

RAIL • JZ | Transit-City Integration Coordination System (Concept)

Centennial Jingzhang AI Innovation Belt – concept proposal: stations, interchanges, public space and blue-green network as one system

Coordinated research area ~43.6 km² (official announcement)

Overall design area ~11.4 km² (provisional substitute boundary)

Key areas ~368.4 ha (official announcement)

Three nodes: Transit-City Nexus (Zhongzhiyuan) / Mobility Loop (AI Origin Community) / Co-Built Gallery (Dazhongsi) | Taskbook three-district two-wing: districts are the three key areas; wings are Zhongguancun Tech-Service and Xiaoyuehe Scenario-Enablement

External regional cooperation network (separately named): Future Science City / Huairou Science City / Development Area / Beiwei Community / Jing-Jin-Ji

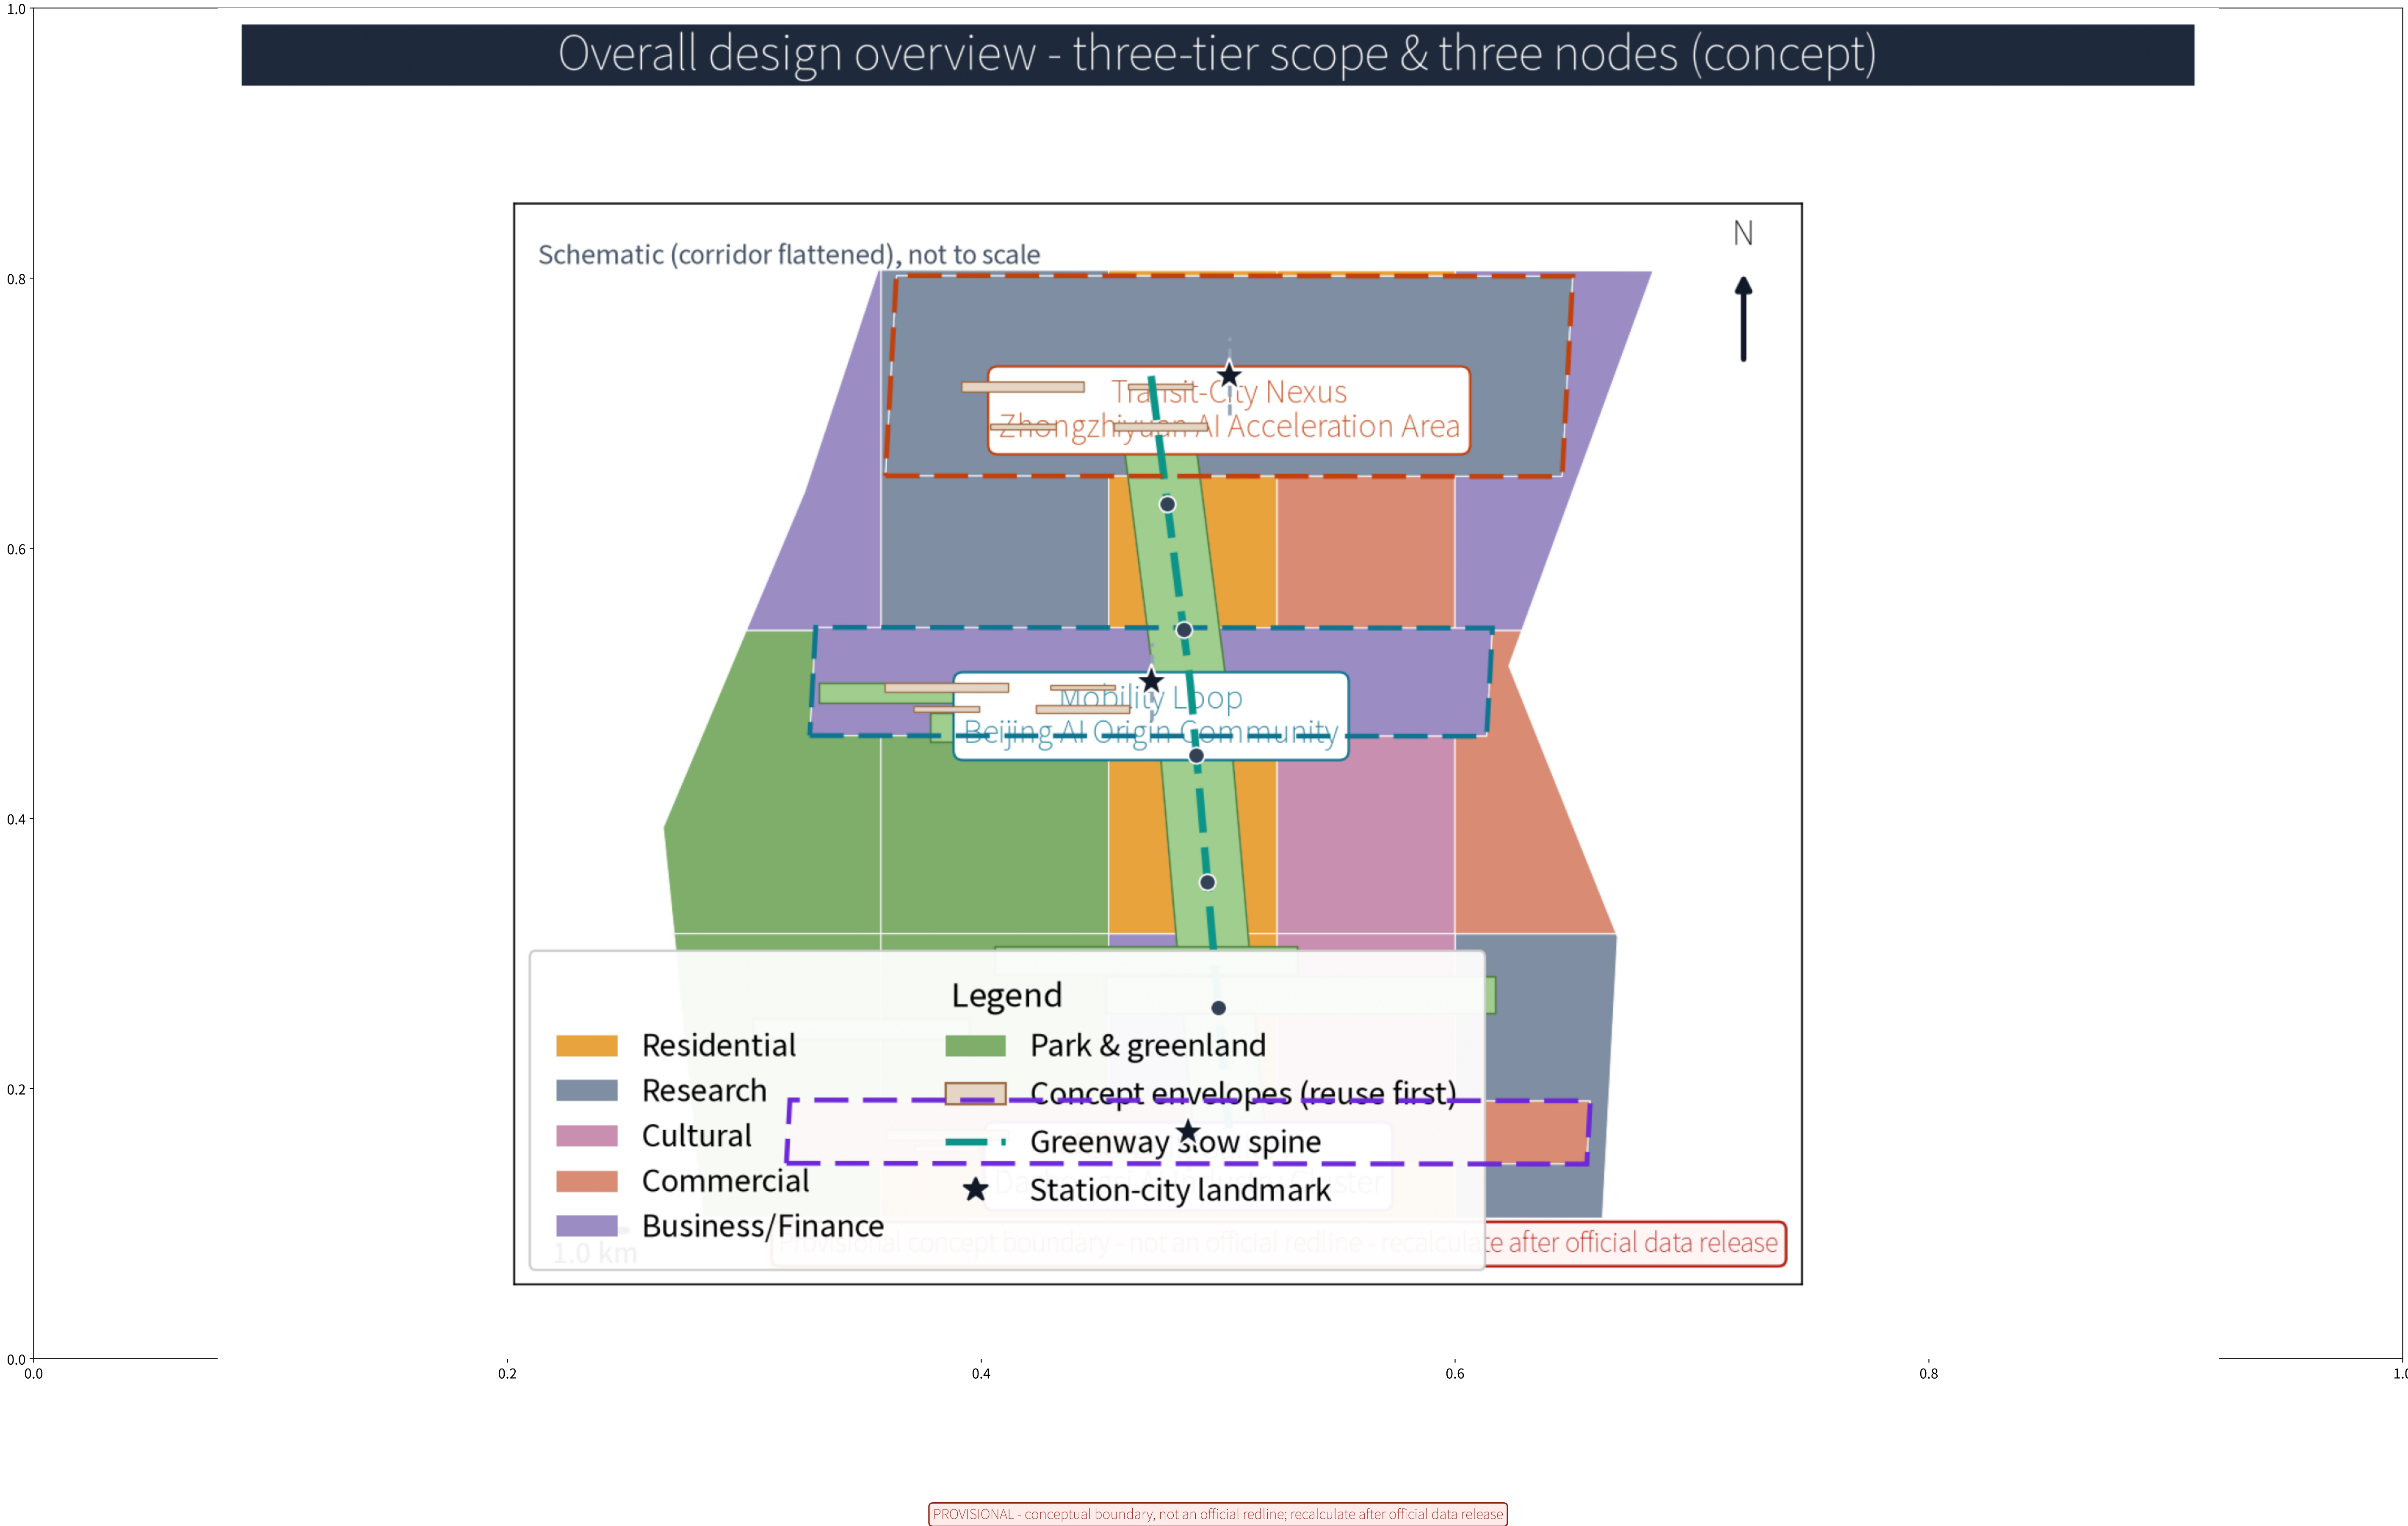

AI governance: anonymised aggregation only / human review of key decisions / no over-monitoring

Core metrics: green_ratio≈0.11 • public_space_ratio≈0.003 • zones 27 • envelopes 12 • scenario nodes 8 • cases 6 • phases 3 (concept; recalc after official data)

Five AI+ scenarios: dispatch / joint operations / slow-mode planning / deck O&M / public feedback

Annual brands: Rail Open Day / Co-Build Workshop / Slow-Mode Experience Season | mechanisms: co-build covenant, points, disclosure, registration, dev community

Risks & gaps: provisional boundary; statutory controls unpublished; ridership/ownership/heritage ledgers not obtained; all conclusions conceptual

Key-area design tasks & AI innovation ecosystem
