

THE POROUS

GROUND CONTRACT

A PORE MUST EXCHANGE AIR WITHOUT
DELIVERING NOISE.

A MULTI-PHYSICS CONTRACT FOR SECTIONS, GROUND-FLOOR
PORES, AND STATION-CITY BUFFERS

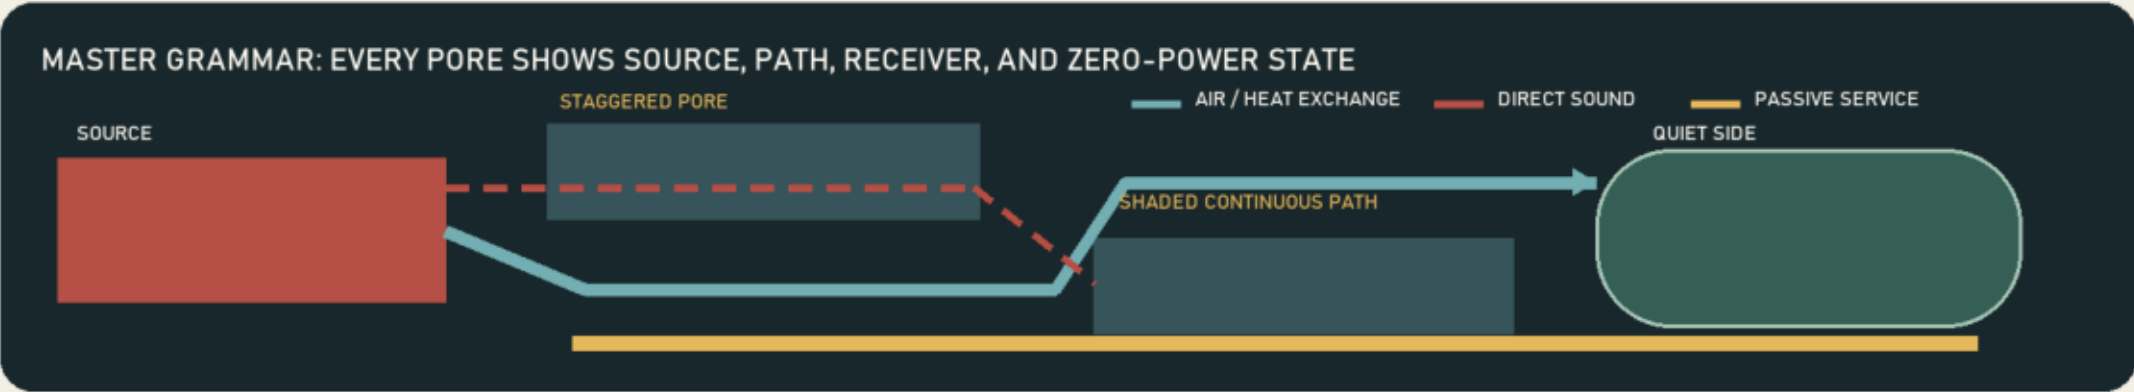

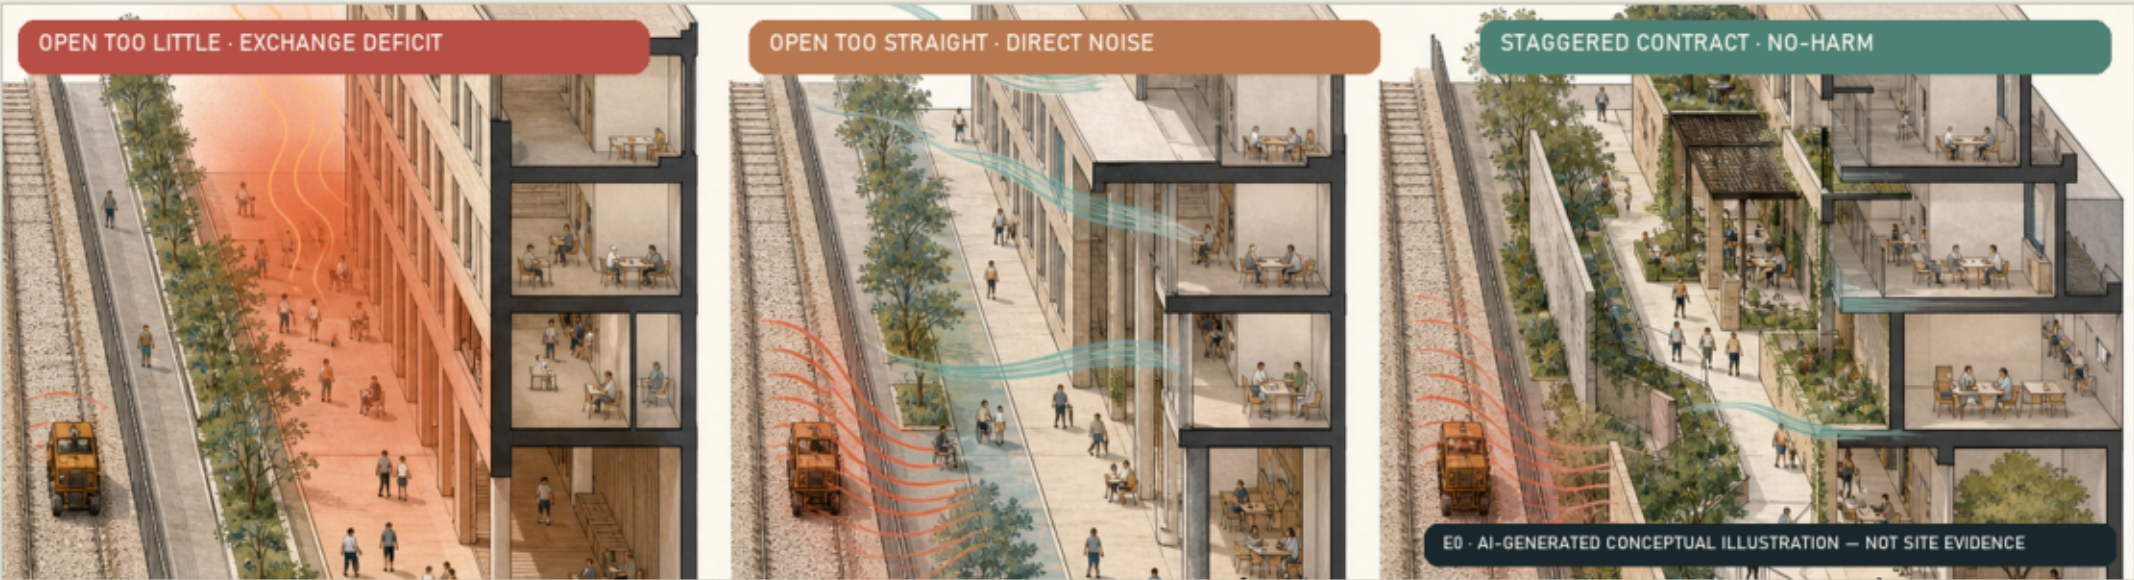

OPEN THE GROUND, NOT A DIRECT NOISE PATH

CONFLICT BECOMES FORM: OPEN TOO LITTLE / OPEN TOO STRAIGHT / STAGGERED PORE + SHADE + QUIET SIDE

01

C-I HOLD · NO FIELD E3/E4

The E0 concept explains three spatial conditions only; it is not current-condition, simulation, or performance evidence.

CONCEPT SPATIAL CONTRACT · NOT FIELD DATA / STATUTORY CONTROL / ENGINEERING RELEASE

Source: spatial-control contract + gpt-image-2 E0 concept; not survey/current condition/simulation/construction/approval/performance evidence; no field E3.

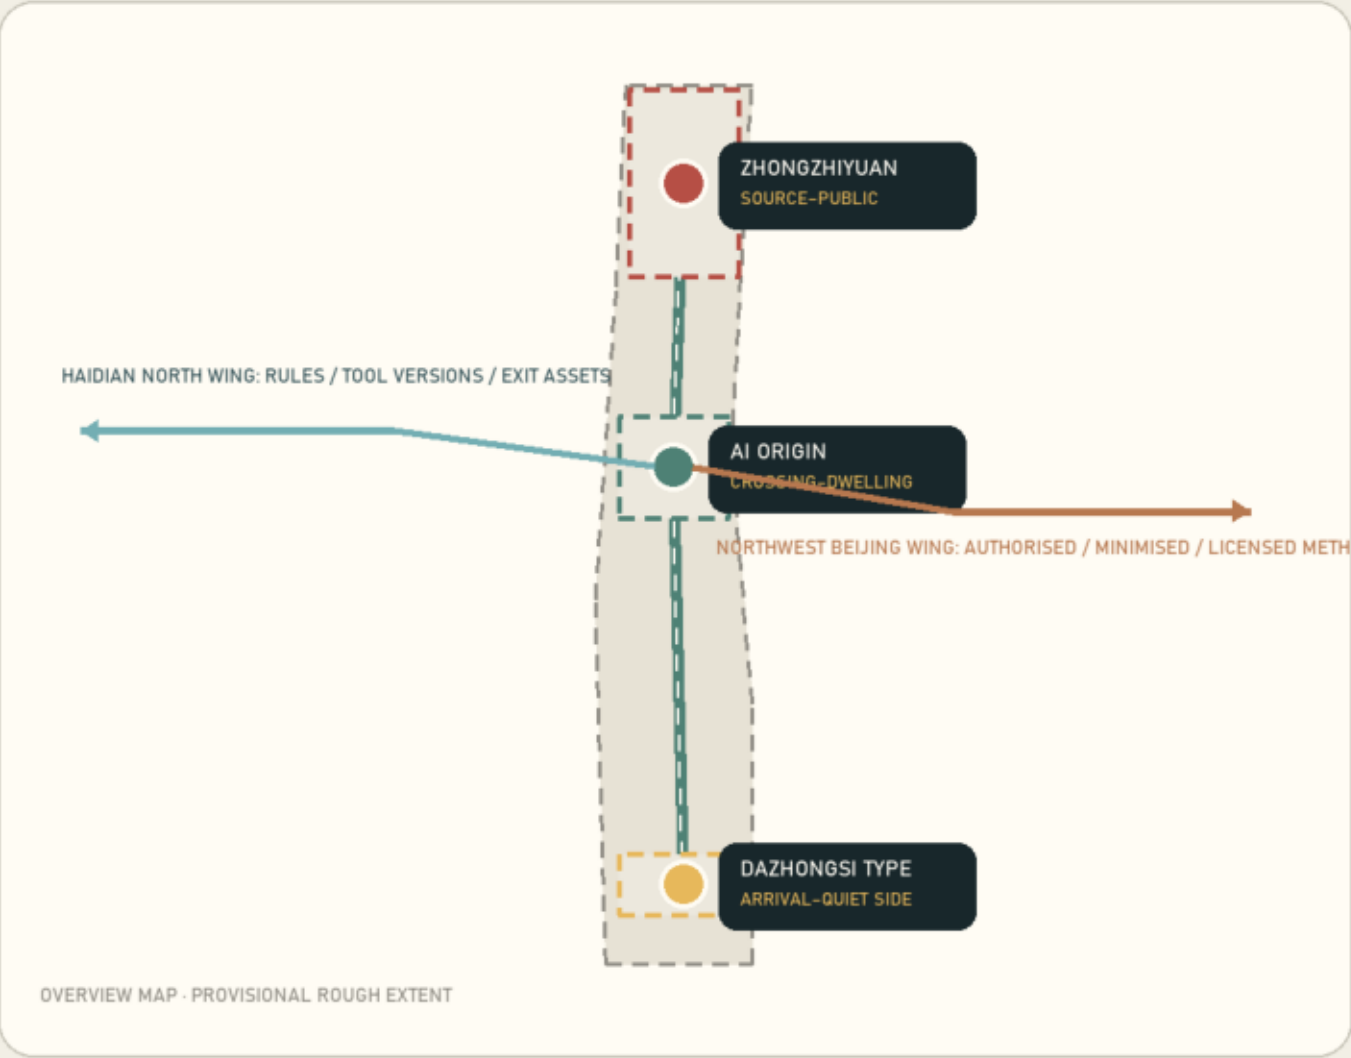

SPACE, PERFORMANCE,
AUTHORITY: UNKNOWN

ONE CONTRACT · THREE NON-INTERCHANGEABLE PROTOTYPES

BELT-WIDE SOURCE-PATH-RECEIVER PLAN; PROVISIONAL GEOMETRY STAYS IN THE EVIDENCE LAYER

C-I HOLD · NO FIELD E3/E4

02

THREE SCALES

43.6 km²

METHOD + EVIDENCE ECOLOGY

Climate / environment / acoustics / open replay; no parcel claims

11.4 km²

MORPHOLOGY-FAMILY NETWORK

Continuous edge / porous block / court / station edge

368.4 ha

THREE DIFFERENT PROTOTYPES

Source-public / crossing-dwelling / arrival-quiet side

PORE CONTRACT = SOURCE + PATH + RECEIVER + SHADE + QUIET SIDE + AUTHORITY + EVIDENCE

Provisional geometry stays in the evidence layer; three areas share a contract, not a repeated device.

SPACE, PERFORMANCE, AUTHORITY: UNKNOWN

THREE AREAS ARE NOT COPIES

SOURCE-PUBLIC / CROSSING-DWELLING / ARRIVAL-QUIET SIDE: ONE PLAN + ONE SECTION EACH

03

C-I HOLD · NO FIELD E3/E4

01

ZHONGZHIYUAN

SOURCE-PUBLIC

PLAN: SOURCE CONTROL + OFFSET GATE + SHADED PUBLIC WALK

SECTION: SOURCE-PATH-RECEIVER / ZERO-POWER SERVICE REMAINS

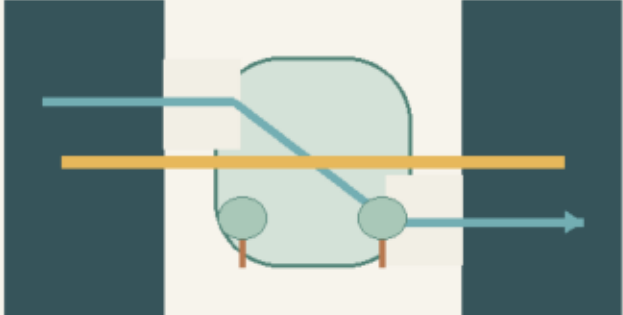

INPUT: test/equipment/road source UNKNOWN

OUTPUT: shaded public walk + quiet review point

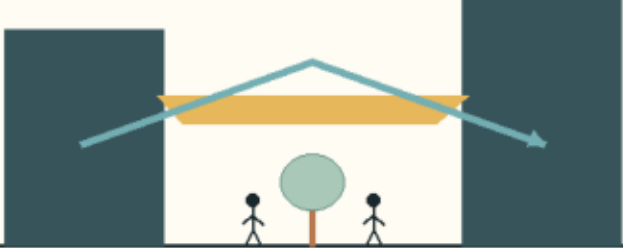

02

AI ORIGIN

CROSSING-DWELLING

PLAN: MULTI-DIRECTION CROSSING + SHADED COURT + QUIET EDGE

SECTION: SOURCE-PATH-RECEIVER / ZERO-POWER SERVICE REMAINS

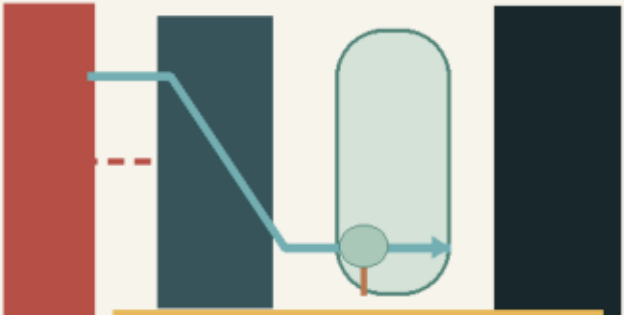

INPUT: campus/community crossing + quiet study

OUTPUT: offset crossing + shared court + quiet inner edge

03

DAZHONGSI TYPE

ARRIVAL-QUIET SIDE

TYPE PLAN: OUTER EDGE + COVERED THRESHOLD + BUFFER COURT + INNER SIDE

SECTION: SOURCE-PATH-RECEIVER / ZERO-POWER SERVICE REMAINS

INPUT: arrival/commercial edge (unanchored)

OUTPUT: threshold-court-inner-side gradient

Each area uses plan + section to show a different source, path, receiver, and failure mode.

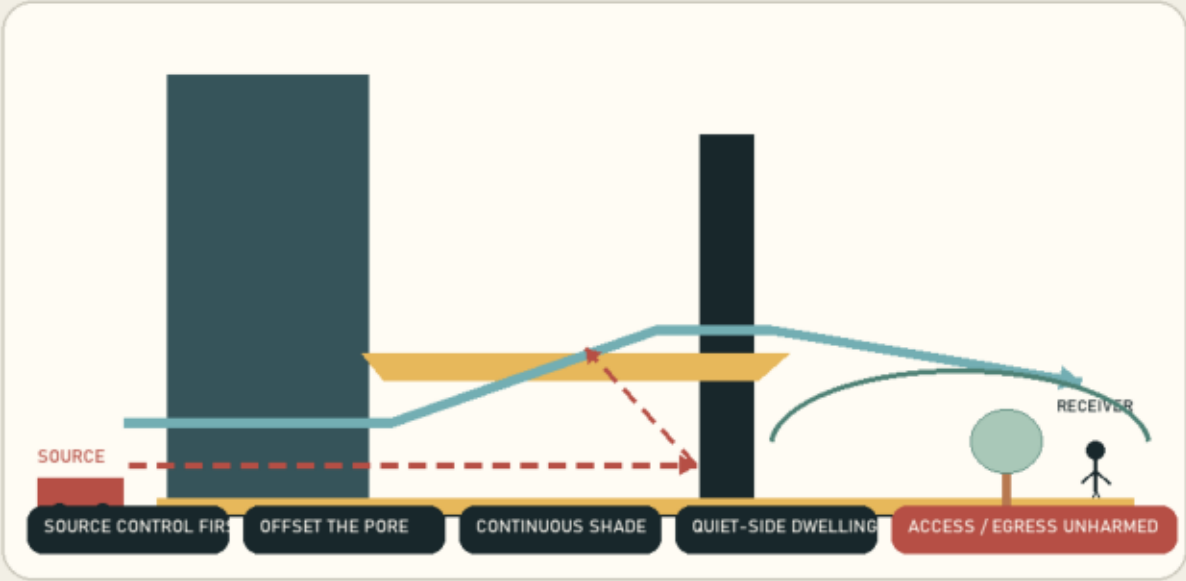

AI MUST PROVE ITSELF

PERMANENT NON-AI B1 / DESIGN-TIME PARETO / HELD-OUT ABLATION / ZERO-POWER SERVICE

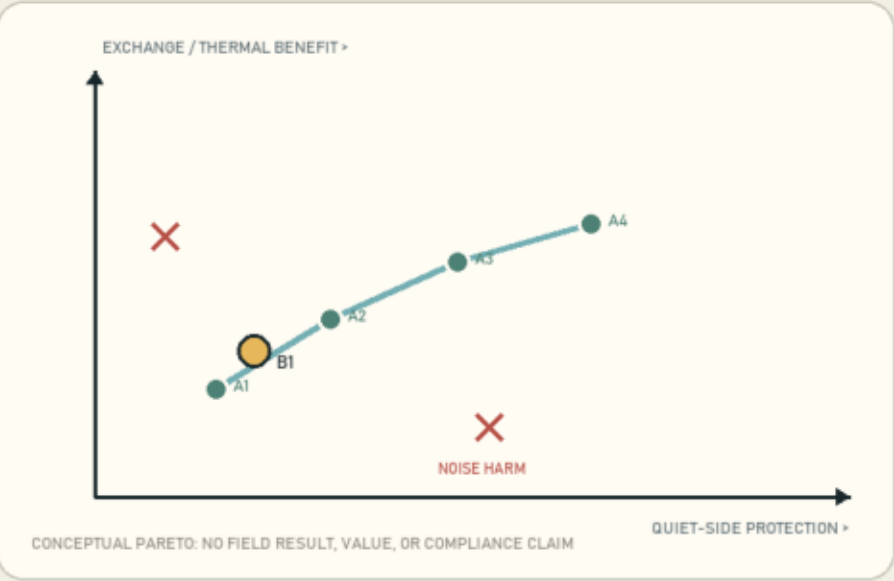

04

C-I HOLD · NO FIELD E3/E4

B1 · PROFESSIONAL RULES DRAW A WORKING SECTION FIRST

A · SEARCH NON-DOMINATED CANDIDATES ONLY

ABLATION GATE

01 FREEZE INPUT + VERSION

Authorised/synthetic data; log every variable and rejection

02 HELD-OUT TEST VS B1

Retain AI only if stable, explainable, and not dominated by B1

03 NO GAIN: DELETE AI

Do not move the KPI; B1 and the passive contract continue

04 ZERO POWER / NETWORK / MODEL

Path, shade, offset pore, quiet side, and manual notice remain

AI IS A DELETABLE DESIGN-TIME RESEARCH LAYER; IT NEVER TRIGGERS CONSTRUCTION, OPENING, SAFETY, OR RECOVERY STATE.

B1 remains. Delete AI if it cannot stably find an explainable non-dominated candidate.

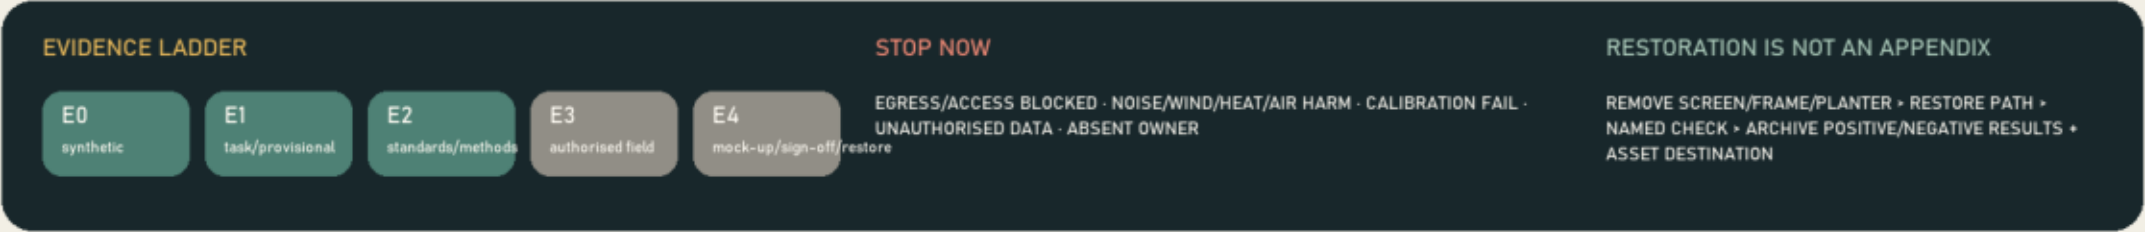

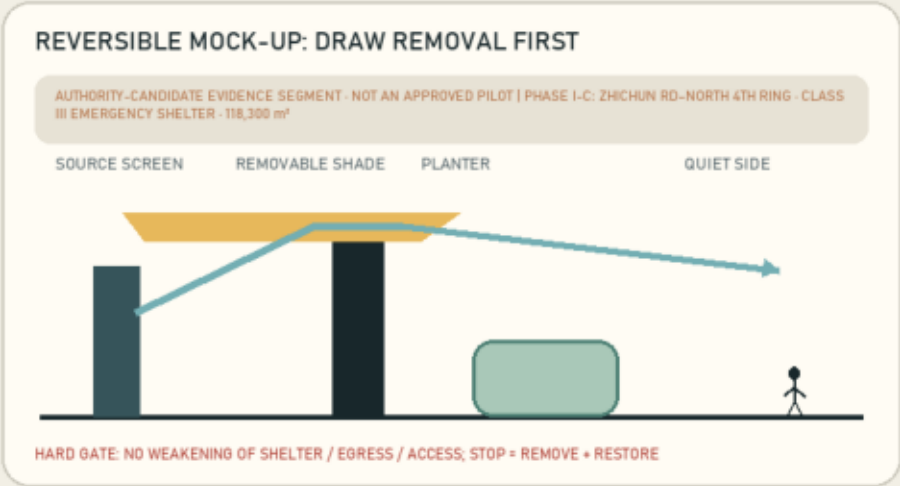

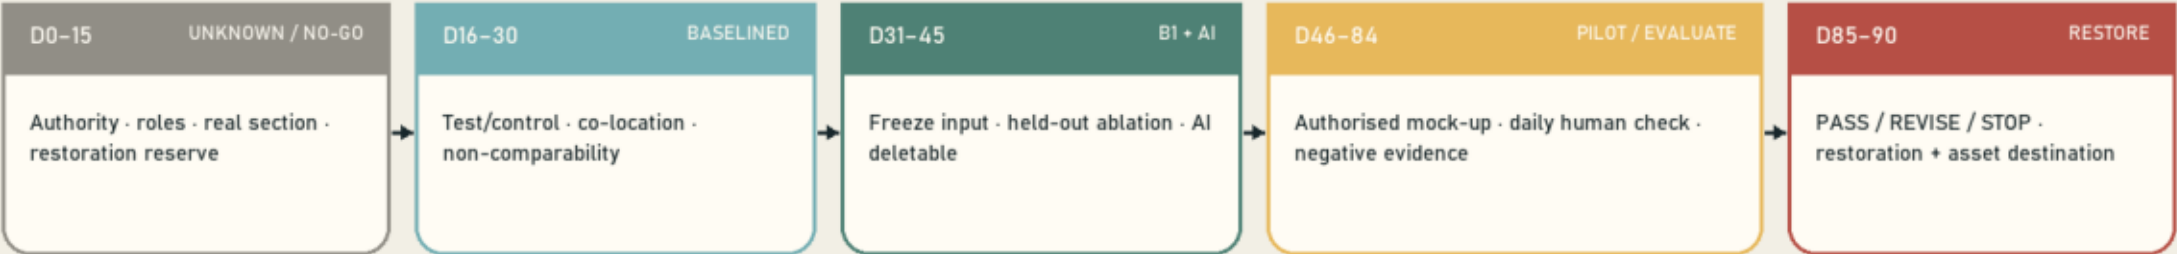

SPACE, PERFORMANCE, AUTHORITY: UNKNOWN

ALLOW FAILURE · REQUIRE RESTORATION

90-DAY AUTHORITY, COST, EVIDENCE, AND EXIT ASSETS; NO AUTHORITY MEANS NO-GO

05

C-I HOLD · NO FIELD E3/E4

CONCEPT SPATIAL CONTRACT · NOT FIELD DATA / STATUTORY CONTROL / ENGINEERING RELEASE

Sources: Beijing Emergency Management Bureau, 2025-03-27; Beijing 2025 Park List, item 385, Authority candidate only; cooperation, section, quotes, performance, E3/E4 UNKNOWN.

No authority, real section, restoration reserve, or professional protocol means NO-GO; E3/E4 do not exist.

SPACE, PERFORMANCE, AUTHORITY: UNKNOWN

KNOWN

Task scales, key-area names, provisional geometry, submitted metrics, public standards, and methods.

UNKNOWN

Official geometry, real section, sources, authority, fire/access, instruments, quotes, and performance.

HARD BOUNDARY / HOLD

Machine PASS is not design quality; C-I stays HOLD until E3/E4, reversible mock-up, and restoration evidence.

MINIMUM NEXT STEP: obtain one lawfully authorised real section, pre-register B0/B1/AI no-harm comparison, and reserve restoration funding; any missing item stops production.
