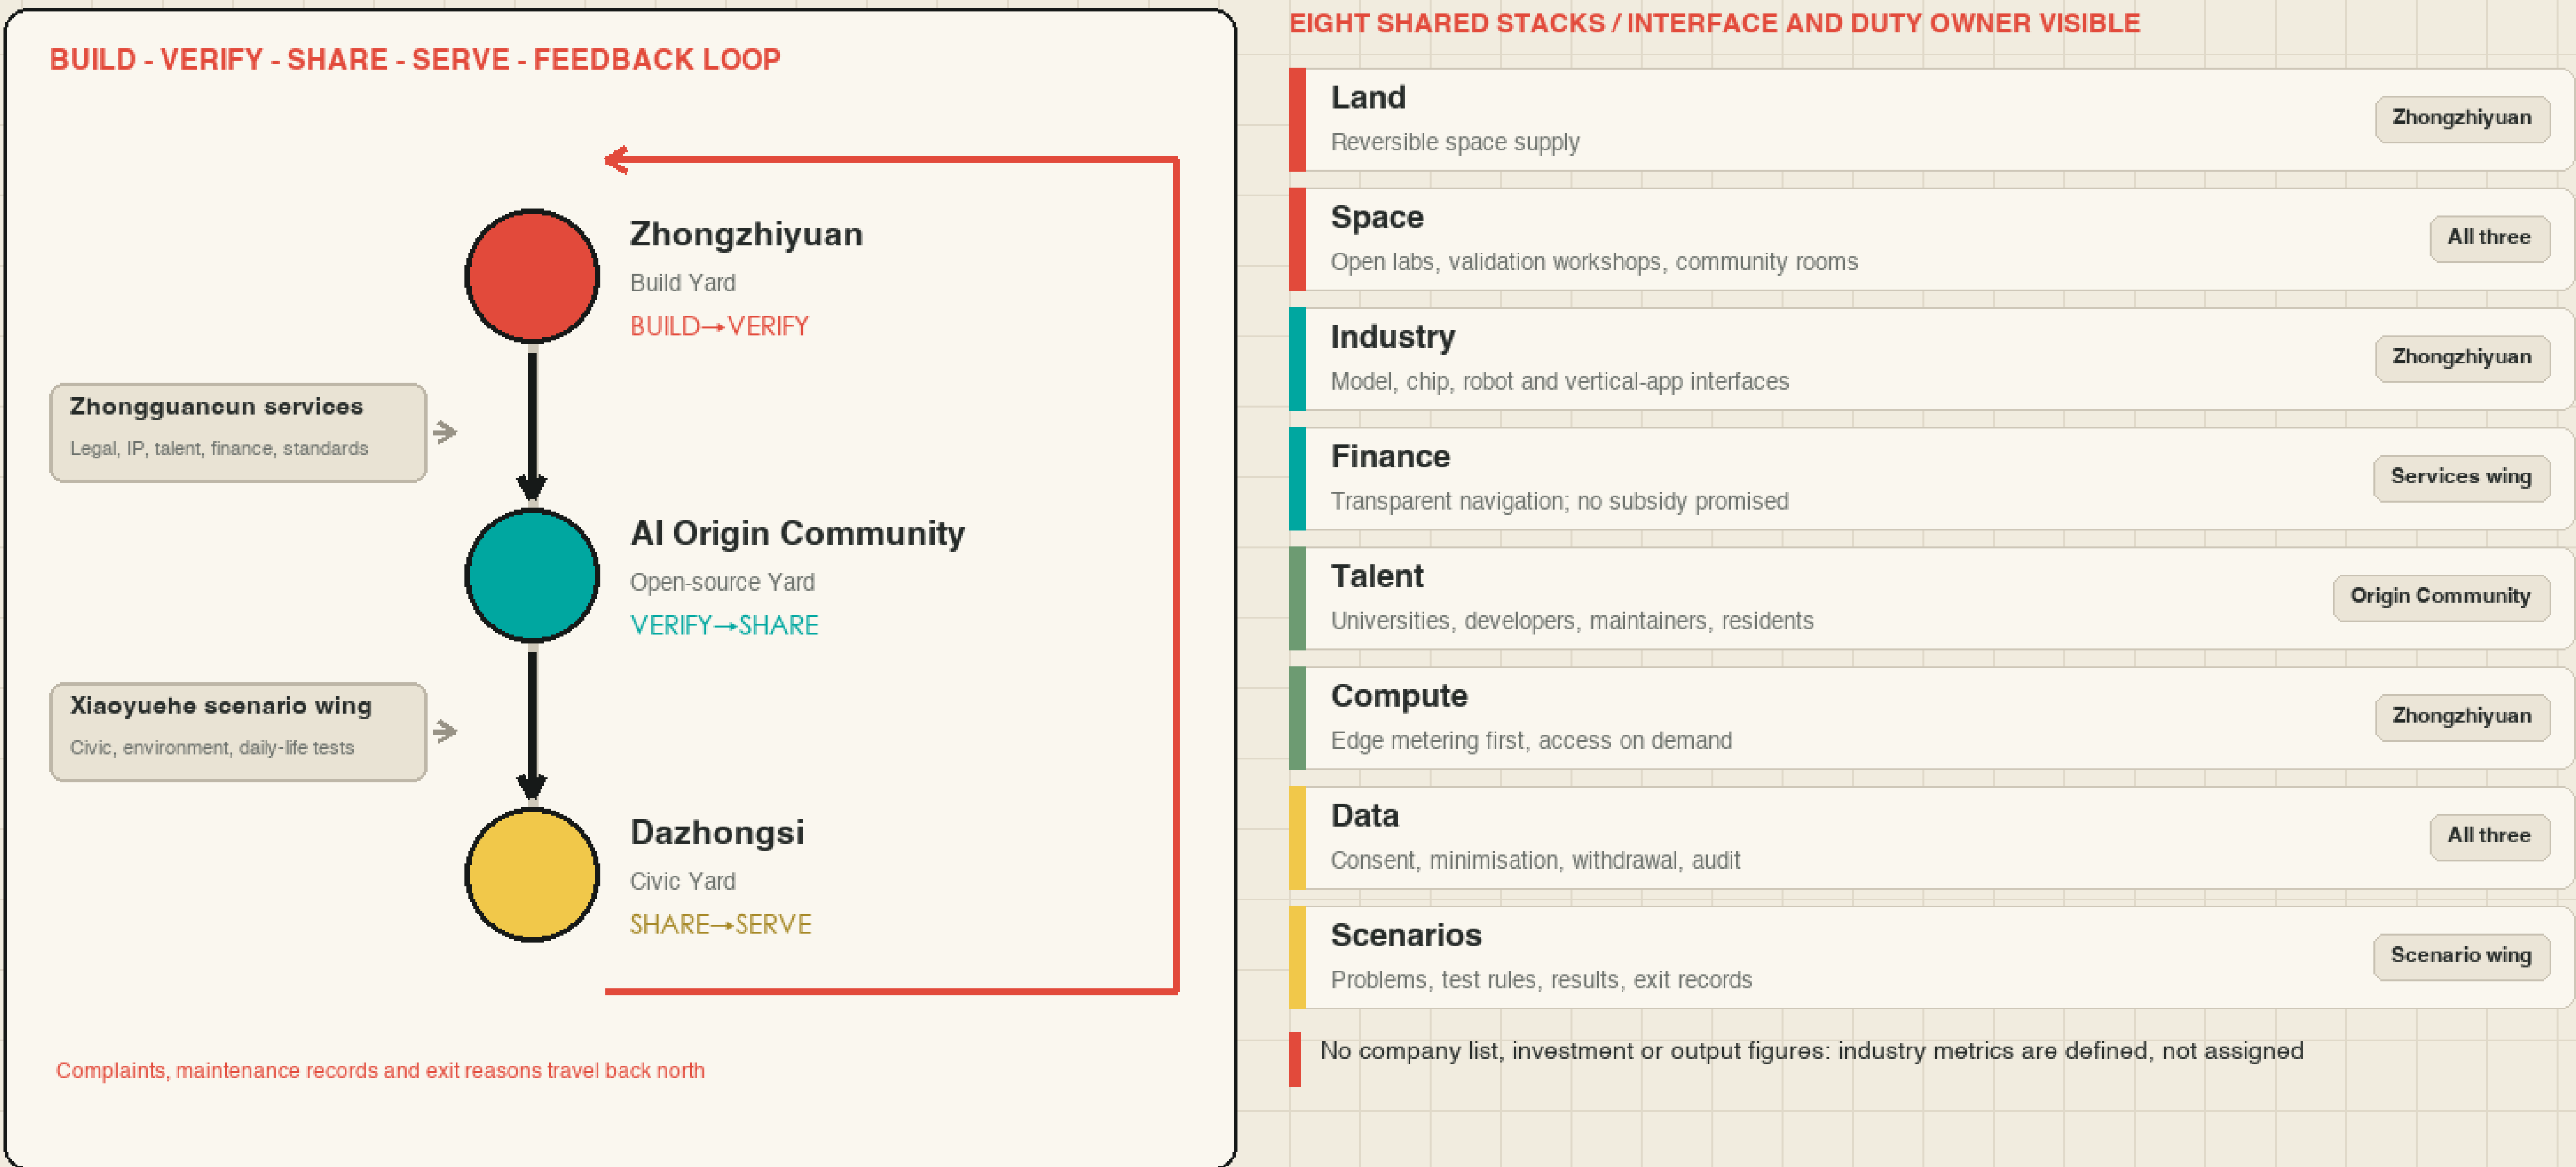

Ecosystem map and regional innovation synergy

Eight shared stacks x three areas and two wings; synergy at four levels

JZ / 06

Eight shared stacks, handed to the next shift

Land / space / industry / finance / talent / compute / data / scenarios x three areas, two wings

Source: agent_taskbook.json three-areas-two-wings and eight-element mechanisms; concept advice only

JING-ZHANG HANDOVER LINE / v1.0

WITHIN BELT	Three areas and two wings organise the research-validation-service loop; objections and shutdown reasons travel back north.
WITHIN CITY	Connects to the official "two zones and one belt" framework, matching Zhongguancun technology supply to this belt's validation and scenario demand.
MUNICIPAL	Future Science City, Huairou Science City and BDA form an original-research / engineering-validation / scale-delivery division; this belt is the public-validation output end.
REGIONAL	Compute, energy and scenario interfaces reserved toward Zhangjiakou and other Beijing-Tianjin-Hebei nodes; feasibility to be confirmed by authorities.

Renewal structure and building decisions

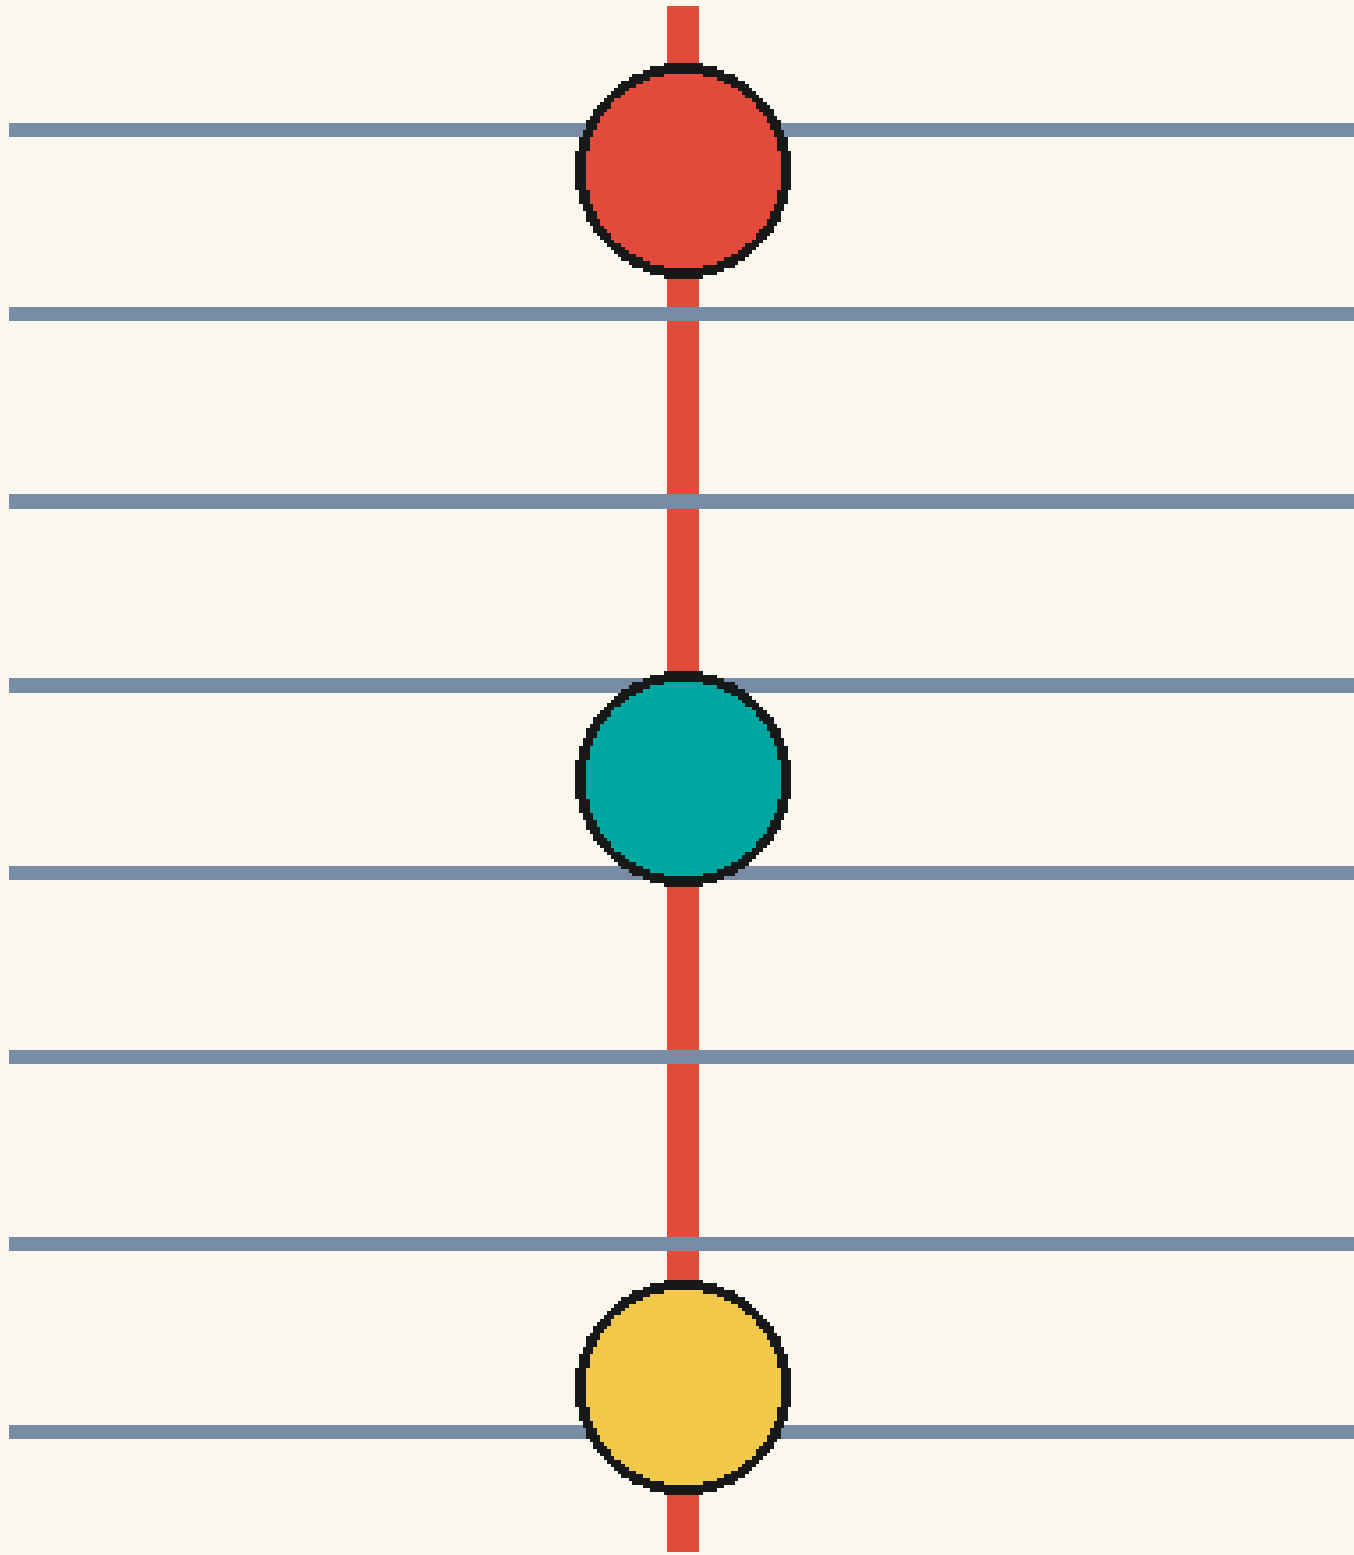

One spine, eight stitches, three yards; priority areas in three tiers, buildings in four steps

JZ / 07

Renewal structure and priority areas

One spine, eight stitches, three yards; priority areas in three tiers

RENEWAL SPATIAL STRUCTURE

Handover Line / organising spine
East-west stitch links x8
Handover yards x3

PRIORITY RENEWAL AREAS

TIER 1

Three yards and their walkable surroundings
One lead body, owners join by agreement

TIER 2

Stitch-spine junctions and low-efficiency park edges
Packaged renewal units, unified public edge

TIER 3

Remaining frontage along the line
Wayfinding, shade and edge tidying only

TWENTY TYPOLOGY TEST CELLS (10 EACH SIDE)

Retain-first adaptive reuse 14 - awaiting survey 6

Source: submitted buildings/roads/key_areas/phasing geometry; conceptual, no demolition conclusion

JING-ZHANG HANDOVER LINE / v1.0

R / RETAIN

Keep in use

Keep in use and complete the condition record.

A / ADAPT

Low-impact repair

Fire safety, energy, accessibility and open ground floor first.

I / INSERT

Removable trial

Removable elements and short-term use only.

D / INVESTIGATE

Not demolition

Awaits survey, structure, ownership, fire and heritage review.

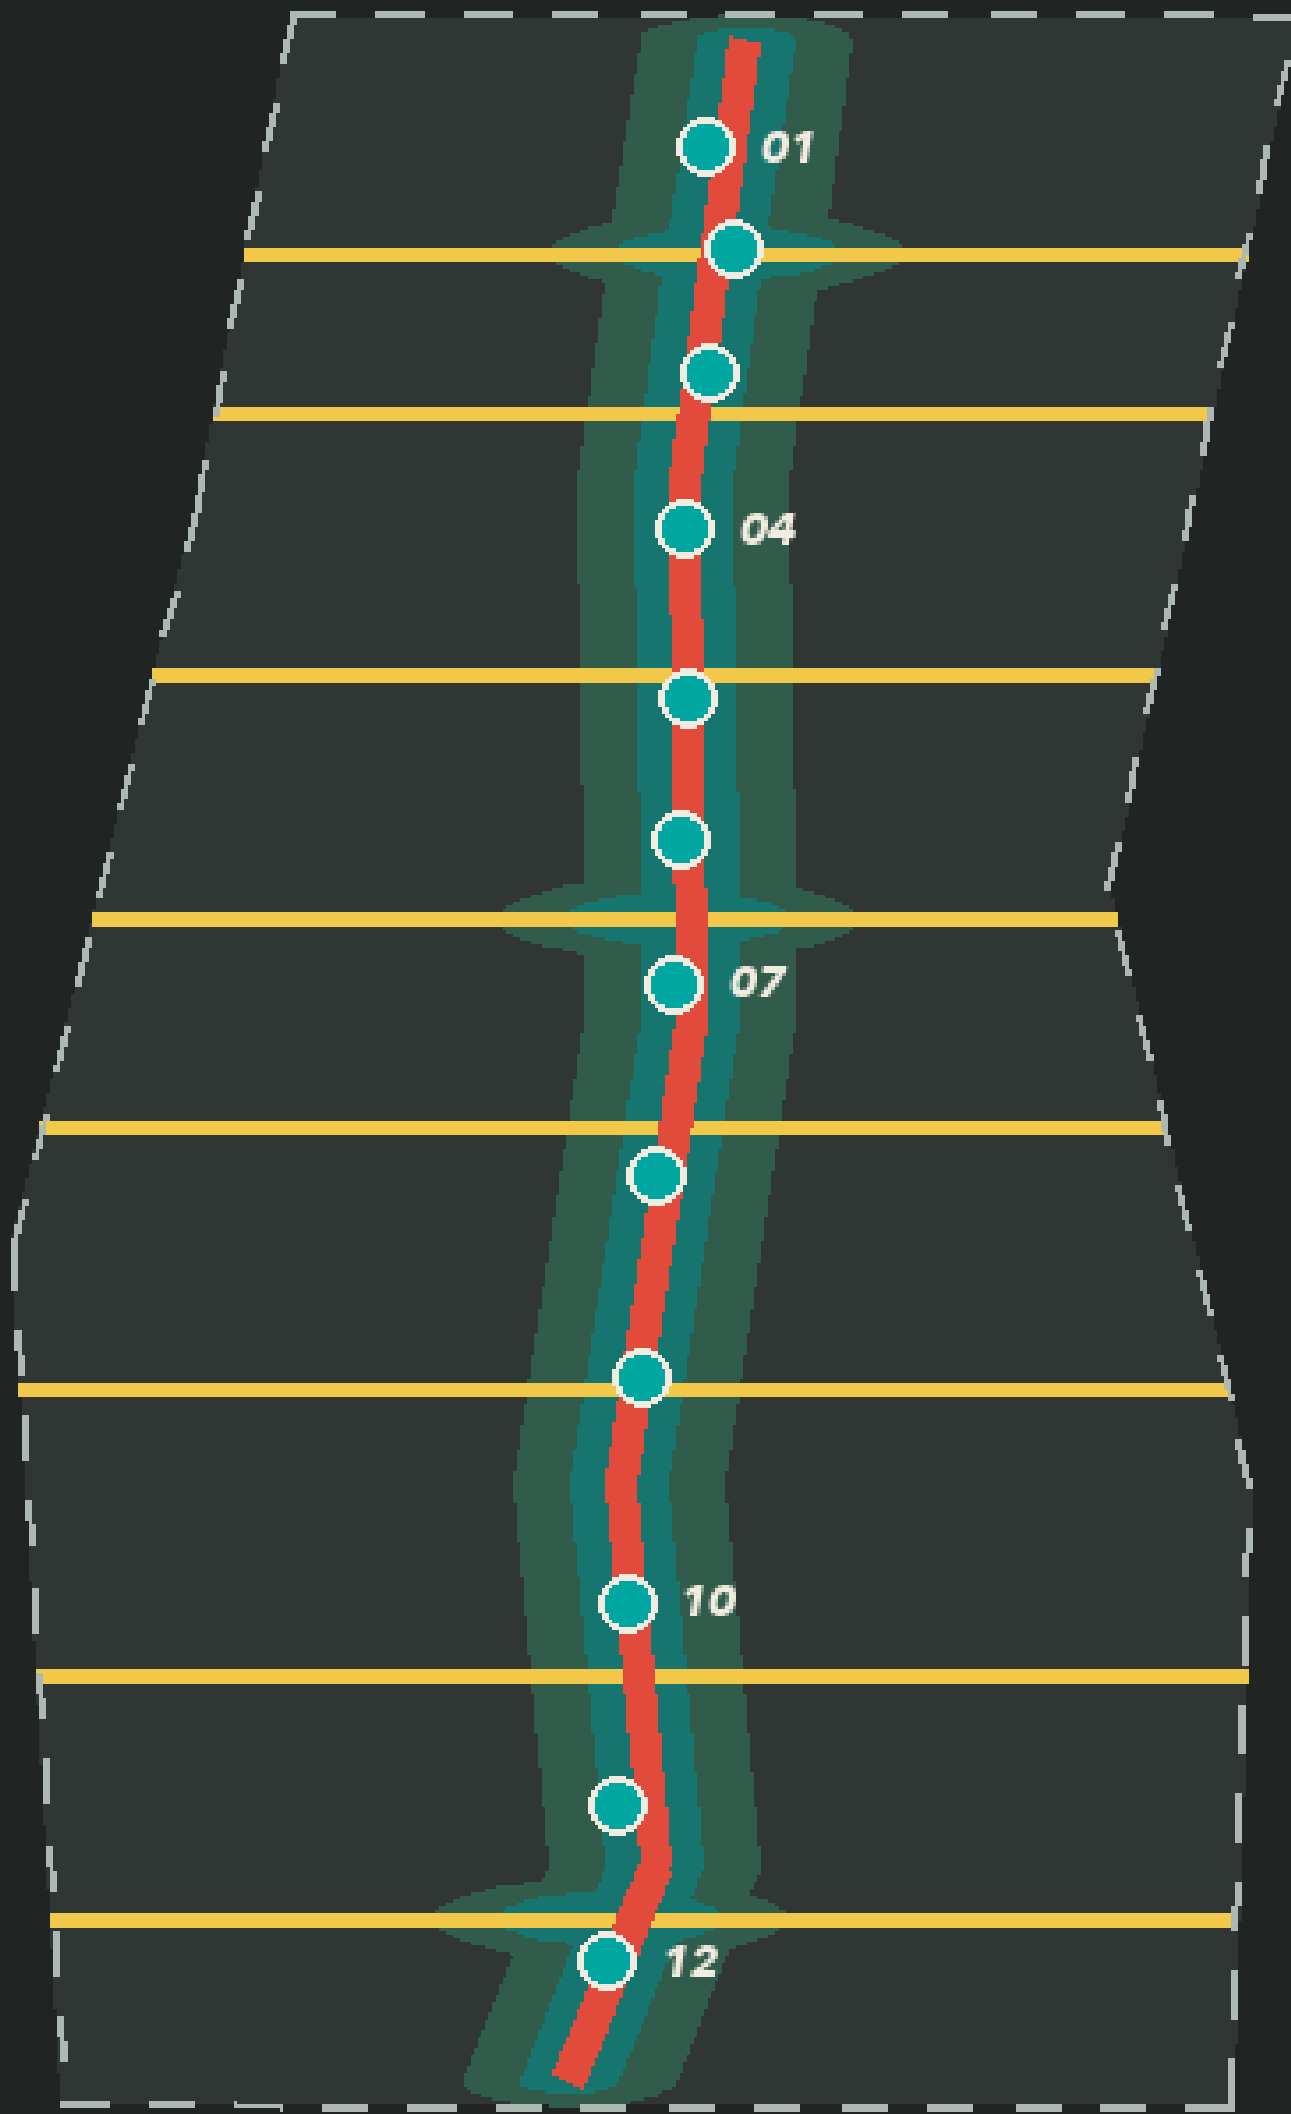

Twelve reversible scenarios and human takeover

Movement, blue-green ground, human takeover and no-AI equivalents

JZ / 04

ONE SPINE, EIGHT STITCH LINKS, TWELVE TAKEOVER POINTS

The smart layer is removable; basic access and human service stay available

MOVEMENT / SERVICE

- Continuous walk-cycle spine
- East-west connection intent
- Blue-green comfort ground
- Human takeover + AI scenario

- A OFFLINE BY DEFAULT**
Static signs, light, tactile maps and human help do not rely on a model.
- B GRADED TAKEOVER**
Low confidence, boundary breach, objection or outage calls the duty person.
- C EXIT IS RECORDED**
Shutdown cause, deletion and service continuity enter the public logbook.

Conceptual connectivity, not road redlines or engineering feasibility; lengths calculated in EPSG:4548

JING-ZHANG HANDOVER LINE / v1.0

SCN-01

Model red-team desk

Human review + paper risk log

SCN-02

Robot right-of-way sandbox

Safety staff + physical stop

SCN-03

Edge energy test station

Manual shutdown + offline meter

SCN-04

Data-consent rehearsal

Paper consent + deletion desk

SCN-05

Accessible-route copilot

Tactile map + human direction

SCN-06

Public translation desk

Human desk + multilingual paper

SCN-07

Campus research relay

Human curation + open catalogue

SCN-08

Visible maintenance stop

Phone report + human dispatch

SCN-09

Community care roster

Staff telephone roster

SCN-10

Night-shift safety light

Fixed light + human patrol

SCN-11

Jing-Zhang oral-history booth

Human guide + paper catalogue

SCN-12

Global Handover Week route

Fixed signs + volunteers

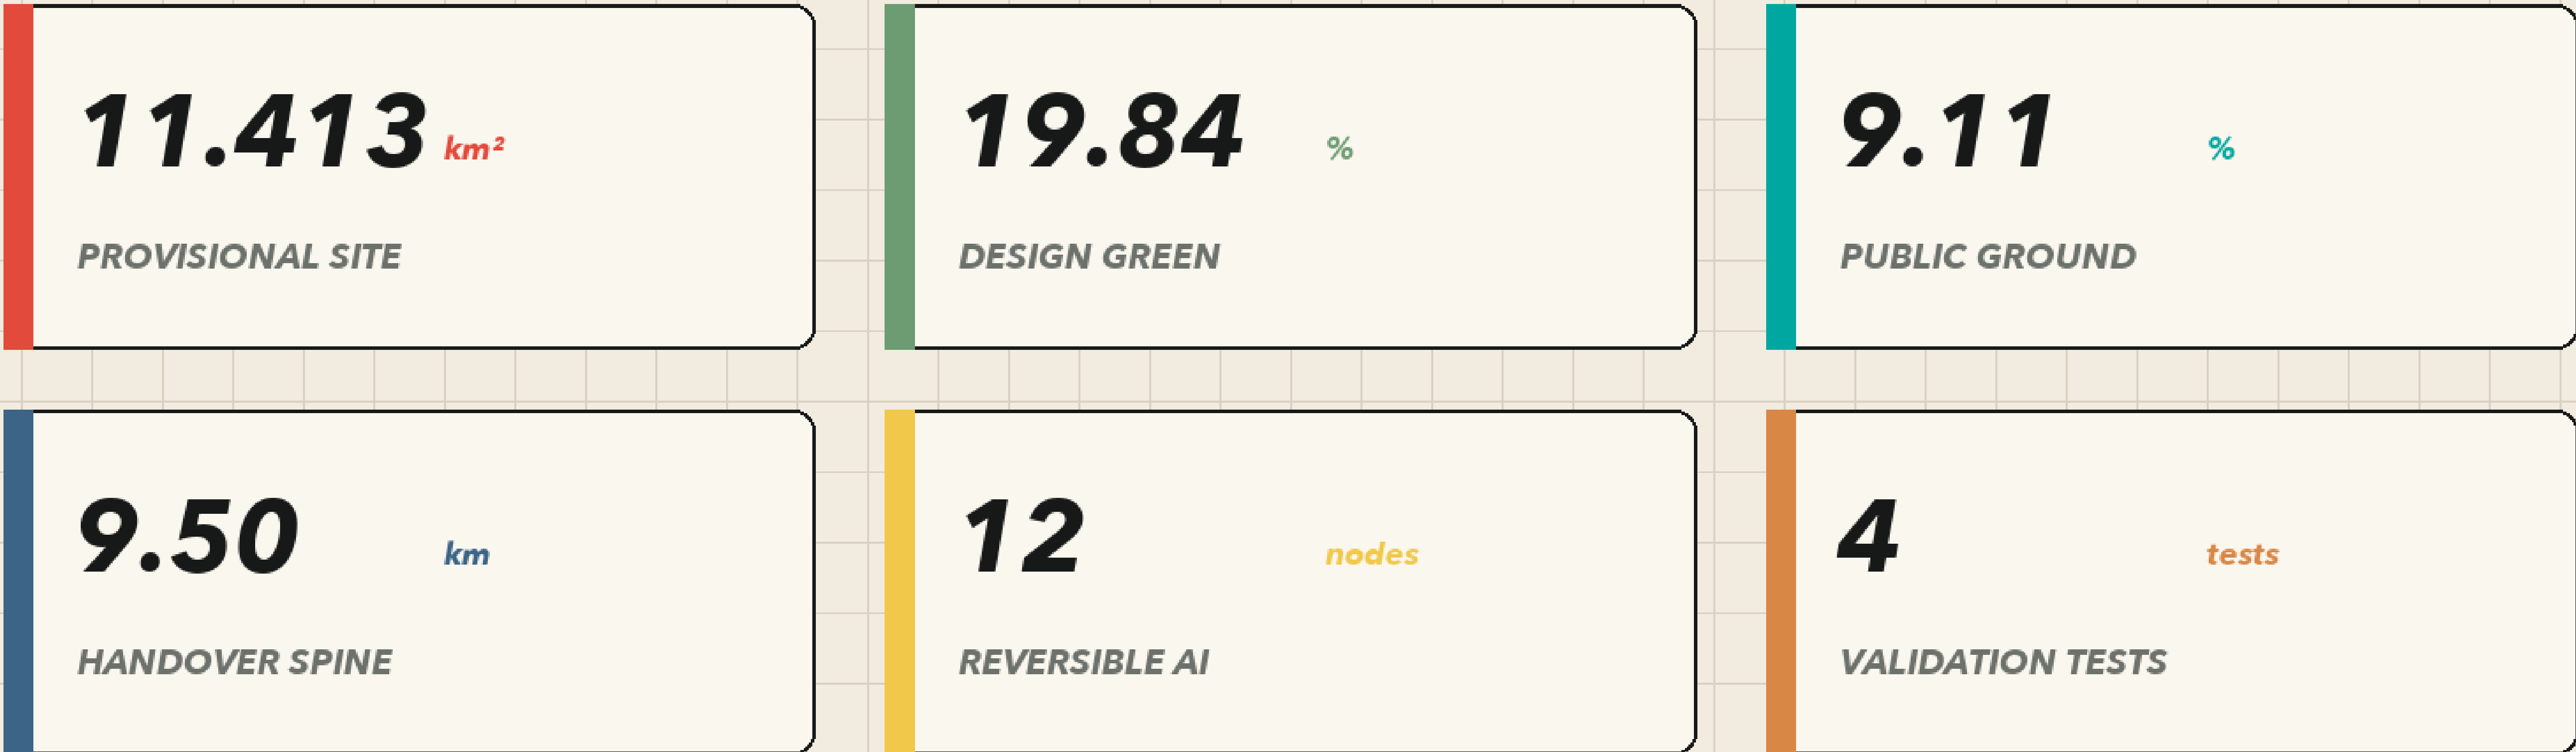

Recalculable, exitable, continuable

Metrics, phasing, risk, sources and professional review gates

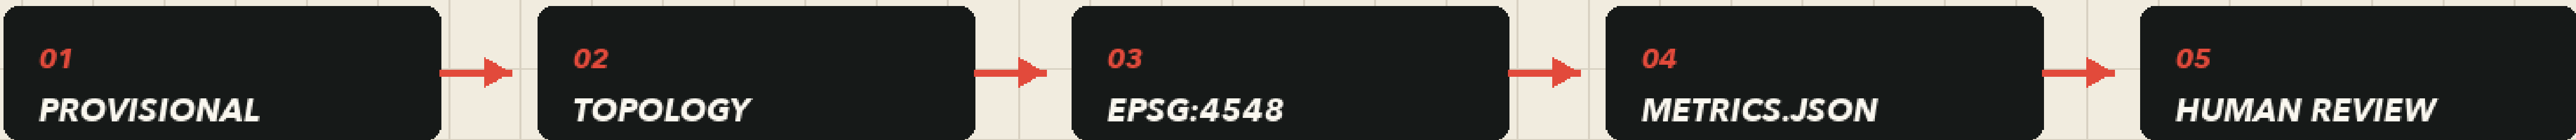

JZ / 05

EVERY NUMBER RETURNS TO GEOMETRY, FORMULA AND ASSUMPTI

Known values recalculate; statutory FAR and height remain unknown

EVIDENCE CHAIN

KEPT UNKNOWN: FAR, building height, ownership, road redlines, utility capacity, investment and output

metrics.json × geometry/*.geojson × assumptions.json; displayed values are rounded

JING-ZHANG HANDOVER LINE / v1.0

PHASE 01	Return to baseline: official data, inventory, wayfinding and three low-risk human-led pilots.
PHASE 02	Open-source yard: ground floors, research relay and community service after ownership and community review.
PHASE 03	Belt-wide operation: complex validation networks only after transport, utilities, heritage, privacy and safety conditions.

Unknown by design: FAR, height, ownership, road redlines, utility capacity, investment and output.
