

Three kinds of presence begin with spatial evidence

People, evidence, and responsibility present make AI visible, takeover-ready, verifiable, and withdrawable.

30 SECONDS

F01 → F03 → F08 → F11

F01 • OPEN CITY DESIGN / 2026

Belt Overview: Twelve Candidate Transects Located

One spine links three areas; 12 candidates, 0 surveyed [metric:cross_section_candidate_count]

F03 • OPEN CITY DESIGN / 2026

Three Key Areas at One Comparative Scale

Five background observations + three spatial moves per area; facts, targets, and unknowns stay distinct

F05 • OPEN CITY DESIGN / 2026

Evidence + Metrics: Adverse Results Stay Visible

19 package-recalculable metrics; 0 surveyed, 0% OSM intersection, and 667 m offset remain visible

F02 • OPEN CITY DESIGN / 2026

Shared Partition: Same Edges, Zero Gaps, Zero Overlaps

A recalculable scenario partition—not statutory zoning, parcels, or control planning [metric:land_use_gap_area_sqm]

F04 • OPEN CITY DESIGN / 2026

Responsibility Transects: Twelve Candidates, Three Detailed

CX02 / CX05 / CX10 are relational design targets; the other nine are not presented as completed design

Adverse / unknown results retained directly

6 metrics unknown

3 provisional key areas

12 CX candidates unsurveyed

Known / recomputable, Provisional constraint, Unknown / pending, Design target, Human Takeover

X • Stop / remove

AI may assist; humans decide rights, safety, stop, and reopen

Twelve scenarios share one visible-status, Human-Takeover, complaint, appeal, removal, and archive contract.

SC10 + IM06
SOLE FIRST USE

F08 • Twelve Scenario Protocols: AI Authority + Human Takeover		Every scenario states what AI may do, what humans alone decide, how takeover works, the low-tech fallback, and the exit path.	
SC01 • Model Evaluation Sandbox AI MAY ONLY Calculate, rank, explain, flag HUMAN ONLY Safety release, publish, stop/reopen HUMAN TAKEOVER CX02 sign, isolate output, safety staff explain LOW-TECH Offline script + paper protocol FAIL / EXIT Source/anomaly fail → takeover → stop/archive if unresolved	FLAGSHIP	SC02 • Edge-Node Energy and Thermal-Safety Bench AI MAY ONLY Detect device anomalies HUMAN ONLY Threshold, isolate, fire/energy, reopen HUMAN TAKEOVER Power off, isolate, mark unavailable LOW-TECH Meter + power switch + paper check FAIL / EXIT Fault/limit → isolate → remove if unresolved	SC03 • Embodied-AI Accessibility Co-Test AI MAY ONLY Prompt and assist HUMAN ONLY Safety boundary, participation, stop HUMAN TAKEOVER Stop device + safety escort LOW-TECH Human escort + physical markings FAIL / EXIT Near miss/access fail → immediate takeover/stop
SC04 • Open-Standard Co-Creation Desk AI MAY ONLY Summarize, cluster, translate HUMAN ONLY Attribution, rights, accept/withdraw HUMAN TAKEOVER Hide dispute + human review LOW-TECH Paper issue wall FAIL / EXIT Misattribute/rights fail → human → take down		SC05 • Research-to-Application Matching Clinic AI MAY ONLY Retrieve, rank, explain candidates HUMAN ONLY Contact, refer, reject, reopen HUMAN TAKEOVER CX05 adviser + stop candidate output LOW-TECH Booking ledger + paper summary FAIL / EXIT Mismatch/leak/no adviser → takeover/pause	FLAGSHIP
SC07 • Talent Life Navigator AI MAY ONLY Retrieve, translate, prompt HUMAN ONLY Eligibility/rights, casework, correct, reopen HUMAN TAKEOVER Counter handover + paper map LOW-TECH Counter + paper map + phone FAIL / EXIT Stale/bias/language risk → degrade/pause		SC08 • Accessible Route Companion AI MAY ONLY Rank verified routes, flag unknowns HUMAN ONLY Open/close, field safety, reopen HUMAN TAKEOVER Spine service point closes route + escort LOW-TECH Paper map + fixed signs + escort FAIL / EXIT Unknown risk/unreachable help → close	
SC10 • AI-Native Product Public Trial Room AI MAY ONLY Demonstrate approved function, explain, prompt HUMAN ONLY Admission, transaction, safety, stop/remove/reopen HUMAN TAKEOVER CX10 desk stops demo + human explains + removal LOW-TECH Human explanation + paper feedback + direct exit FAIL / EXIT Harm/rights/complaint fail → takeover/stop/remove	FLAGSHIP	SC11 • Jing-Zhang Memory Co-Reading Guide AI MAY ONLY Retrieve, translate, cue HUMAN ONLY Facts, rights, publish/hide, reopen HUMAN TAKEOVER Hide dispute + fact/rights review LOW-TECH Cleared panel + human narration FAIL / EXIT Fact/rights dispute → hide/withdraw	
		SC12 • Explainable Civic-Service Desk AI MAY ONLY Retrieve, translate, assist verify, prompt HUMAN ONLY Casework, rights, professional conclusion, reopen HUMAN TAKEOVER Three service points stop answer + human transfer LOW-TECH Counter + paper directory + phone FAIL / EXIT Stale/high-risk/transfer fail → degrade/stop	

F11 • Operate, Take Over, Appeal, Stop, and Remove					Nine states, fifteen transitions, the sole SC10+IM06 first use, complaint and appeal, and thirteen adverse dispositions jointly constrain exit.			
01 • preflight Preflight	02 • limited-open Limited Open	03 • operating Operating	04 • degraded Degraded	05 • human-takeover Human Takeover	06 • paused Paused	07 • stopped Stopped	08 • removed Removed	09 • archive Archive
RT-01 • High-risk wrong advice with failed human transfer Stop the affected Q&A; close the service if transfer or qualified review cannot be restored.		fail_stop	RT-02 • Group disparity in matching, scheduling, or navigation Pause the affected automation; do not restore it until disparity cause and equivalent service are verified.		fail_pause	COMPLAINT / APPEAL Non-digital entry → durable receipt → independent human review → correct / pause / stop → re-appeal		
						SOLE FIRST USE SC10 + IM06 only • no opening if any gate is unproven		
RT-03 • Data or model drift with unknown impact scope Unknown impact scope stops automated output; silent reopening after an automatic rollback is prohibited.		unknown_stop	RT-04 • Impersonation or unauthorized delegation Stop and withdraw unauthorized results; do not restore when authorization cannot be verified.		fail_stop	ADVERSE / UNKNOWN RETAINED 16 red-team tests; 13 retained fail / stop / unknown. Six metrics unknown; 12/12 controllers unknown; legal, access, safety, site, operator, and approval incomplete or unauthorized.		
AI MUST NOT AUTOMATE		default facial recognition • emotion recognition • social scoring • predictive policing • undisclosed sensitive inference • hidden monitoring • bypassing human accountability						

AI MAY ONLY suggest • rank • translate • assist verification • prompt	HUMAN ONLY rights • safety • approval • sanction • resources • stop • reopen	HUMAN TAKEOVER visible handover + low-tech fallback + complaint / appeal	EXIT degraded → paused → stopped → removed → archive	COMPLAINT / APPEAL non-digital entry → receipt → independent human review → correct / stop → re-appeal	SOLE FIRST USE SC10 + IM06 only • no opening if any gate is unproven	ADVERSE 16 red-team tests • 13 retained fail / stop / unknown	STILL UNKNOWN 6 metrics • 12/12 controllers • legal / access / safety / site / operator / approval incomplete
---	--	--	--	---	--	---	--

F06

Identity System: One Belt, Three Interfaces, One Grammar

The shared language supports recognition, takeover, verification, and withdrawal without implying official identity.

CL01 • agent.1 • canonical project name

F07

AI Innovation Ecosystem: Three Areas + Two Wings

Space, talent, compute, data, scenarios, and governance form a gated, auditable loop.

CL07 • agent.2 • background cases only

F09

Three Landmarks + Open Contribution Ledger + Components

Contributions are reviewable, correctable, and withdrawable; conceptual components remain reversible, maintainable, and removable.

CL04 • agent.4 • C01-C09

F10

Culture + Wayfinding: Time as a Spatial Coordinate

Jing-Zhang rail memory, Zhongguancun innovation, and transparent AI remain distinct.

agent.5 • six-level wayfinding
