

JINGZHANG WEAVELINE • CENTURY TRACK BELT (concept)

Jingzhang Railway Heritage Park corridor renewal & AI-convergence belt • reference scheme

- Three official tiers & regional synergy mechanism
- Three-node prototypes & reversible components
- AI ecosystem: 8-element loop + 5 cases + 10 scenario cards
- Pilot matrix P1-P6 & long-term operations
- Personas & service journeys (5)
- Community participation & redress loop
- AI governance: anonymized only • human review • no over-monitoring
- All geometry provisional; recalculate after official data

Contents:

P1 Overview & scope

P2 Nodes & AI ecosystem

P3 Implementation & operations

P4 Inclusion & compliance

Brand Visual Identity Direction (concept • internal working codename)

Mark construction • warp-weft weave motif

Color direction

Rail grey #445566
primary • structures/text

Cold iron blue #2e4e62
primary • graphics/signage

Signal amber #e6a33d
accent, ~100%

Ballast cream #f3d9d1
accent, ~100%

Safety white #ffffff
neutral text

Warp rails (century memory): 1 x warp stitching (urban repair) x 3 (urban)

Monos/total size: rail grey or safety white only; minimum 24px on screens, 8mm in print.

Lockups: zh/en name combination

"JINGZHANG WEAVELINE"

CENTURY TRACK BELT

(经纬京张 • 百年轨带)

Lockups: stacked or horizontal zh/en; accent color never in body text;
English lockups use Noto Sans SC caps with 0.5em tracking; zh titles recommend
Noto Serif SC, body text Noto Sans SC.
Fonts are SIL OFL 1.1 licensed; lawful embedding and redistribution, no remote font dependency.
Tagline (time narrative): 1909-2026 Century Track Belt

Mono & reverse versions

Small size rule: at ~12px or ~18mm use only the mark and ac; no accent color; keep contrast min 4.5:1.

Monos versions for print & mono media

Identify hierarchy (vs signage / nodes / events)

Belt mark (master brand)
applies to the whole warp-knit and belt, the only master mark

Event sub-brands AP-Q1-Q5
info post-S, guide terminus S, honor wall H, mono only

Applications (info post-S / terminus-T / honor wall)

信息枢纽

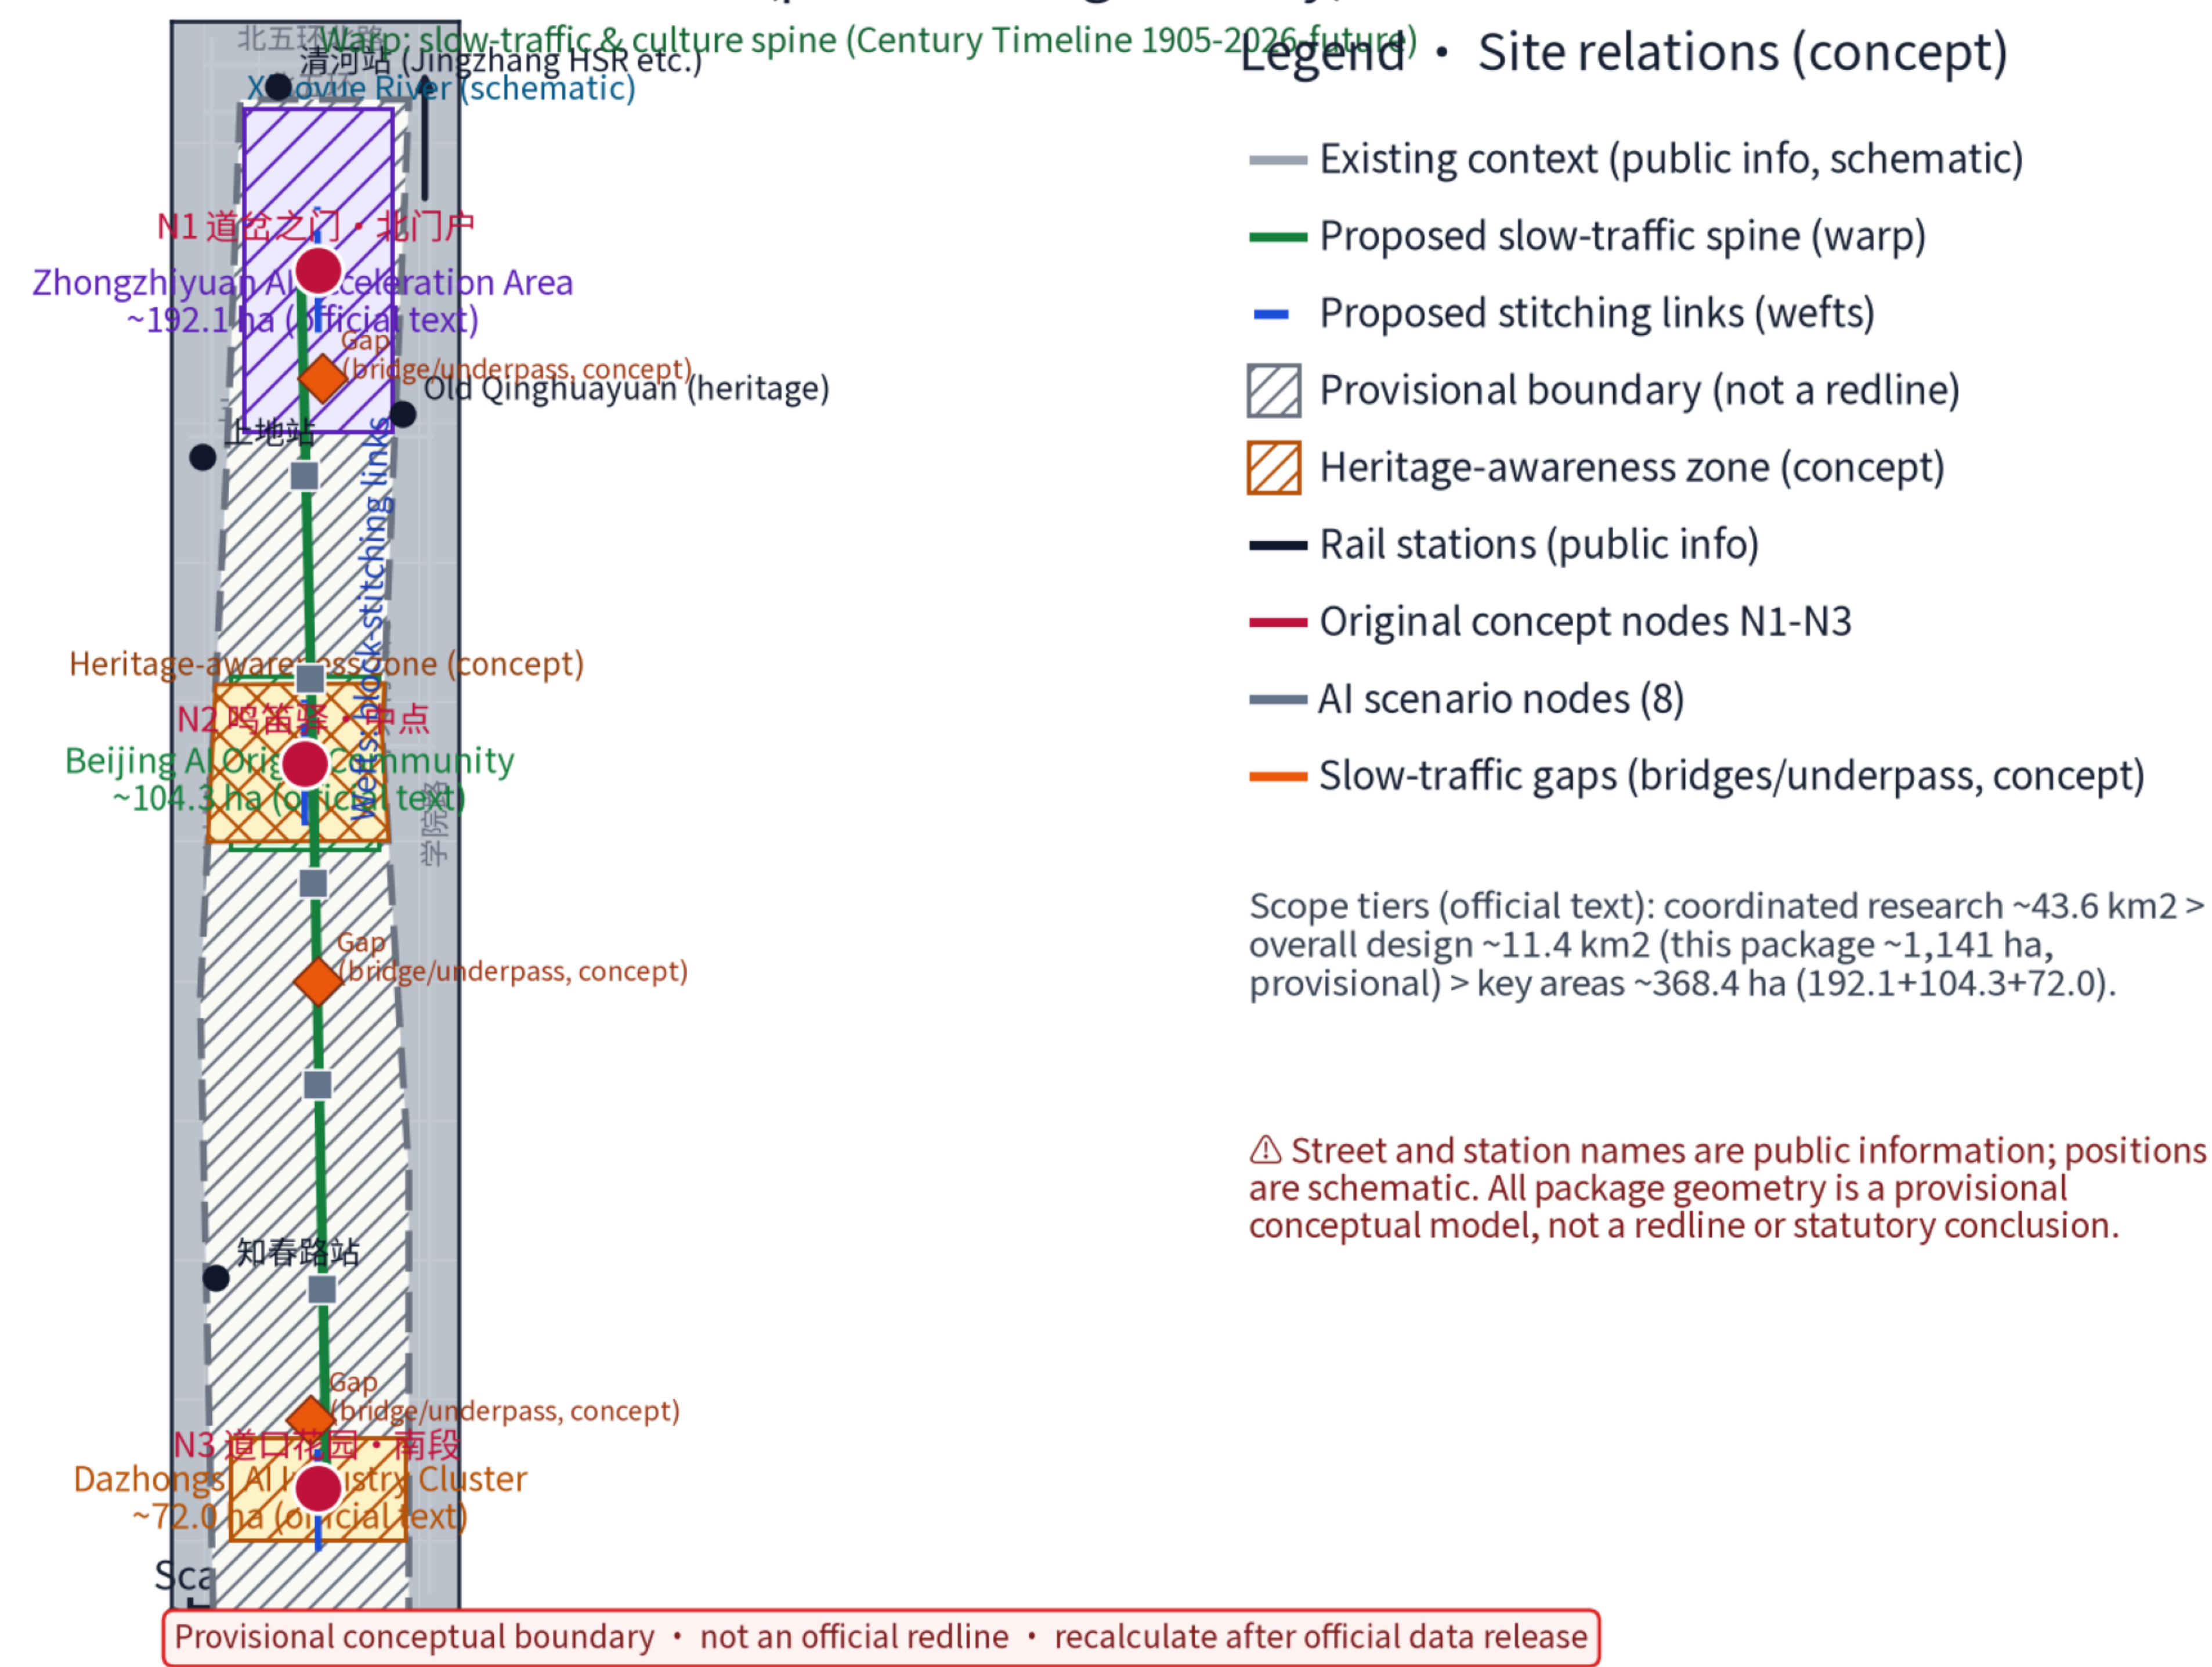

百年记忆墙

百年记忆墙

All of the above are concept directions, not final; names and marks (including Weaveline) are internal working codenames until prior rights clearance; no external registration.

Provisional conceptual boundary • not an official redline • recalculate after official data release

Overall Design Overview • Site Relations and Three Tiers (provisional geometry)

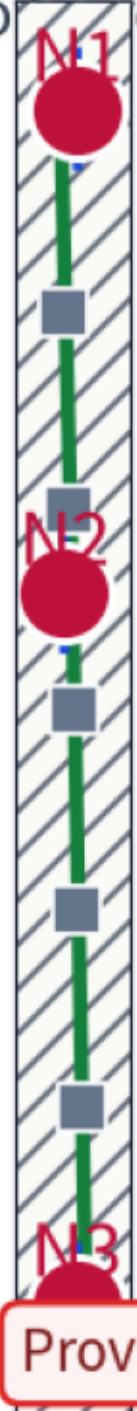

Regional Synergy Mechanism Map (concept • no official bodies or commitments)

Three-Node Spatial Prototype Cards and Design Tasks (concept)

Node index (provisional geometry; siting to be re-evaluated after heritage/rail assessment)

N1 Daocha Gate (heritage culture gateway • north end)

- Suitable space type: Heritage park north gateway plaza and platform culture grounds (concept)
- Core components: Century Timeline origin engraving, AR time platform, honor wall-H, reversible canopy and info post-S
- Day/night use: Day: guided tours, archive access; night: timeline lighting, AR time show
- Cultural narrative: Starting point of the 1905 start - 1909 opening narrative
- AI interaction: AR history guide (historian review), booking-based flow control, on-device rendering
- Accessibility: Wheelchair turning circle, low service counter, voice/tactile guidance with human option
- Reversible installation: Modular platform and canopy, relocatable

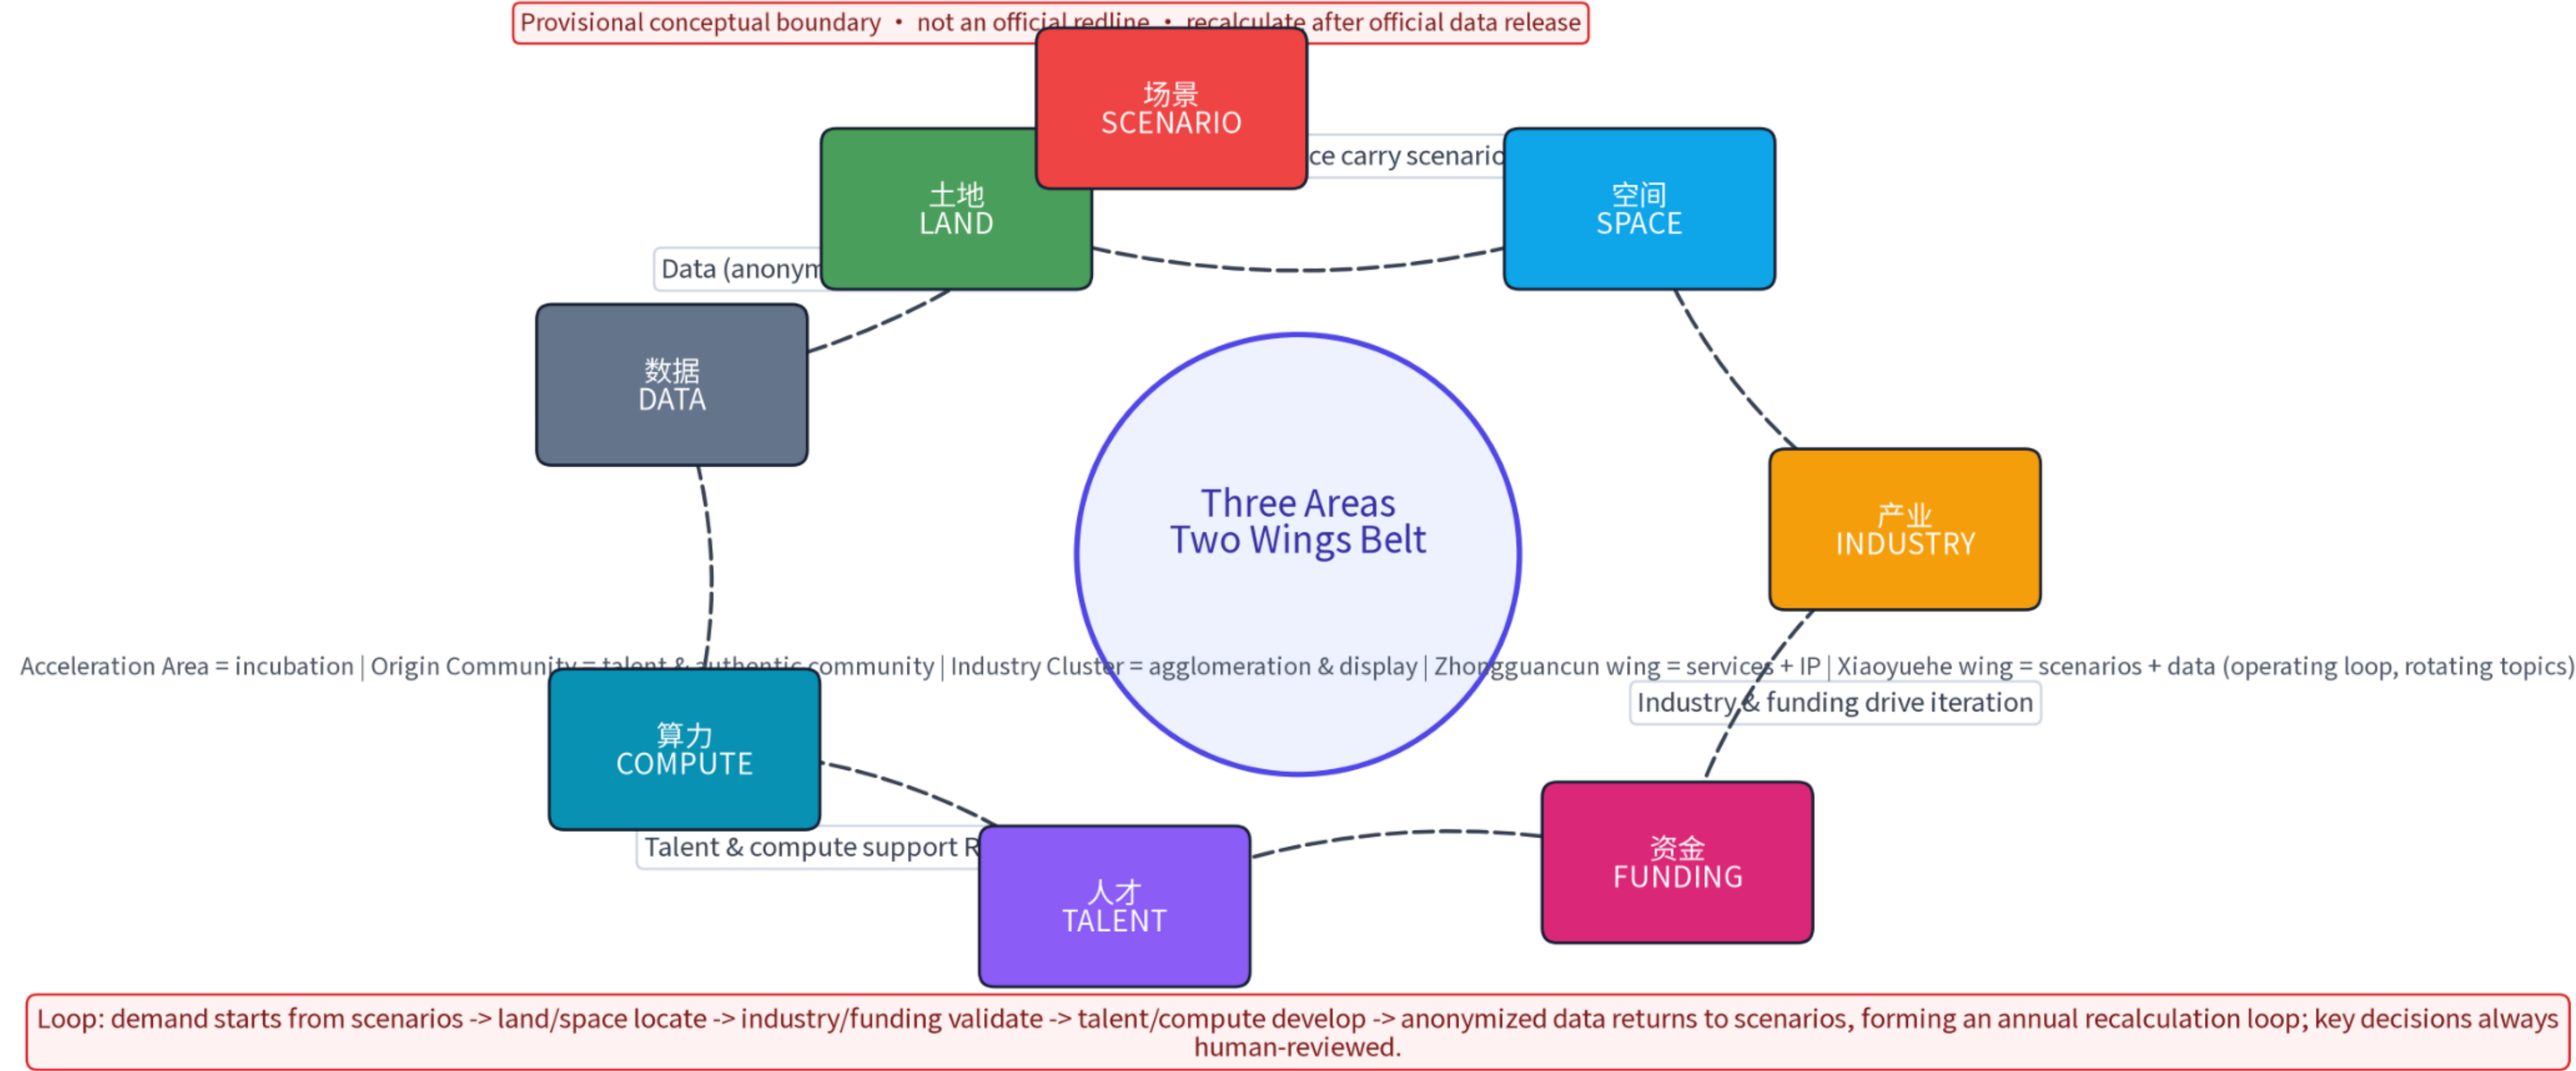

N3 Crossing Garden (community stitching node • south residential segment)

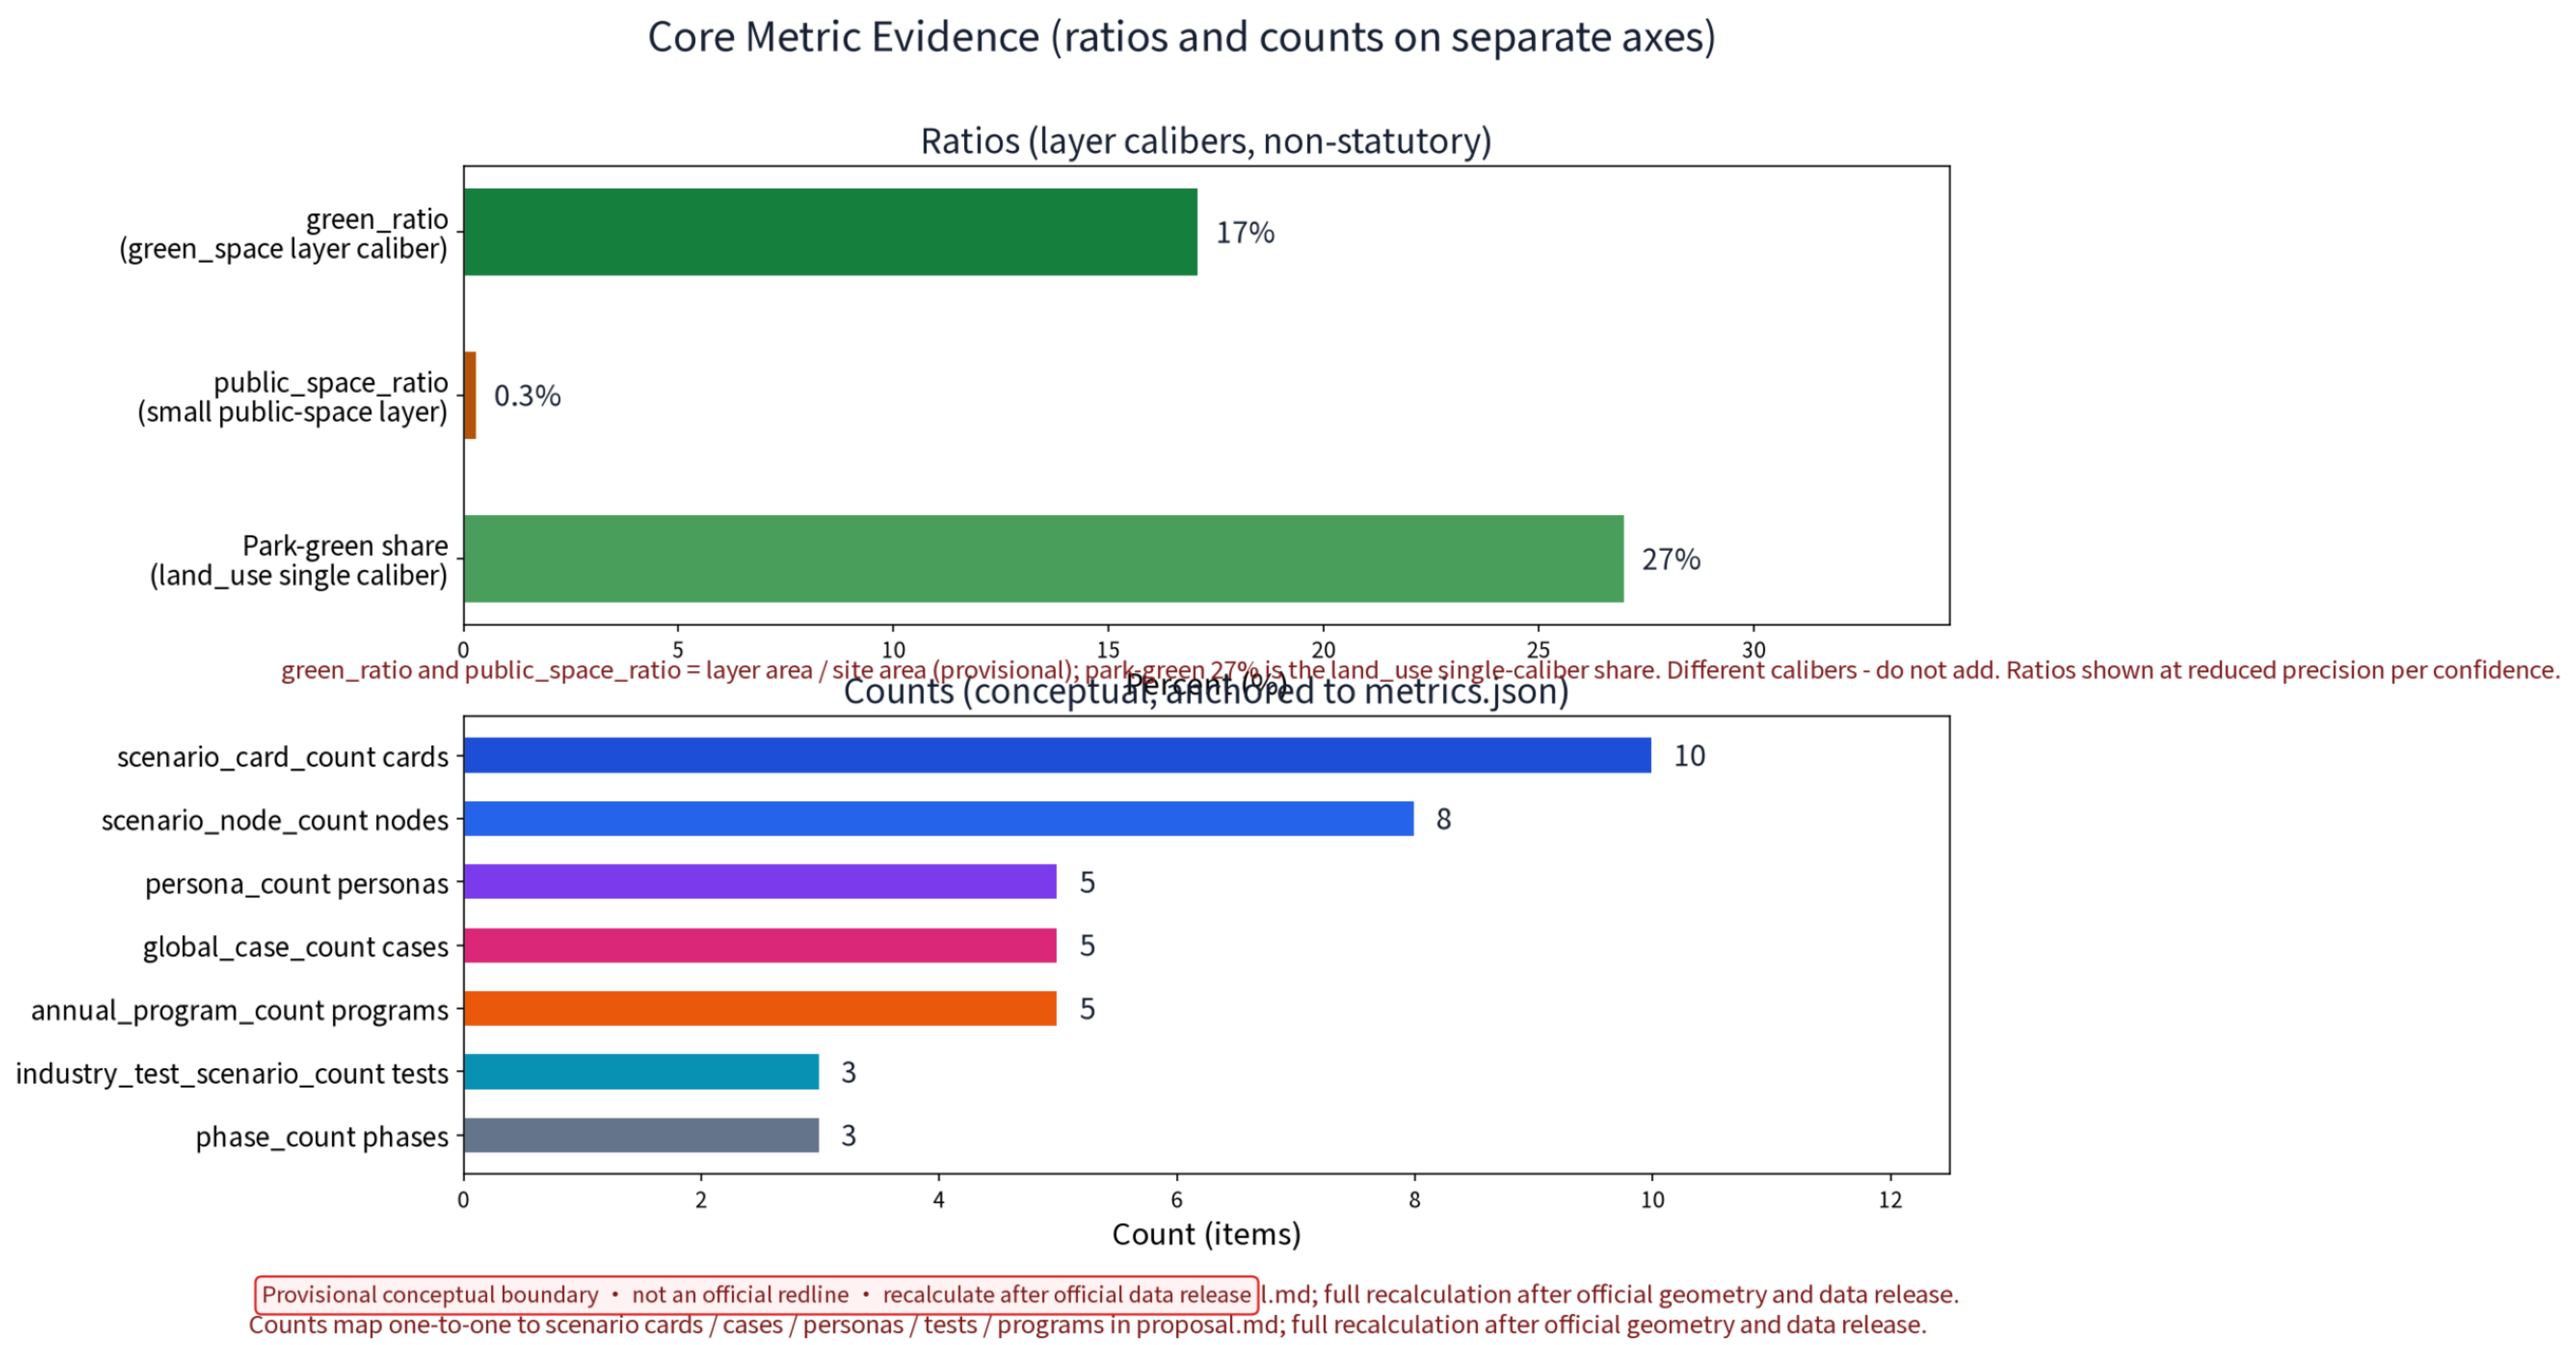

- Suitable space type: Community garden on the former crossing image in the dense residential segment (concept)
- Core components: Sleeper planters, adoption-points board, Weave Assembly point, child-friendly play corner, elderly rest zone
- Day/night use: Day: garden care, play and rest; night: tiered lighting with quiet hours
- Cultural narrative: Crossing memory: everyday life where railway and street once crossed
- AI interaction: Adoption points (human-reviewed), maintenance reminders; no individual tracking
- Accessibility: All-age accessible loop, low planters, non-digital sign-up channels
- Reversible installation: Sleeper-module planters and facilities, rotated by points

N2 Whistle Post (slow-traffic vitality post • mid-flow segment)

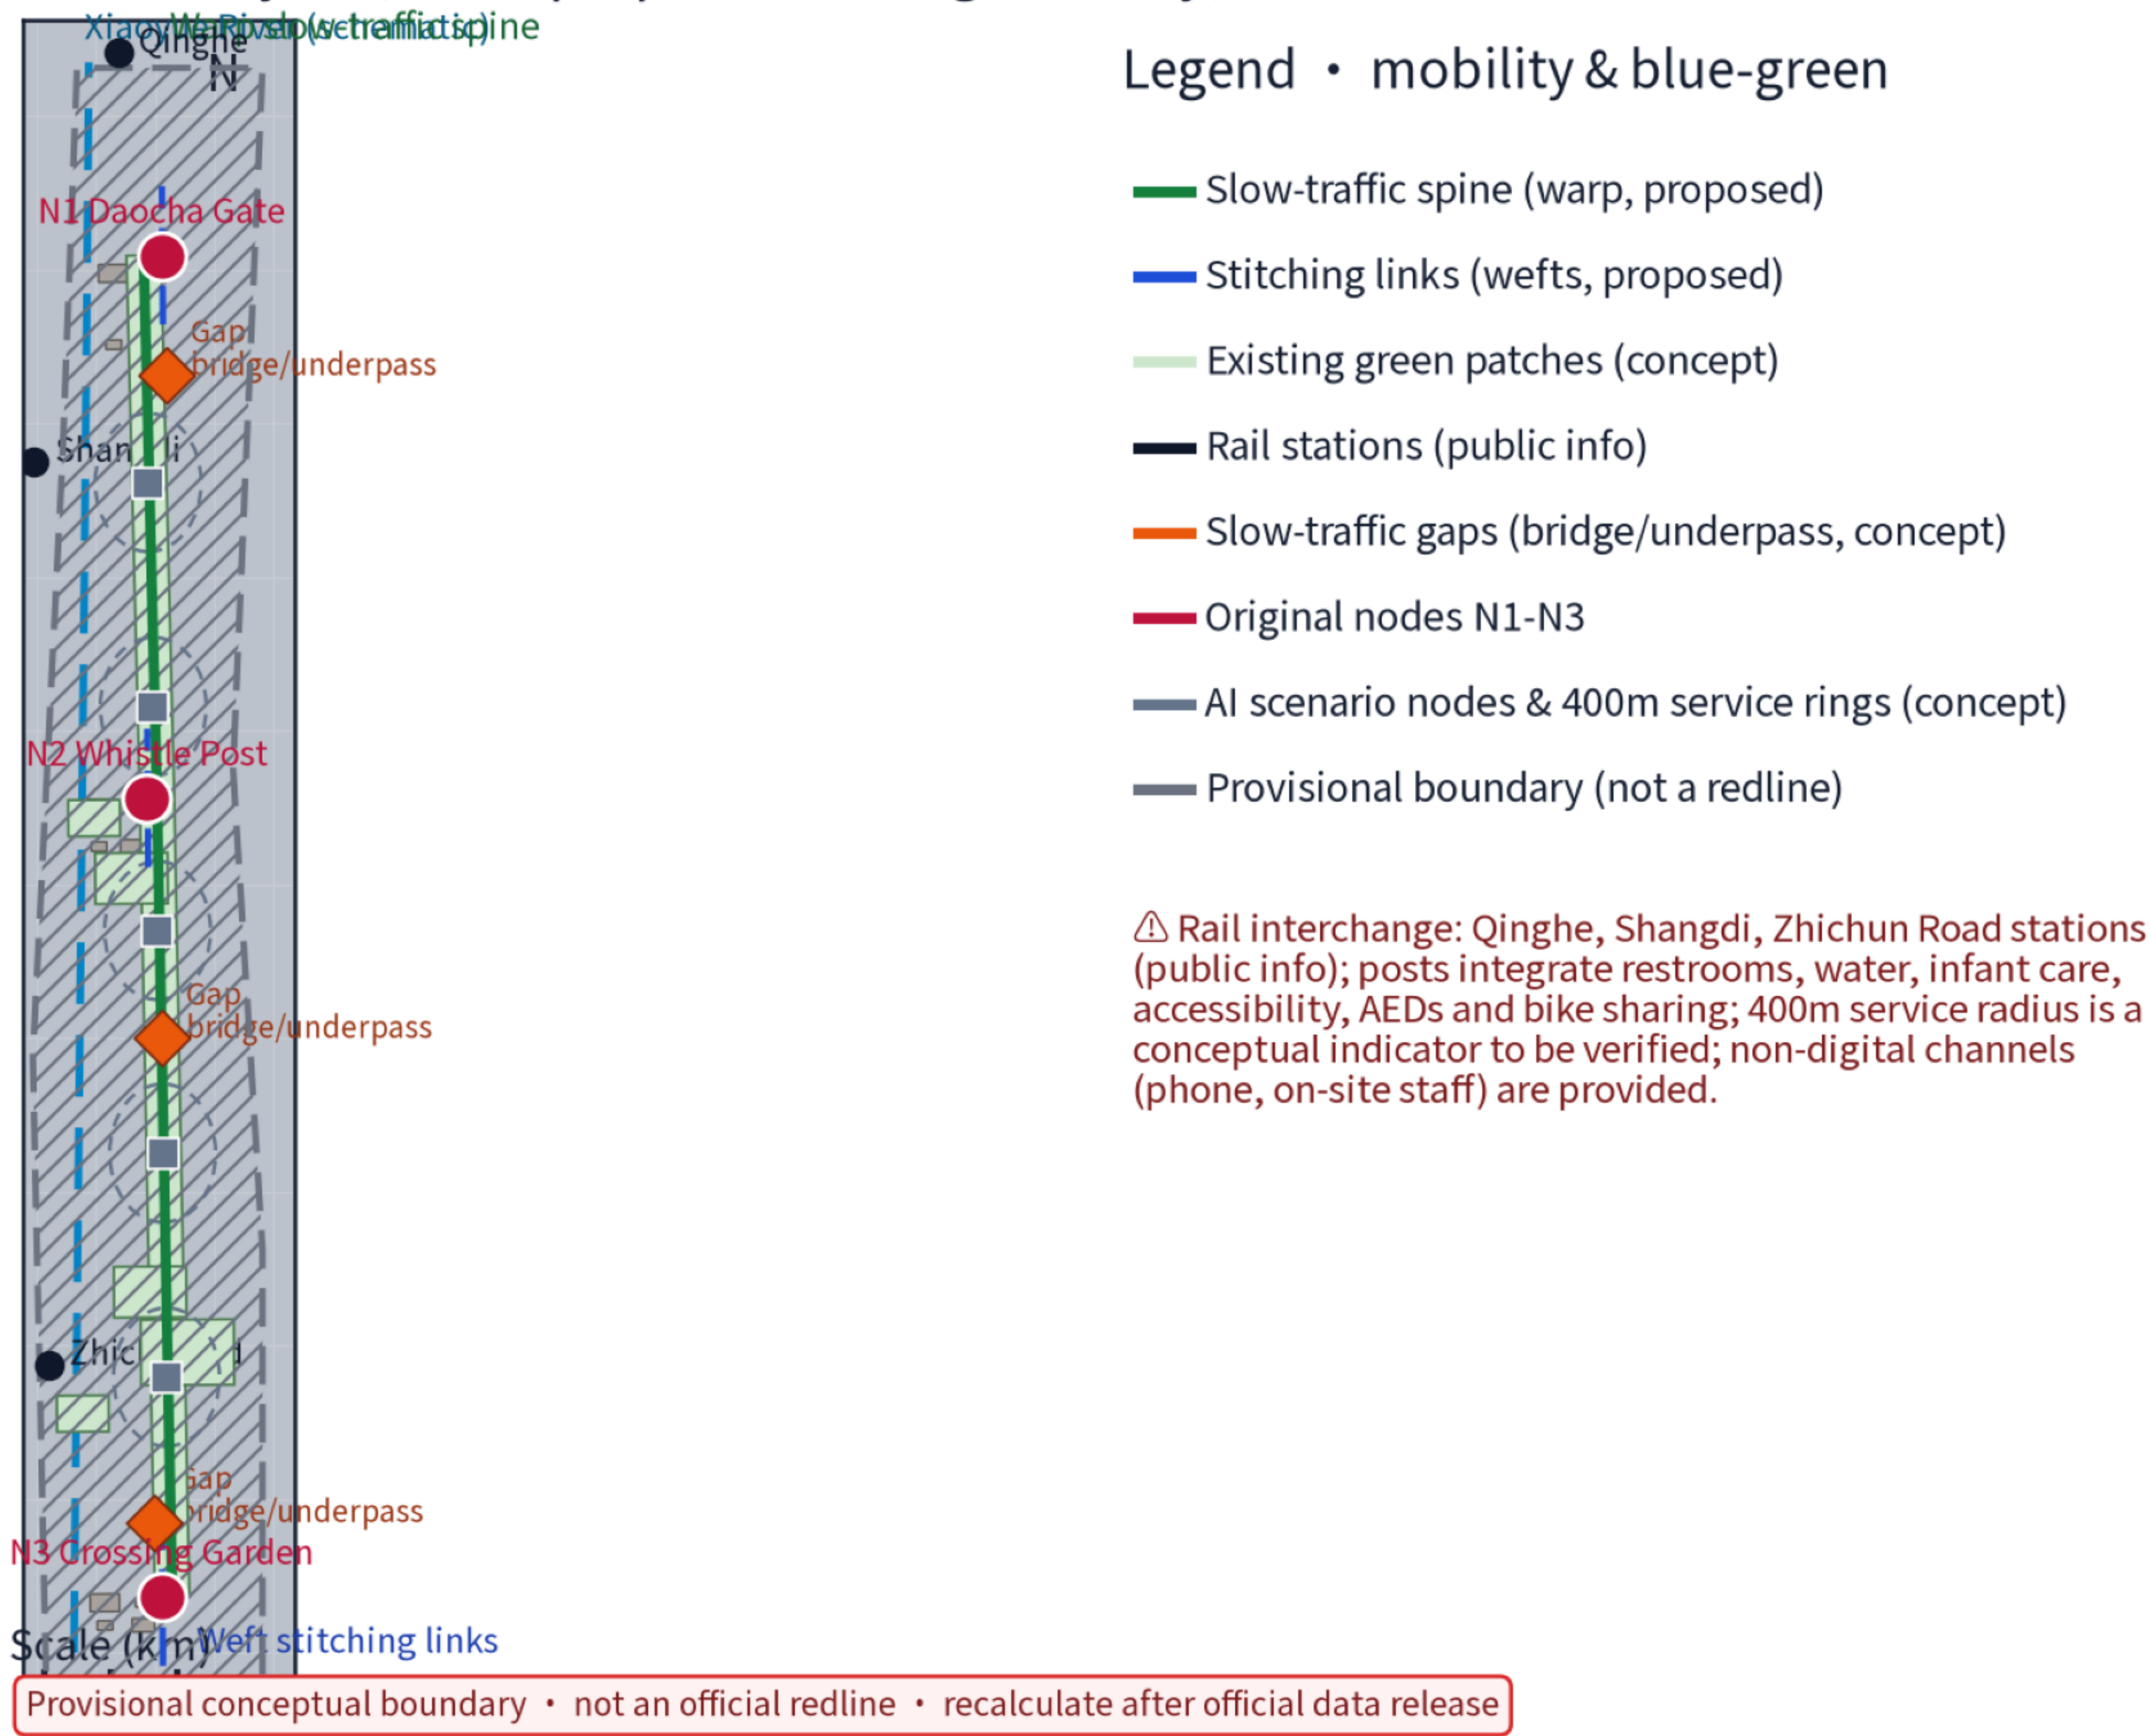

- Suitable space type: Slow-traffic service post with small performance grounds at mid-flow (concept)
- Core components: Service pavilion, station-concert stage, booking screen, water/infant-care/accessible restroom module
- Day/night use: Day: supply, bike service, rest; night: station concerts & open days
- Cultural narrative: Whistle motif: train arrival-departure memory vs contemporary city sound
- AI interaction: Event booking and time-slot flow control; edge anonymized crowd aggregation (human review)
- Accessibility: Low counter, step-free routes, AED and staffed service
- Reversible installation: Container-module pavilion and stage, withdrawable to public facility

AI Innovation Ecosystem Map - eight-element loop of land-space-industry-funding-talent-compute-data-scenario (concept)

Slow Mobility and Blue-Green Network Analysis (concept, provisional geometry)

Land-Use Structure (single caliber, concept)
