

Rail Memory AI Commons Overview

Rail Memory AI Commons

Memory Link evidence and closure lifecycle + three repositories + four honor nodes

Memory Link

evidence fields + closure review + reopen while preserving history

4 honor nodes

12 memory points

3 repositories

2 service wings

Source: submission GeoJSON + metrics.json + proposal text; the provisional boundary supports concept review and self-check only, not an official redline.

Land Use Structure and Scope Transmission

Rail Memory AI Commons

actual provisional topology, not statutory land conversion

- 0802 R&D commons
- 1401 green open space
- 09 industry service
- 0702 community service

43.6 km2 coordinated research

11.4 km2 overall design

3 key areas

12 memory points

Source: submission GeoJSON + metrics.json + proposal text; the provisional boundary supports concept review and self-check only, not an official redline.

Three Key Areas: Memory Prototypes

Rail Memory AI Commons

trptych of forge, studio, and public adoption exchange

Stack Memory Forge

model/data/robotics validation

- reviewable scenario entrance
- rights and source ledger
- human steward, closure review, and reopen gate

AI Origin Open Memory Studio

open-source translation and rights

- reviewable scenario entrance
- rights and source ledger
- human steward, closure review, and reopen gate

Public Adoption Exchange

public preview and feedback

- reviewable scenario entrance
- rights and source ledger
- human steward, closure review, and reopen gate

Source: submission GeoJSON + metrics.json + proposal text; the provisional boundary supports concept review and self-check only, not an official redline.

Mobility and Blue-Green Network

Rail Memory AI Commons

conceptual centerlines + green spine + twelve memory points

22.99 km
conceptual network length

12
reviewable memory points

4
honor/pilgrimage nodes

unknown
road redline area

Road redlines, under-bridge
space, parking and municipal
conditions require official
data.

Source: submission GeoJSON + metrics.json + proposal text; the provisional boundary supports concept review and self-check only, not an official redline.

Core Metrics and Evidence Chain

Rail Memory AI Commons

known, provisional, and unknown states kept visible

Pending operational baseline

memory_link_closure_confirmation_rate: unknown

log - assign - act - closure review - reopen/escalate - archive

Unknown controls

floor_area_ratio / height_control_m / road_area_sqm / statutory_building_density

Source: submission GeoJSON + metrics.json + proposal text; the provisional boundary supports concept review and self-check only, not an official redline.
