

Figure 09 | Five project families: G0/G1 gates and exit actions

Project families express responsibility, evidence and exit order only; no institution, budget, permit, procurement or implementation commitment

Project family	G0 / G1 gate	Acceptance focus	Exit action
PF-01 Human buffer and community retention	G0: publish rules and co-create samples; G1: professional review	Human service access, exit protocol, community seat	Pause and publicly revise on complaint or inequality risk
PF-02 Reskilling and night wellbeing	G0: navigation prototype; G1: accessibility and night-safety review	Human consultation, explainable path, night feedback	Exit if no human fallback or risk cannot be explained
PF-03 City API and data governance	G0: paper protocol; G1: authorization and safety review	Purpose limitation, revoke button, audit log	Freeze on authorization lapse or bias complaint
PF-04 Xiaoyue River blue-green and human-machine test	G0: map rule; G1: special safety review	People first, stop control, incident record, ecological boundary	Do not enter field work without permit, safety threshold, hydrology data
PF-05 Culture, landmarks and global co-creation loop	G0: narrative and event prototype; G1: rights and venue review	Traceable sources, cultural review, post-event release note	Withdraw or revise if source unproven or misleading risk appears

Public-service order: publish the problem and human route first, then authorize and review professionally; any missing responsibility, evidence, rights or safety gate keeps G0, freezes or exits.

FIG. 03 | Three key areas: public space, scenario cards, landmarks

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

01 Zhongzhiyuan

Problems—protocol—shared lab; human review, minimization, and exit are inside each G0 card.

02 AI-origin community

Retention—learning—care; human review, minimization, and exit are inside each G0 card.

03 Dazhongsi

Culture—business—explainable service; human review, minimization, and exit are inside each G0 card.

FIG. 02 | Shared-cut concept land use: reversible space and services

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

FIG. 05 | Metrics—evidence—versions: every claim passes a concept gate

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

Spatial recomputation

- Provisional scope
11,412,825.386 sqm
- Green layer 879,519.159 sqm
- Public-space layer
123,473.537 sqm

G0 scenario gate

- 10 scenario cards
- 6 personas
- 100% human fallback

Versioned governance

- Problem release
- Public/professional review
- Release note and exit

One algorithm, one rounding rule, one provisional-boundary warning: recomputable metrics are not legal or scoring areas.

FIG. 04 | People-first mobility rules and Xiaoyuehe resilience

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

- People first
Walking, access, human service
- G0 observation
Robot, air, flood begin as rules
- Blue-green gate
No engineering conclusion before evidence
- Night care
Auditable service and screen-free space

Figure 07 | Ordinary-person task chain and stop loop

5 journey steps · 5 rollback steps · 6 acceptance checks · 4/4 routes · G0 concept replay, result_status=not_run

Step	What a person does	Evidence to retain	Rollback if it fails
J-01	enter and choose an ordinary or AI-assisted route	AC-01 · AC-02 · 4 fixture(s)	freeze the AI-assisted route and keep ordinary service available
J-02	request one bounded public service with purpose and data scope	AC-01 · AC-03 · AC-06 · 3 fixture(s)	remove the temporary data request and retain only the decision record
J-03	trigger human takeover or freeze before an unsafe continuation	AC-02 · AC-03 · 4 fixture(s)	offer paper, voice, staffed, or physical-wayfinding alternatives
J-04	appeal, delete, withdraw, or return to a paper route	AC-04 · AC-06 · 4 fixture(s)	publish the hold, complaint, and next review state
J-05	independently replay evidence before expand, repair, or exit	AC-05 · AC-06 · 1 fixture(s)	return to G0 and reopen only after independent replay

Replay evidence: 4/4 routes, 6/6 checks, 5/5 negative cases; remains not_authorized_not_run, not field service results.

Figure 08 | Ten scenario cards: taskbook, space and replay coverage

Every row resolves to a scenario card, space/operation matrix and taskbook; green has ordinary-person replay, amber remains G0 structure evidence

ID / scenario	Taskbook	Spatial refs	Ordinary replay	Boundary
SCN-01 Community-retention desk	agent.4 · agent.5 · agent.6	PUBLIC-01 · LAND-01	G0 structure	G0 · not authorized
SCN-02 Reskilling corridor	agent.5 · agent.6	PUBLIC-02 · LAND-03 · MOBILITY-04	replayed · ROUTE-04	G0 · not authorized
SCN-03 Intergenerational learning navigation	agent.4 · agent.5	PUBLIC-03 · LAND-01	replayed · ROUTE-01	G0 · not authorized
SCN-04 Night human service	agent.4 · agent.6	PUBLIC-04 · LAND-07 · MOBILITY-01	replayed · ROUTE-03	G0 · not authorized
SCN-05 International service assistant	agent.5 · agent.6	PUBLIC-05 · LAND-07	G0 structure	G0 · not authorized
SCN-06 Municipal API governance	agent.4 · agent.6	SCN-06 · SERVICE-ZONE-02	replayed · ROUTE-02	G0 · not authorized
SCN-07 Low-speed robot public test	agent.4 · agent.6	SCN-07 · SERVICE-ZONE-01 · MOBILITY-05	G0 structure	G0 · not authorized
SCN-08 Low-air logistics rule sandbox	agent.4 · agent.6	SCN-08 · GREEN-02	G0 structure	G0 · not authorized
SCN-09 Flooding simulation observatory	agent.4 · agent.6	SCN-09 · GREEN-01 · GREEN-03	G0 structure	G0 · not authorized
SCN-10 Energy-compute-heat ledger	agent.4 · agent.6	SCN-10 · LAND-05 · SERVICE-ZONE-02	G0 structure	G0 · not authorized

Coverage: 4/10 cards have ordinary-person replay; the rest need field, professional and authorization evidence; not_an_official_score=true.

FIG. 01 | JINGZHANG COMMONS: daily life with human override

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

Three linked layers

-  **A City for people**
Retention, skills, inclusion, night, screen-free green
-  **B City for machines**
API, rule-based access, embodied test, reversibility
-  **C Institutional moat**
Energy research, resilience, sandbox, versions

Three cores: Zhongzhiyuan, AI-origin community, Dazhongsi
Two wings: tech service / Xiaoyuehe scenarios

Figure 06 | Node-level public interfaces

Ordinary arrival → human explanation/service → bounded state → freeze/replay/exit · function

Relational reading of existing provisional anchors (not a map, redline, section)

	Ordinary arrival	Human explanation/service	Bounded state
01 Zhongzhiyuan	Ordinary route / observe	Staffed desk / explain	Limited control
02 AI Origin Community	Daily arrival / dwell	Paper / phone / human	Voluntary lock
03 Dazhongsi	Cultural arrival / move	Multilingual / consent	Withdrawal

The node plan expresses state, responsibility and order only; dimensions, capacity and performance are not included.
Evidence chain: existing GeoJSON anchors + package JSON + human fallback. No permission

Figure 10 | Taskbook, public space and annual operation

agent.4 public space · agent.5 cultural narrative · agent.6 global events/long-term operation; all remain G0 concept evidence

agent.4 Public space

Three landmarks bring problems, human override and exit rules into daily space.
L-01 Open Problem Mile Marker · L-02 Calibration Court · L-03 Human Override Beacon

agent.5 Cultural narrative

Timeline + problem line + human-service line; heritage review remains pending.
Centennial Jing-Zhang / Zhongguancun / AI culture

agent.6 Annual operation

Spring publish, summer walk, autumn protocol camp, winter v0.x check; release notes retain the trail.
Public Problem Week · Xiaoyue River walk · Protocol Camp · City check

Four-season rhythm: make version governance visible in public time

Spring | Public Problem Week

Problem, data boundary, human Q&A

Summer | Xiaoyue River Walk

Older people, workers, accessibility seats

Autumn | Developer Protocol Camp

Authorization, exit and explainable G0 protocol

Winter | City v0.x Check

Keep, pause, revise and data gaps

Five conceptual families: spatial carrier → G0 gate → professional review → reversible release

PF-01
Human buffer and community retention

PF-02
Reskilling and night wellbeing

PF-03
City API and data governance

PF-04
Xiaoyue River blue-green and human-machine test

PF-05
Culture, landmarks and global co-creation loop

This board resolves only package JSON and taskbook relations; it is not an official score, confirmed event, operator, heritage permit, partnership or field result.
