

One World Question Line organizes two wings and three stations into a civic evidence journey from development and testing to deliberation and release.

1,141.3 ha

PROVISIONAL OVERALL AREA

Recalculated; not an official redline

01 · 02 · 03

LINE · WINGS · STATIONS

Design structure, not an existing-condition survey

12 + 4

QUESTIONS · SEASONS

Year-round public testing and release cycle

JZWS / FIG-01 / OVERVIEW + THESIS

WORLD STATION: TURN WORLD QUESTIONS INTO URBAN EVIDENCE

The world asks. The city tests. Jingzhang shares.

ONE / TWO / THREE / TWELVE / FOUR

01 ONE WORLD QUESTION LINE

EVIDENCE → ASSEMBLY → RELEASE

02 TWO SUPPORT WINGS

TECH SERVICES / SCENARIO ENABLEMENT

03 THREE INSTITUTIONAL STATIONS

RETEST / CORRECT / RELEASE

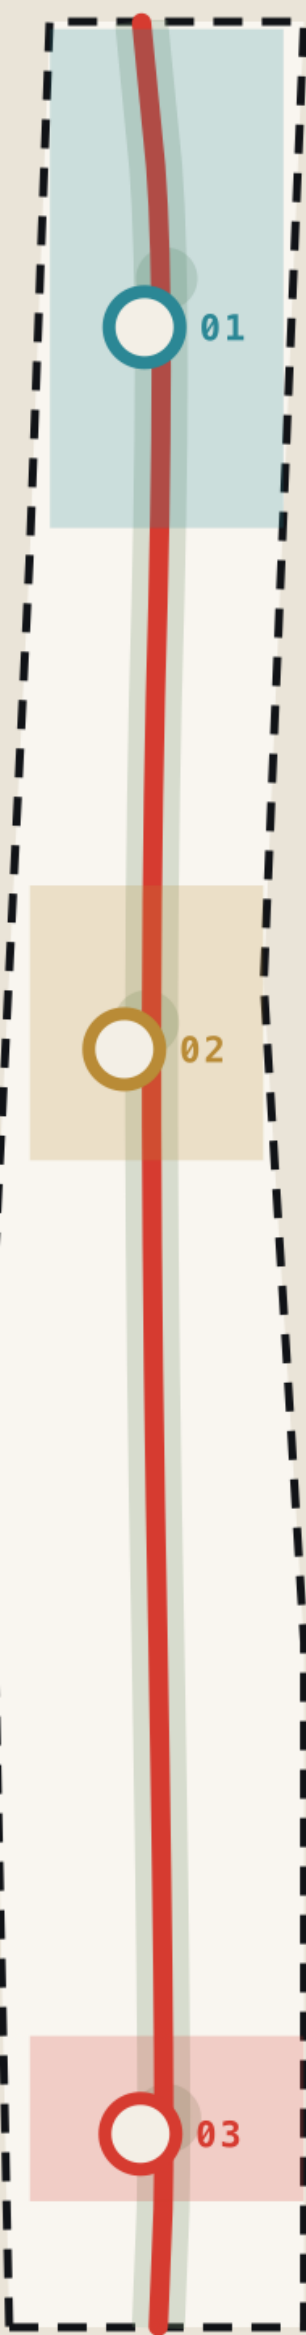

12 TWELVE WORLD-CITY QUESTIONS

3 INDUSTRY TESTS + 9 DAILY-LIFE QUESTIONS

04 FOUR OPERATING SEASONS

CALL / PROTOTYPE / TRIAL / ASSEMBLY

N 1 / EPSG:4326 → AREA EPSG:4548

THE EVIDENCE JOURNEY

01 Zhongzhiyuan · Evidence Works

From independent technology to open evidence

02 AI Origin · Commons Forum

From product prototypes to shared urban life

03 Dazhongsi · World Station Hall

From urban evidence to global release

PROVISIONAL GEOMETRY | NOT AN APPROVAL REDLINE

Coordinates preserved; recalculate the full chain when official data arrive

THREE LEVELS | COORDINATED RESEARCH × OVERALL DESIGN × KEY AREAS

PROVISIONAL / CONCEPTUAL / NON-STATUTORY

Sources: official announcement, repository provisional geometry, metrics.json | FIG-01

01 / ASK

WORLD QUESTION LINE

Annual questions organize space and resources

02 / ENABLE

TWO ENABLING WINGS

Technology services and daily-life scenarios support together

03 / RELAY

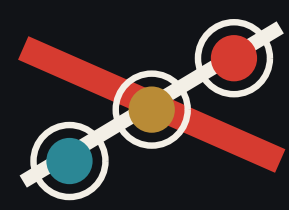

THREE-STATION RELAY

Development, deliberation, and release have distinct duties

STATUS

PROVISIONAL GEOMETRY

Recalculate every spatial metric after official redlines

Six conceptual land-use roles serve the evidence journey; official redlines, existing conditions, ownership, and controls must trigger recutting, recalculation, and review.

6

CONCEPTUAL ROLES
Never presented as statutory zoning

18

REVERSIBLE MODULES
53,856 m² footprint; height and GFA unknown

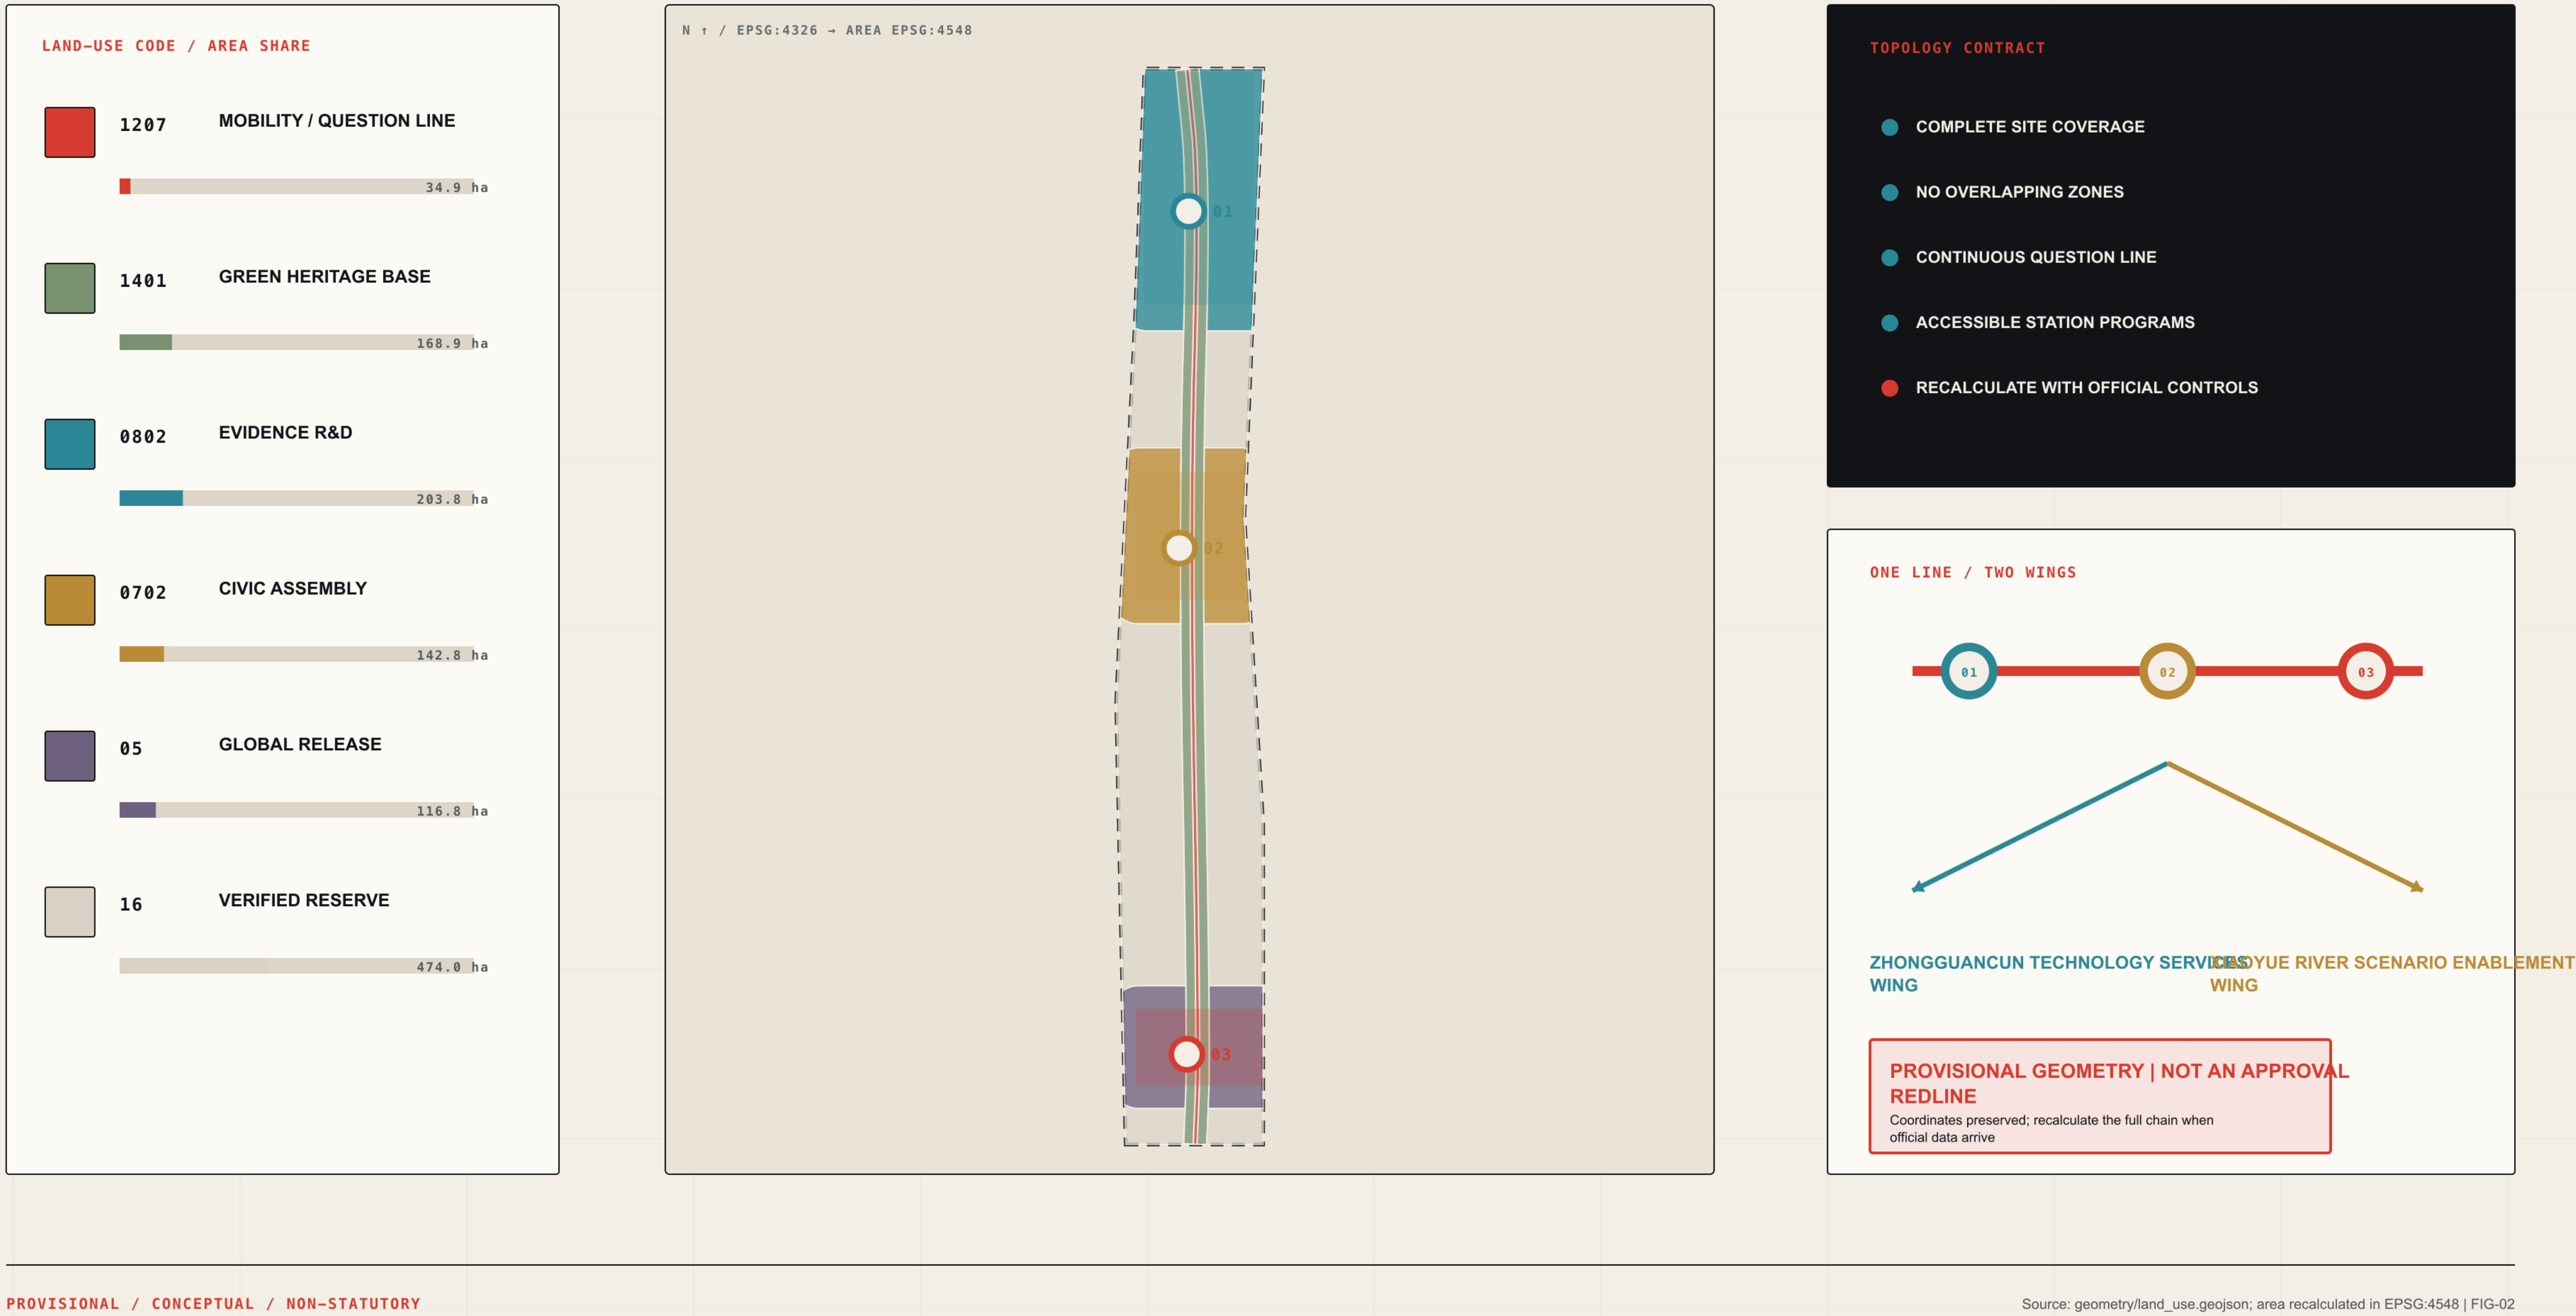

24

PHASED PROJECTS
Sequence shows dependencies, not approval commitments

JZWS / FIG-02 / SPATIAL STRUCTURE

ONE CURVED LINE, NOT TABULA RASA

Six conceptual roles cover the site without overlap; statutory use and intensity remain unconfirmed.

01 / RETAIN

RETAIN FIRST

Do not alter an uninvestigated object

02 / ROLE

SIX LAND-USE ROLES

Express relationships, never statutory zoning

03 / MODULE

REVERSIBLE MODULES

Small, demountable, repairable, versionable

04 / VERIFY

CONTROLS PENDING

FAR, height, and GFA remain unknown

Mobility is not a line. It is a public-safety protocol of arrival, walking, observation, emergency stop, human takeover, and accessible exit.

10.87 km

CONCEPTUAL LINKS

Recalculable; not road redlines

100%

HUMAN TAKEOVER

Every scenario retains stop and rollback

UNKNOWN

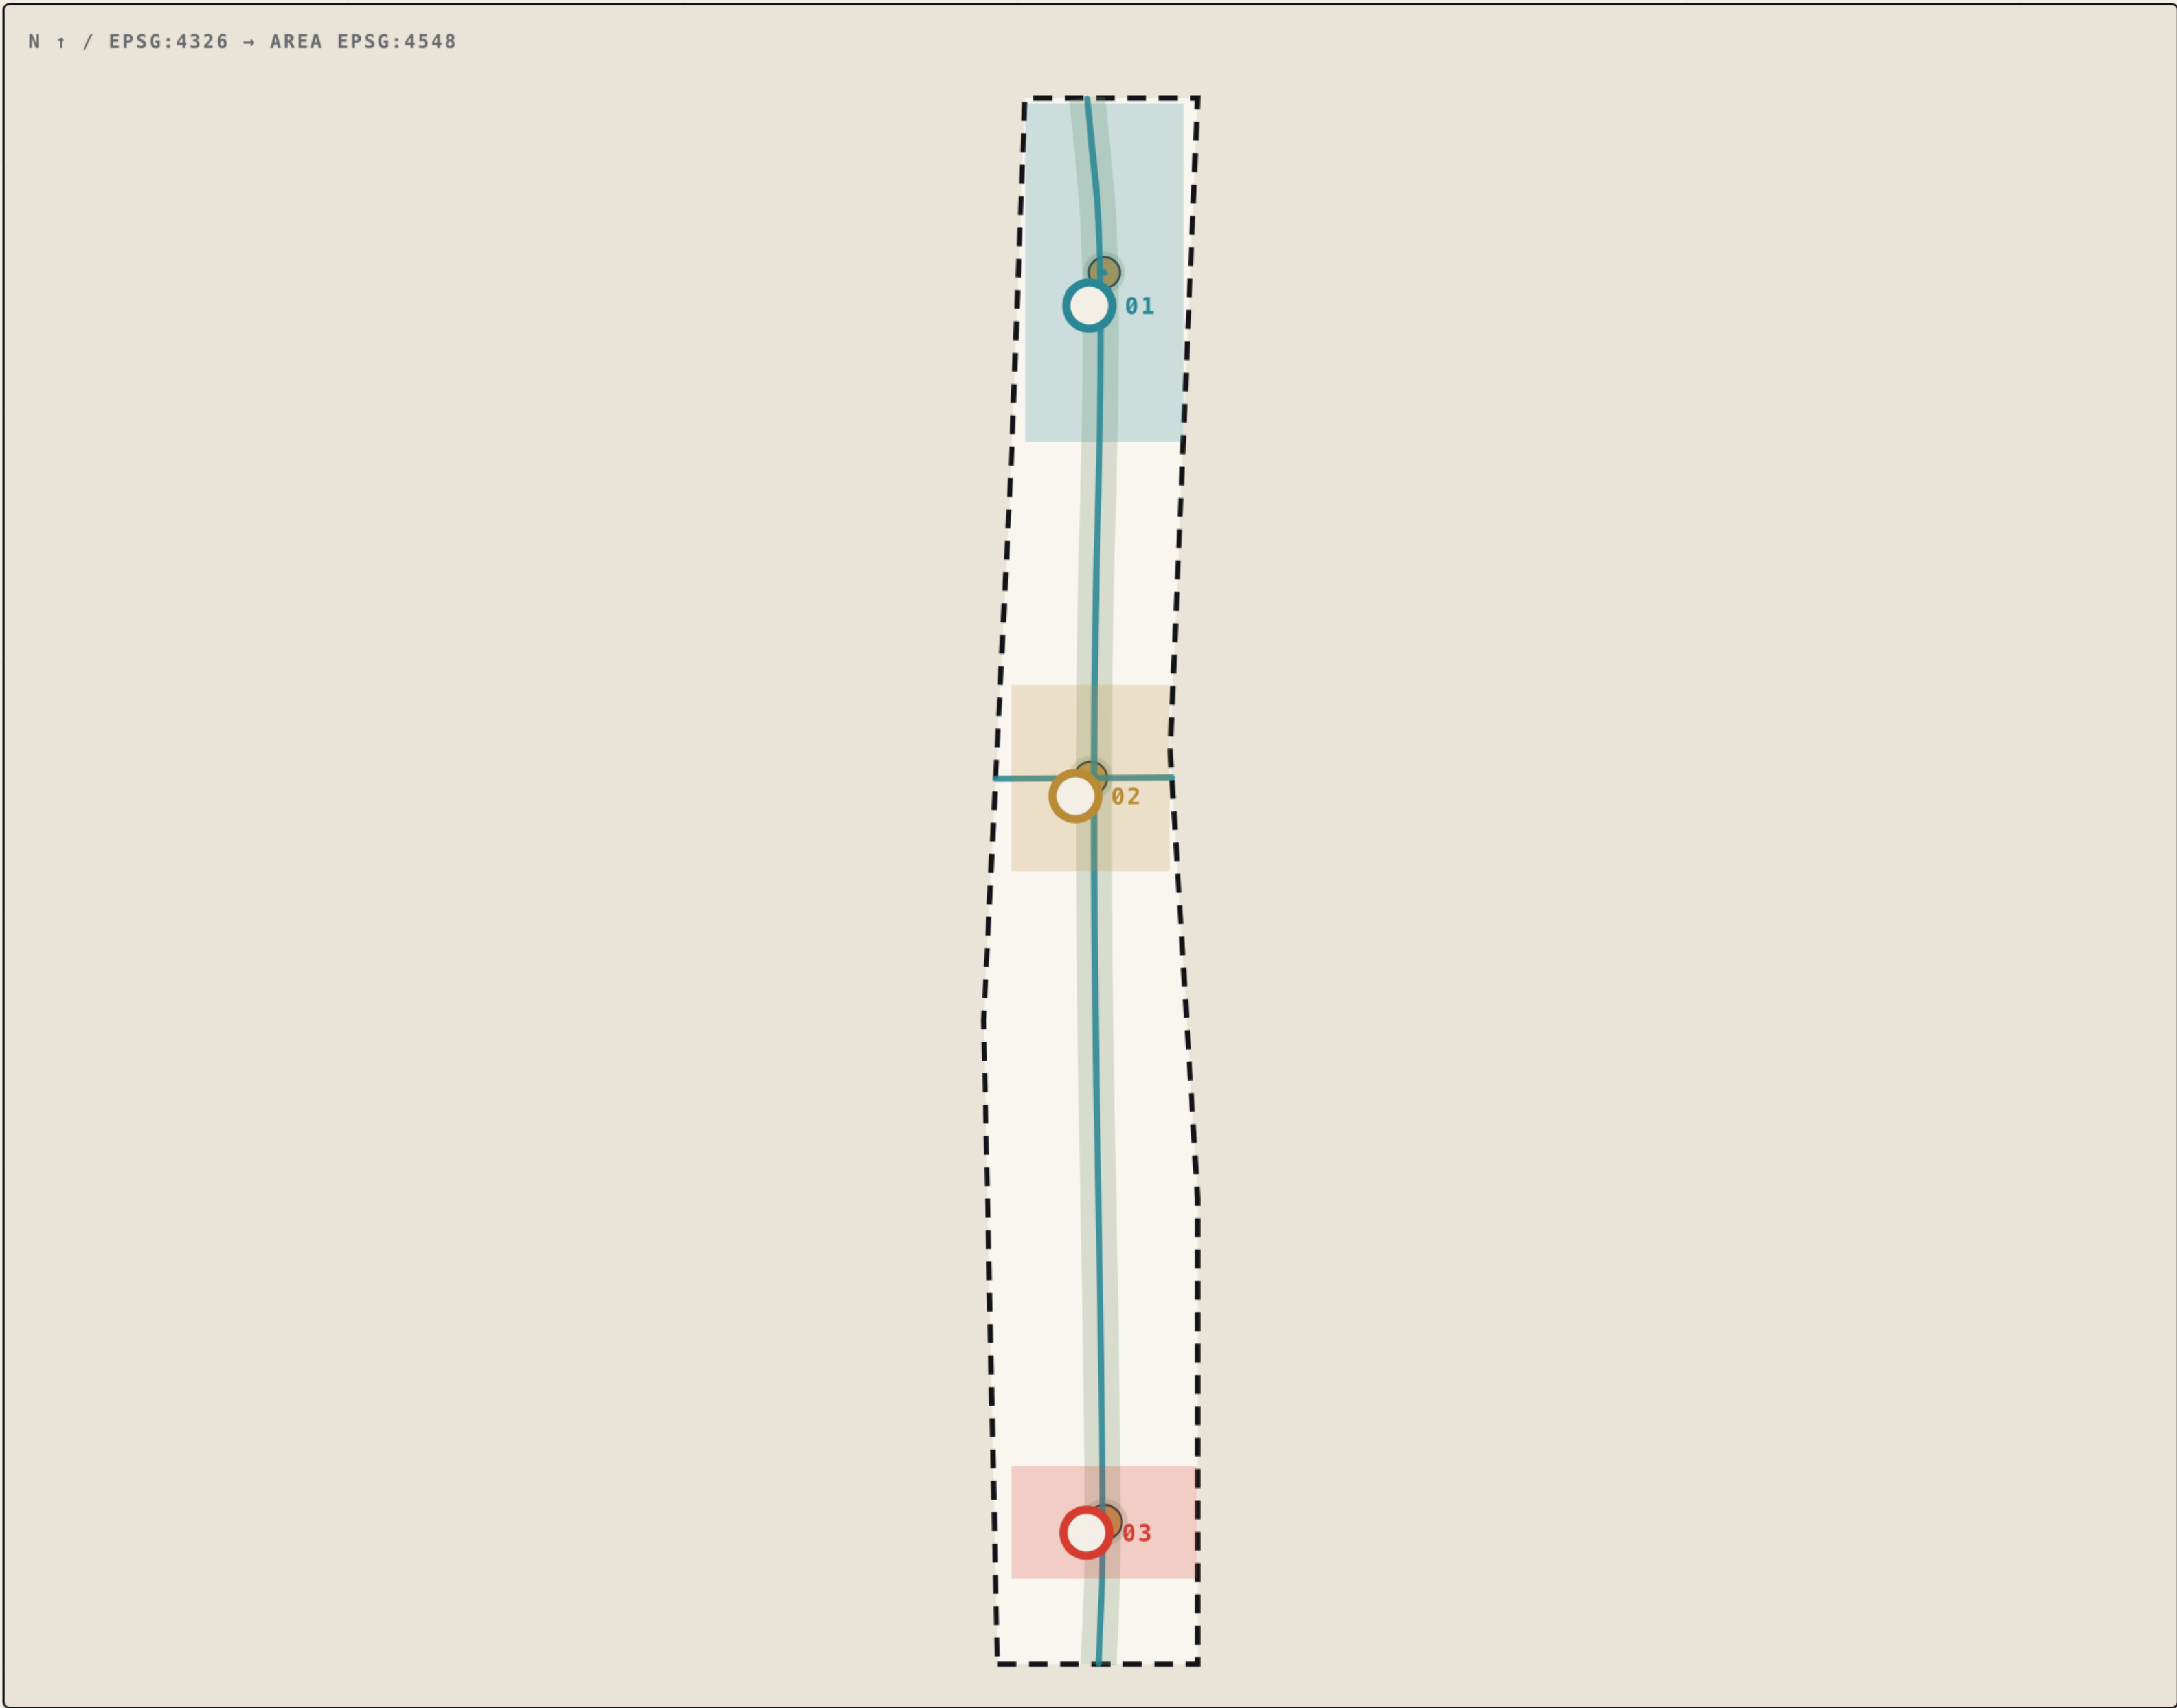

UTILITIES + PARKING

Requires road, rail-protection, and utility data

JZWS / FIG-04 / MOBILITY + BLUE-GREEN

MAKE SLOW MOBILITY A REPEATABLE PUBLIC PROTOCOL

The Question Line prioritizes walking, cycling, wheelchairs, and low-speed trials; blue-green space carries comfort and feedback.

NETWORK HIERARCHY

- WORLD QUESTION LINE | ~10.87 KM CONCEPTUAL NETWORK
- STATION LINKS | LAST KILOMETRE + RAIL GATEWAYS
- WING STITCHES | SERVICES + DAILY LIFE
- BLUE-GREEN COMFORT | SHADE + STORMWATER + REST

SIX DESIGN RULES

- 01 See the Question Line within five minutes of rail arrival
- 02 Continuous accessibility; no app as a gate
- 03 Timed, bounded low-speed trials with on-site safety
- 04 Minimum sensing; location processed on-device
- 05 Low-glare nights; negotiate noise rules with residents
- 06 No false precision for bridges, tunnels, entrances, or parking

PROVISIONAL / CONCEPTUAL / NON-STATUTORY

Sources: roads / green_space / public_space GeoJSON; no road redline implied | FIG-04

01 / ARRIVE

RAIL ARRIVAL

Bring transfer thresholds into the civic journey

02 / WALK

CONTINUOUS WALKING

Audit accessibility, shade, and rest together

03 / OBSERVE

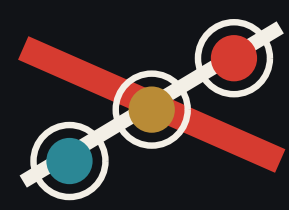

PUBLIC OBSERVATION

Testing is visible without invading bystander privacy

04 / STOP

STOP + TAKEOVER

Humans retain highest on-site authority

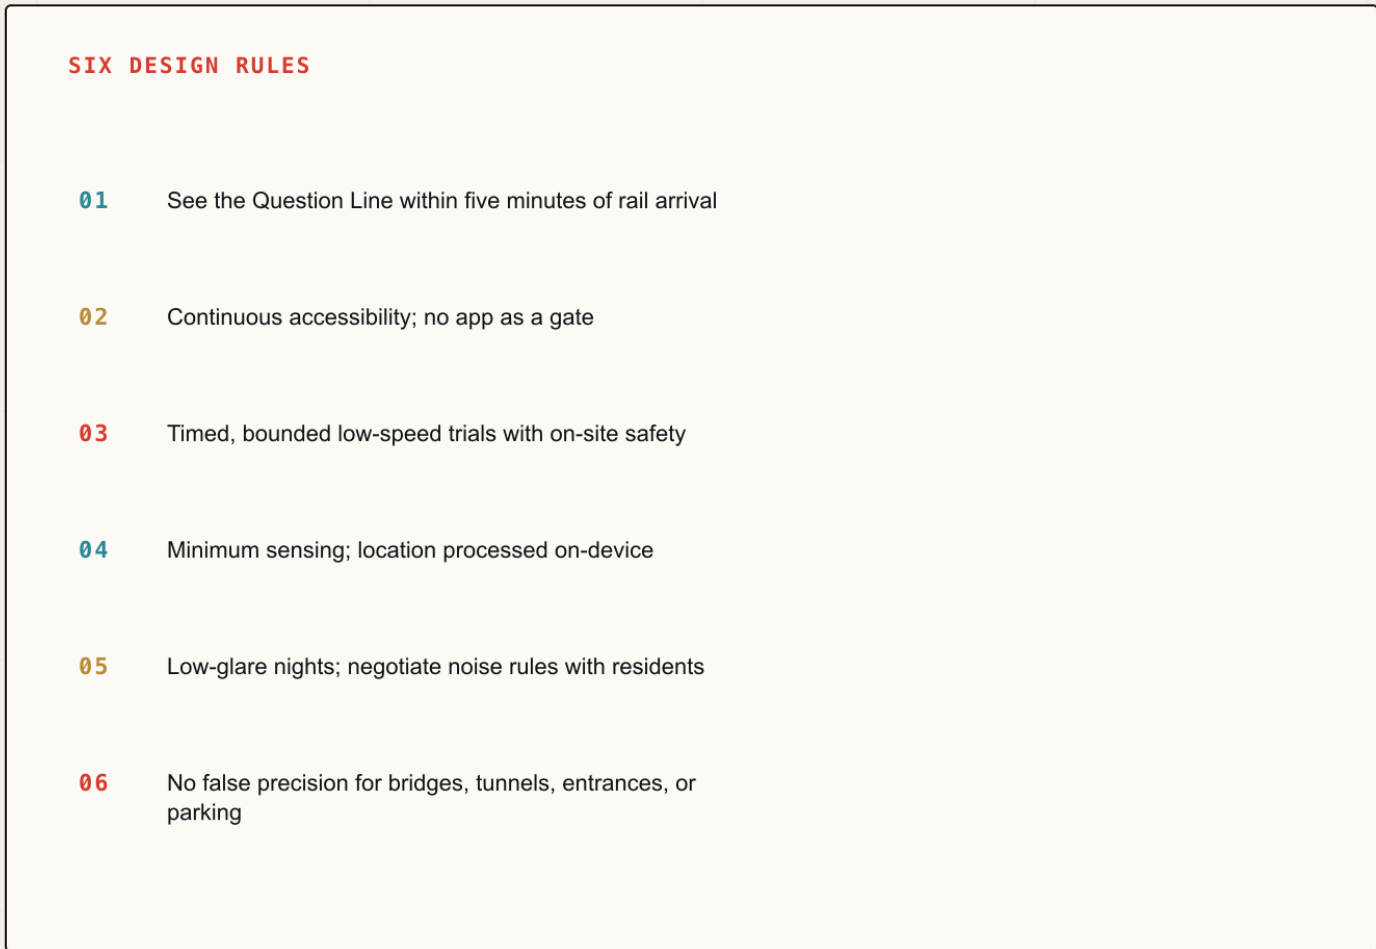

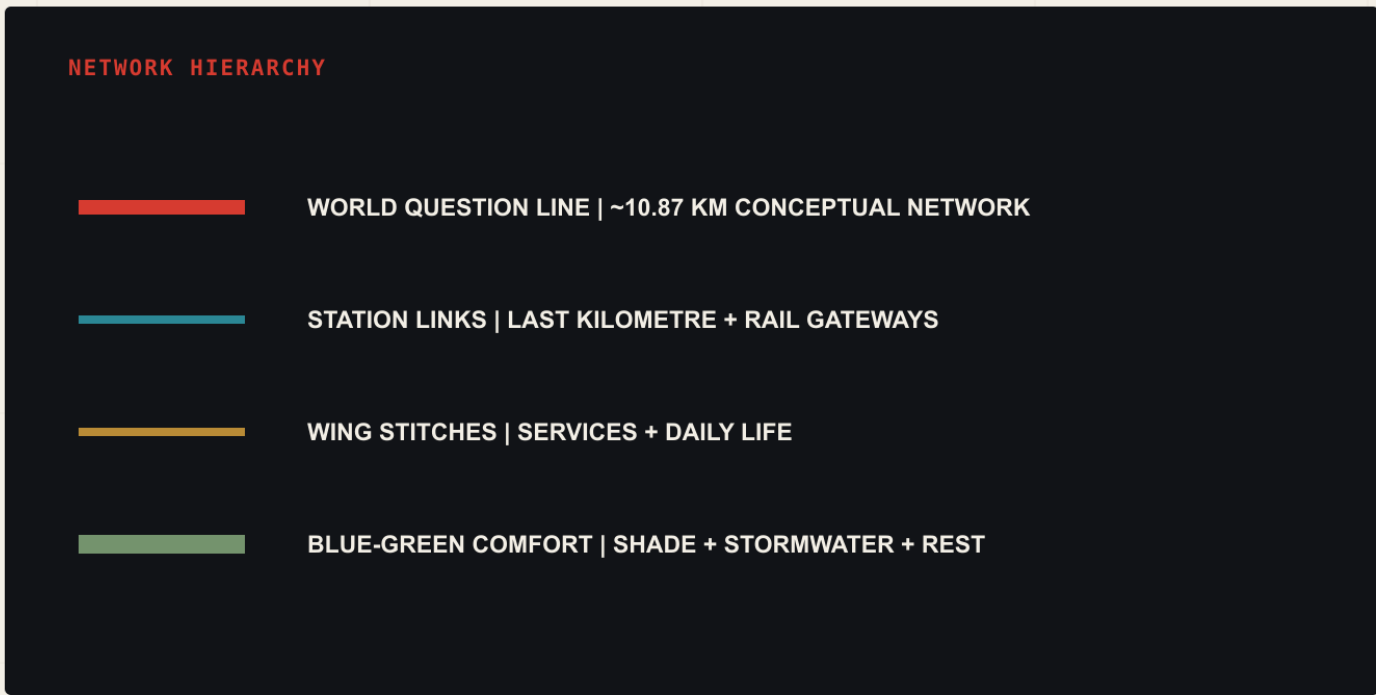

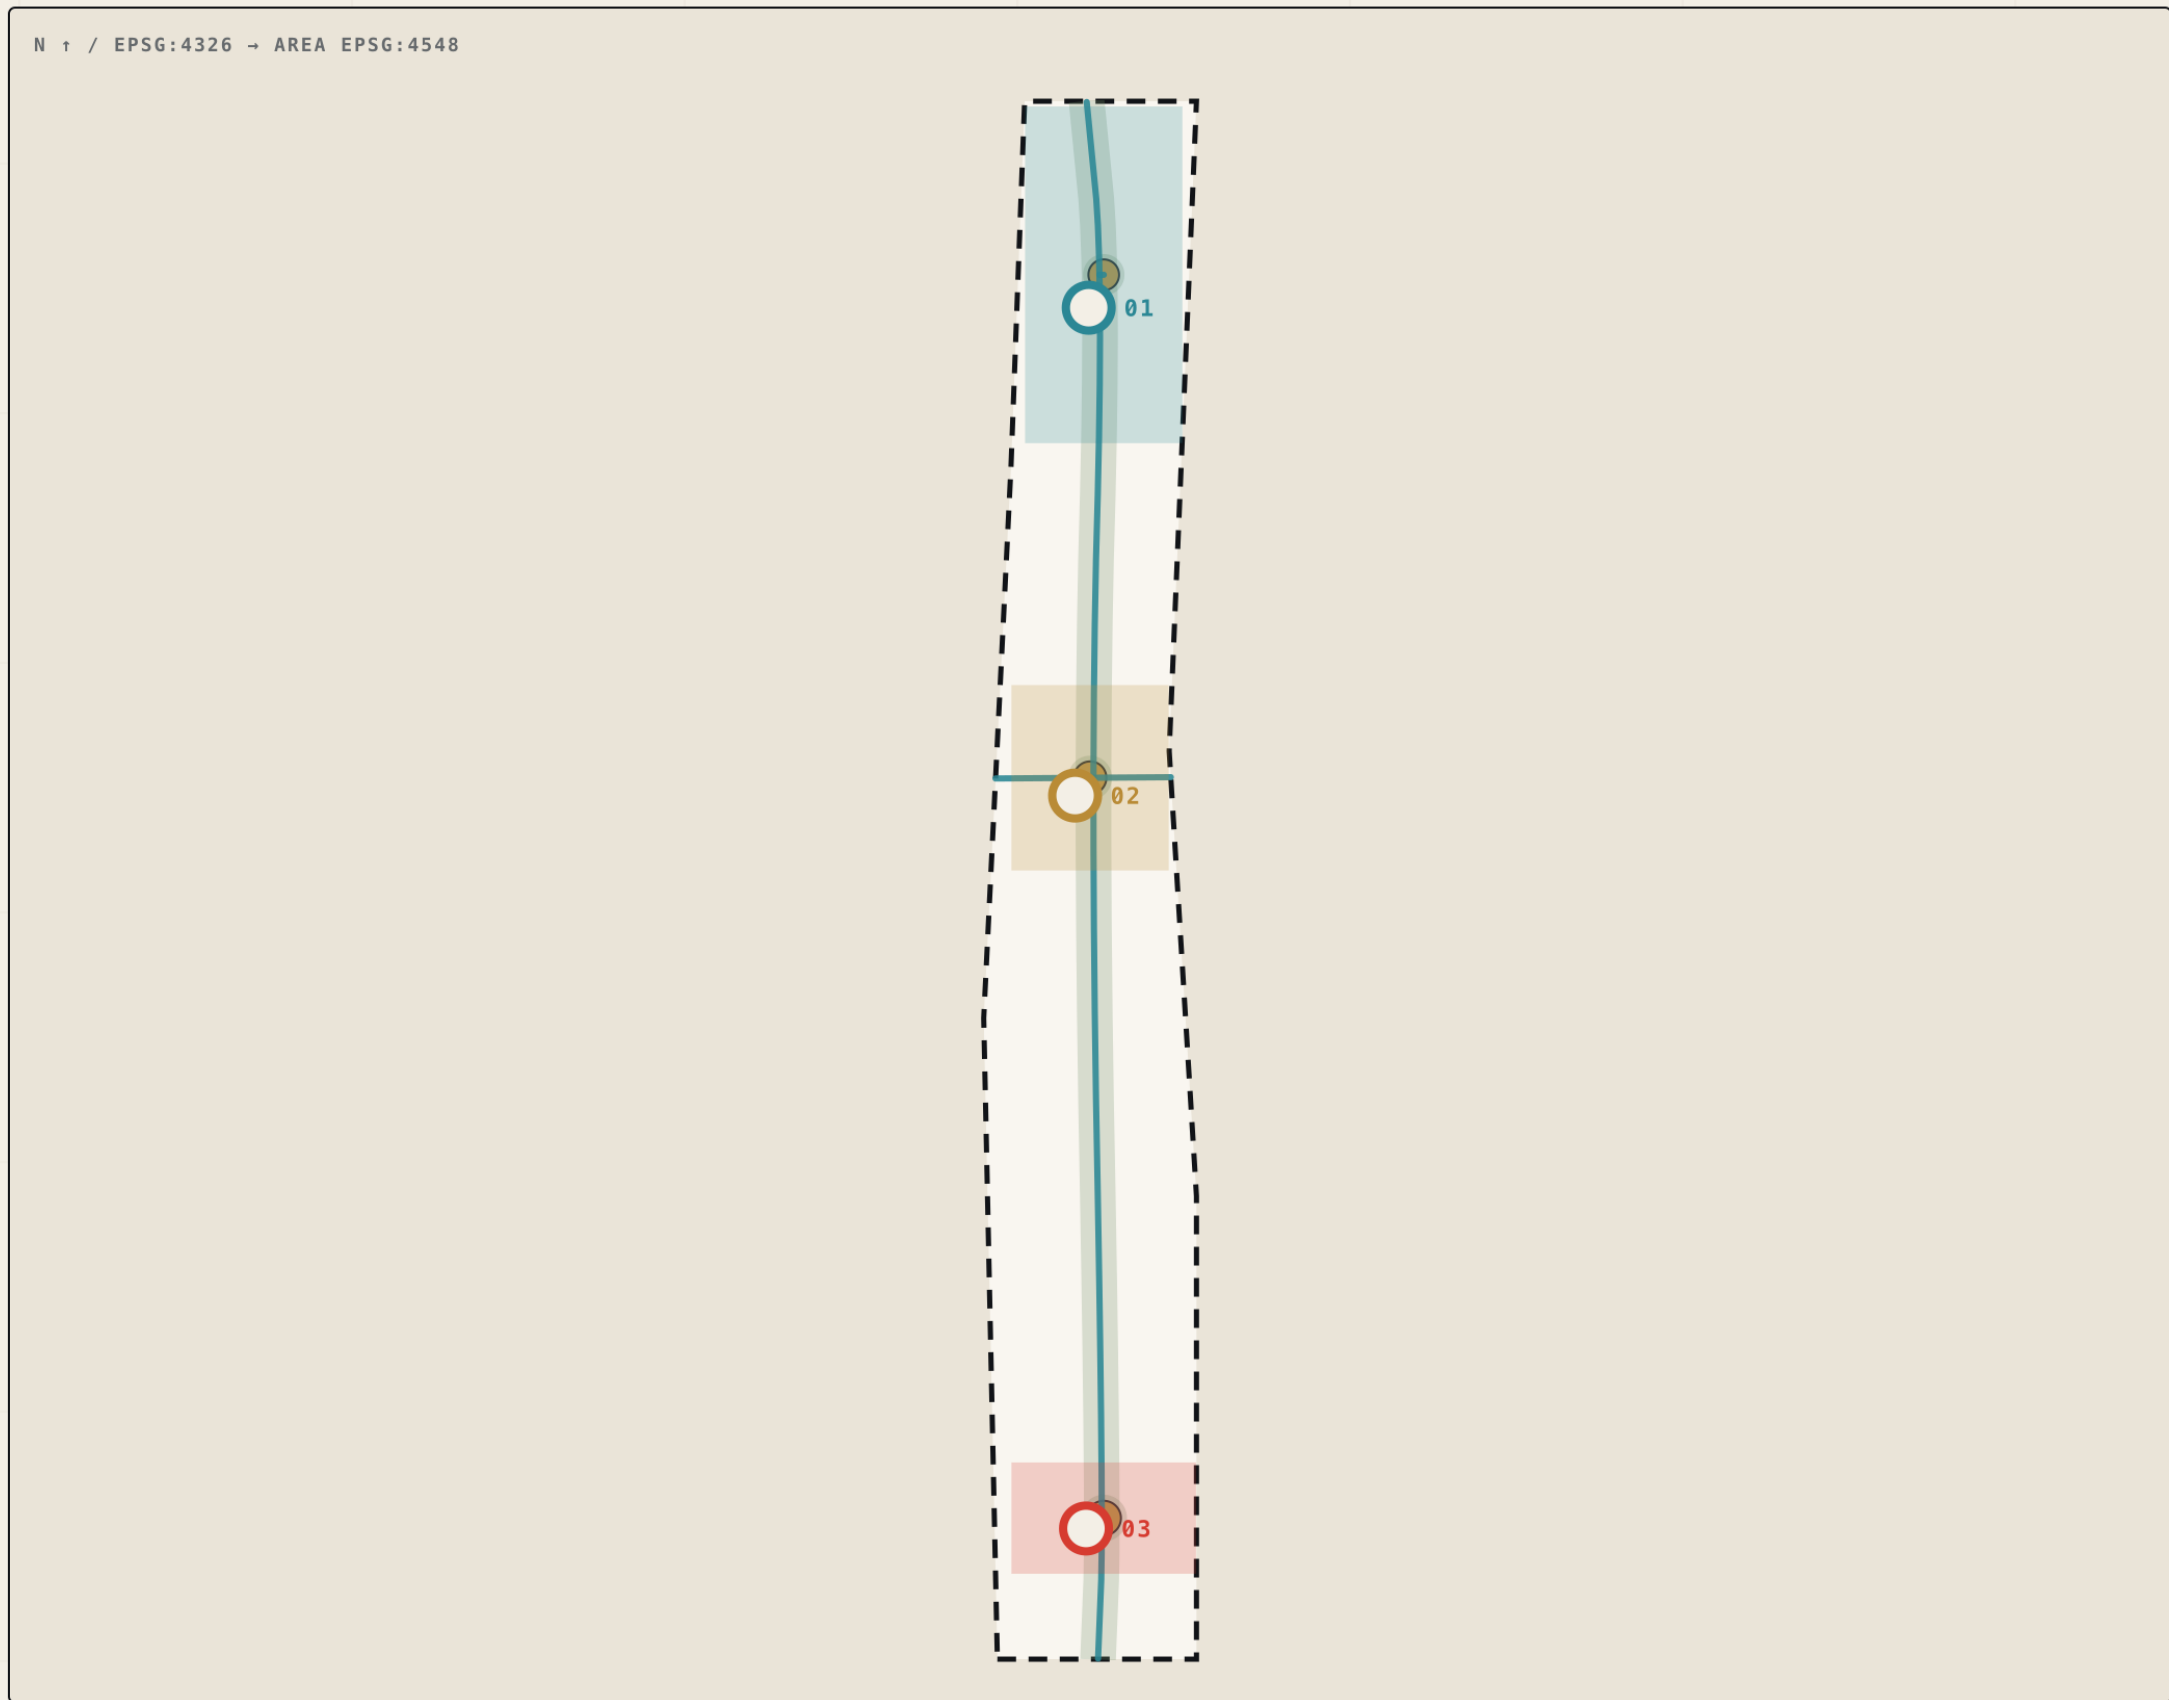

Heritage is not event scenery. It is a Railway Evidence grammar that organizes public space through provenance, version, failure, and correction.

JZWS / FIG-04 / MOBILITY + BLUE-GREEN

MAKE SLOW MOBILITY A REPEATABLE PUBLIC PROTOCOL

The Question Line prioritizes walking, cycling, wheelchairs, and low-speed trials; blue-green space carries comfort and feedback.

PROVISIONAL / CONCEPTUAL / NON-STATUTORY

Sources: roads / green_space / public_space GeoJSON; no road redline implied | FIG-04

18.06%

CONCEPTUAL GREEN RATIO

206.1 ha; recalculate after official boundary

5

CIVIC-INSTITUTION LANDMARKS

Question, evidence, deliberation, release, contribution

MINIMUM

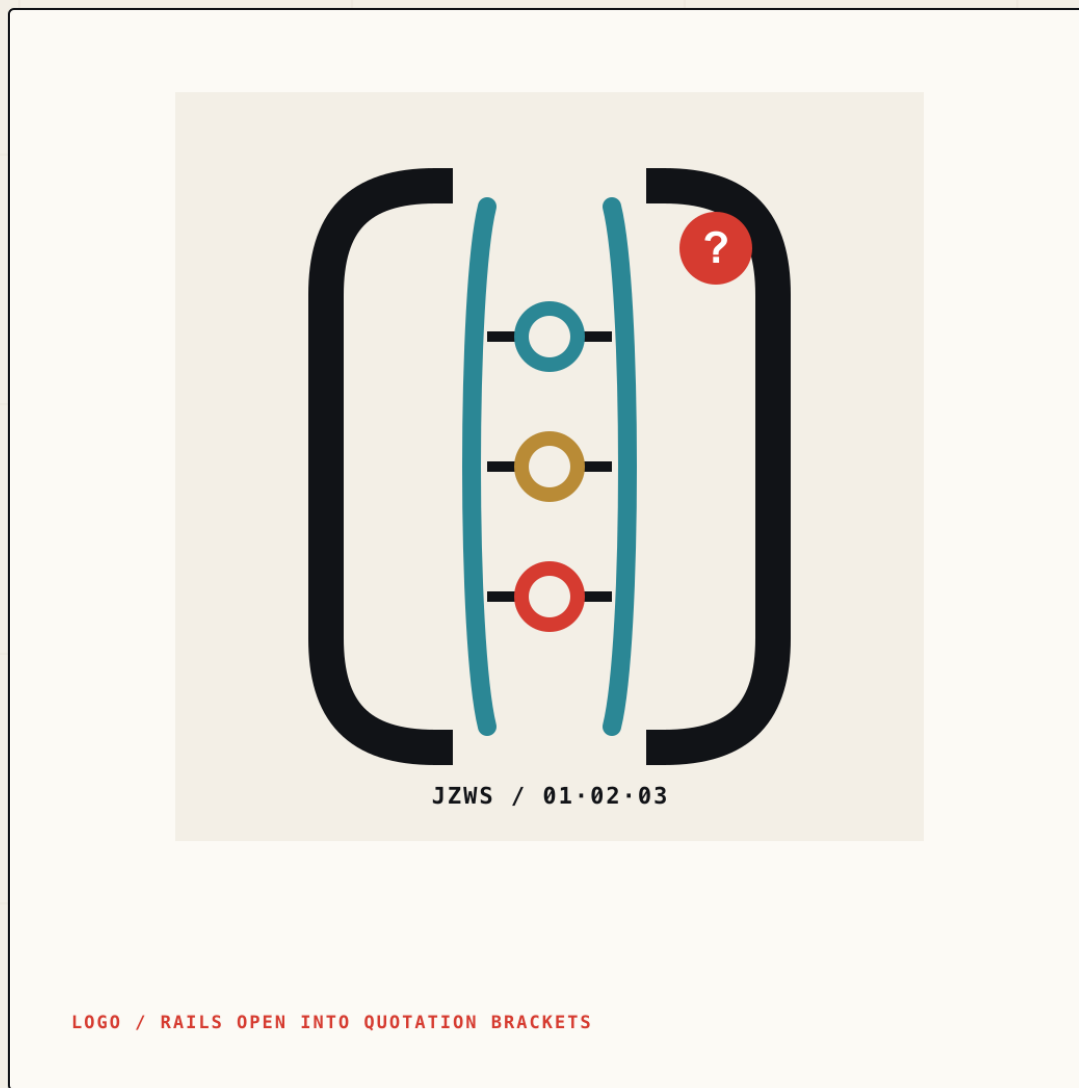

MINIMAL REVERSIBLE INTERVENTION

Survey first; demountable; useful when devices are off

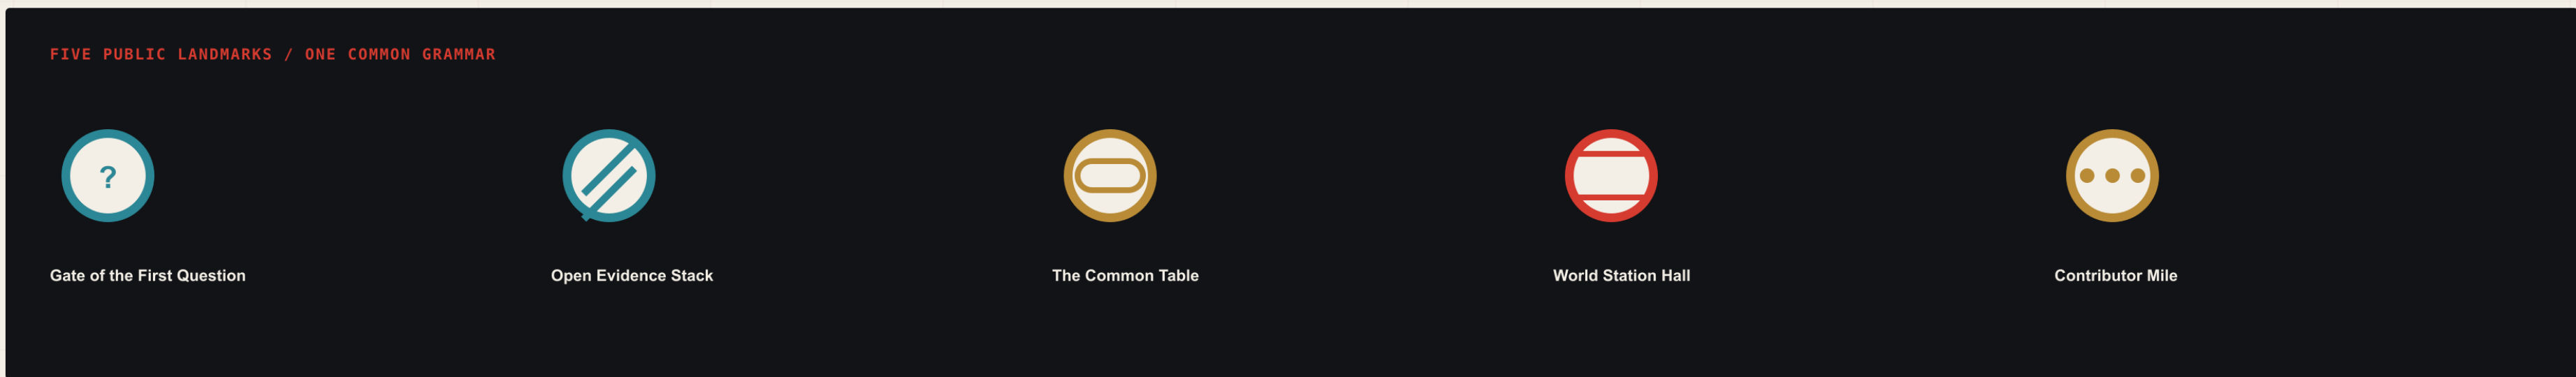

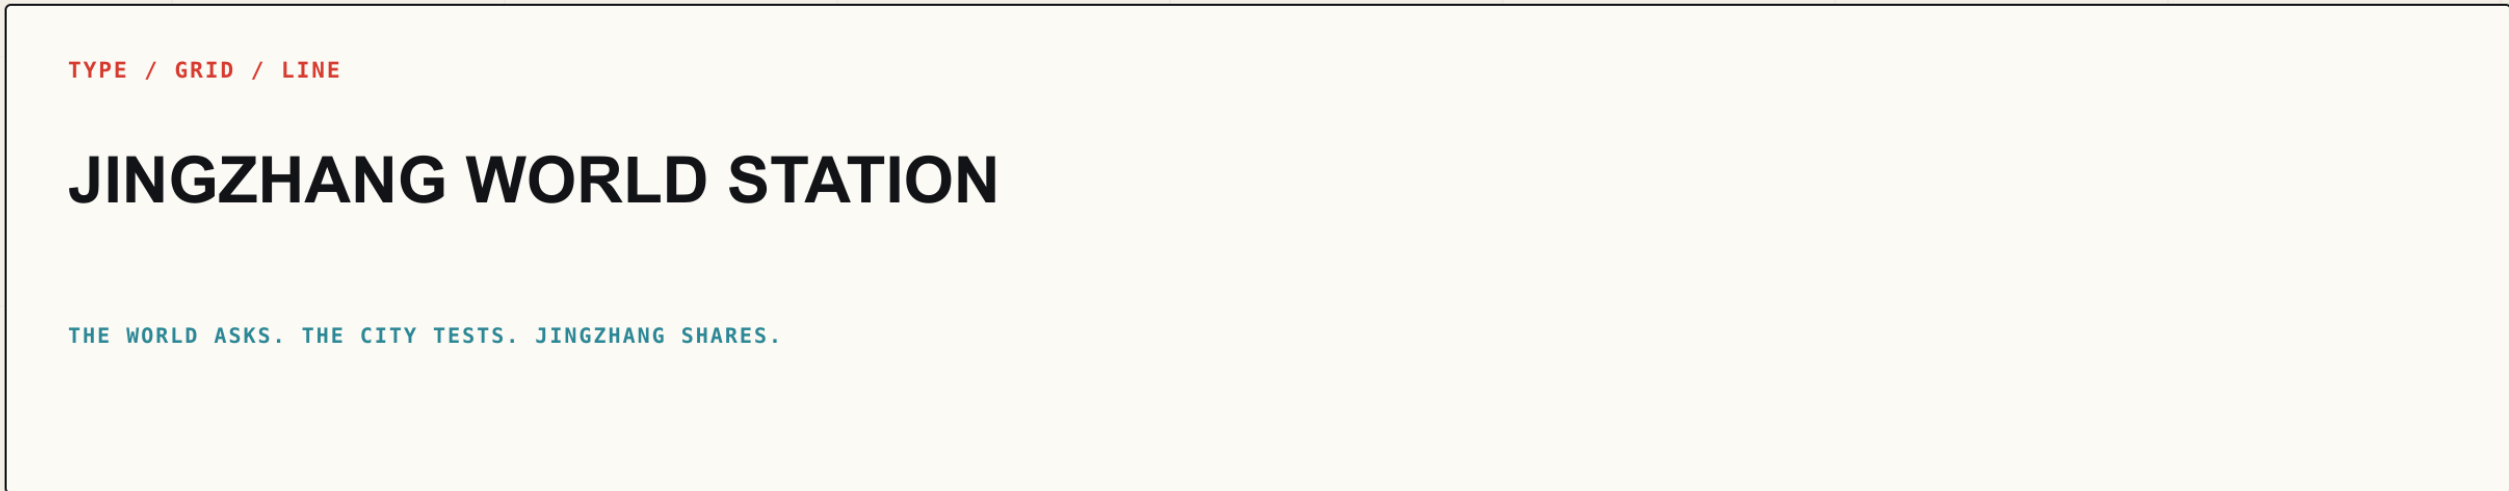

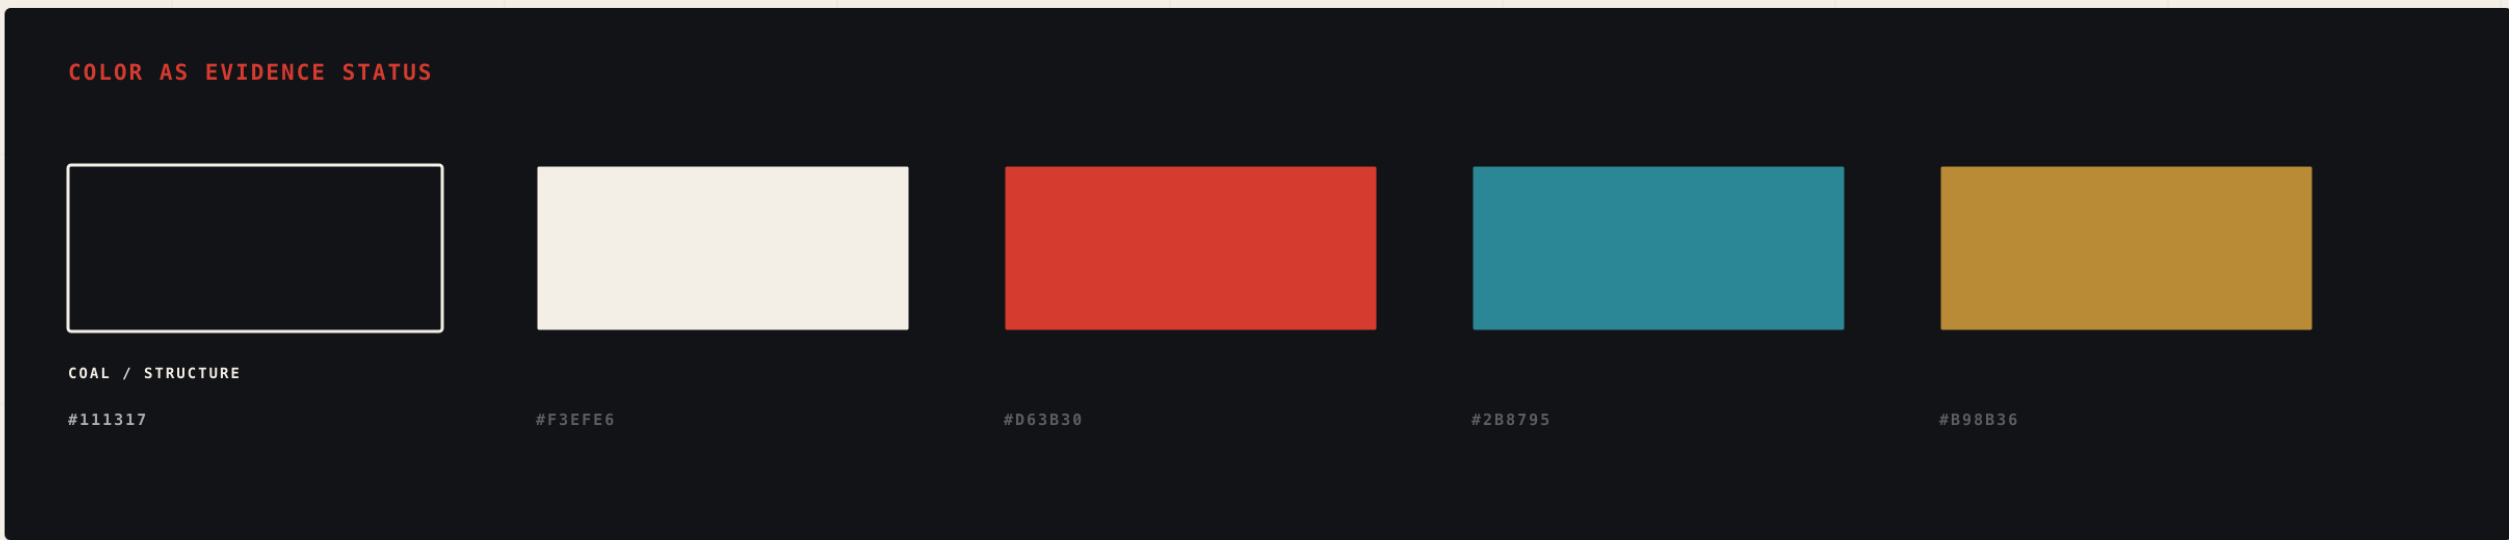

JZWS / FIG-09 / RAILWAY EVIDENCE SYSTEM

RAILWAY EVIDENCE: TIMETABLE × JOURNAL × DIPLOMATIC DOSSIER

The brand is not decoration; it keeps questions, risk, evidence, and participation legible at every scale.

LOGO / RAILS OPEN INTO QUOTATION BRACKETS

PROVISIONAL / CONCEPTUAL / NON-STATUTORY

Original visual system; no remote fonts, images, or third-party marks | FIG-09

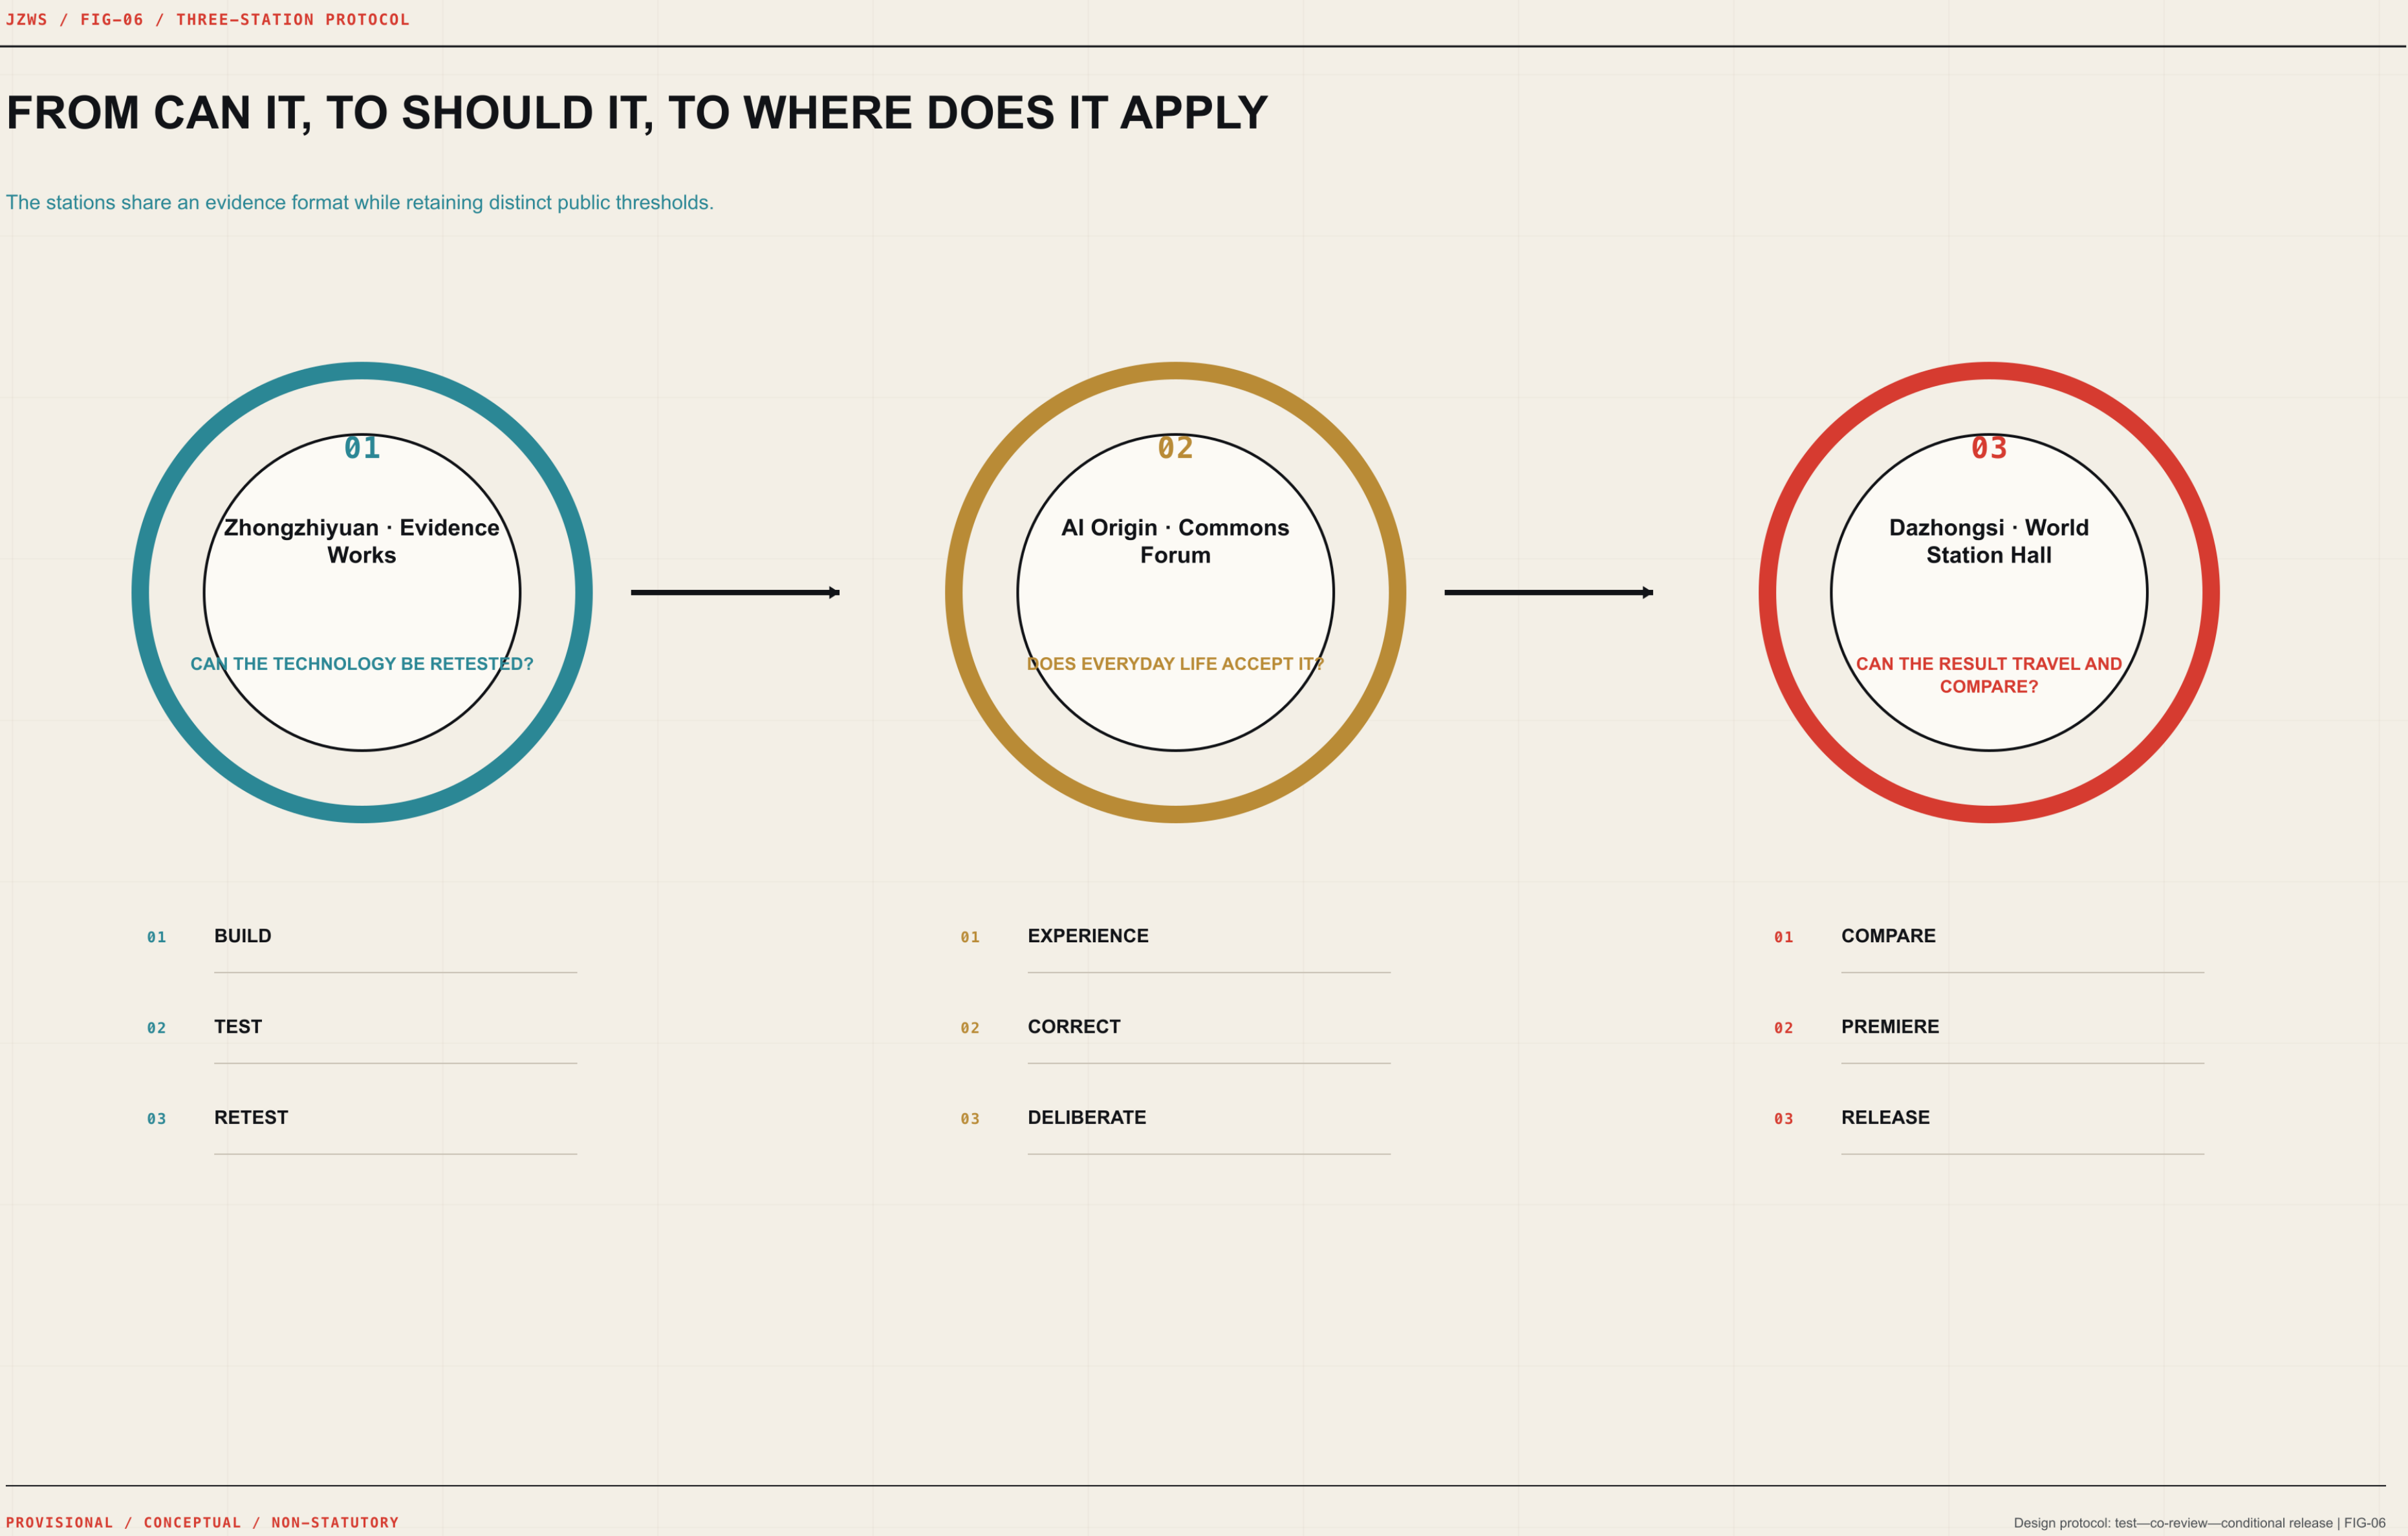

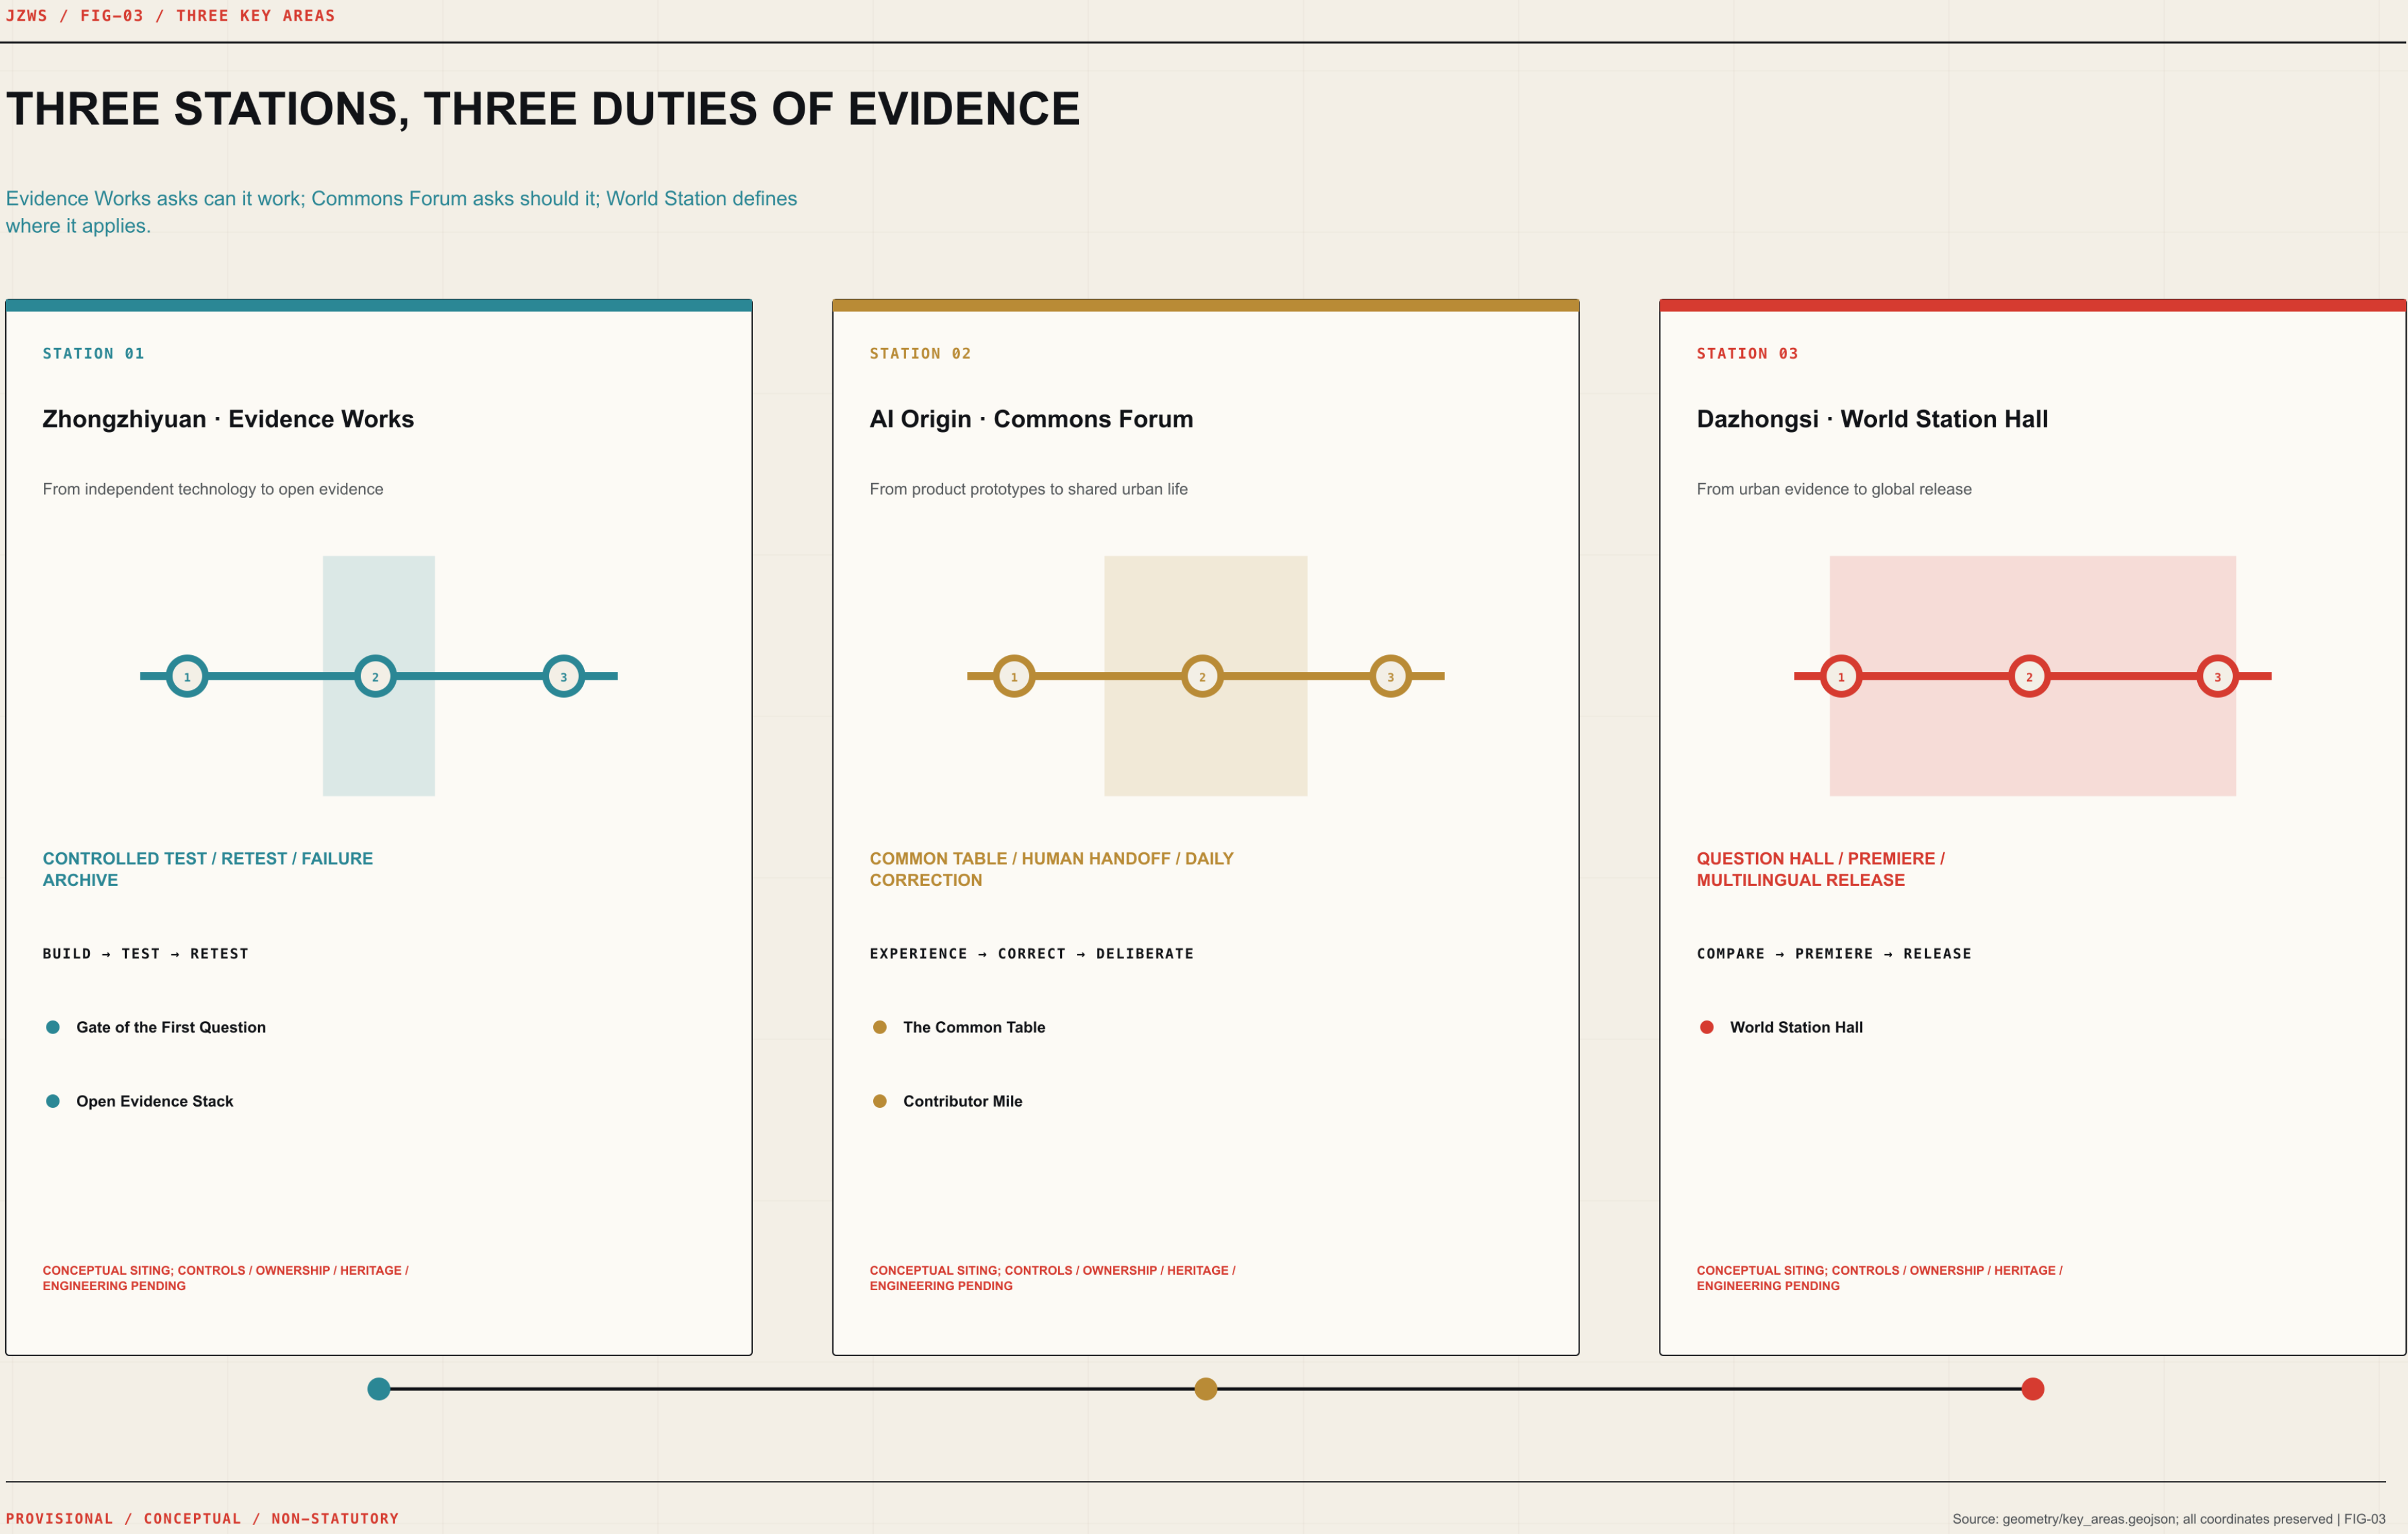

Three stations differ by public duty: capability becomes evidence, products become shared life, and urban evidence becomes global release.

experience · correct · deliberate

72.0 ha
DAZHONGSI REFERENCE
Coordinate offset remains pending

Twelve questions share one protocol: space and operation, data boundary, human review, stop and rollback, and the Evidence Passport.

12
ANNUAL CITY QUESTIONS
Three are industry testing and validation

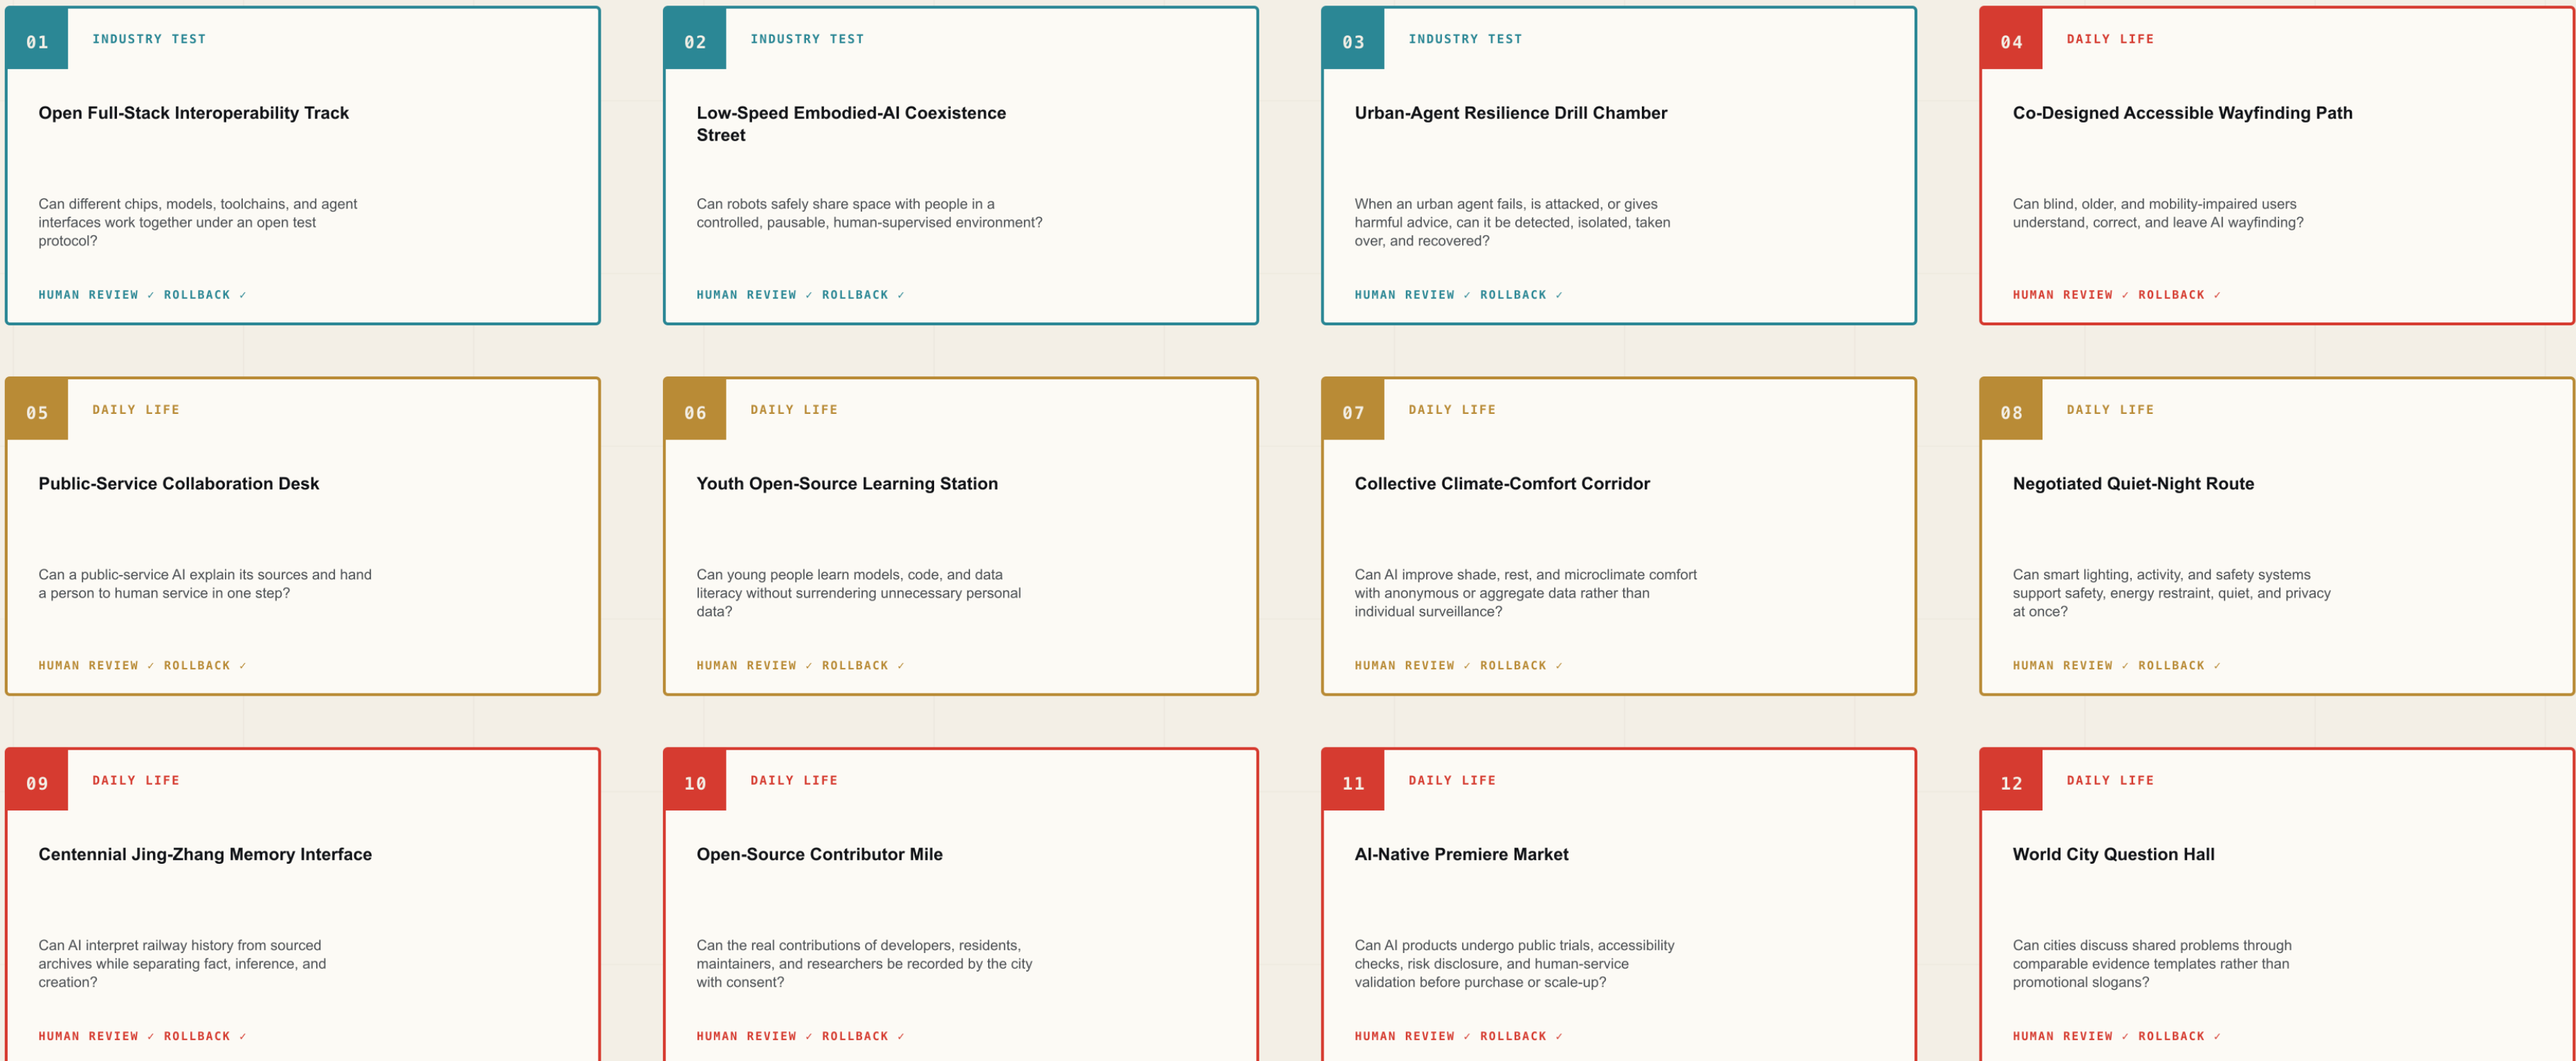

100%
REVIEW + ROLLBACK
No final decision is delegated to automation

4
OPERATING SEASONS
question → prototype → trial → release

JZWS / FIG-07 / TWELVE-QUESTION ATLAS

TWELVE QUESTIONS: HOW A CITY TESTS AI WITH BOUNDARIES

The first three test industry capability; nine test public life. Every question has Human Review and rollback.

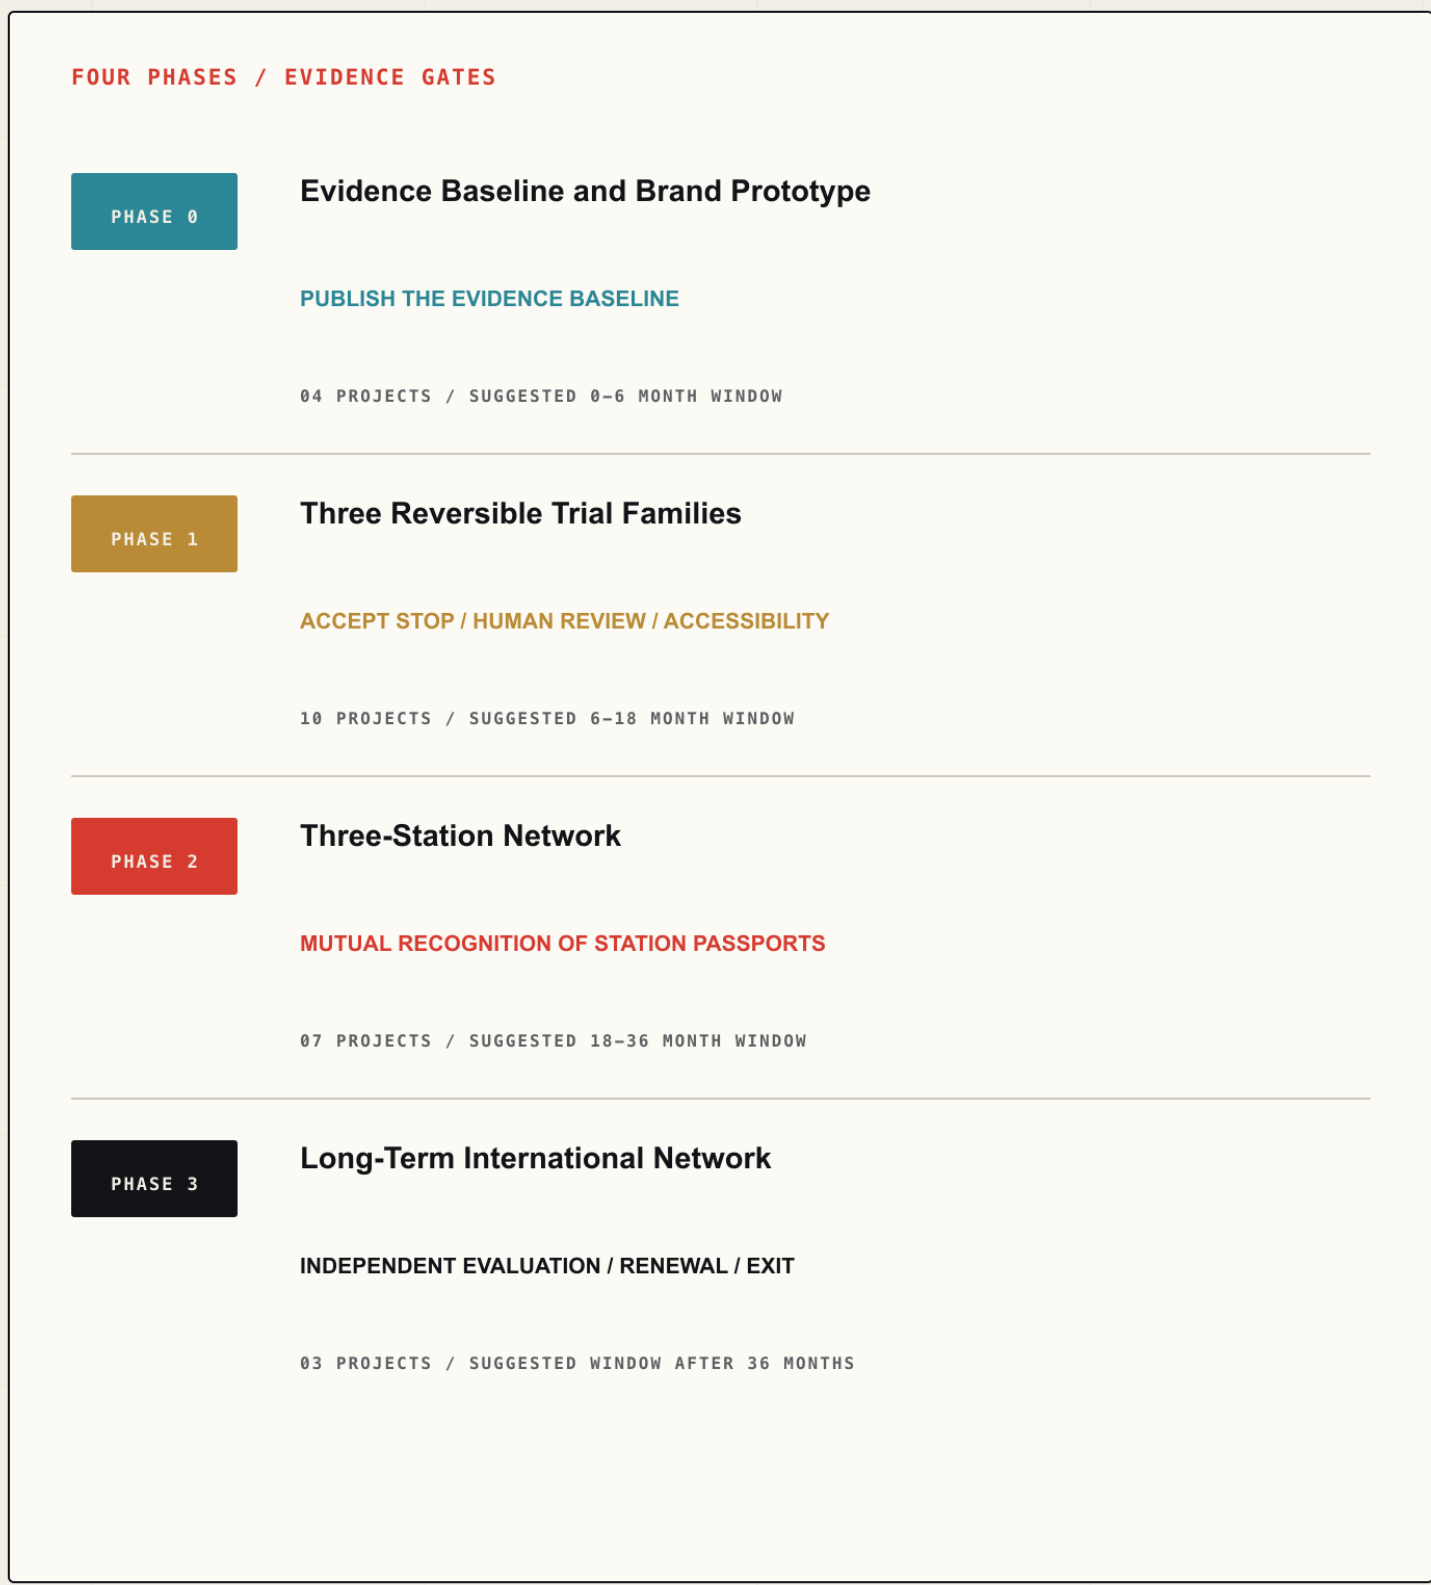

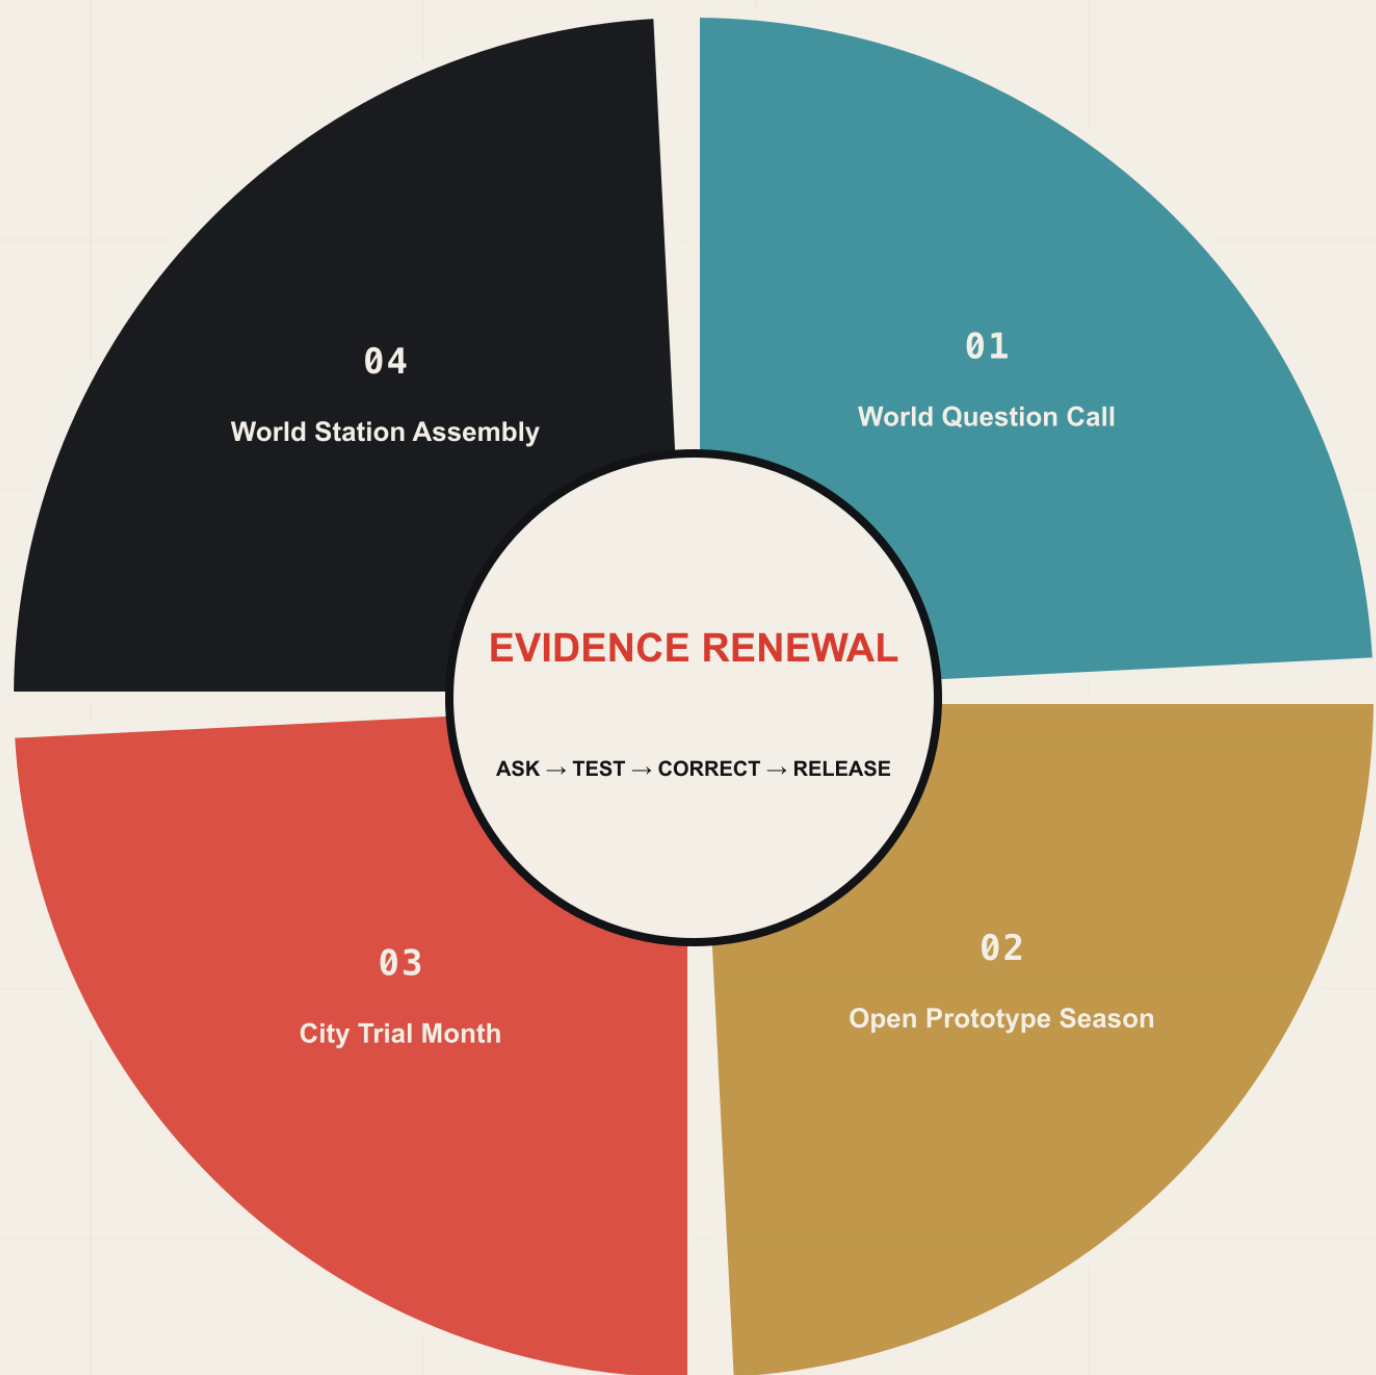

PROVISIONAL / CONCEPTUAL / NON-STATUTORY

Source: visualassets/design-data.json; 12/12 scenarios include review and rollback | FIG-07

JZWS / FIG-08 / FOUR-SEASON OPERATIONS

TURN ONE CALL INTO AN ANNUAL URBAN INSTITUTION

Every season produces handoff evidence; every phase advances by gates, not dates alone.

PROVISIONAL / CONCEPTUAL / NON-STATUTORY

Source: four-season operations and 24 conceptual projects; windows are not commitments | FIG-08

Credibility comes from recalculation and disciplined blanks: known values return to geometry and formulas; unknowns wait for official data and professional confirmation.

JZWS / FIG-05 / METRICS + EVIDENCE

AN EXPLICIT UNKNOWN IS BETTER THAN FALSE PRECISION

Spatial values recalculate, structures count, statutory values are never invented; every trial carries an Evidence Passport.
