

JING-ZHANG TWO ANSWERS · DAZHONGSI CIVIC ADOPTION SAMPLE

Every AI trial must preserve a public route that cannot be sacrificed.

Public-source concept · prototype dimensions pending survey · not field-run7

ONE SPINE · THREE STATIONS

S7 flagship brings spatial proof to the first screen

THE NON-NEGOTIABLE PUBLIC ROUTE

Every AI trial first proves the baseline remains whole.

01 · baseline stands alone

02 · AI boundary never crosses public route

03 · staff, E-stop and recovery are locatable

04 · adopt / revise / stop only

NOT FIELD-RUN · E1 CONCEPT DESIGN

90-SECOND JURY ROUTE

Locate the continuous baseline, inspect S7 at four scales, then verify receipt and exit.

06

continuous baseline

PUBLIC ROUTES BEFORE MOBILITY TRIALS

01

two continuous public axes
complete when AI is off

02

two rain-garden edges
complete when AI is off

03

shade, seats and water
complete when AI is off

04

fire, egress and takeover
complete when AI is off

05

separate timed trial bay
never occupies baseline

PRIORITY

SOURCES, EVIDENCE LEVELS + PRECISION

OSM supports directional context only; dimensions are reviewable prototype assumptions.

URBAN INTERFACE + REVERSIBLE TRIAL OVERLAY

SPACE, NOT A COMPONENT TABLE

01 · PERMANENT BASELINE

routes, interchange, shade, rain, staffed service

retained through all four states

02 · REVERSIBLE AI TRIAL

separate bay, buffer, control, isolated power

visible only in TRIAL; closed in PAUSE

03 · PUBLIC EVIDENCE

receipt, appeal, status, human decision

readable without AI online

RENEWAL SEQUENCE

PATH → EDGE → PLUG-IN

Repair public route and ground edge before equipment.

Not land classification, intensity control or statutory plan

THREE CONFLICTS, THREE SPATIAL TYPES

V6 selects one flagship sample rather than diluting all three.

ONE FLAGSHIP SAMPLE + TWO PROTOCOL COMPARATORS

OVERALL URBAN DESIGN

The continuous baseline leads; S7 locates civic adoption in space.

Public-source concept · prototype dimensions pending survey · not field-run5

ONE SPINE · THREE STATIONS

S7 flagship brings spatial proof to the first screen

THE NON-NEGOTIABLE PUBLIC ROUTE

Every AI trial first proves the baseline remains whole.

- 01 · baseline stands alone
 - 02 · AI boundary never crosses public route
 - 03 · staff, E-stop and recovery are locatable
 - 04 · adopt / revise / stop only
- NOT FIELD-RUN · E1 CONCEPT DESIGN**

CIVIC SPINE, TWO WINGS + SIX STITCHES

Walking, rest, interchange and staffed service remain whole with AI off.

PUBLIC ROUTES BEFORE MOBILITY TRIALS

NINE COMPONENTS + FOUR-STATE LIFECYCLE

Components declare interfaces, separation, maintenance and retirement.

OPEN

baseline open

TRIAL

AI enters by window

PAUSE

staff takeover

RETIRE

equipment removed; space restored

T2 ZHONGZHIYUAN · SAFETY COMPARATOR

A complete public bypass encloses the controlled loop.

T2 DETAIL, SECTION + STOP

Buffer intrusion, repeated near miss or E-stop failure stops the trial.

T2 · Controlled robot-pedestrian-accessibility test · 1:200

Prototype dimensions, not field measurements; the baseline route never crosses the AI trial boundary

Current proof covers safety space and ownership, not robot performance.

E0 → E4 EVIDENCE LADDER

NOT FIELD-RUN · E1 FLAGSHIP READY · E2 BASELINE PENDING

Two public axes, conventional interchange and staff complete the task

Only in the southeast bay, timed and under staffed control

100 eligible passages per mode; seven-day stratified baseline window

Collision, buffer intrusion, E-stop failure, route loss or takeover timeout

Stop, staff completion, reopen routes, remove equipment, committee review

STOP

Authority: human scene committee; no decision is selected

E1 CONCEPT DESIGN · ESTABLISHED

E3 CONTROLLED TRIAL · PENDING FIELD

E4 CIVIC ADOPTION · PENDING FIELD

RACI • SIX LOCATABLE OWNERS

06 · Public: appeals at evidence square

NO PROGRESSION

permit gap / baseline regression / severe event

S2 AI ORIGIN · CIVIC-SERVICE COMPARATOR

No-account passage stands first; the plug-in wall can close.

S2 DETAIL, SECTION + RECEIPT

Identity misuse, rights mistranslation or failed correction stops AI.

S2 · International arrival and civic-service navigation · 1:200

Prototype dimensions, not field measurements; the baseline route never crosses the AI trial boundary

S7 DAZHONGSI · 1:2000 FLAGSHIP PLAN

Two public axes never cross the southeast AI boundary.

S7 · 1:500 DETAIL, 1:200 SECTION + FOUR STATES

Curbs, crossings, transit, blue-green, staff, E-stops, fire and removal are visible together.

NINE-SCENE REPLICATION CATALOGUE

Replicate the protocol, never unverified outcomes.

ECOSYSTEM, WINGS + TRANSLATION

Exchange problems, capabilities and evidence without inventing commitments.

RACI, PERMITS, PHASING + ASSET DESTINATION

No move from OPEN to TRIAL with permit gaps or baseline regression.

ALL STATES: baseline continuous; final decision is ADOPT / REVISE / STOP only

ASSET

forecourt + restoration

BASELINE

northwest service pavilion

AI

southeast trial bay

SAFETY

buffer edge + two E-stops

PUBLIC

appeals at evidence square

METRICS, EVIDENCE, RISK + UNKNOWNNS

Denominator and window are designed; observations, thresholds and adoption remain unknown.

S7 CIVIC ADOPTION RECEIPT: SPACE, MEASURE, OWNER, EXIT

S7 / SCN-010 · Conventional transit interchange with optional low-speed feeder

NOT FIELD-RUN · E1 FLAGSHIP READY · E2 BASELINE PENDING

BASELINE

Two public axes, conventional interchange and staff complete the task

AI INCREMENT

Only in the southeast bay, timed and under staffed control

DENOMINATOR

100 eligible passages per mode; seven-day stratified baseline window

ZERO-TOLERANCE STOP

Collision, buffer intrusion, E-stop failure, route loss or takeover timeout

RESTORED STATE

Stop, staff completion, reopen routes, remove equipment, committee review

ADOPT

REVISE

STOP

Authority: human scene committee; no decision is selected
