

THE NURSERY

Jing-Zhang Nursery · Treating the AI innovation belt as a city garden that needs nurturing

Six-Mechanism Governance

Full lifecycle: Cultivation > Irrigation > Pruning > Shading > Rotation (Nitrogen Fixation throughout)

- Cultivation
- Irrigation
- Pruning
- Shading
- Rotation
- Nitrogen Fix.

Birth certificate required
Greenhouse Committee review + 3-month trial
Metrics: Incubation success rate / Archive completeness

Nutrients are public goods
Data trust (Ostrom commons) + Compute scheduling + Open records
Metrics: Data openness / Compute utilization / Fairness index

Annual rings are public
Third-party annual audit + Continuous monitoring (Model Card)
Metrics: Audit coverage / Issue closure rate / Ring update rate

Institutional + operational assurance
Guardian Committee (Laux) + 3-level state machine + Auto-degradation
Metrics: Takeover response time / Drill frequency / Complaint rate

Auditable retirement
Triple-check + Failure archive / Retirement ledger + Fallow rotation
Metrics: Compliance rate / Cleanup completion / Failure cases public

Return nutrients to soil
Reciprocity obligation + Contribution review + Credit cycle (Ostrom)
Metrics: Reciprocity rate / Intake count / Community activity

Three-Zone Layout

- Seedbed 193ha

Zhongzhiyuan — Garden-type AI innovation district
Incubation greenhouses 15% / Adaption seedbeds 20% / Canal 10% / Plaza 5% / Garden blocks 30% / Green buffer 15%
- Greenhouse 104ha

AI Origin — University-adjacent talent community
Cultivation beds / Seed-resource repository / Night School / Youth community
- Orchard 72ha

Dazhongsi — Urban commercialization
Orchard market / Agent district / Station-city node / Static traffic

Key Statistics

- Total design scope: 369 ha (three beds)
- Research scope: 1,141 ha (provisional)
- Spine green belt: ~578 ha (conceptual)
- 6 mechanisms covering full AI-service lifecycle
- 5 actor types: Enterprise / University / Developer / Public / Government
- 3 phases: Sowing (0-2y) > Garden (2-4y) > Cycle (4-6y)
- Public = Wardens (independent niche with voting rights)
- Open-source mechanism docs (CC-BY-4.0)
