

BellPivot AI Precinct - Dazhongsi AI Industry Cluster (Concept)

Concept booklet - conceptual advice and reference material

3 nodes - 12 scenario cards - 5 personas - 7 cases - 3 tests - 5 programmes

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL RED LINE - RECOMPUTE AFTER OFFICIAL DATA

Conceptual advice / reference material: no FAR, height, retain-renovate-demolish, investment, capacity or engineering conclusions; official data governs and triggers full recomputation.

Three-Level Scope Framework

Coordinated research - overall design - key areas (official textual caliber)

Coordinated research approx. 43.6 km2: Jingzhang Heritage Park spine; full-stack AI chain layout and regional synergy loops (Beiwei, Future Science City, Huairou, ETDZ, Jing-Jin-Ji).

Overall design approx. 11.4 km2: stock-first renewal, TOD density gradients, retain-renovate-renew guide, regulatory-depth indicator transmission (concept).

Key areas approx. 368.4 ha: Zhongzhiyuan (approx. 192 ha), AI Origin Community (approx. 104 ha), Dazhongsi cluster (approx. 72 ha) plus two wings; this booklet deepens the Dazhongsi cluster.

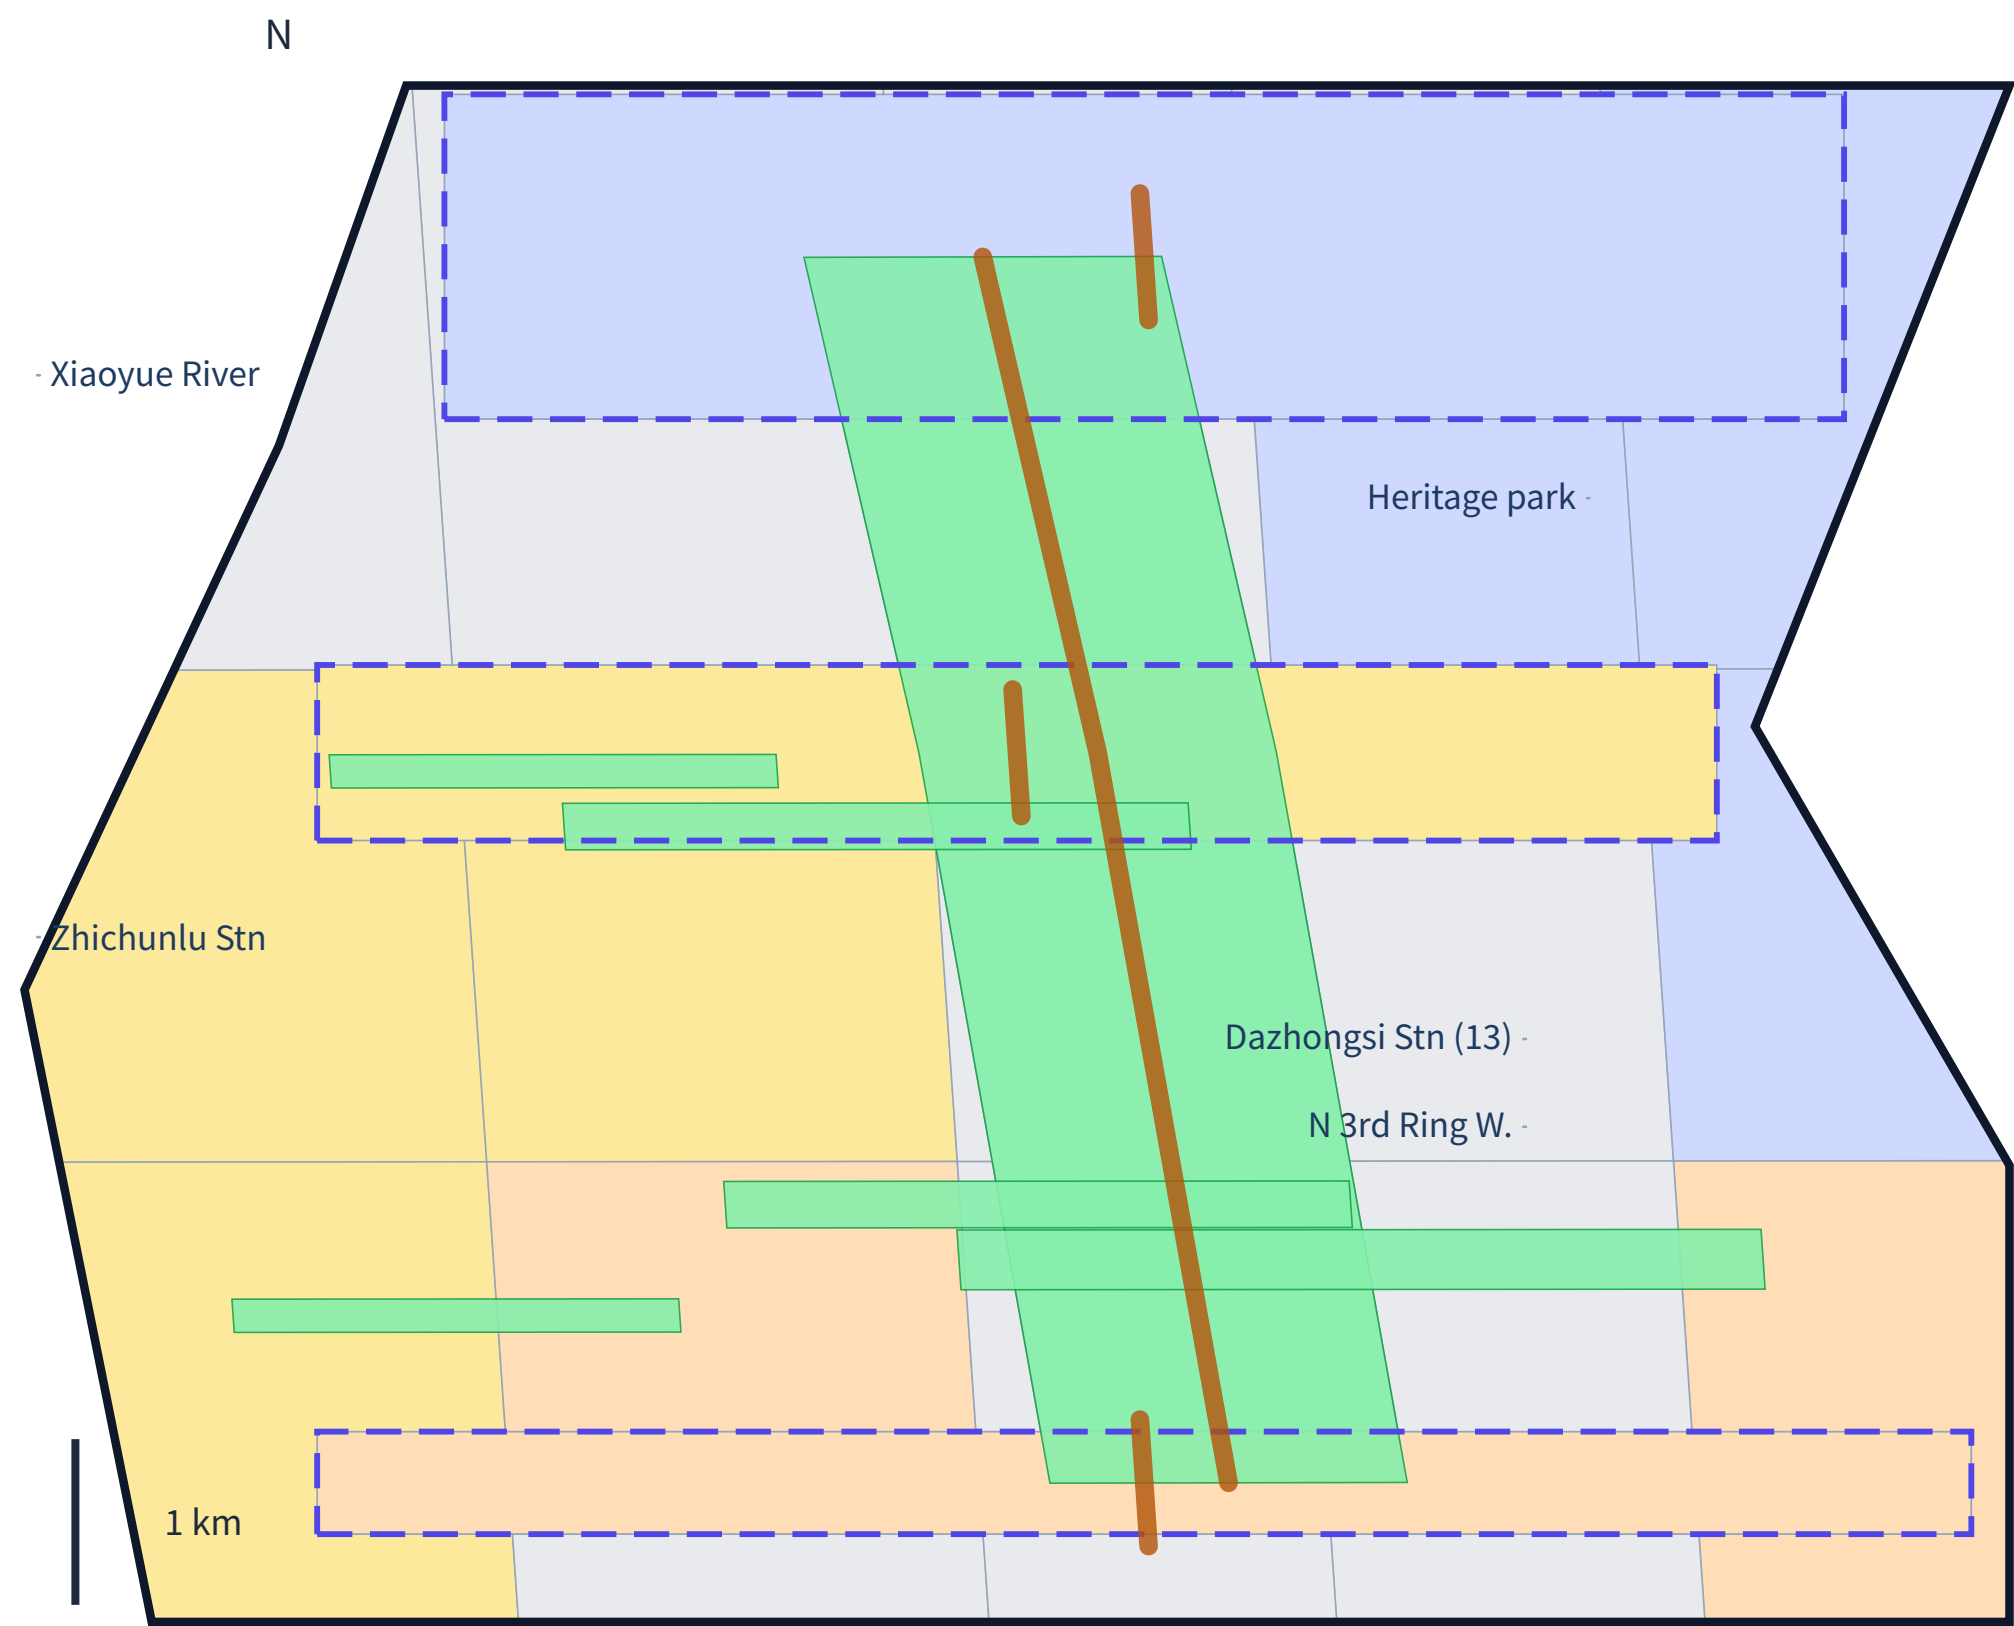

All geometry is provisional concept geometry; containment is checked first, then full recomputation on official publication.

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL RED LINE - RECOMPUTE AFTER OFFICIAL DATA

Conceptual advice / reference material: no FAR, height, retain-renovate-demolish, investment, capacity or engineering conclusions; official data governs and triggers full recomputation.

Overall Design Scope (concept)

Stations, heritage park, water, roads, surrounding districts (public names, concept positions)

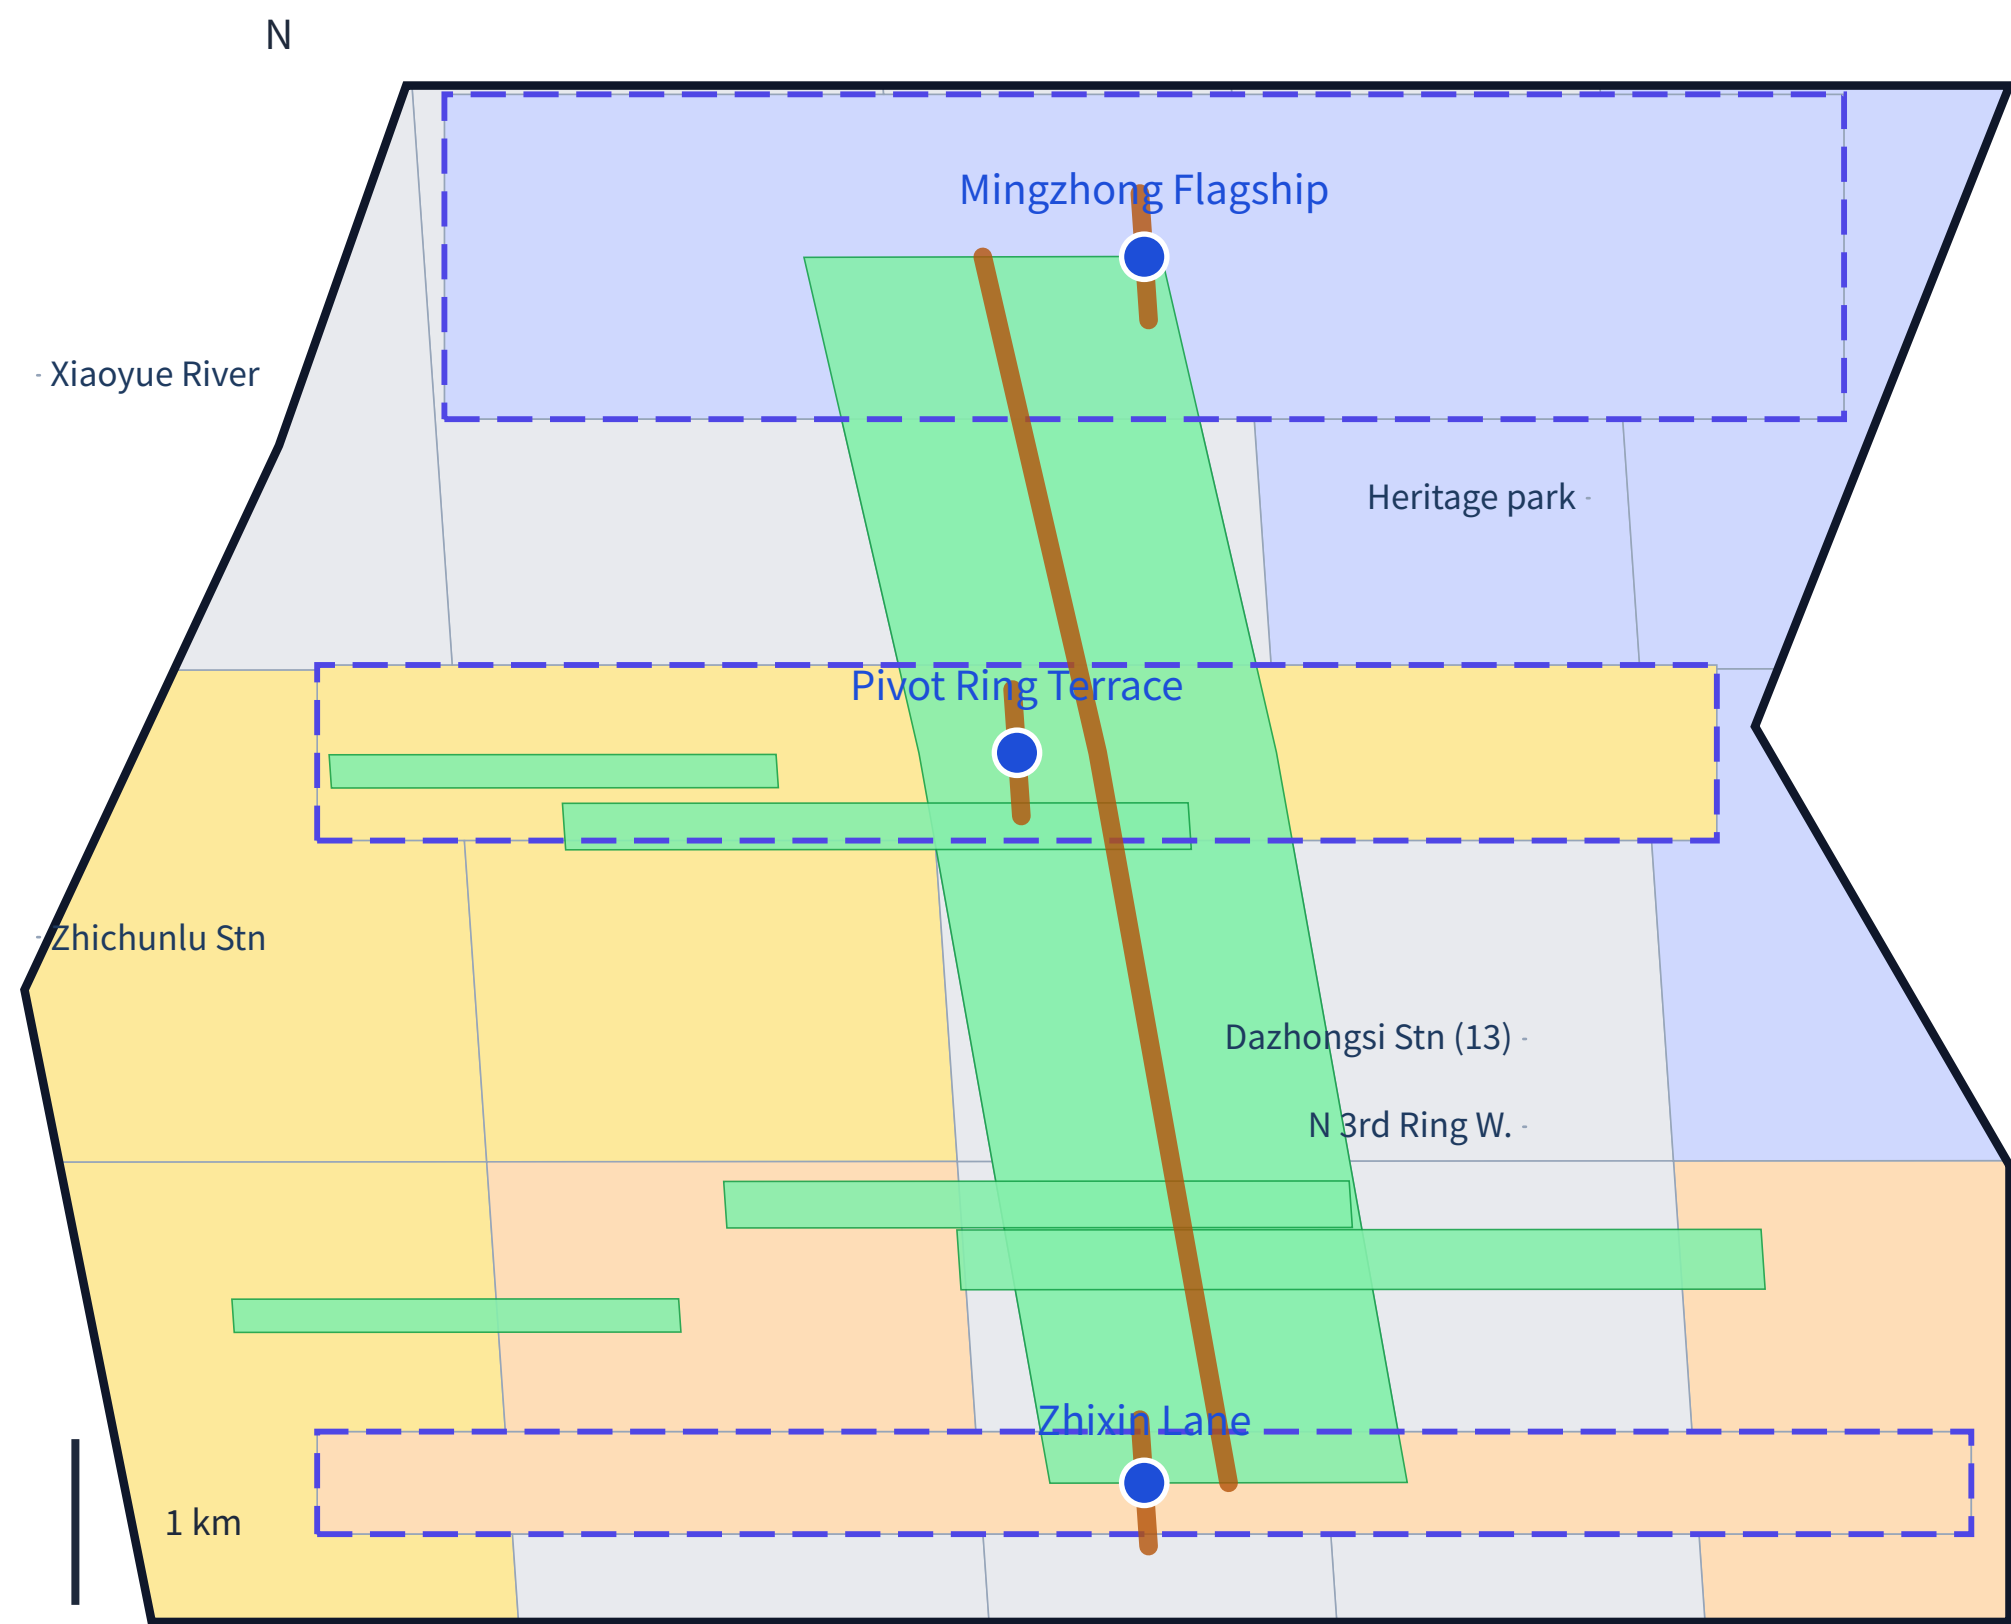

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL RED LINE - RECOMPUTE AFTER OFFICIAL DATA

Three tiers: coordinated approx. 43.6 km2 / overall design approx. 11.4 km2 / key areas approx. 368.4 ha (official textual caliber); this page focuses on the overall design scope on provisional concept
Conceptual advice / reference material: no FAR, height, retain-renovate-demolish, investment, capacity or engineering conclusions; official data governs and triggers full recomputation.

Key Area: Three-Node Detailed Design (concept)

Mingzhong Flagship - Pivot Ring Terrace - Zhixin Lane (concept points subject to statutory review)

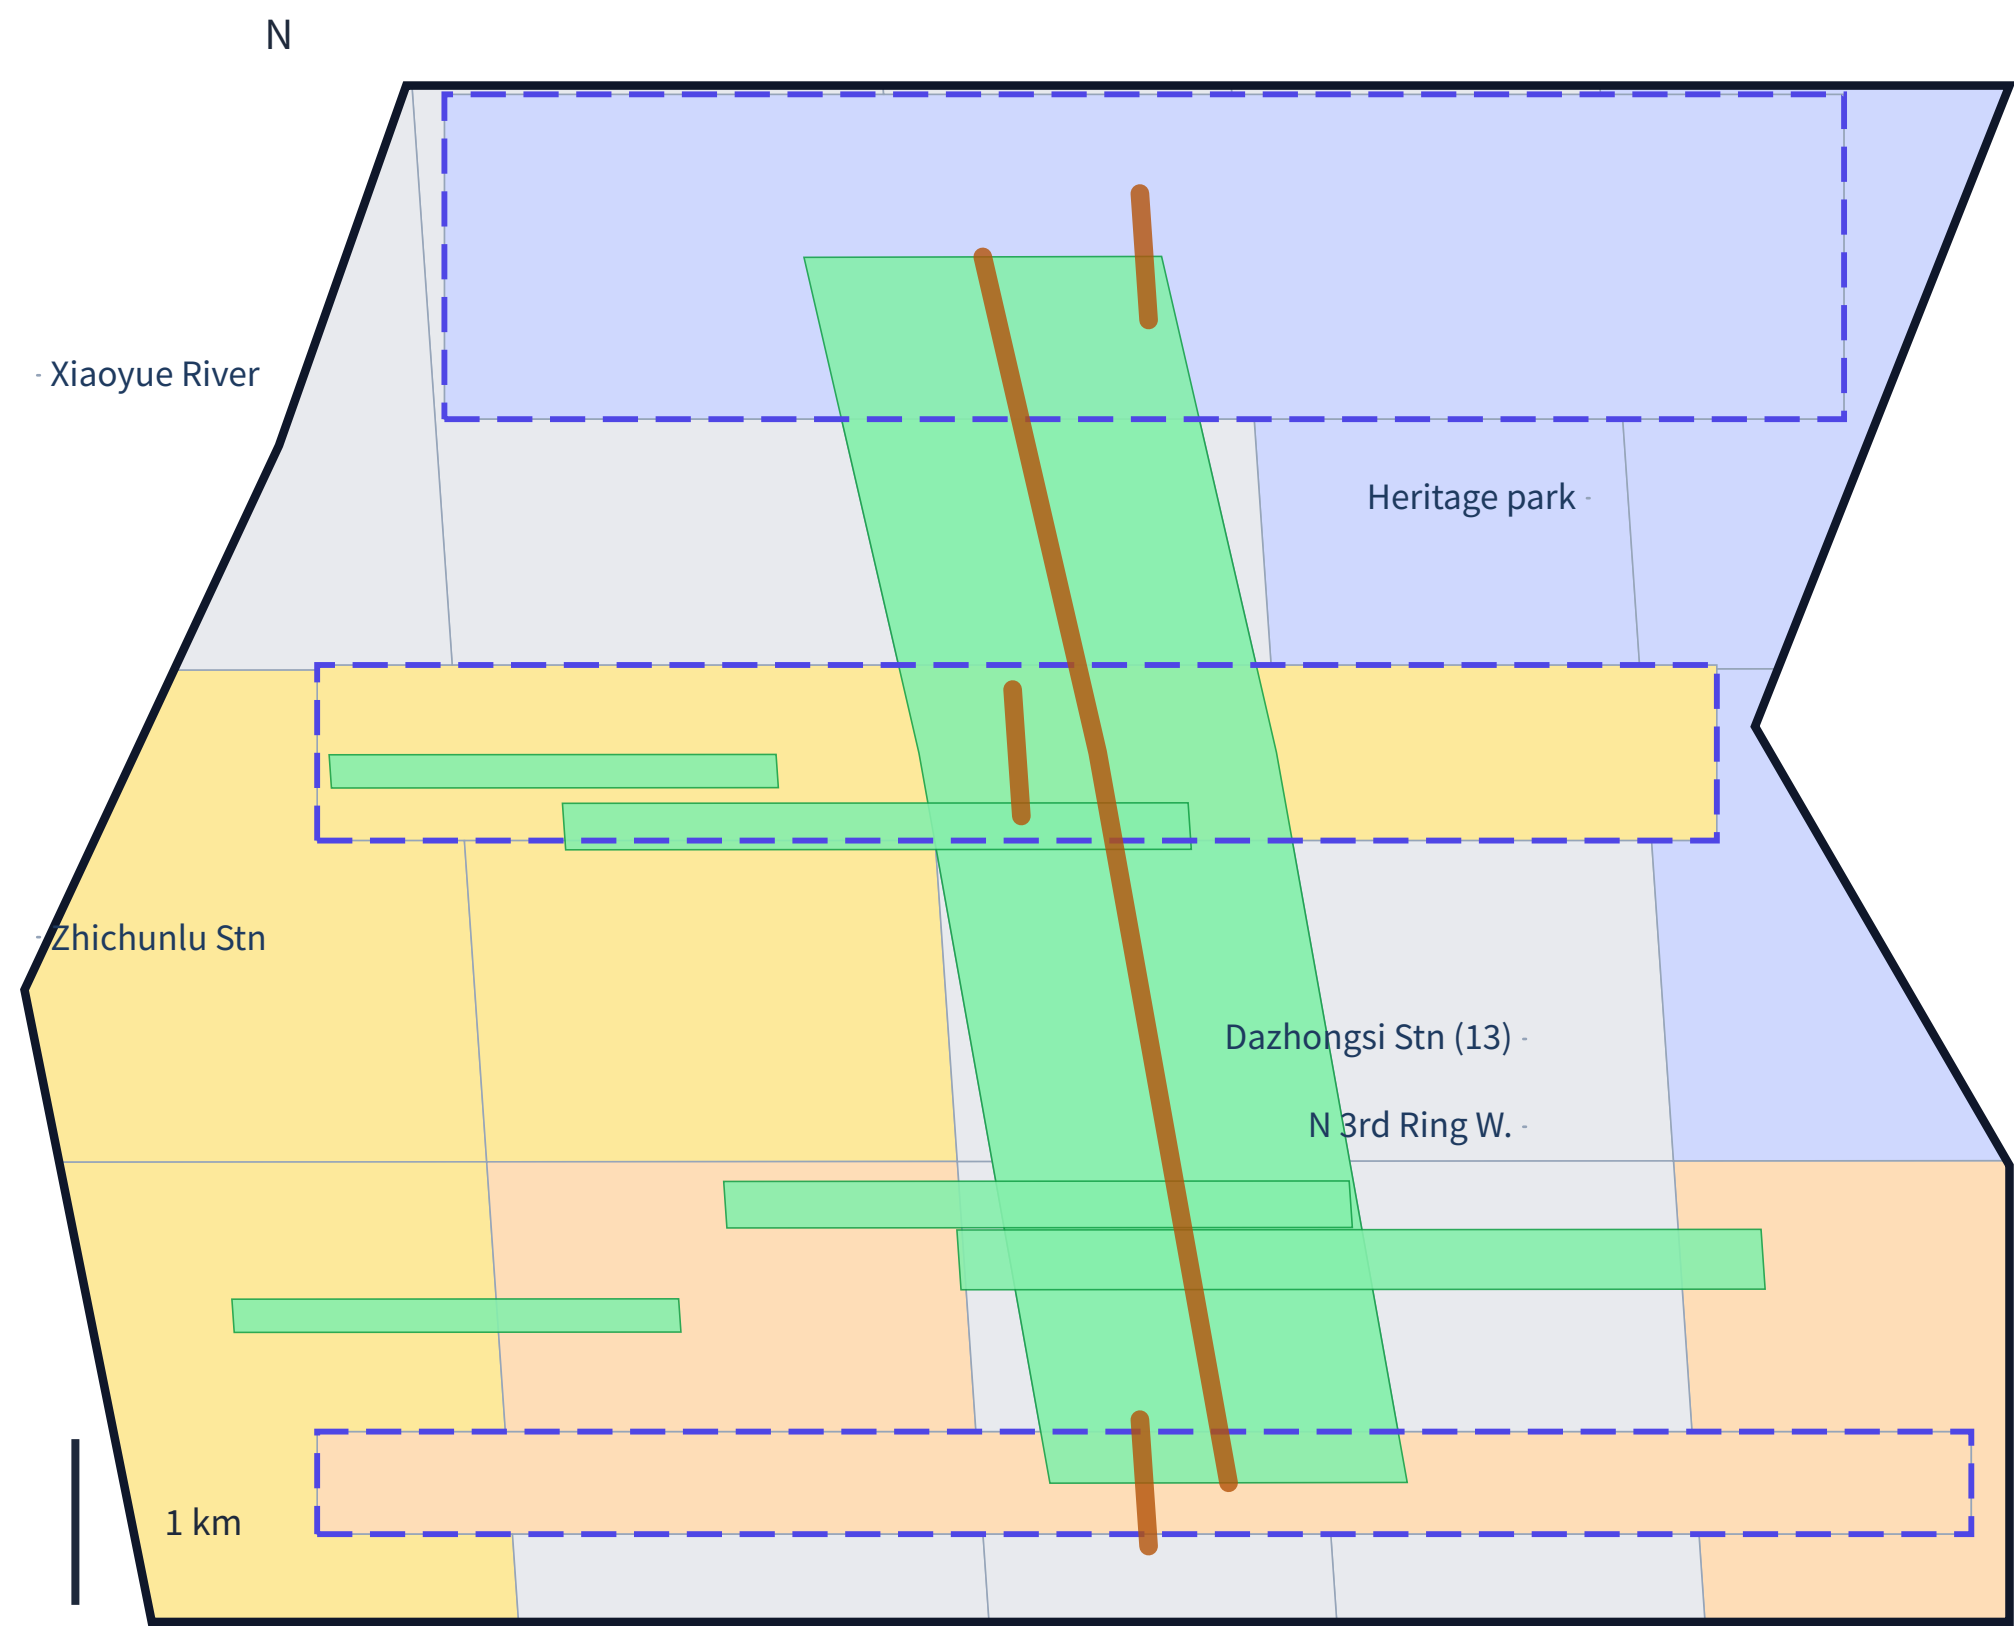

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL RED LINE - RECOMPUTE AFTER OFFICIAL DATA

Three tiers: coordinated approx. 43.6 km² / overall design approx. 11.4 km² / key areas approx. 368.4 ha (official textual caliber); this page focuses on the overall design scope on provisional concept. Conceptual advice / reference material: no FAR, height, retain-renovate-demolish, investment, capacity or engineering conclusions; official data governs and triggers full recomputation.

Slow Movement and Blue-Green Network (concept)

Heritage culture axis - Xiaoyue River waterfront loop - pocket parks and rain gardens

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL RED LINE - RECOMPUTE AFTER OFFICIAL DATA

Three tiers: coordinated approx. 43.6 km² / overall design approx. 11.4 km² / key areas approx. 368.4 ha (official textual caliber); this page focuses on the overall design scope on provisional concept
Conceptual advice / reference material: no FAR, height, retain-renovate-demolish, investment, capacity or engineering conclusions; official data governs and triggers full recomputation.

Implementation and Long-Term Operation (concept)

Three phases - RACI roles - stop conditions - annual disclosure

Near term (1-3y) anchor launch: hub renewal planning, flagship siting, first unmanned-retail and barrier-free pilots; mid term (3-5y) cluster formation: stock conversion, accelerator, routine roadshows; long term (5-10y) maturity: whole-precinct connection and station-city operation.

Pilot standard: small, reversible, measurable; every project states lead/collaborate roles under RACI with preconditions, assessments, resource tiers, acceptance KPIs and continue/stop conditions; stop-and-withdraw on trigger with disclosure.

Costs are qualitative low/medium/high tiers only (method, price basis, scope, confidence, recompute trigger in the proposal matrix) - no precise amounts.

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL RED LINE - RECOMPUTE AFTER OFFICIAL DATA

Conceptual advice / reference material: no FAR, height, retain-renovate-demolish, investment, capacity or engineering conclusions; official data governs and triggers full recomputation.

Risk, Copyright and Compliance (concept)

Honesty boundary - data gaps - source registry

All content is conceptual advice: no FAR, height, retain-renovate-demolish, investment, capacity or engineering conclusions; no fabricated official data; no claims of endorsement, approval or commitment.

Official boundary polygons and statutory controls (rail protection, road red lines, land/height controls, heritage, blue-green, underground) are unpublished; all related statements are concept frameworks with full recomputation on publication.

Sources registered in sources.json (16 entries incl. 7 global case pages with reuse boundaries); font and graphic assets in report/asset_rights_ledger.md; brand names/mark are internal working codenames until prior-rights clearance.

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL RED LINE - RECOMPUTE AFTER OFFICIAL DATA

Conceptual advice / reference material: no FAR, height, retain-renovate-demolish, investment, capacity or engineering conclusions; official data governs and triggers full recomputation.
