

Jing-Zhang Open Ledger: A Traceable AI Public-Return Belt

From centennial track trace to a traceable AI public-return belt

CONCEPT / PROVISIONAL GEOMETRY: not a redline, engineering drawing, or approval basis.

J· Z COMMONS / 京张公地

CONCEPT / PROVISIONAL GEOMETRY

One heritage line, three civic commons

Track trace, commons, and public receipts organize the three areas and two wings; the provisional boundary stays secondary.

Spatial grammar

01 轨痕 / Track trace

A continuous walkable public frame carries the railway's temporal memory.

02 三处公地 / Three commons

Verification, translation, and return are spatially distinct—not one generic AI campus.

03 五张凭据 / Five receipts

Source, test, release, review, return: each names a steward, review date, and stop condition.

两翼 / Two wings

Zhongguancun service wing: make IP, capital, compute, and conversion approachable. Xiaoyuehe scenario wing: test ecology and everyday service with low data and a clear exit path.

01 总体关系 / OVERALL RELATION

One heritage slow-mobility, climate, and service spine joins verification, translation, and return into a readable, questionable, pausable daily civic interface.

03 公共界面 / PUBLIC INTERFACE

Shade, rainwater, inclusive pause, low-glare information, and human help share one section. AI is an explainable, pausable, cared-for service.

J· Z COMMONS / 京张公地

CONCEPT / PROVISIONAL GEOMETRY

Three commons: space, service, and receipts together

Along one conceptual slow spine, every common names its interface, human responsibility, pause gate, and hand-off.

One conceptual slow spine links three space-service-receipt relationships: explain, test, then return.

资料：公开征集与资料包 | 空间图层：概念建议 + 暂定几何 · 非红线、非工程图、非审批依据

02 三处公地 / THREE COMMONS

Zhongzhiyuan: Verifiable Window | AI Origin: Translation Arcade | Dazhongsi: Return Station.
Landmarks are service interfaces, not isolated sculpture.

J· Z COMMONS / 京张公地

CONCEPT / PROVISIONAL GEOMETRY

J· Z COMMONS: not a logo, but a civic promise

Track is time, double line is companionship, and an open loop is a civic relation that can be questioned, corrected, and returned.
