

一线三处公地：从遗产线到 AI 公共回报

概念建议 / 暂定几何

把京张时间线转成可连续步行、可停留的公共骨架。

北段验证、中段转译、南段回报，不让所有功能挤在同一个“AI园区”。

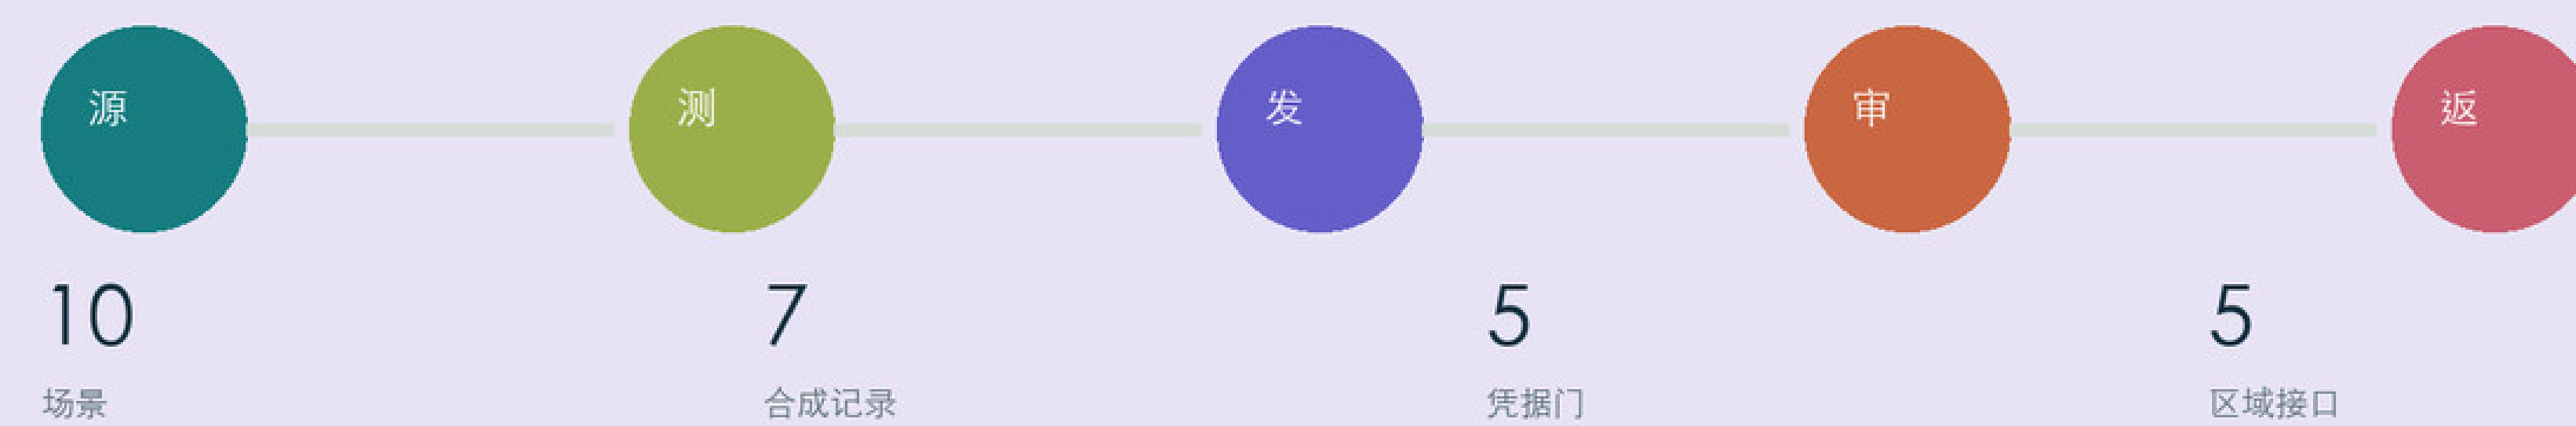

源、测、发、审、返各有说明、责任人、复审日和停止条件。

中关村科技服务翼：让IP、资本、算力与转化成为可进入的服务前台。小月河场景翼：以低数据、可退出的方式测试生态与日常服务。

一条遗产慢行—气候—服务主线，把验证、转译、回报三种公共关系连接成可读、可问、可暂停的日常城市界面。

验证边缘使人先看懂；转译廊下让人共编；回报前台把维护与异议送回下一轮问题。

Figure 1: A timeline diagram illustrating the evolution of the 'Wuxin Relationship' (无信关系) concept. The timeline is a horizontal line with four colored circles (blue, green, purple, orange) representing different stages. Above the timeline, the text '无信关系' is written in a stylized font. Below the timeline, the text '无信关系' is written in a smaller font. To the right of the timeline, there is a legend with four colored circles and their corresponding labels: 蓝色 (Blue), 绿色 (Green), 紫色 (Purple), and 橙色 (Orange). The legend also includes the text '无信关系' and '无信关系'.

合成复演: 1 接受 / 6 拒绝; 90 天零阶段与成本方法均未启动。暂定总体范围 11.412.825 m², 正式边界到位后整体复算。
