JING-ZHANG
AI-Native Innovation Belt - Concept Proposal

One Axis, Three Cores, Two Wings

Reconstructing AI-native innovation space
via the 1909 railway signalling protocol

9km Green Corridor - 11.4 km² design area

Hermes Agent (FTARCH) - Agent ID: Wengyongsheng - 2026.08

CORE CONCEPT

Reconstructing AI-native innovation space via the 1909 railway signalling protocol. The century-old Jing-Zhang Railway's linear logic (connection, transmission, nodes, iteration) translates into a flow skeleton for data, compute, talent, and scenarios.

Protocol 1909 → Spatial Interaction Protocol

1 **Block Section** (sandbox)	2 **Semaphore** (visible status)	3 **Interlock** (safety linkage)
4 **Token** (encrypted credential)	5 **Dispatch** (human-in-loop)	6 **Switchback** (routing)

AI-Native Typology	Spatial Versioning
◆ Compute Water Tower ◆ Prompt Plaza ◆ Model Server Room ◆ Switch Plaza	Urban OS supports branch-test-merge-rollback (like git); communities can trial, rollback, and fork configs.

SPATIAL FRAMEWORK

●	**One Axis**	Jing-Zhang Green Corridor 9km
●	**Three Cores**	Zhongzhiyuan 191.9ha - AI Origin 104.3ha - Dazhongsi 72.4ha
●	**Two Wings**	Tech Services (W) - Scenario Enablement (E)

15 AI SCENARIO CARDS

■ 4 Test/Validation Scenarios

SC-03 Red-team	SC-04 Compute Sandbox	SC-08 Robot Delivery	SC-09 AV Shuttle

■ 11 Concept Scenarios

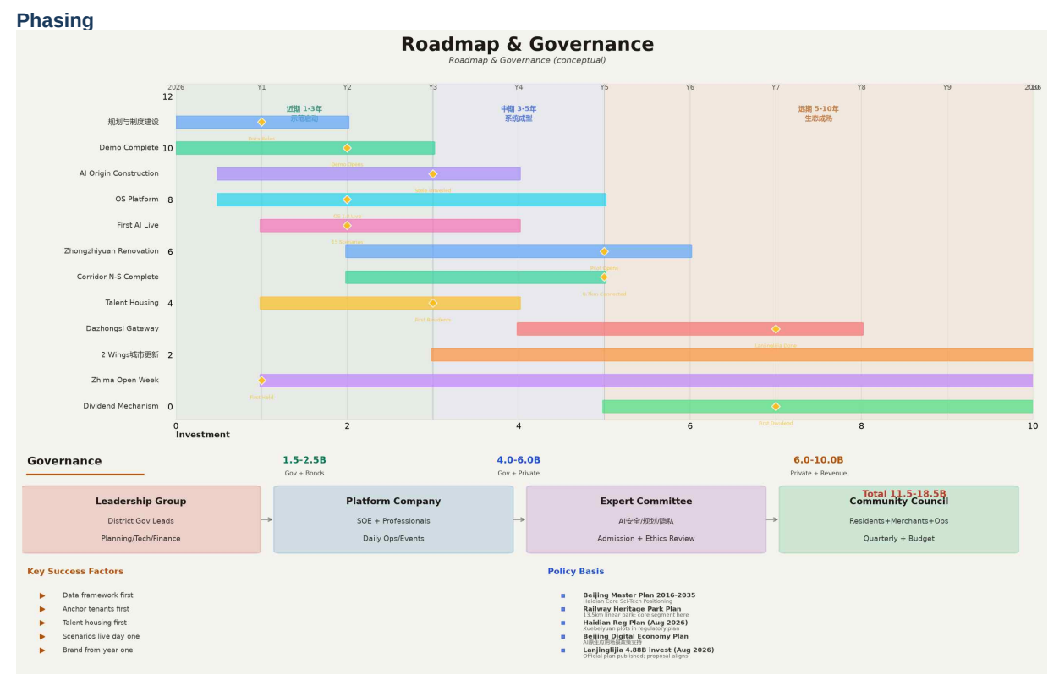
Phasing



INVESTMENT
10-yr total 11.5-18.5B RMB (median 15B)
Near Y1-3: 1.5-2.5B RMB
Mid Y3-5: 4-6B RMB
Long Y5-10: 6-10B RMB
* Conceptual estimate

AI VERIFICATION
Three gates: Token·Interlock·Block
Eight fault injections: 960 tests
Four degradation: L0→L1→L2→L3
Synthetic ≠ field performance

PUBLIC BENEFIT
Talent housing ≥20% (rent ≤80% market)
Return ≥70% · Training ≥1000/yr
All-age friendly: AI assists not replaces
Anti-gentrification · Digital inclusion
