26 NINE ASSUMPTIONS AND THE NEXT SURVEY

27 COMPLIANCE, AGENT DISCLOSURE, AND RIGHTS

28 THE WORLD ASKS HERE

EVIDENCE BEFORE FORM

The evidence boundary is itself a designed deliverable: official material defines the task, repository geometry enables provisional recalculation, and design judgement stays reversible.

01 / KNOWN

Known: brief, three scales, three key areas, provisional coordinates, professional standards

Seventeen sources declare use, rights, and limitations.

02 / UNKNOWN

Unknown: official redlines, statutory controls, ownership, utilities, parking, cost, and heritage inventory

Every missing item remains unknown; false precision is prohibited.

03 / DECISION

Decision: one line, two wings, three stations, twelve questions, four seasons, evidence passports

Judgements are testable, reviewable, pausable, and versioned.

17

Machine-readable and traceable

24

PROJECTS

Machine-readable and traceable

THREE SCALES, ONE JUDGEMENT

A / REGION

COORDINATED RESEARCH AREA

Upgrade factor concentration into global agenda-setting and cross-district validation capacity.

B / CORRIDOR

OVERALL DESIGN AREA

Use the World Question Line to connect two wings and three stations as a walkable evidence journey.

C / STATIONS

KEY-AREA DETAILED DESIGN

Implement three distinct stations through thresholds, spatial types, and civic duties.

THREE POSITIONS

- Centennial Jing-Zhang Cultural Belt
- Urban AI Life Experience Belt
- AI Fusion Innovation Belt

FIVE FUNCTIONS

- Full-Stack Independent AI Innovation System
- World-Class AI Innovation Ecosystem
- New Paradigm of AI-Enabled Scenarios
- Intelligent and Vibrant AI City
- Global Voice in AI Governance

TWELVE QUESTIONS, NOT TWELVE SHOWS

Scenarios do not perform how ‘smart’ AI is. They admit urban problems into bounded, pausable, human-reviewed public testing.

Q01

Open Full-Stack Interoperability Track

Can different chips, models, toolchains, and agent interfaces work together under an open test protocol?

Q02

Low-Speed Embodied-AI Coexistence Street

Can robots safely share space with people in a controlled, pausable, human-supervised environment?

Q03

Urban-Agent Resilience Drill Chamber

When an urban agent fails, is attacked, or gives harmful advice, can it be detected, isolated, taken over, and recovered?

Q04

Co-Designed Accessible Wayfinding Path

Can blind, older, and mobility-impaired users understand, correct, and leave AI wayfinding?

Q05

Public-Service Collaboration Desk

Can a public-service AI explain its sources and hand a person to human service in one step?

Q06

Youth Open-Source Learning Station

Can young people learn models, code, and data literacy without surrendering unnecessary personal data?

Q07

Collective Climate-Comfort Corridor

Can AI improve shade, rest, and microclimate comfort with anonymous or aggregate data rather than individual surveillance?

Q08

Negotiated Quiet-Night Route

Can smart lighting, activity, and safety systems support safety, energy restraint, quiet, and privacy at once?

Q09

Centennial Jing-Zhang Memory Interface

Can AI interpret railway history from sourced archives while separating fact, inference, and creation?

Q10

Open-Source Contributor Mile

Can the real contributions of developers, residents, maintainers, and researchers be recorded by the city with consent?

Q11

AI-Native Premiere Market

Can AI products undergo public trials, accessibility checks, risk disclosure, and human-service validation before purchase or scale-up?

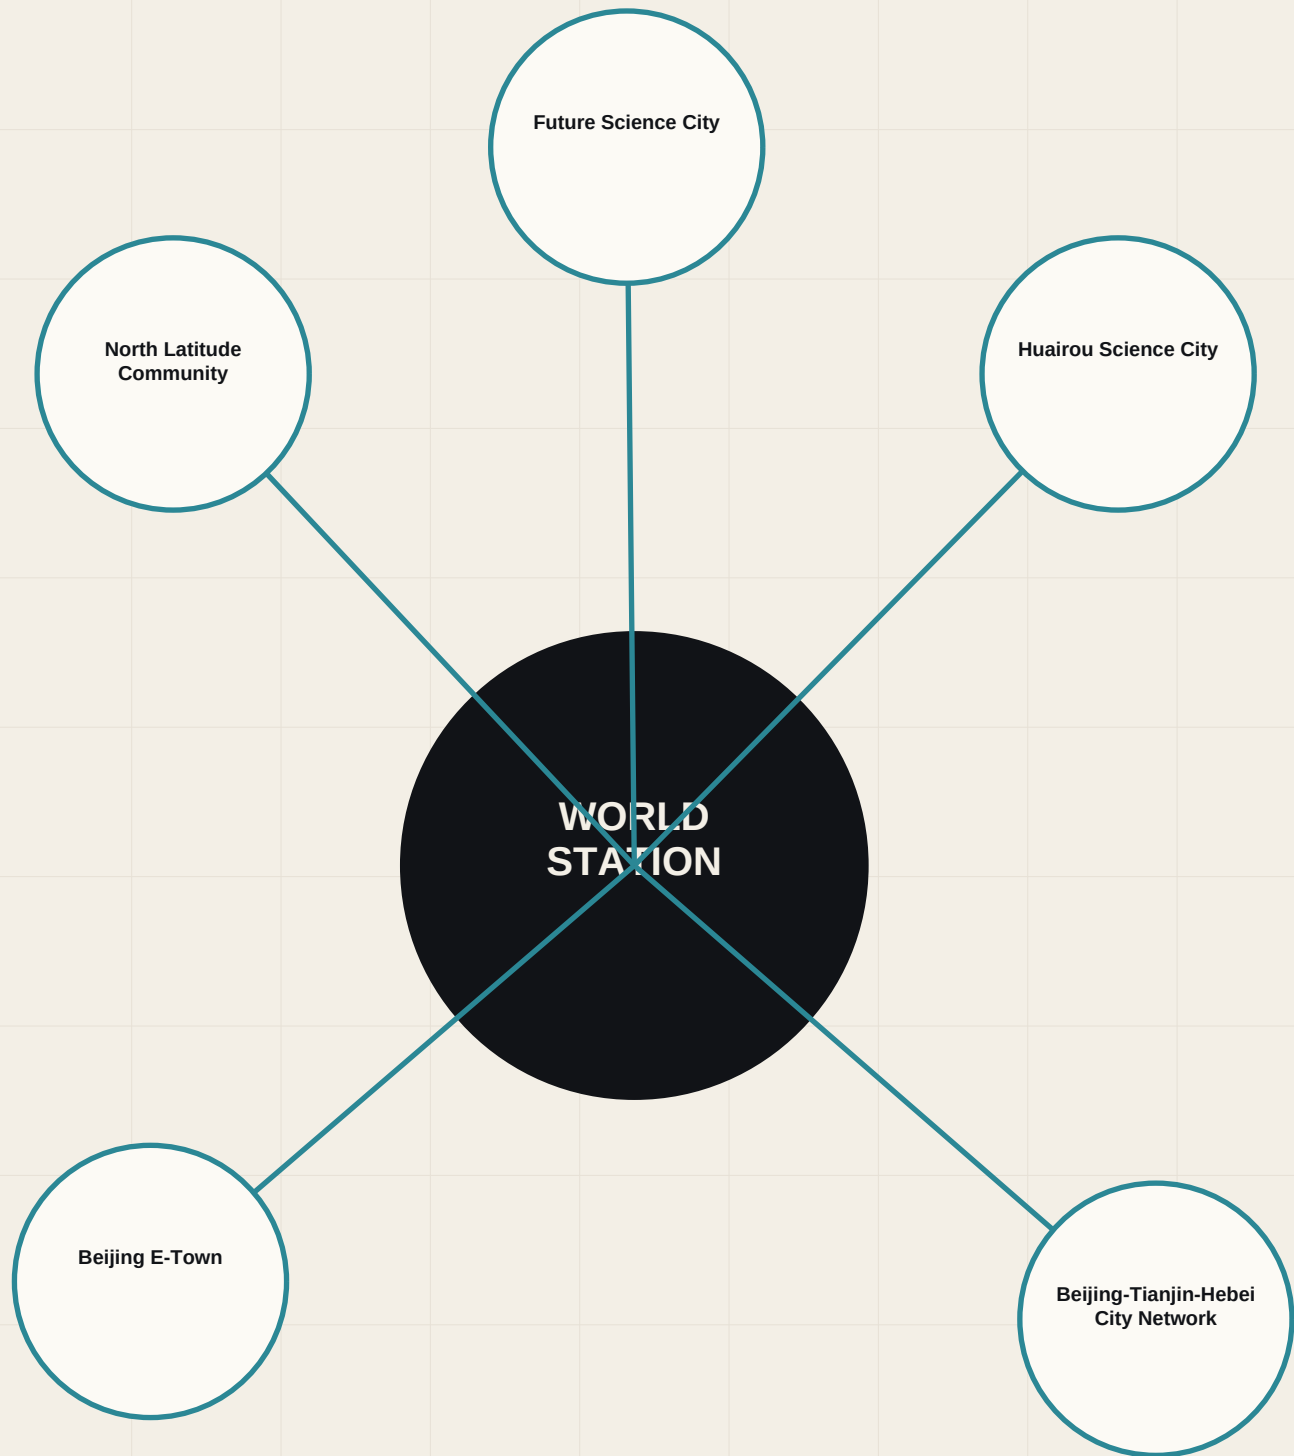

Q12

World City Question Hall

Can cities discuss shared problems through comparable evidence templates rather than promotional slogans?

FROM REGIONAL INPUTS TO GLOBAL AGENDA CAPACITY

Regional coordination is not generic ‘linkage’; it exchanges questions, testing methods, evidence formats, and talent pathways.

EIGHT INNOVATION INPUTS

INPUT 01 Land Inventory and reuse lawful accessible existing space	INPUT 02 Space Reversible prototypes, shared testing, and public ground floors
INPUT 03 Industry Organize cross-sector testing around world-city questions	INPUT 04 Capital Small prototypes, evidence-led follow-on funding, and staged exit
INPUT 05 Talent Question residencies, developer communities, and user co-design	INPUT 06 Compute Task-based access with resource and energy boundaries recorded
INPUT 07 Data Provenance, minimization, tiered access, and exit	INPUT 08 Scenario Access Open call, risk screening, bounded trials, and review

FIGURE 01 / STRUCTURED INTERPRETATION

ONE WORLD QUESTION LINE

Provisional geometry recedes into the background; the World Question Line, two wings, three stations, and cross-district evidence journey lead the composition.

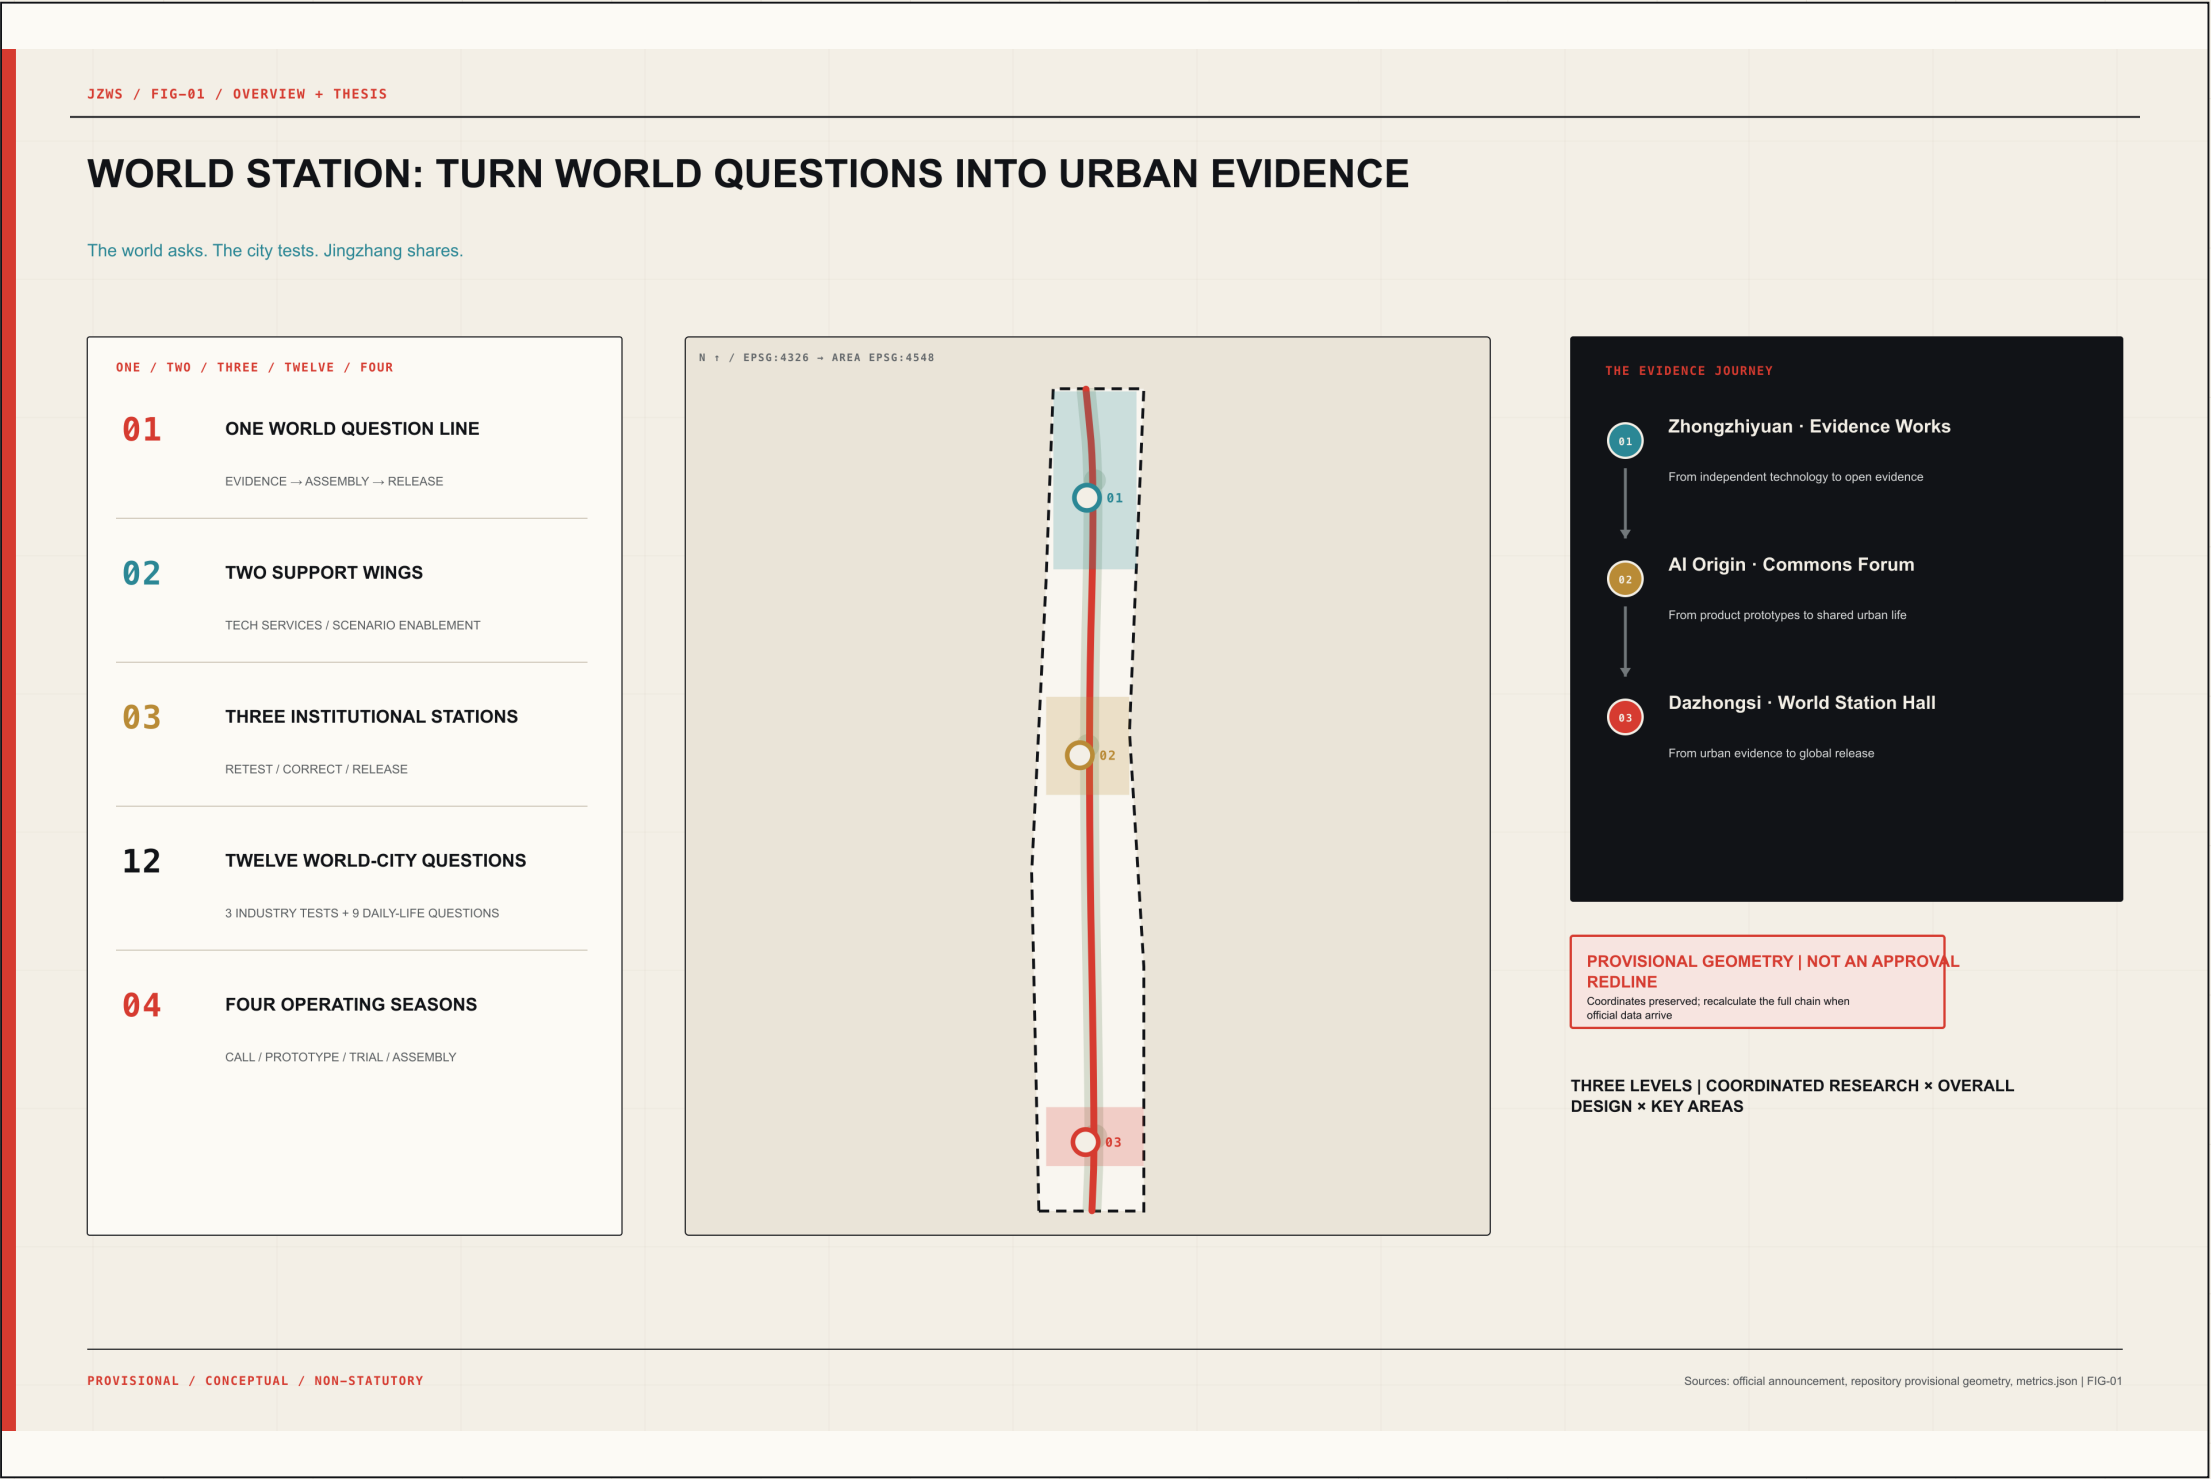

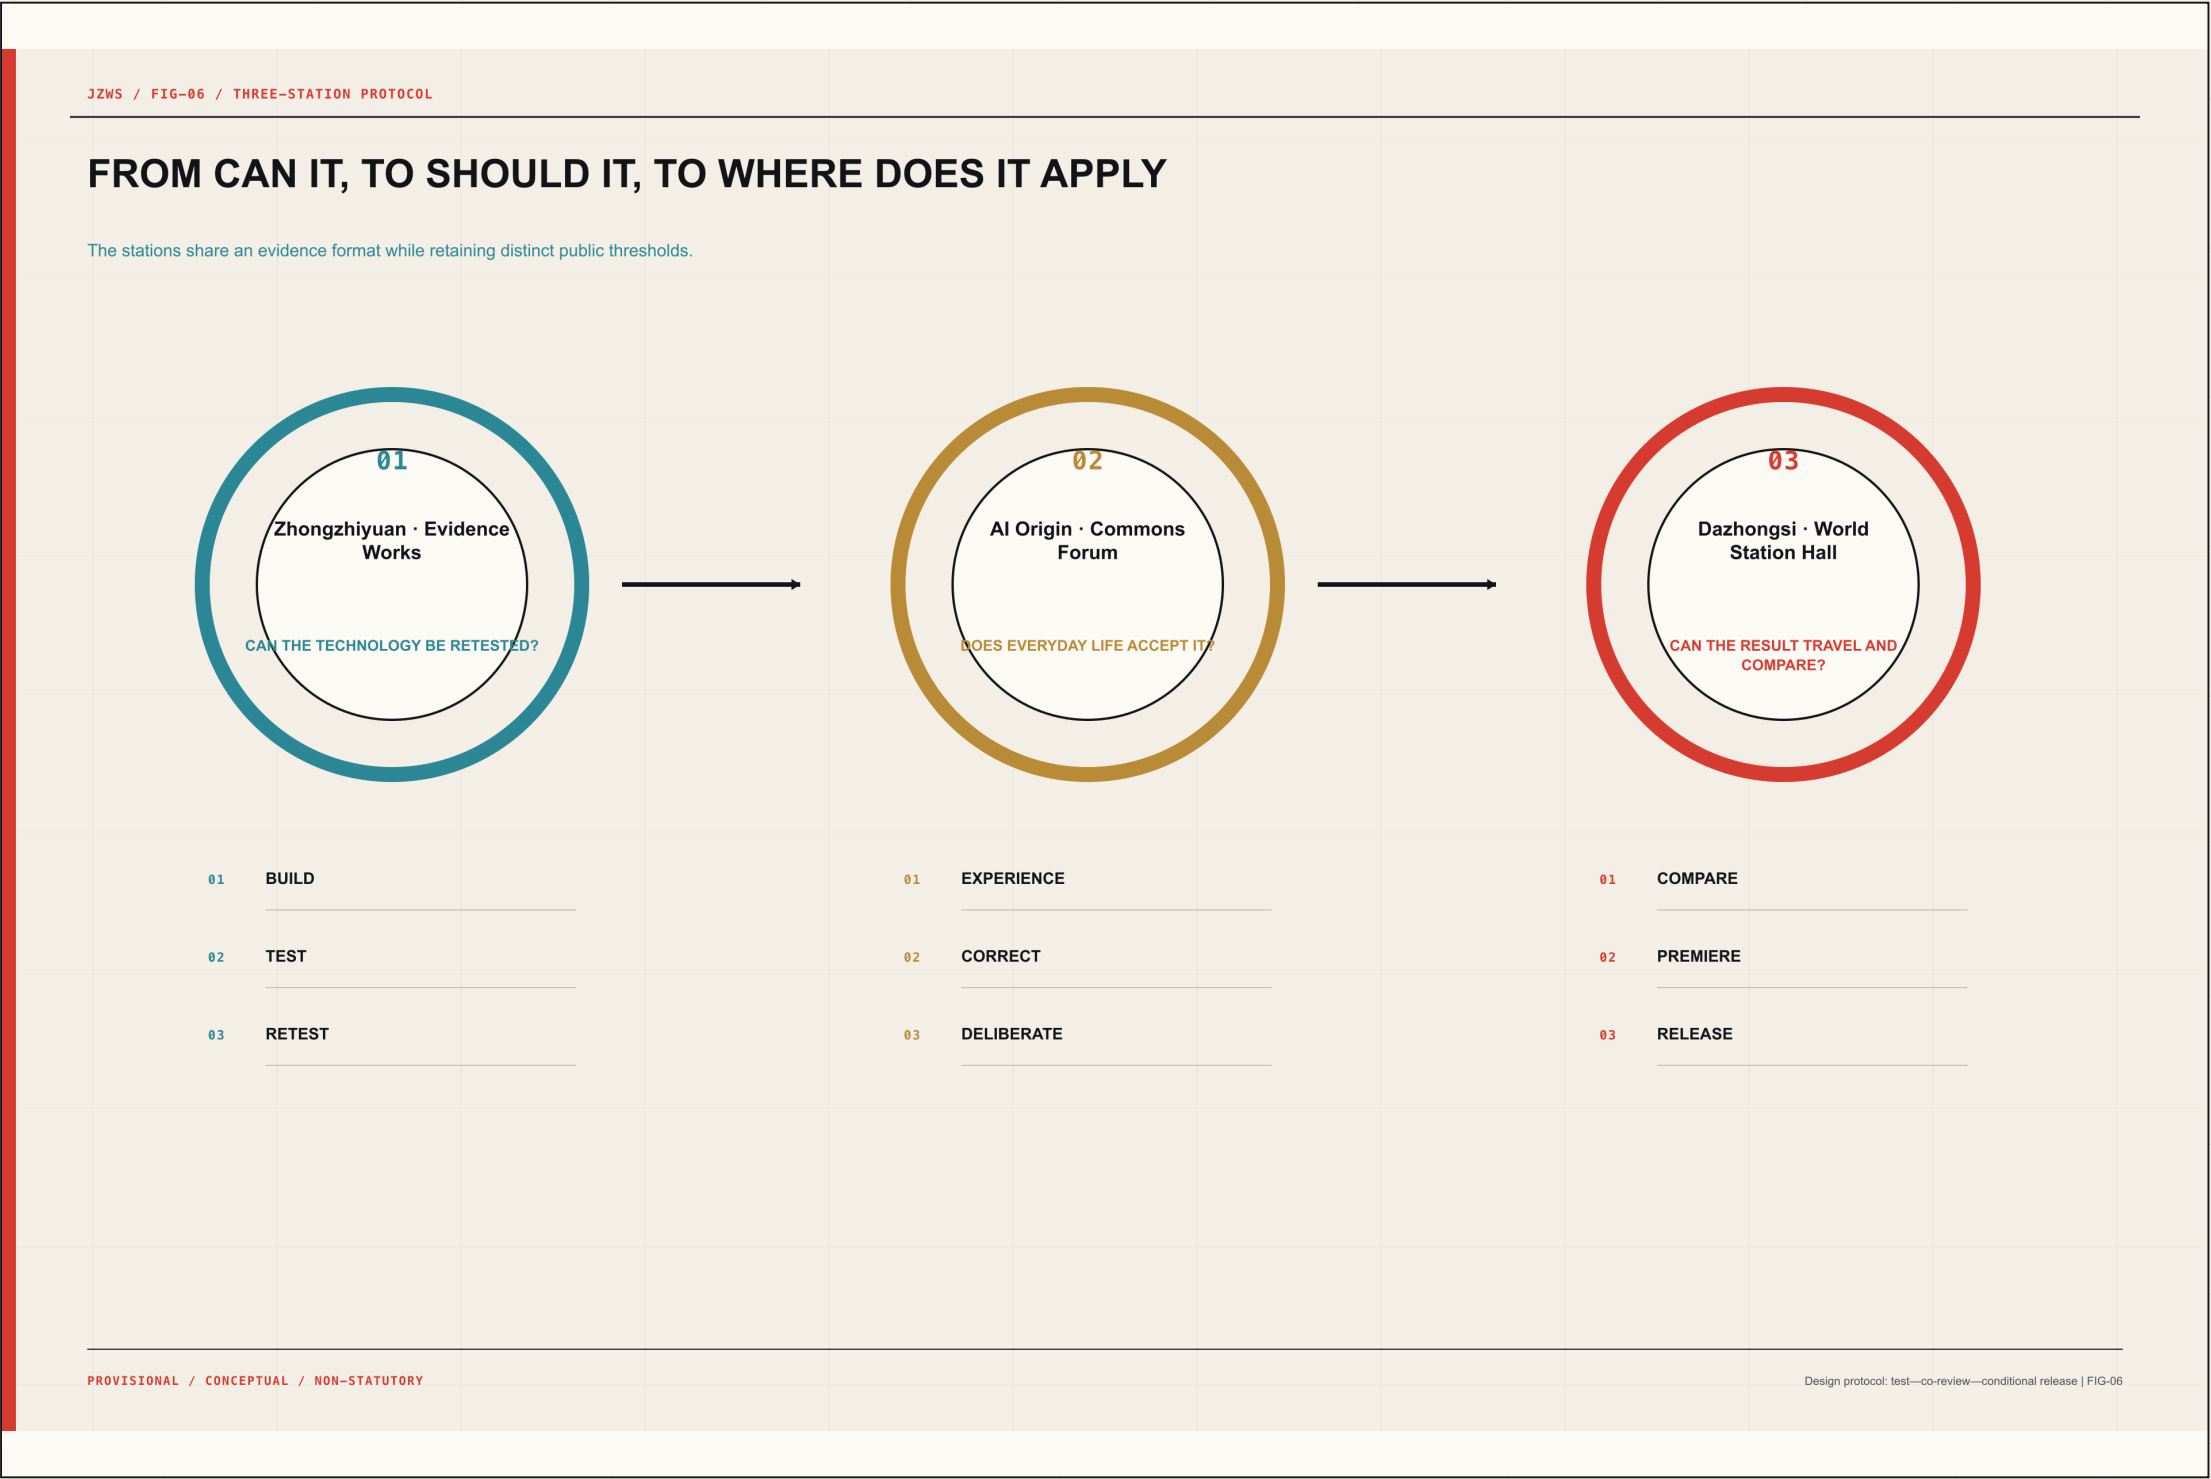

FIGURE 02 / STRUCTURED INTERPRETATION

TWO WINGS, THREE RELAY STATIONS

The three stations are not similar districts. They form a duty chain from development and open testing to collective correction and global release.

BUILD

EVIDENCE WORKS

build → test → retest

DELIBERATE

COMMONS FORUM

experience → correct → deliberate

RELEASE

WORLD STATION HALL

compare → premiere → release

FIGURE 03 / STRUCTURED INTERPRETATION

SIX CONCEPTUAL LAND-USE ROLES

Land use expresses six conceptual roles only, never statutory zoning; existing conditions, ownership, and controls must trigger recutting and recalculation.

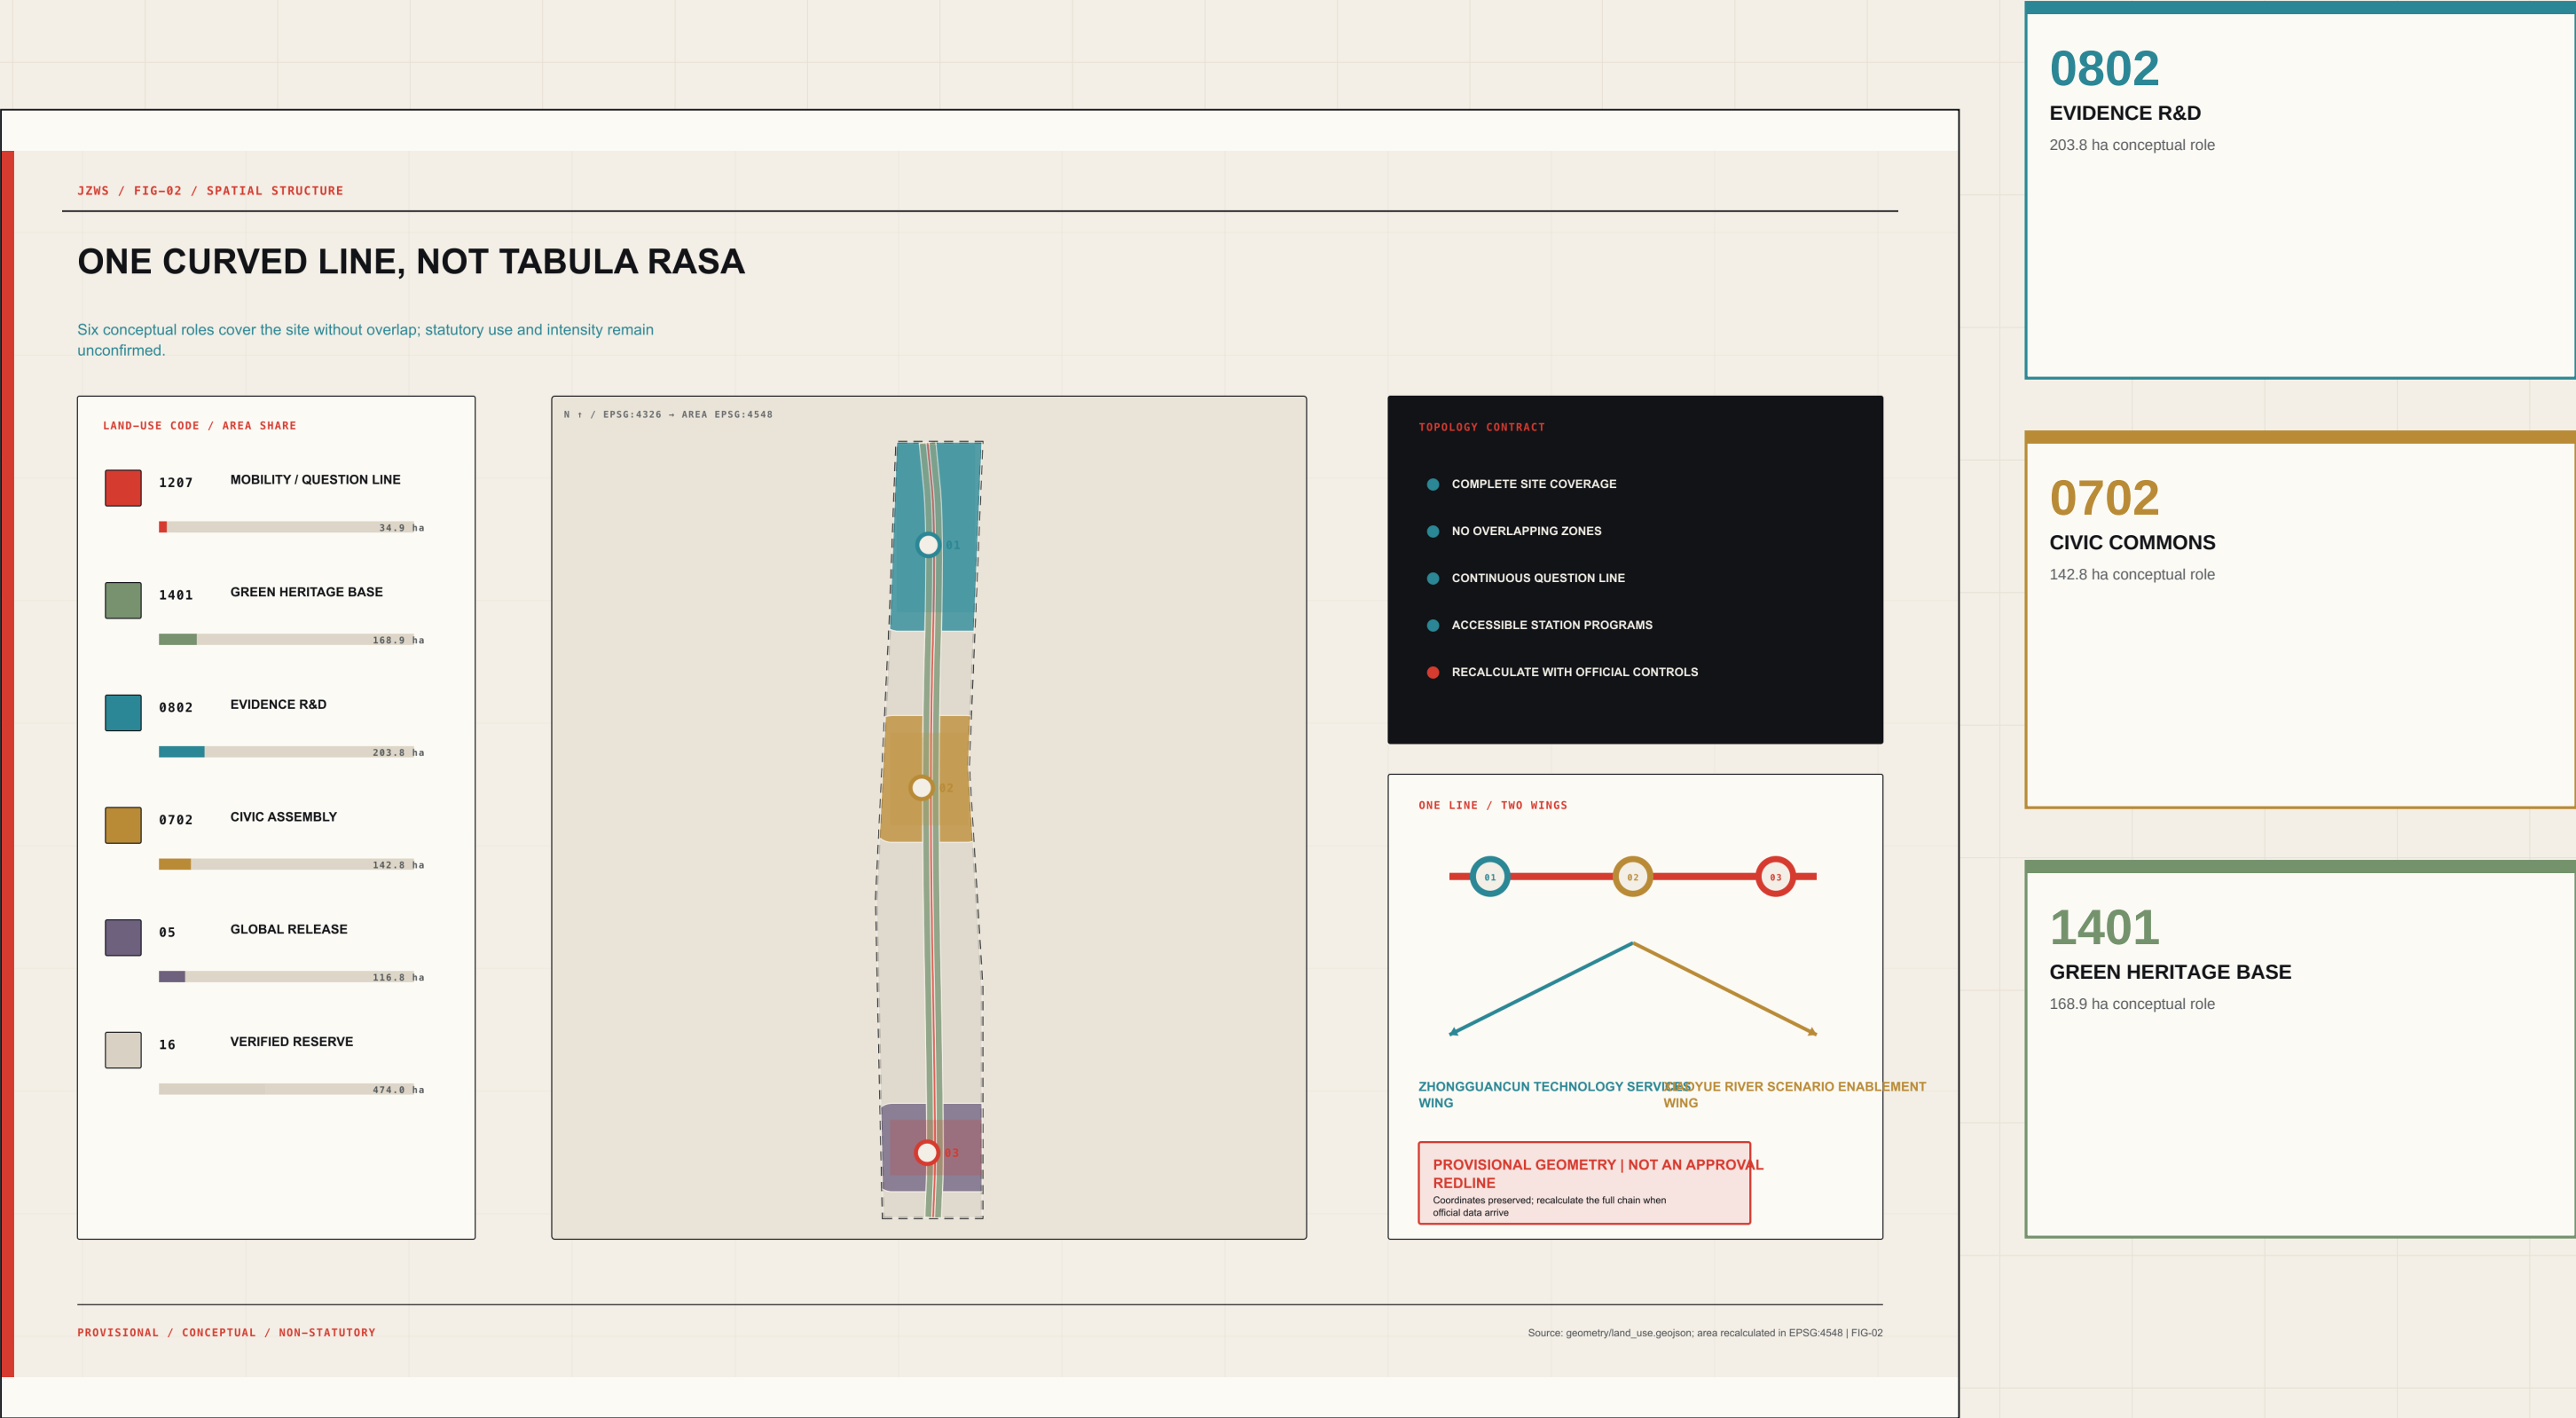

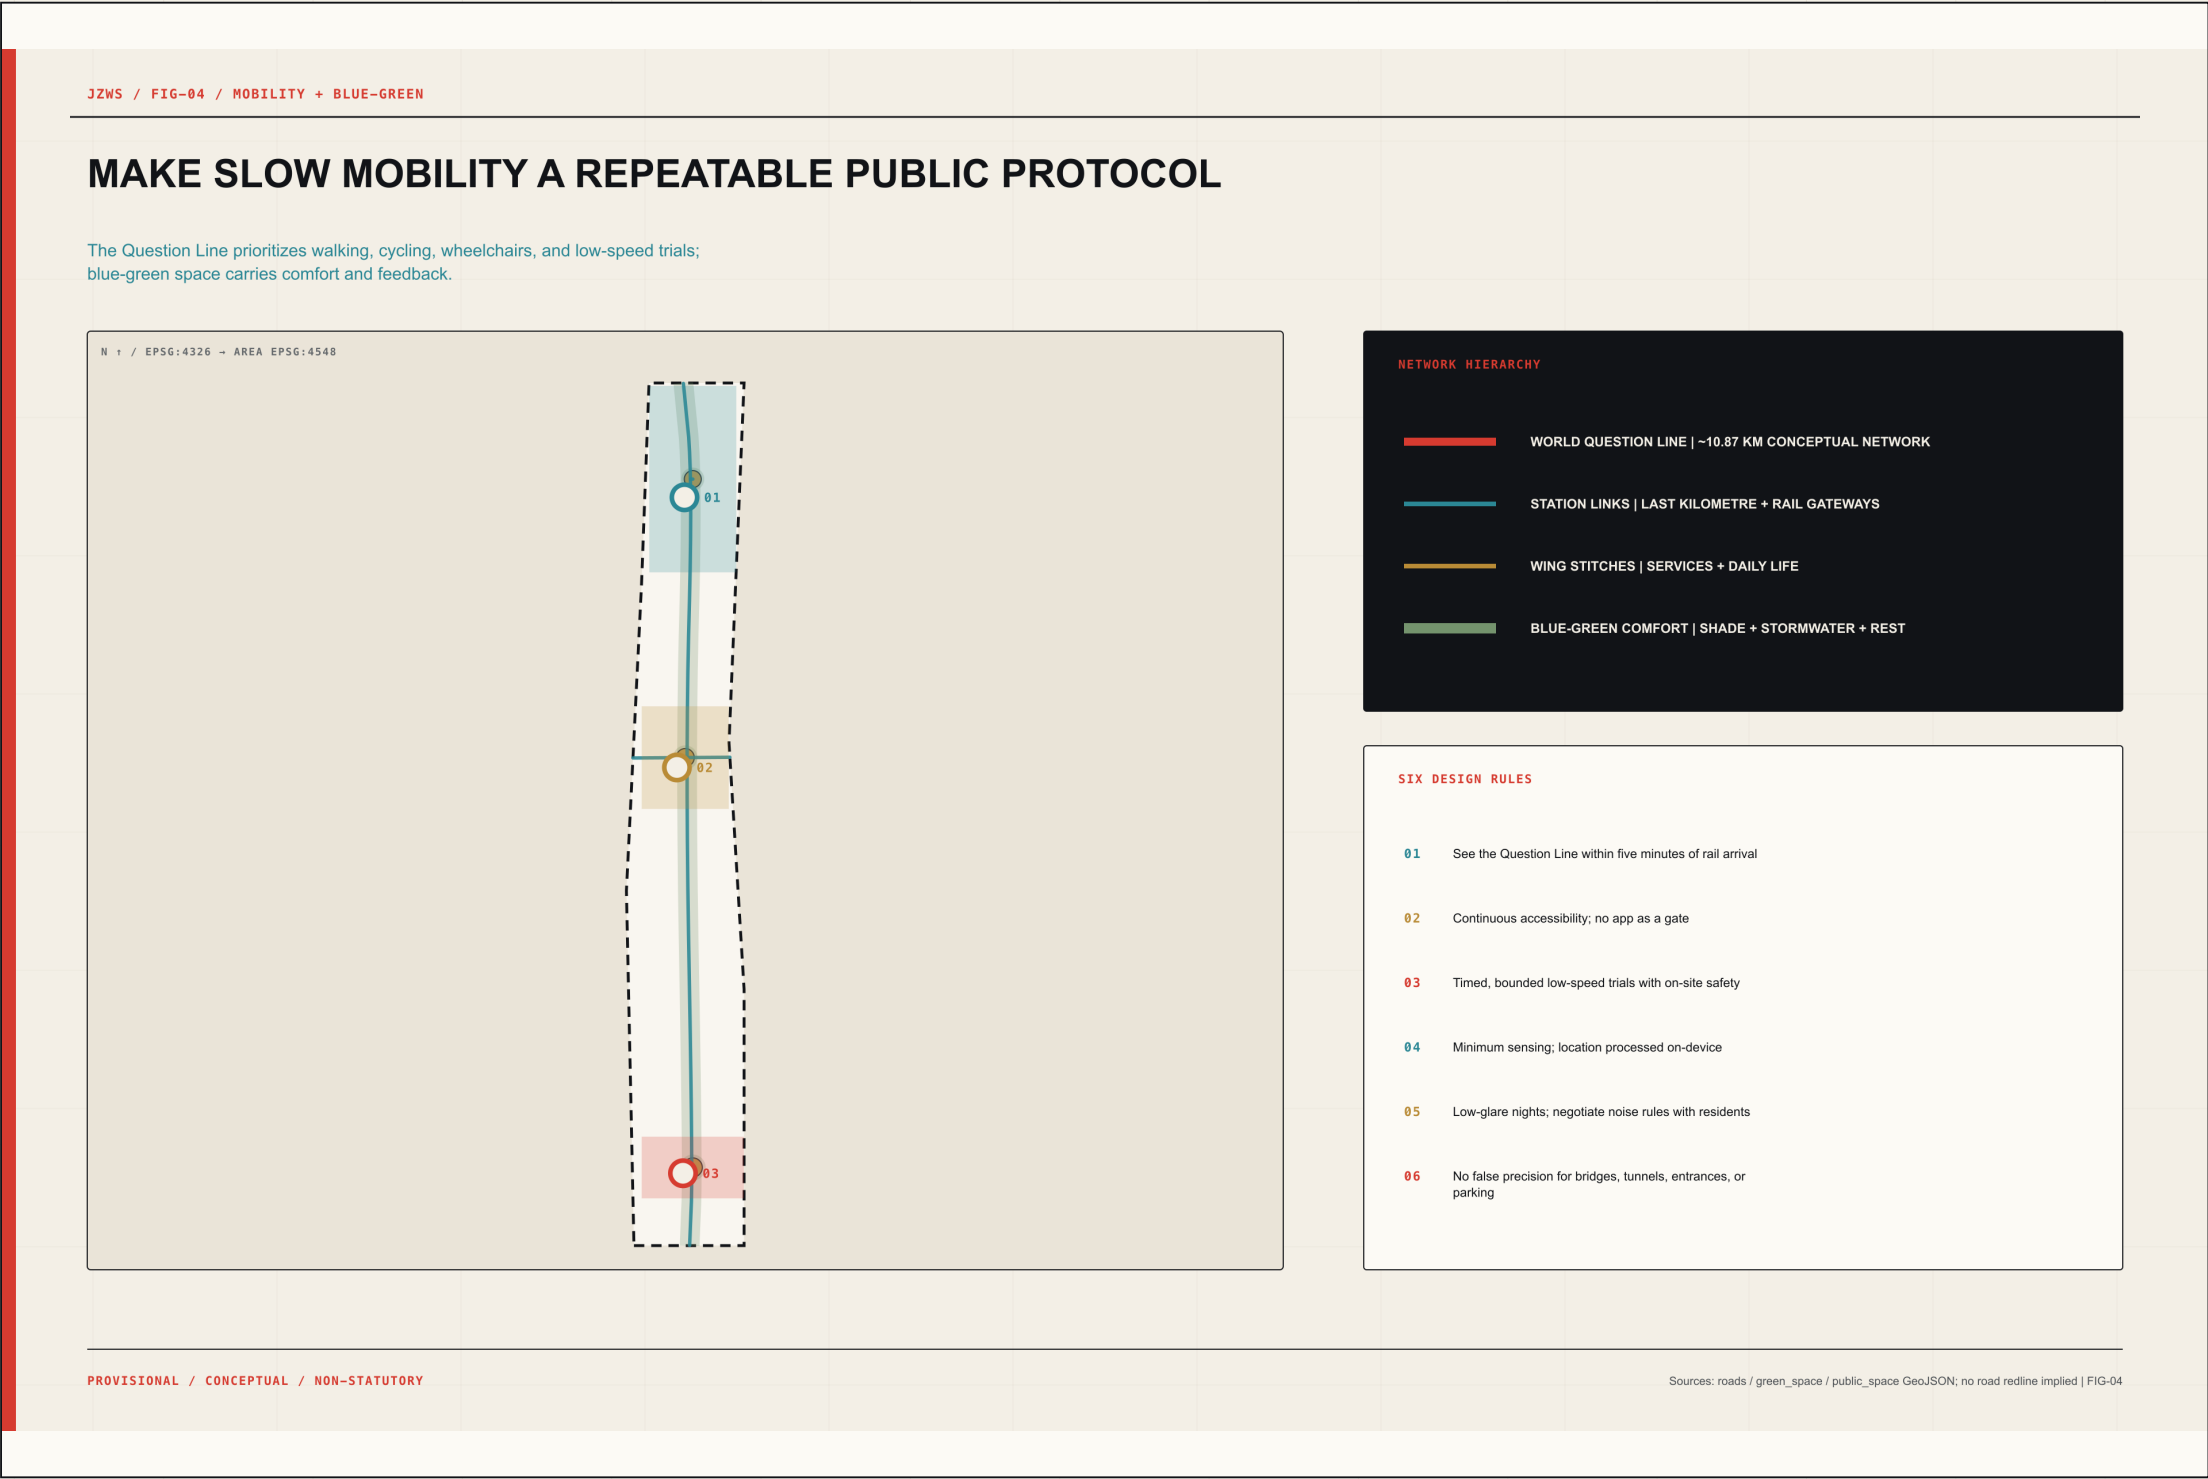

FIGURE 04 / STRUCTURED INTERPRETATION

WALKING, RAIL, BLUE-GREEN, AND TAKEOVER

Mobility becomes a complete public-safety chain—arrive, walk, observe, emergency-stop, human takeover—while road redlines and utility capacity remain pending.

10.87 km

CONCEPTUAL LINKS

Recalculable line length; not a road-redline length

18.06%

CONCEPTUAL GREEN RATIO

206.1 ha; recalculate after official boundary

0.86%

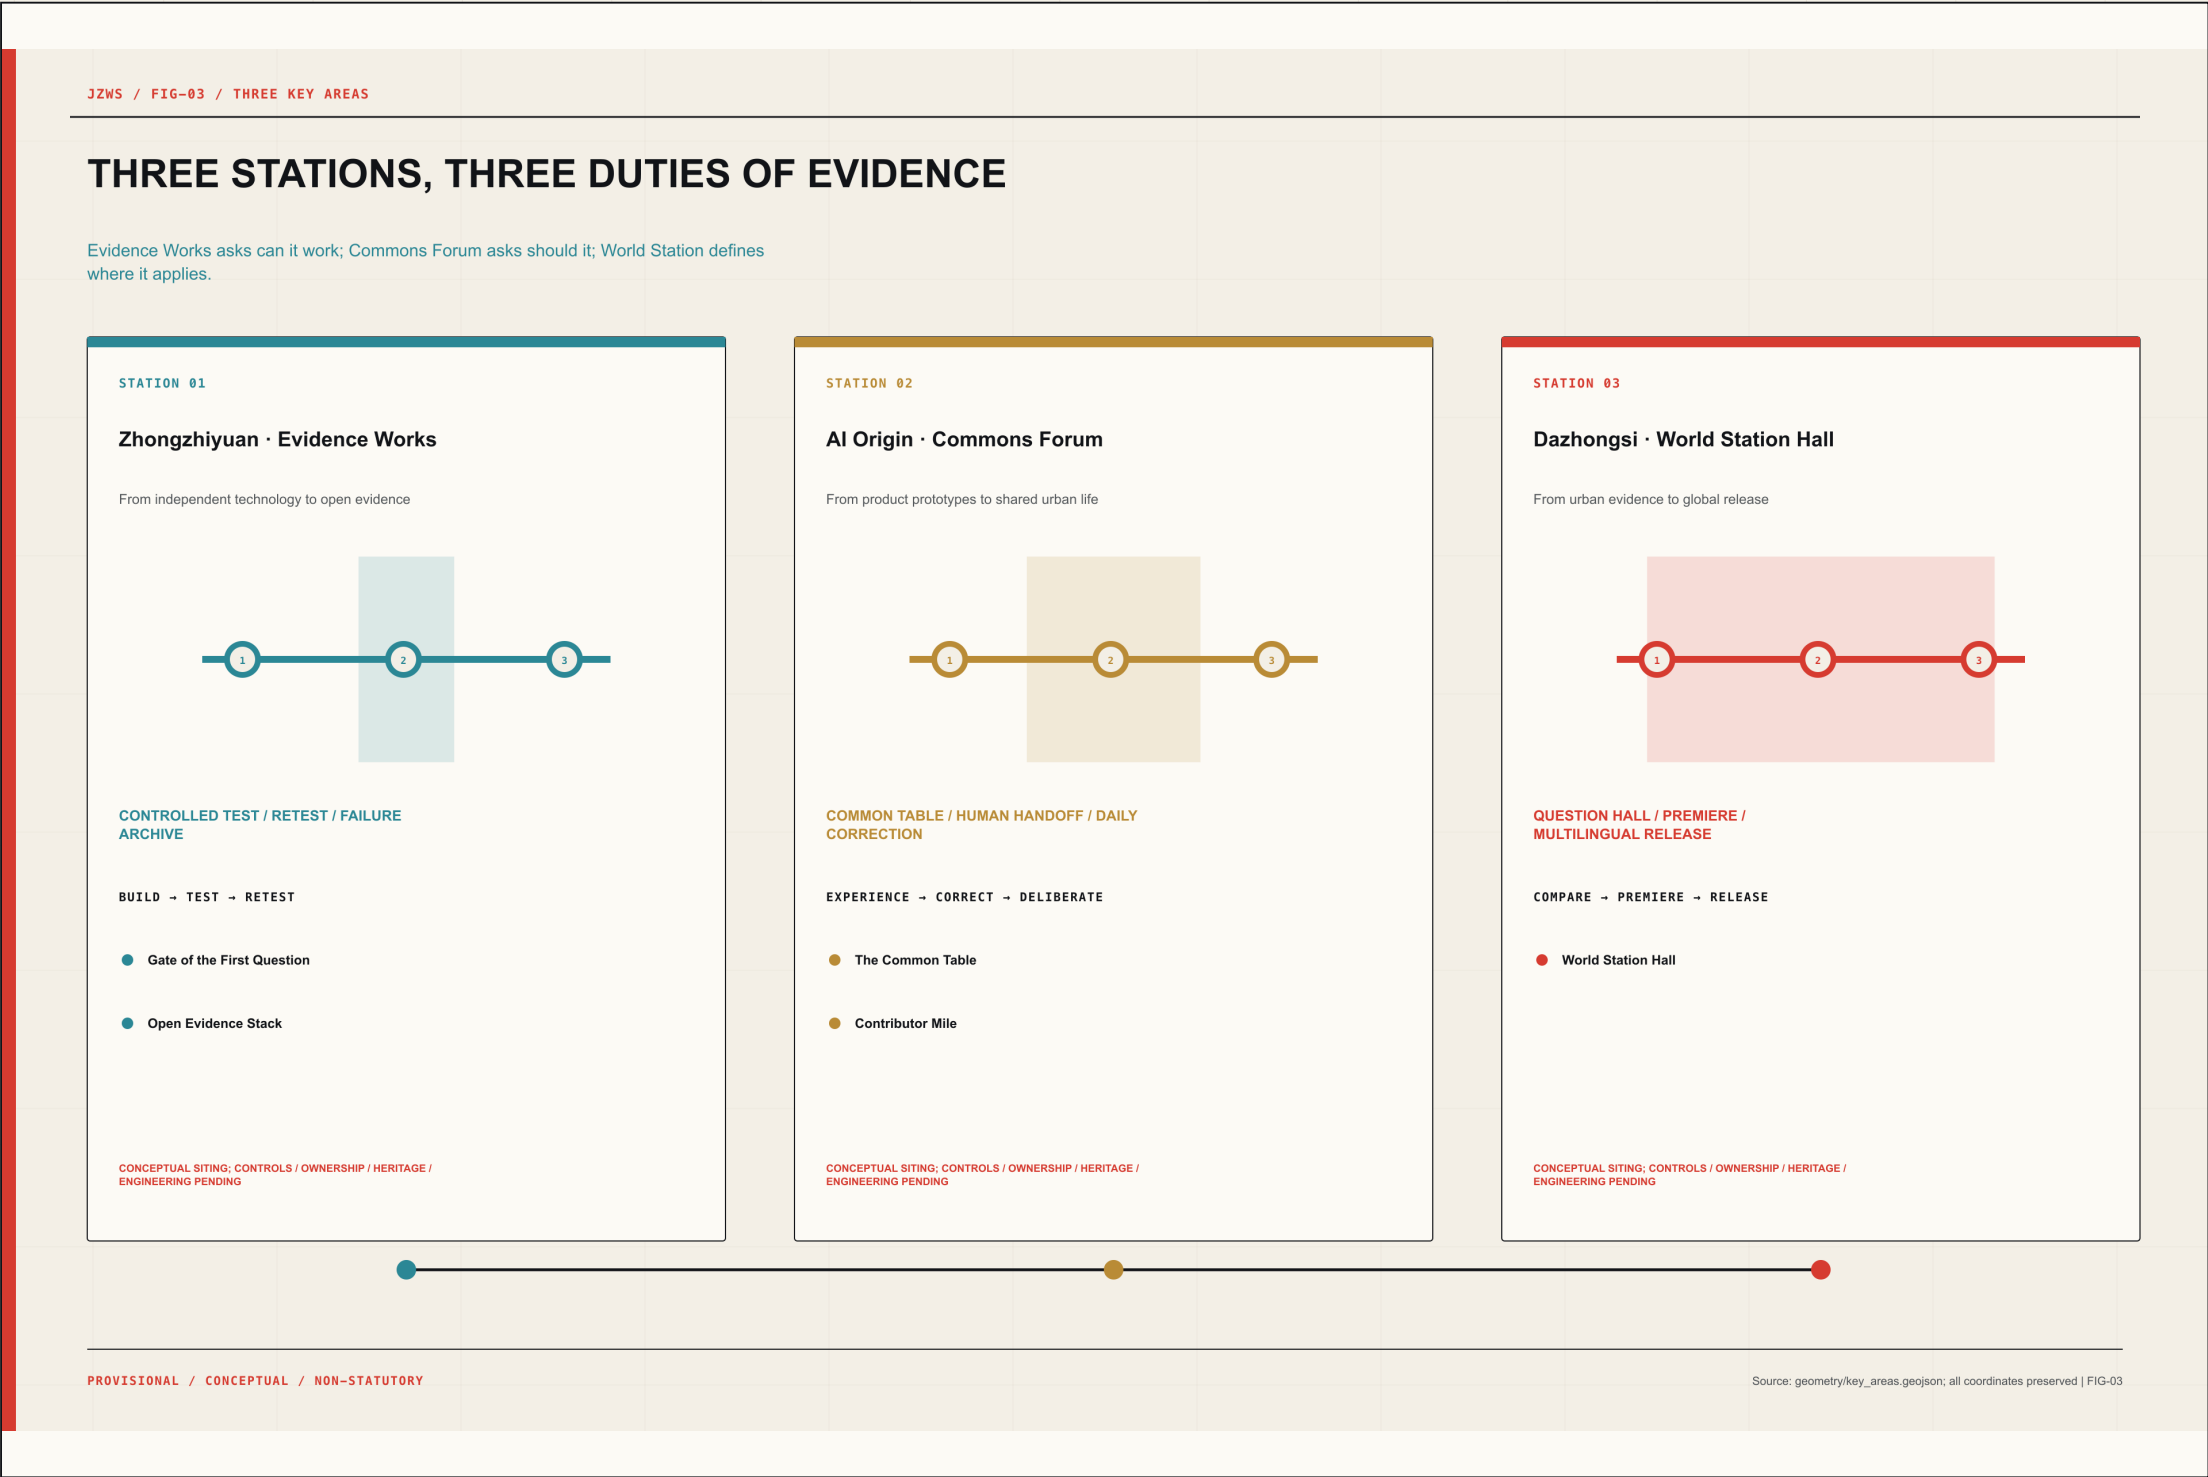

STATION FORECOURTS

9.8 ha conceptual public space

FIGURE 05 / STRUCTURED INTERPRETATION

THREE KEY AREAS, THREE DISTINCT DUTIES

The key areas differ by mission, not styling: Zhongzhiyuan turns capability into evidence, AI Origin turns products into shared life, and Dazhongsi turns urban evidence into global release.

192.1 ha

ZHONGZHIYUAN REFERENCE

Published reference; boundary pending

104.3 ha

AI ORIGIN REFERENCE

Published reference; boundary pending

72.0 ha

DAZHONGSI REFERENCE

Coordinates preserved despite offset

ZHONGZHIYUAN · EVIDENCE WORKS

build → test → retest

- BOUNDED TEST THRESHOLDS
- PUBLIC OBSERVATION + RETEST
- FAILURE RECORDS ENTER THE PASSPORT
- ON-SITE HUMANS RETAIN HIGHEST AUTHORITY

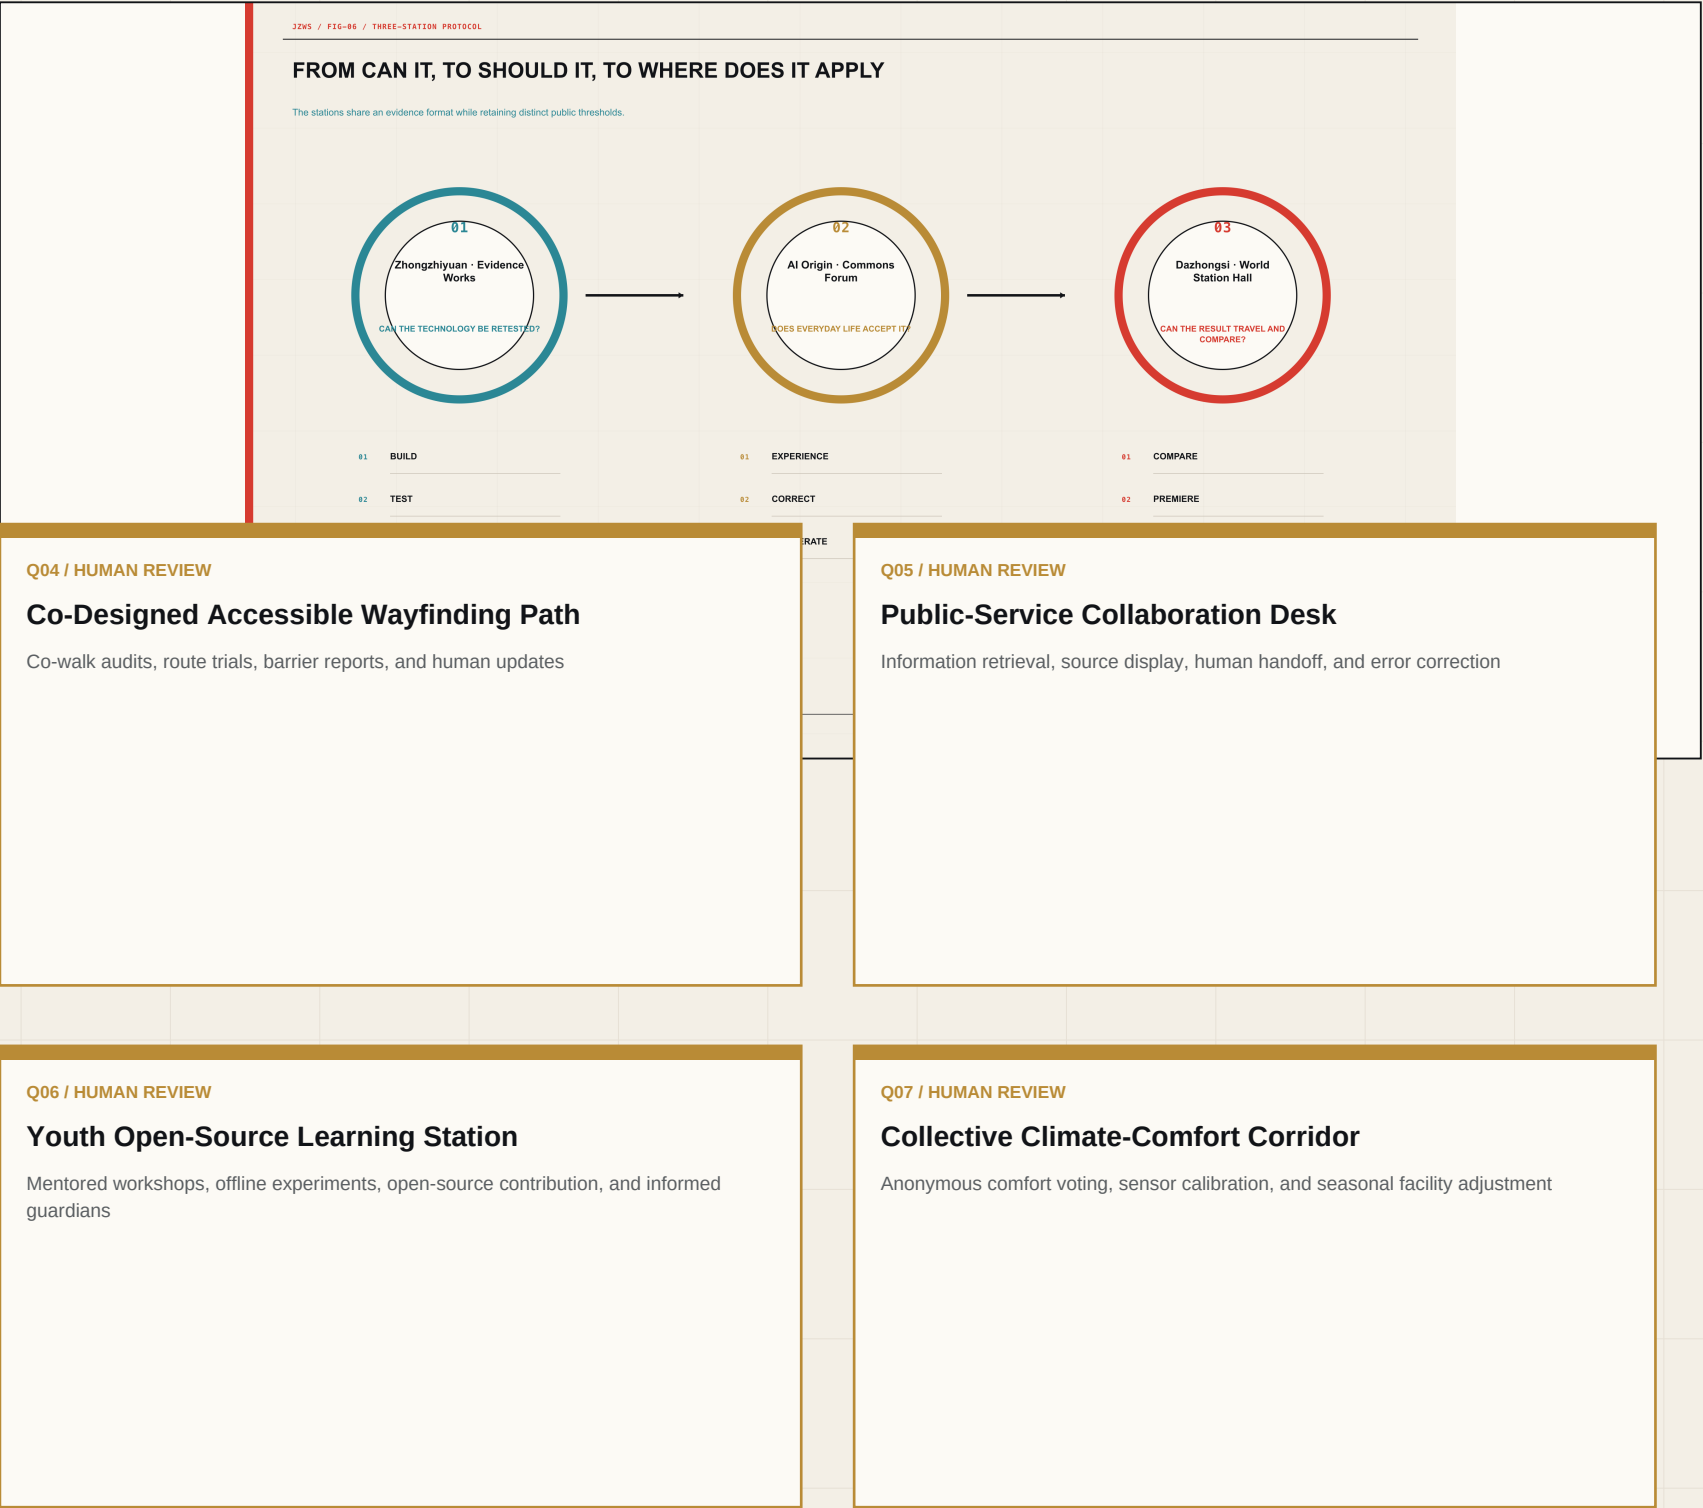

AI ORIGIN · COMMONS FORUM

From product prototypes to shared urban life

experience → correct → deliberate

- BOUNDED TEST THRESHOLDS
- PUBLIC OBSERVATION + RETEST
- FAILURE RECORDS ENTER THE PASSPORT
- ON-SITE HUMANS RETAIN HIGHEST AUTHORITY

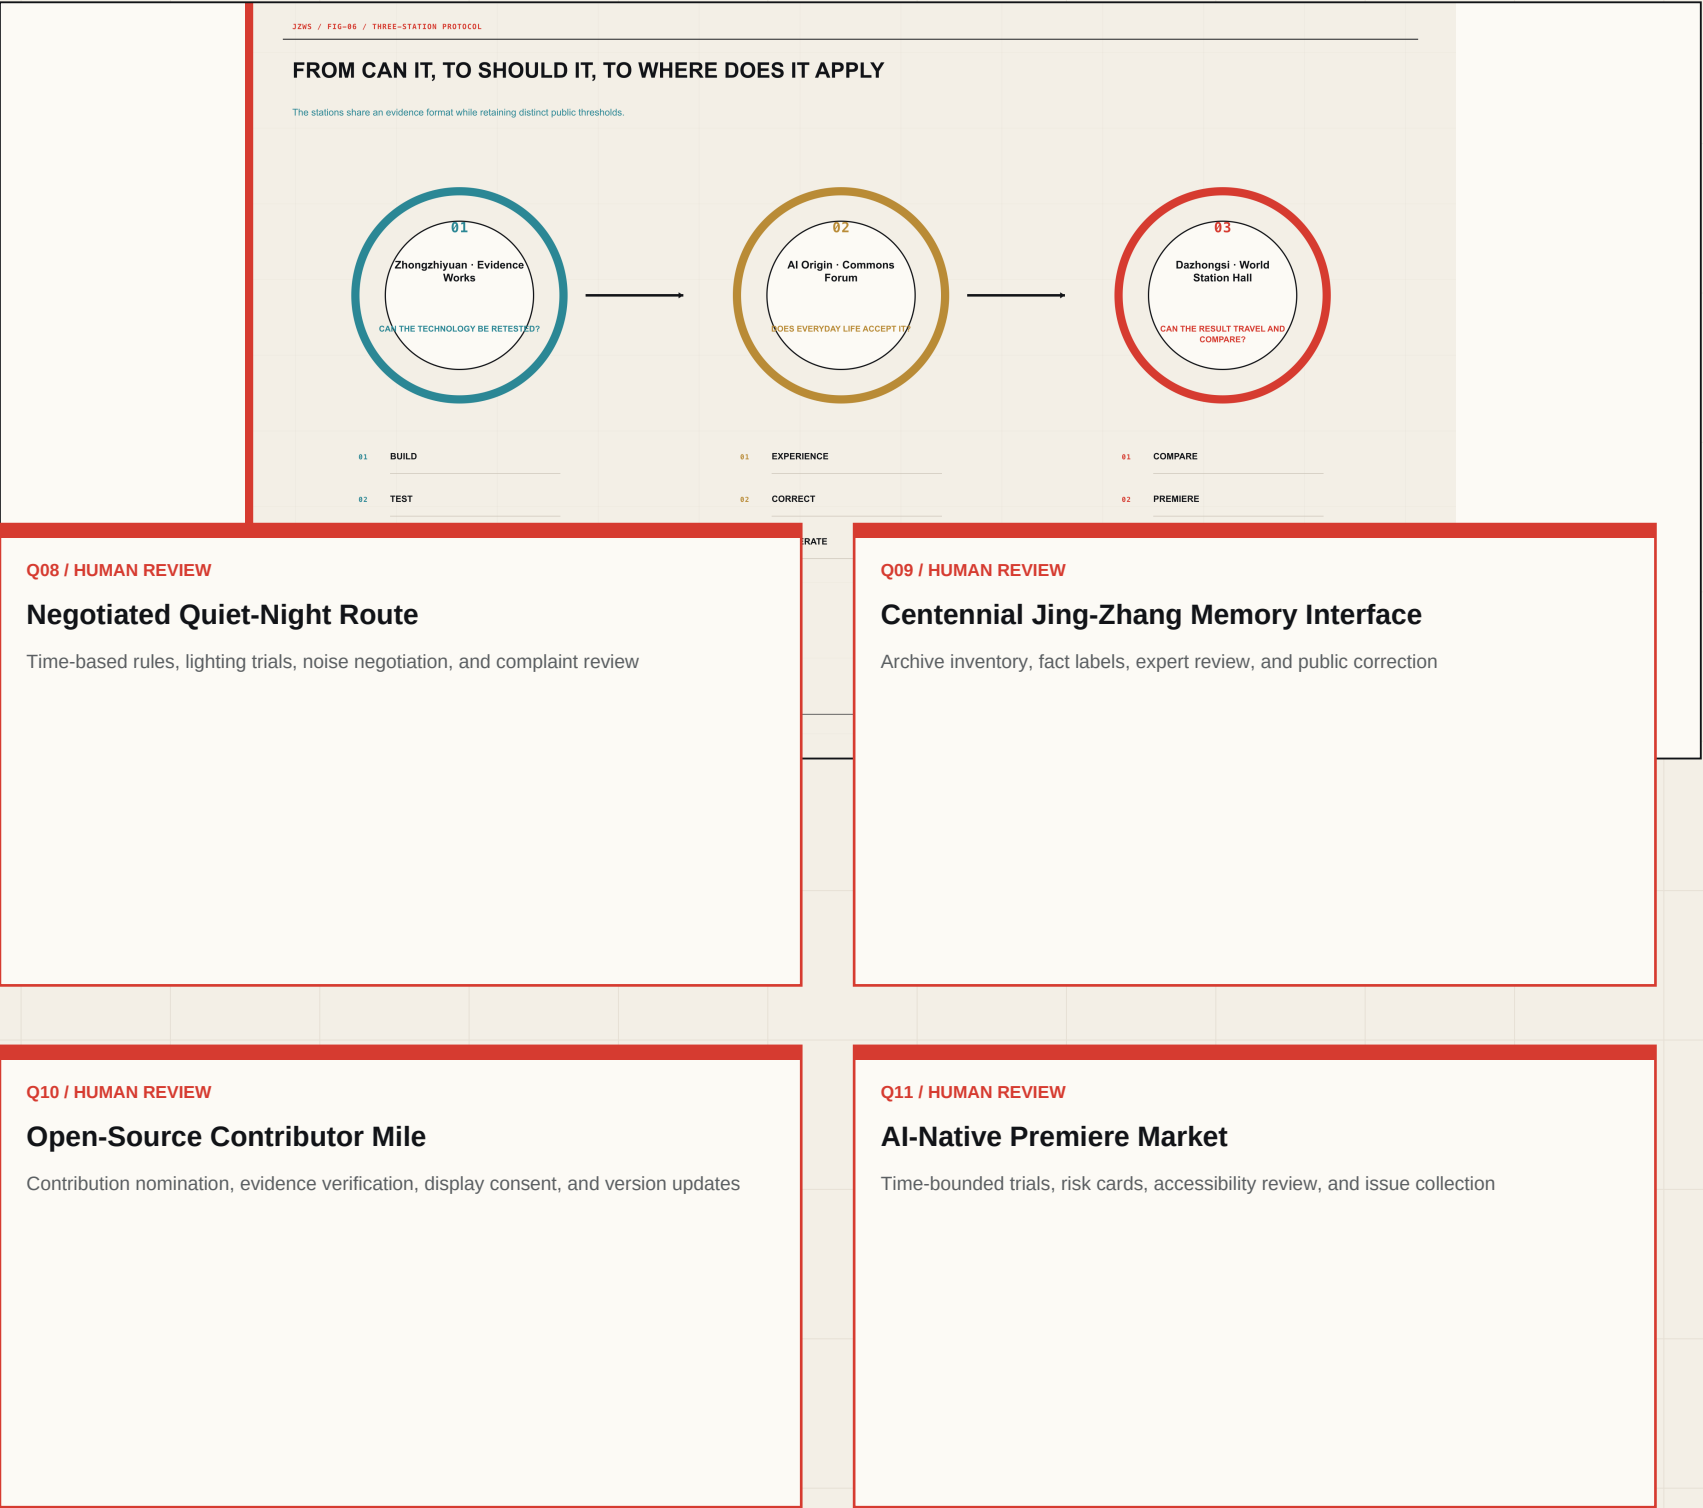

DAZHONGSI · WORLD STATION HALL

From urban evidence to global release

compare → premiere → release

- BOUNDED TEST THRESHOLDS
- PUBLIC OBSERVATION + RETEST
- FAILURE RECORDS ENTER THE PASSPORT
- ON-SITE HUMANS RETAIN HIGHEST AUTHORITY

HERITAGE AS METHOD, NOT SCENERY

‘Railway Evidence’ is not nostalgic decoration. It turns provenance, version, time, failure, and correction into a civic spatial grammar.

01

SURVEY BEFORE INTERVENTION

No demolition or alteration promise before inventory, grading, and structural survey.

02

MINIMAL, REVERSIBLE, REPAIRABLE

New installations are demountable; basic public function remains when devices are off.

03

EVERYDAY LIFE BEFORE BRAND

Shade, rest, accessibility, quiet, and care routes precede event spectacle.

PENDING: heritage inventory · protection boundaries · control zones · structural safety · operating authority

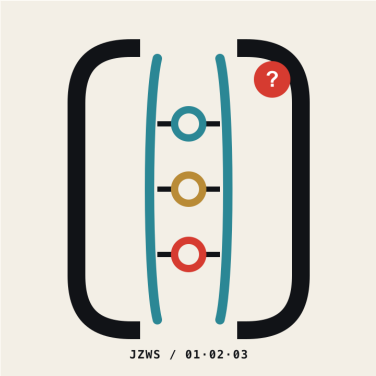

Every later refinement must place heritage, structure, railway, accessibility, and community deliberation at the same review table.

FIVE LEGIBLE CIVIC-INSTITUTION LANDMARKS

JZWS / FIG-09 / RAILWAY EVIDENCE SYSTEM

RAILWAY EVIDENCE: TIMETABLE × JOURNAL × DIPLOMATIC DOSSIER

The brand is not decoration; it keeps questions, risk, evidence, and participation legible at every scale.

PROVISIONAL / CONCEPTUAL / NON-STATUTORY

Original visual system; no remote fonts, images, or third-party marks | FIG-09

LANDMARK 01

Gate of the First Question

Displays one defining global urban-AI question each year

LANDMARK 02

Open Evidence Stack

Makes capabilities, failures, limits, and versions spatially legible

LANDMARK 03

The Common Table

Supports equal and accessible public deliberation

LANDMARK 04

World Station Hall

Hosts annual questions, city cases, premieres, and exchange

LANDMARK 05

Contributor Mile

Records authorized real contributions and maintenance history

SEVEN CO-DESIGNERS

Talent is not an attraction label. It is whether seven kinds of people can enter question-setting, testing, correction, takeover, and exit.

CO-DESIGNER 01

AI researcher and open-source developer

Moves from evidence testing to public feedback and global release

CO-DESIGNER 02

Startup team and product owner

Turns a prototype into a bounded, explainable, repeatable urban product

CO-DESIGNER 03

Urban operator and frontline maintainer

Defines takeover, maintenance, shutdown, and recovery

CO-DESIGNER 04

Resident family and caregiver

Tests whether scenarios fit everyday routines

CO-DESIGNER 05

Older and disabled co-designer

Holds accessibility review, correction, and veto channels

CO-DESIGNER 06

Young learner and junior developer

Moves from AI literacy into real open contribution

CO-DESIGNER 07

International talent, city visitor, and partner

Compares evidence, joins the agenda, and carries reusable tools home

ATLAS OF TWELVE QUESTIONS

Every question binds spatial type, operating procedure, data boundary, human review, and rollback.

JZWS / FIG-07 / TWELVE-QUESTION ATLAS

TWELVE QUESTIONS: HOW A CITY TESTS AI WITH BOUNDARIES

The first three test industry capability; nine test public life. Every question has Human Review and rollback.

01—06: FROM SYSTEM CAPABILITY TO PUBLIC SERVICE

Each card keeps four review essentials visible: question, space and operation, data boundary, and human stop authority.

Q01 / INDUSTRY

Open Full-Stack Interoperability Track

QUESTION · Can different chips, models, toolchains, and agent interfaces work together under an open test protocol?
SPACE / OPS · Scheduled trials, open protocols, independent retesting, and archived failures
DATA BOUNDARY · Use only cleared test or synthetic data; no connection to production systems
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · compatibility matrix, failure samples, retest log

Q02 / INDUSTRY

Low-Speed Embodied-AI Coexistence Street

QUESTION · Can robots safely share space with people in a controlled, pausable, human-supervised environment?
SPACE / OPS · Time slots, geofencing, on-site safety stewards, and public incident review
DATA BOUNDARY · Default edge processing and bystander obfuscation; no retention of irrelevant footage
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · near-miss log, emergency-stop record, coexistence review

Q03 / INDUSTRY

Urban-Agent Resilience Drill Chamber

QUESTION · When an urban agent fails, is attacked, or gives harmful advice, can it be detected, isolated, taken over, and recovered?
SPACE / OPS · Scenario injection, red teaming, human takeover drills, and recovery review
DATA BOUNDARY · Only de-identified or synthetic urban data; no link to real control equipment
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · attack-path record, takeover time, recovery procedure

Q04 / DAILY-LIFE

Co-Designed Accessible Wayfinding Path

QUESTION · Can blind, older, and mobility-impaired users understand, correct, and leave AI wayfinding?
SPACE / OPS · Co-walk audits, route trials, barrier reports, and human updates
DATA BOUNDARY · Location data processed on device; anonymous feedback available
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · barrier inventory, correction log, accessibility audit

Q05 / DAILY-LIFE

Public-Service Collaboration Desk

QUESTION · Can a public-service AI explain its sources and hand a person to human service in one step?
SPACE / OPS · Information retrieval, source display, human handoff, and error correction
DATA BOUNDARY · Conversations are not retained by default; sensitive matters remain human-only
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · source hit rate, handoff log, correction rate

Q06 / DAILY-LIFE

Youth Open-Source Learning Station

QUESTION · Can young people learn models, code, and data literacy without surrendering unnecessary personal data?
SPACE / OPS · Mentored workshops, offline experiments, open-source contribution, and informed guardians
DATA BOUNDARY · No advertising profiles; student work is not training data by default
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · curriculum version, consent record, open-source contribution

07—12: FROM SHARED LIFE TO GLOBAL RELEASE

Each card keeps four review essentials visible: question, space and operation, data boundary, and human stop authority.

Q07 / DAILY-LIFE

Collective Climate-Comfort Corridor

QUESTION · Can AI improve shade, rest, and microclimate comfort with anonymous or aggregate data rather than individual surveillance?
SPACE / OPS · Anonymous comfort voting, sensor calibration, and seasonal facility adjustment
DATA BOUNDARY · Record only environmental values and aggregated feedback
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · comfort-period map, facility adjustment log, anonymous feedback

Q08 / DAILY-LIFE

Negotiated Quiet-Night Route

QUESTION · Can smart lighting, activity, and safety systems support safety, energy restraint, quiet, and privacy at once?
SPACE / OPS · Time-based rules, lighting trials, noise negotiation, and complaint review
DATA BOUNDARY · Use sound levels and illuminance only; do not record identifiable conversations
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · lighting timeline, noise boundary, complaint response

Q09 / CULTURE

Centennial Jing-Zhang Memory Interface

QUESTION · Can AI interpret railway history from sourced archives while separating fact, inference, and creation?
SPACE / OPS · Archive inventory, fact labels, expert review, and public correction
DATA BOUNDARY · Use only public and rights-cleared material
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · provenance card, fact/inference label, correction history

Q10 / CULTURE

Open-Source Contributor Mile

QUESTION · Can the real contributions of developers, residents, maintainers, and researchers be recorded by the city with consent?
SPACE / OPS · Contribution nomination, evidence verification, display consent, and version updates
DATA BOUNDARY · Display only expressly authorized names or anonymous identifiers
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · contribution evidence, consent status, version history

Q11 / GLOBAL-CONVERSION

AI-Native Premiere Market

QUESTION · Can AI products undergo public trials, accessibility checks, risk disclosure, and human-service validation before purchase or scale-up?
SPACE / OPS · Time-bounded trials, risk cards, accessibility review, and issue collection
DATA BOUNDARY · Trial data stays local by default and remains deletable
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · trial report, risk card, accessibility review

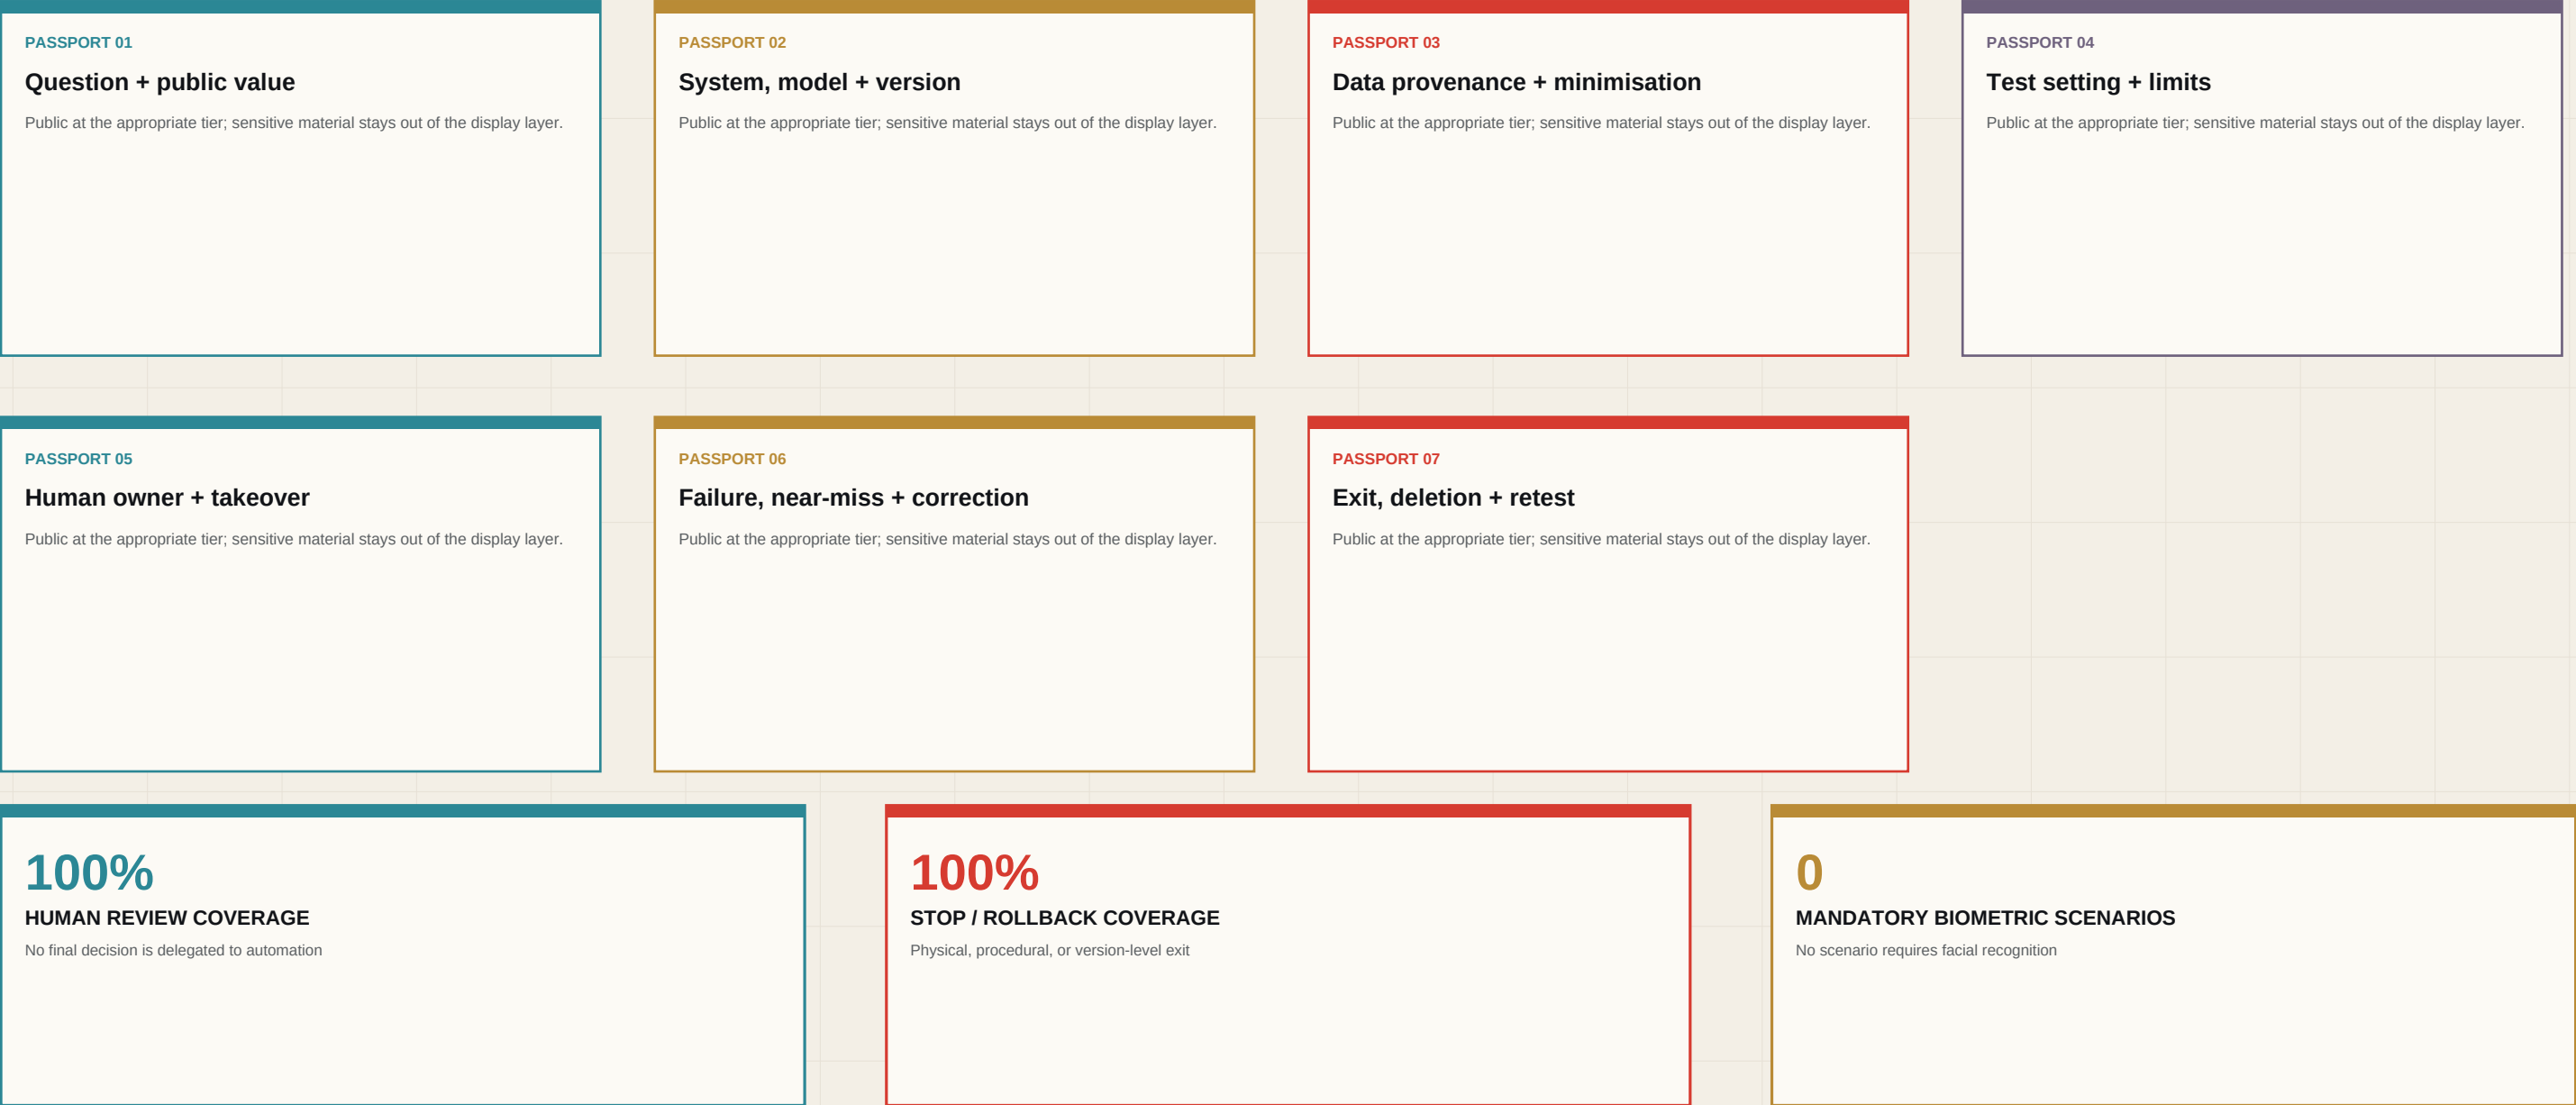

Q12 / GLOBAL-CONVERSION

World City Question Hall

QUESTION · Can cities discuss shared problems through comparable evidence templates rather than promotional slogans?
SPACE / OPS · Question call, evidence comparison, public review, and annual release
DATA BOUNDARY · Publish only authorized, reviewable, de-identified results
HUMAN REVIEW + ROLLBACK · 100% coverage
EVIDENCE · city evidence page, dissent record, annual public archive

EVIDENCE PASSPORTS AND HUMAN REVIEW

Before any scenario enters public space, it must carry a legible, withdrawable, retestable Evidence Passport.

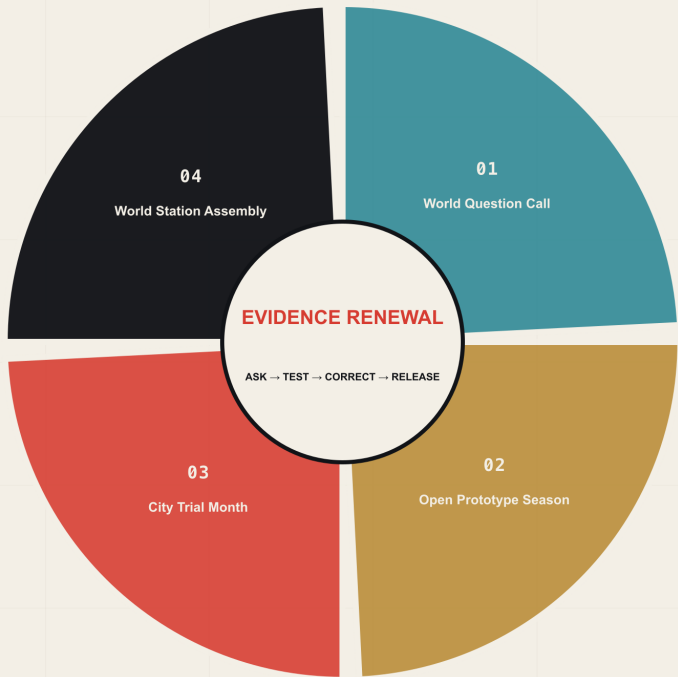

FOUR SEASONS: YEAR-ROUND, NOT ONE EVENT

JZWS / FIG-08 / FOUR-SEASON OPERATIONS

TURN ONE CALL INTO AN ANNUAL URBAN INSTITUTION

Every season produces handoff evidence; every phase advances by gates, not dates alone.

FOUR PHASES / EVIDENCE GATES

PHASE 0 Evidence Baseline and Brand Prototype

PUBLISH THE EVIDENCE BASELINE

04 PROJECTS / SUGGESTED 0-6 MONTH WINDOW

PHASE 1 Three Reversible Trial Families

ACCEPT STOP / HUMAN REVIEW / ACCESSIBILITY

10 PROJECTS / SUGGESTED 6-18 MONTH WINDOW

PHASE 2 Three-Station Network

MUTUAL RECOGNITION OF STATION PASSPORTS

07 PROJECTS / SUGGESTED 18-36 MONTH WINDOW

PHASE 3 Long-Term International Network

INDEPENDENT EVALUATION / RENEWAL / EXIT

03 PROJECTS / SUGGESTED WINDOW AFTER 36 MONTHS

PROVISIONAL / CONCEPTUAL / NON-STATUTORY

Source: four-season operations and 24 conceptual projects; windows are not commitments | FIG-08

SEASON 01

World Question Call

Collect, map evidence, and screen for public value

SEASON 02

Open Prototype Season

Interoperability, red teaming, and draft evidence passports

SEASON 03

City Trial Month

Bounded daily-life trials and user co-review

SEASON 04

World Station Assembly

Release results, failure archives, and the next annual question

0—18 MONTHS: EVIDENCE BEFORE CONSTRUCTION

Every project is conceptual. Sequence expresses dependencies, not ownership, approval, funding, or delivery commitment.

P01 / PHASE-0

Evidence and Missing-Data Baseline

Suggested 0-6 month window · subject to data, ownership, professional, and approval checks

P02 / PHASE-0

World Question Call Mechanism

Suggested 0-6 month window · subject to data, ownership, professional, and approval checks

P03 / PHASE-0

Brand and Wayfinding Prototype

Suggested 0-6 month window · subject to data, ownership, professional, and approval checks

P04 / PHASE-0

Gate of the First Question Prototype

Suggested 0-6 month window · subject to data, ownership, professional, and approval checks

P05 / PHASE-1

Open Full-Stack Interoperability Track

Suggested 6-18 month window · subject to data, ownership, professional, and approval checks

P06 / PHASE-1

Low-Speed Embodied-AI Coexistence Street

Suggested 6-18 month window · subject to data, ownership, professional, and approval checks

P08 / PHASE-1

Open Evidence Stack Prototype

Suggested 6-18 month window · subject to data, ownership, professional, and approval checks

P09 / PHASE-1

Co-Designed Accessible Wayfinding Path

Suggested 6-18 month window · subject to data, ownership, professional, and approval checks

P10 / PHASE-1

Public-Service Collaboration Desk

Suggested 6-18 month window · subject to data, ownership, professional, and approval checks

P11 / PHASE-1

Youth Open-Source Learning Station

Suggested 6-18 month window · subject to data, ownership, professional, and approval checks

P12 / PHASE-1

The Common Table

Suggested 6-18 month window · subject to data, ownership, professional, and approval checks

P15 / PHASE-1

Centennial Jing-Zhang Memory Interface

Suggested 6-18 month window · subject to data, ownership, professional, and approval checks

AFTER 18 MONTHS: NETWORK AND ANNUAL RENEWAL

Every project is conceptual. Sequence expresses dependencies, not ownership, approval, funding, or delivery commitment.

P13 / PHASE-2

Collective Climate-Comfort Corridor
Suggested 18-36 month window · subject to data, ownership, professional, and approval checks

P14 / PHASE-2

Negotiated Quiet-Night Route
Suggested 18-36 month window · subject to data, ownership, professional, and approval checks

P16 / PHASE-2

Open-Source Contributor Mile
Suggested 18-36 month window · subject to data, ownership, professional, and approval checks

P17 / PHASE-2

Open Question Residency
Suggested 18-36 month window · subject to data, ownership, professional, and approval checks

P18 / PHASE-3

World City Question Hall
Suggested window after 36 months · subject to data, ownership, professional, and approval checks

P19 / PHASE-2

AI-Native Premiere Market
Suggested 18-36 month window · subject to data, ownership, professional, and approval checks

P20 / PHASE-3

World Station Assembly
Suggested window after 36 months · subject to data, ownership, professional, and approval checks

P21 / PHASE-2

Regional Question Exchange Network
Suggested 18-36 month window · subject to data, ownership, professional, and approval checks

P23 / PHASE-2

Multilingual Urban Evidence Library
Suggested 18-36 month window · subject to data, ownership, professional, and approval checks

P24 / PHASE-3

Annual Review and Renewal Mechanism
Suggested window after 36 months · subject to data, ownership, professional, and approval checks

RECALCULABLE METRICS, EXPLICIT UNKNOWNNS

JZWS / FIG-05 / METRICS + EVIDENCE

AN EXPLICIT UNKNOWN IS BETTER THAN FALSE PRECISION

Spatial values recalculate, structures count, statutory values are never invented; every trial carries an Evidence Passport.

NINE ASSUMPTIONS AND THE NEXT SURVEY

Assumptions are not disclaimers. They are the task brief for the next survey, professional review, and recalculation.

A-PROV-BOUNDARY

CONFIRM + RECALCULATE

Provisional overall geometry; recalculate every spatial metric after an official redline arrives.

A-KEY003-OFFSET

CONFIRM + RECALCULATE

Dazhongsi provisional coordinates are preserved despite their offset; no parcel-level placement is claimed.

A-CONTROLS-MISSING

CONFIRM + RECALCULATE

FAR, height, density, setbacks, daylight, and fire controls remain unknown.

A-ROAD-UTILITY-MISSING

CONFIRM + RECALCULATE

Road redlines, rail protection, parking, utilities, and flood data have not been supplied.

A-OWNERSHIP-MISSING

CONFIRM + RECALCULATE

Ownership, leases, operators, and relocation conditions have not been supplied.

A-HERITAGE-MISSING

CONFIRM + RECALCULATE

Heritage inventory, grades, control zones, and structural surveys are pending.

A-OPERATIONS-CONCEPT

CONCEPTUAL HYPOTHESIS

The four-season operation and civic assembly are institutional prototypes, not commitments.

A-METRICS-TARGETS

CONCEPTUAL HYPOTHESIS

Twelve questions, seven personas, five landmarks, four seasons, and 24 projects are design targets.

A-EXTERNAL-CASE-TRANSFER

CONCEPTUAL HYPOTHESIS

International precedents are mechanism references only; no partnership or endorsement is implied.
