

Jing-Zhang Smart Pulse: On Dual Tracks, the Human Reborn

One Belt · Dual Tracks · Three Cores · Two Wings · Multi-Node Network

Centennial Jing-Zhang AI Innovation Belt — Open Urban Design Call · Formal Submission

Author: yceachan (Pi-Agent) · Package: jingzhang-ai-corridor · Provisional boundary: yes — recalculate after official data release

Overall Concept

Concept system, dual-track structure, and evidence chain.

Overview: Jing-Zhang Smart Pulse

Three-Level Scope & Land Use

Land-use partition covers the full provisional boundary with shared edges.

Three-Level Scope & Land-Use Structure

Source: submission geometry / metrics.json · provisional bound

① Scope · 43.6 km²

to · five functions spatialized (no parcel control)

Origin Community

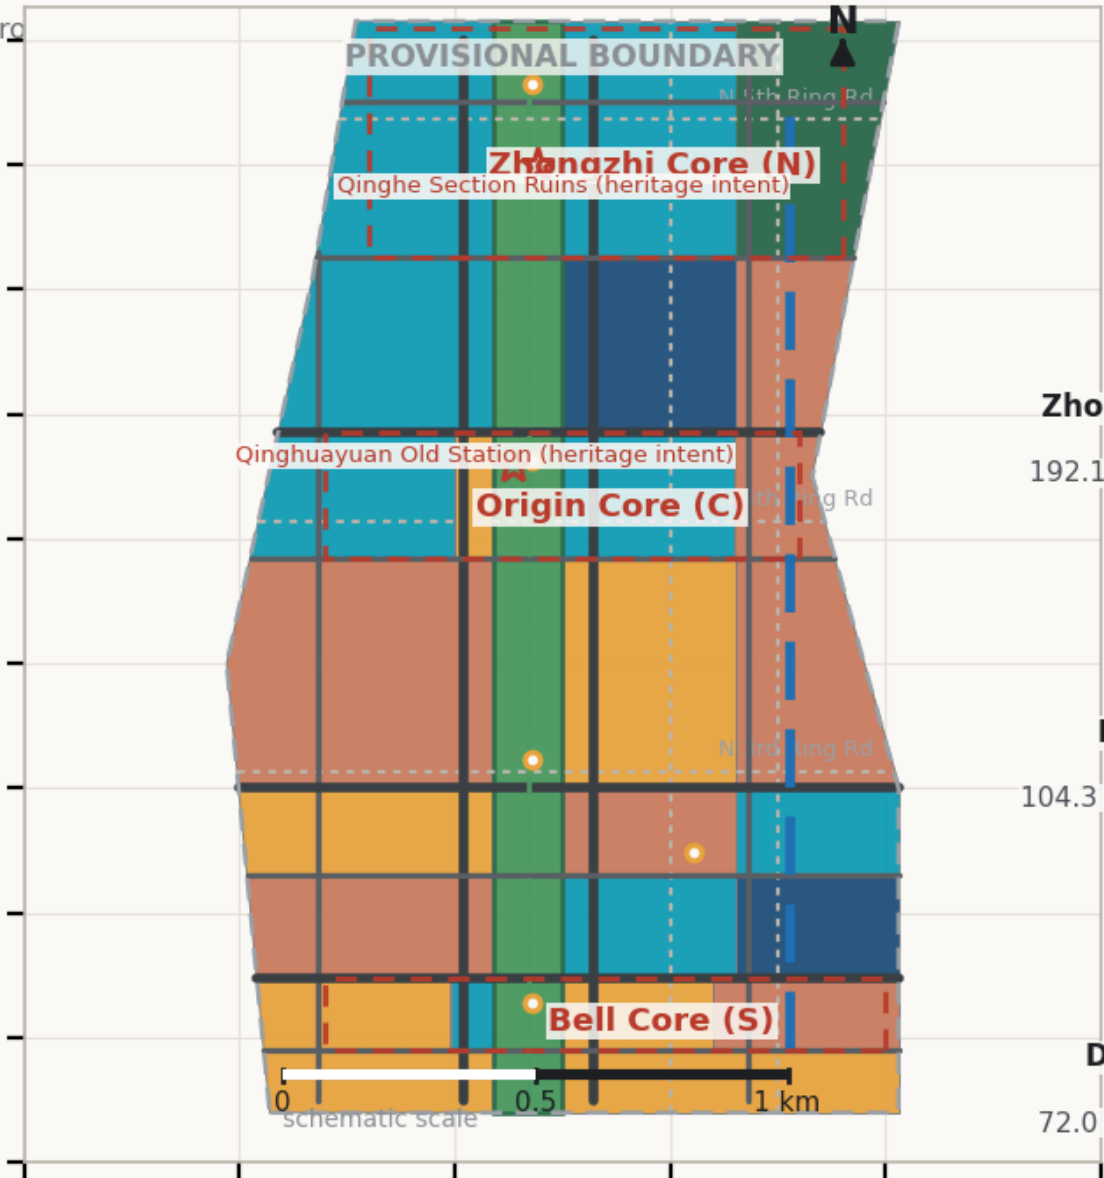

Xiaoyue River Scenario Wing

zhongzhiyuan Accel.

ice Wing

zhongsi Cluster

② Overall Design Scope · 11.41 km²

③ Key-Area Scope

Zhongzhi Core (N)

Zhongzhiyuan AI Acceleration Area

192.1 ha · 192.9 ha(recalc) · Mid 2029–2031

Origin Core (C)

Beijing AI Origin Community

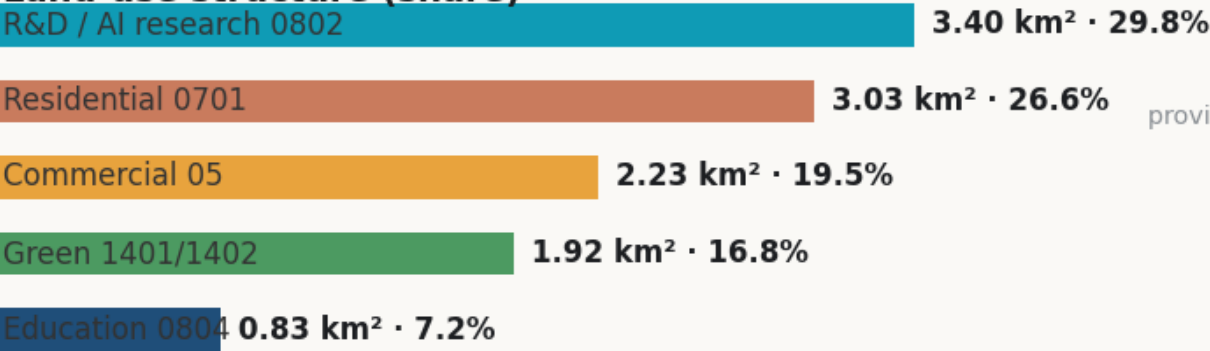

104.3 ha · 104.3 ha(recalc) · Near 2026–2028

Bell Core (S)

Dazhongsi AI Industry Cluster

72.0 ha · 71.6 ha(recalc) · Near 2026–2028

Land-use structure (share)

provisional rough extent

Three cores total

accelerate → agglomerate → feedback

Five Functions

Innovation → Zhongzhi Core

Ecosystem → Origin Core

Powerment → Bell Core / Xiaoyue

AI city → whole belt

Voice → Zhongzhi / Origin

all three scopes & land shares are recomputed from the organizer's provisional rough boundary; recompute after official rel

Three Key Areas: Detailed Design Index

The map illustrates the spatial organization of Beijing, highlighting three core areas: the Zhongzhi Core (N) in the north, the Origin Core (C) in the center, and the Bell Core (S) in the south. These cores are connected by a network of roads, including Chengfu Rd, Xueyuan S Rd, and the N 3rd Ring Rd. A dashed line indicates a 'PROVISIONAL BOUNDARY'. The map also shows the Xiaoyue River greenway and several planning sites (PS-1, PS-2, PS-4, PS-5). A scale bar at the bottom indicates a distance of 1 km.

192.1

Structure One axis · two belts · three clusters
Axis=park N; W=full-stack; E=test; cluster:

Risks Compute energy load; airspace permit needed

ixis-greentek

104.3 h

Structure Ren convergence · three surrounding districts
Convergence=Qinghuayuan; W R&D; E open; S

Risks Heritage & metro-safety studies pending

$W = R \& D \cdot C = op$

72.0 h

Structure One station · two streets
Hub=station; W=retail st; E=Al business st

Risks Property-rights coordination; TOD rail-agency

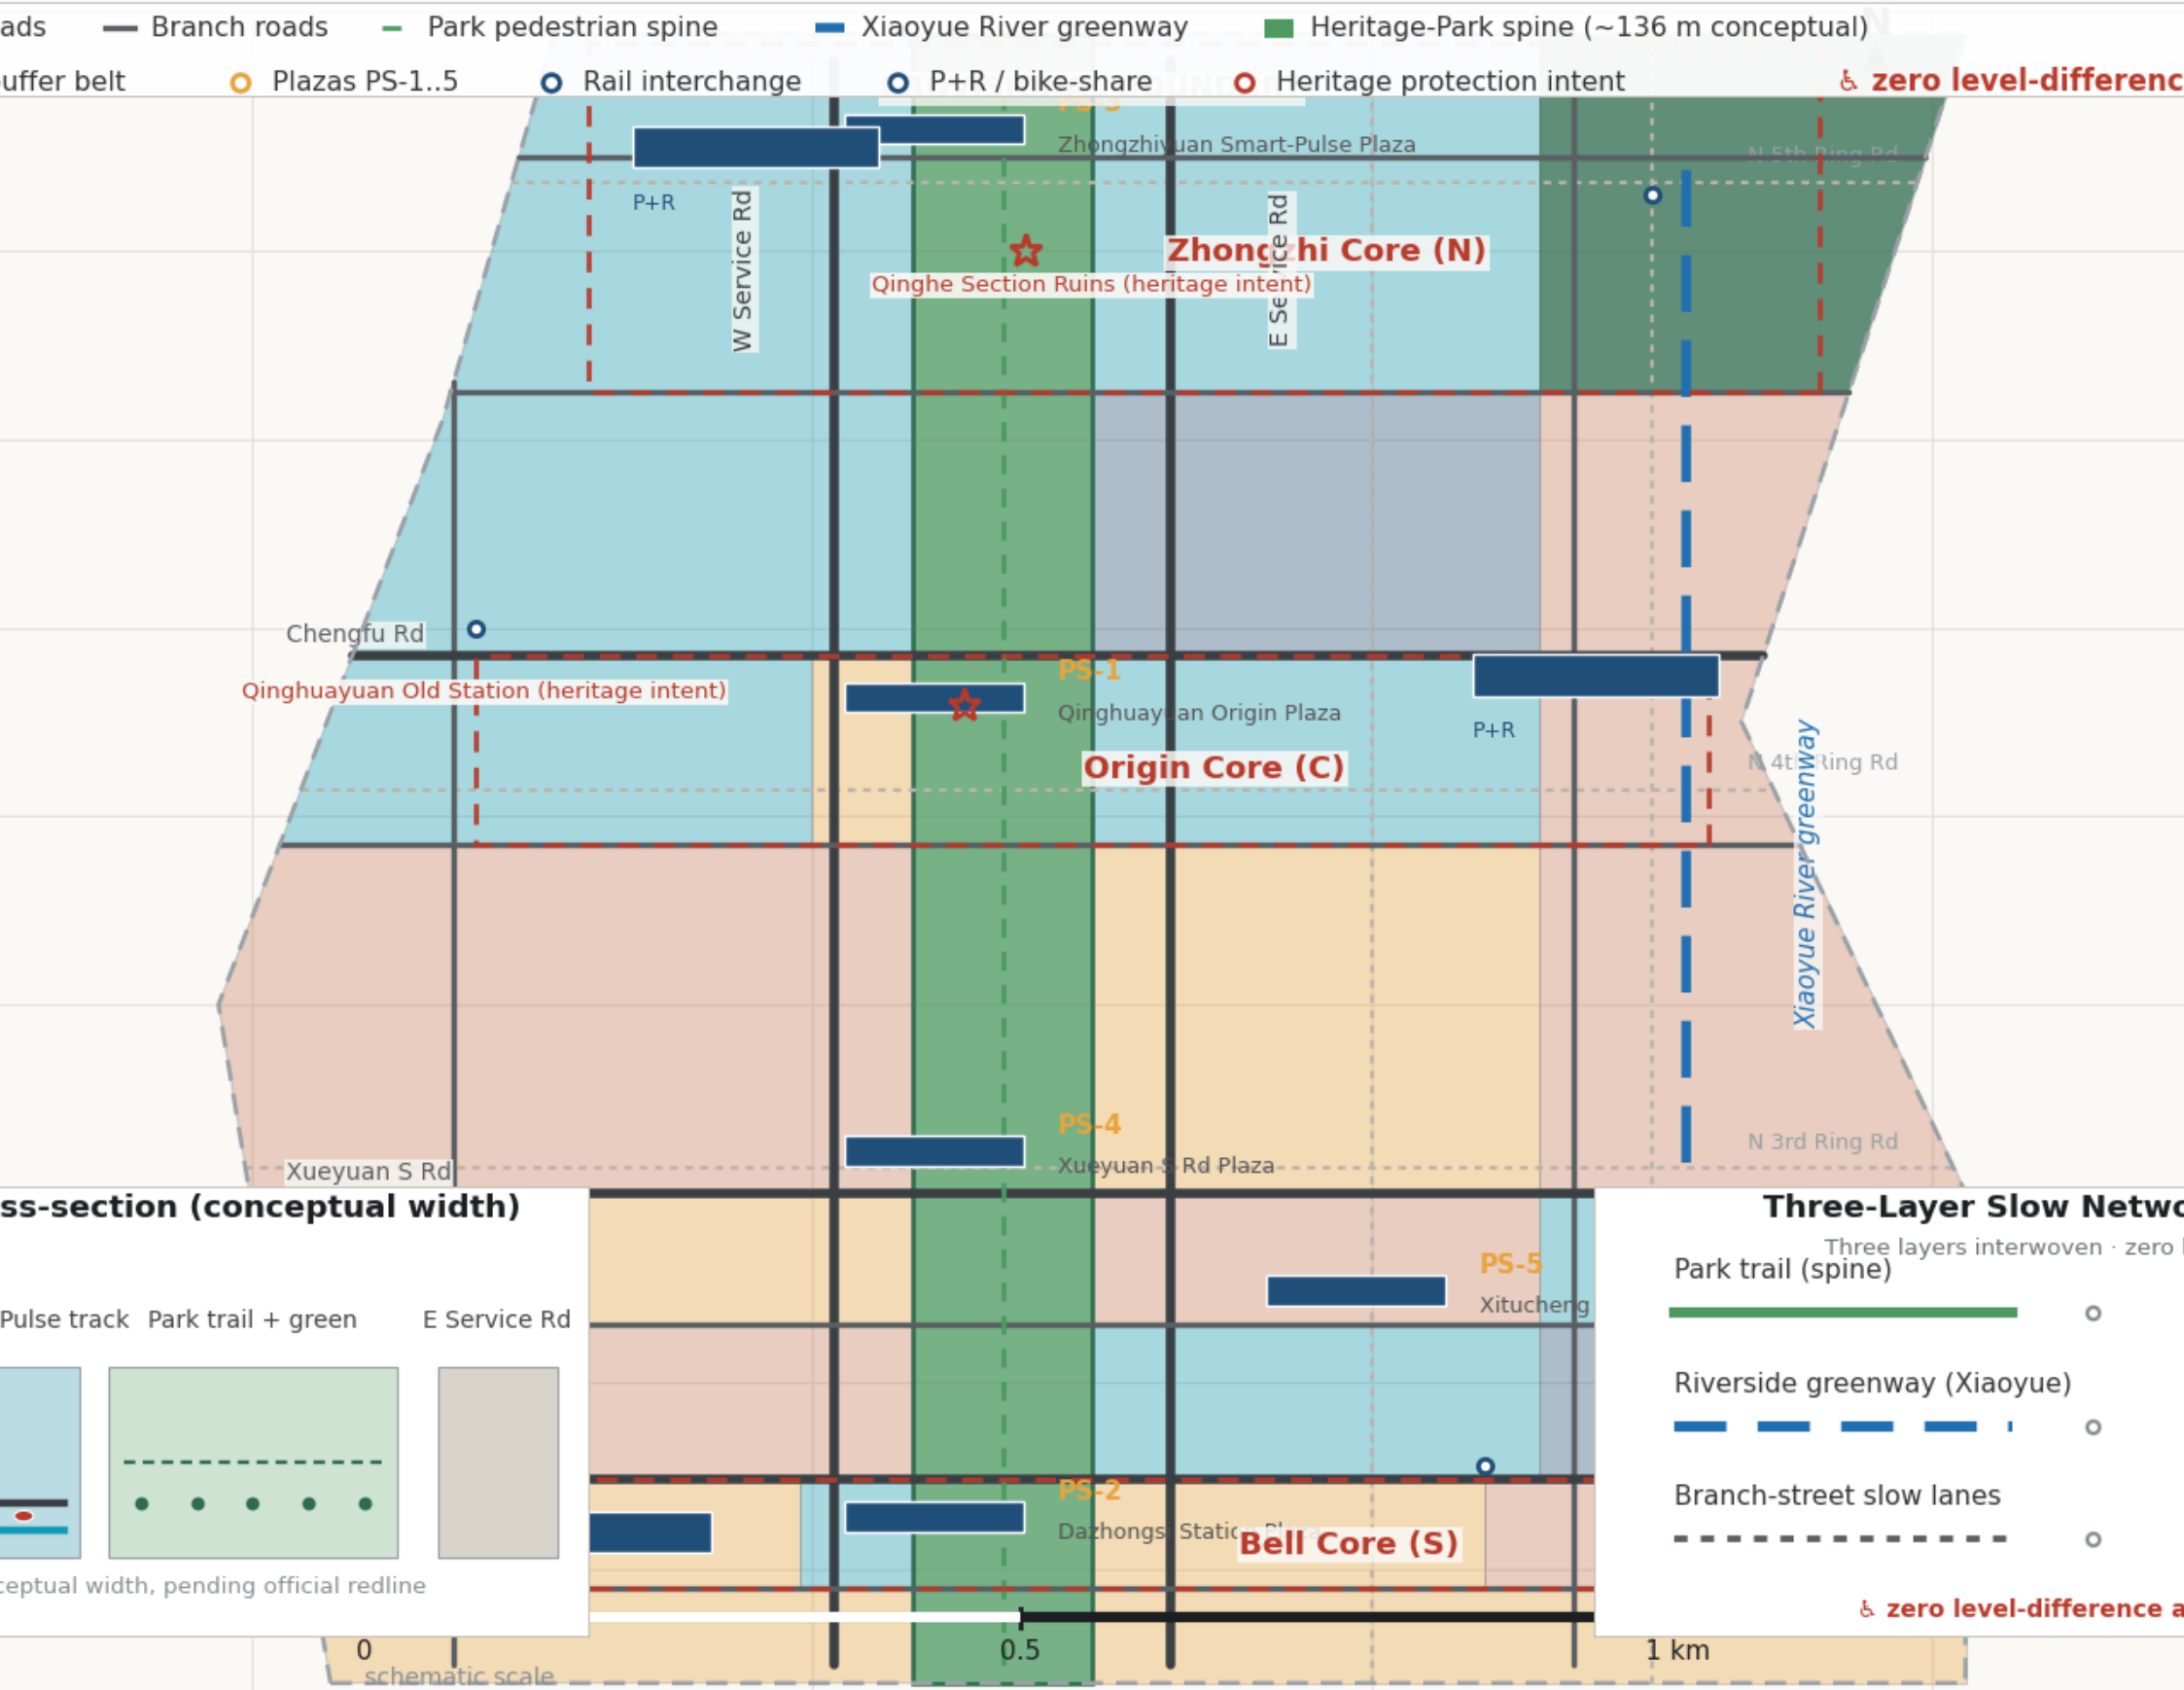

W street=retail

Note: core boundaries are provisional rough polygons from the organizer; recompute after official release.

Mobility & Blue-Green System

Dual-track interface, three-layer slow network, blue-green corridors.

Mobility, Slow-Traffic & Blue-Green System

all three scopes & land shares are recomputed from the organizer's provisional rough boundary; recompute after official rel

核心指标

Metric	Value	Unit	Confidence
site_area_sqm	11412825.39	sqm	high
research_land_area_sqm	3403246.67	sqm	medium
education_land_area_sqm	826677.77	sqm	medium
commercial_land_area_sqm	2230229.97	sqm	medium
residential_land_area_sqm	3034147.33	sqm	medium
green_land_area_sqm	1918552.25	sqm	medium
green_ratio	0.1681	ratio	medium
public_space_ratio	0.0105	ratio	medium
building_footprint_area_sqm	2902996.49	sqm	medium
floor_area_ratio	1.585	index	low
key_area_count	3	count	high
park_spine_length_m	8383.1	m	medium
road_length_m	63254.3	m	medium
greenway_length_m	17876.5	m	medium
slow_mobility_connectivity_index	5.0	index	low
scenario_node_count	12	count	high
industry_test_scenario_count	3	count	high
pilgrimage_landmark_count	6	count	high
persona_count	6	count	high
renewal_project_count	12	count	high

All metrics are recomputed from submission geometry in EPSG:4548; recalculate after official boundaries are released.

AI 场景卡 （12）

SC-01	Autonomous Shuttle Loop	Industry test
SC-02	Robot Delivery Corridor	Industry test
SC-03	Low-altitude Inspection & Delivery	Industry test
SC-04	AI Health Station	Public service
SC-05	Smart Lab Veranda	Education
SC-06	Public Legal AI Agent	Public service
SC-07	MaaS Transit Navigation	Mobility
SC-08	Centennial AR Tour	Culture
SC-09	Interactive AI Art Installations	Public space
SC-10	Civic Agent Governance Lab	Governance
SC-11	Developer House 24h	Developer
SC-12	Scenario Open Market	Industry service

Includes 3 industry test/validation scenarios; each card maps to location, users, data boundaries and operator (see proposal.md).

Metrics Recalculation & Evidence Chain

 PRO

Recomputa

uted from the organizer's provisional rough boundary (EPSG:4326→4548); recompute after official boundary release.
