

Jing-Zhang AI Spine: Urban Design Proposal for the Centennial Jing-Zhang AI Innovation Belt

A3 booklet • formal machine-readable urban design package

Author: oppry12102 • xuseek

Overview

The proposal applies a 'Recalculable–Stoppable–Accountable' mechanism to turn the Jing-Zhang green corridor—running through the country's densest cluster of universities and research institutes—into a public innovation interface: the heritage park is the historical and public-space spine, and Zhongzhiyuan, the Beijing AI Origin Community, and Dazhongsi are the three innovation cores, forming a 'one spine, three cores, multiple scenarios, blue-green slow-mobility composite loop.' The three positionings are the Centennial Jing-Zhang Culture Belt, the Urban AI Life Experience Belt, and the AI Integration and Innovation Belt.

Overall concept and three cores

Jing-Zhang AI Spine: Overall Concept and Three Cores

Land-use structure and east-west stitching

Land-Use Structure and East-West Stitching

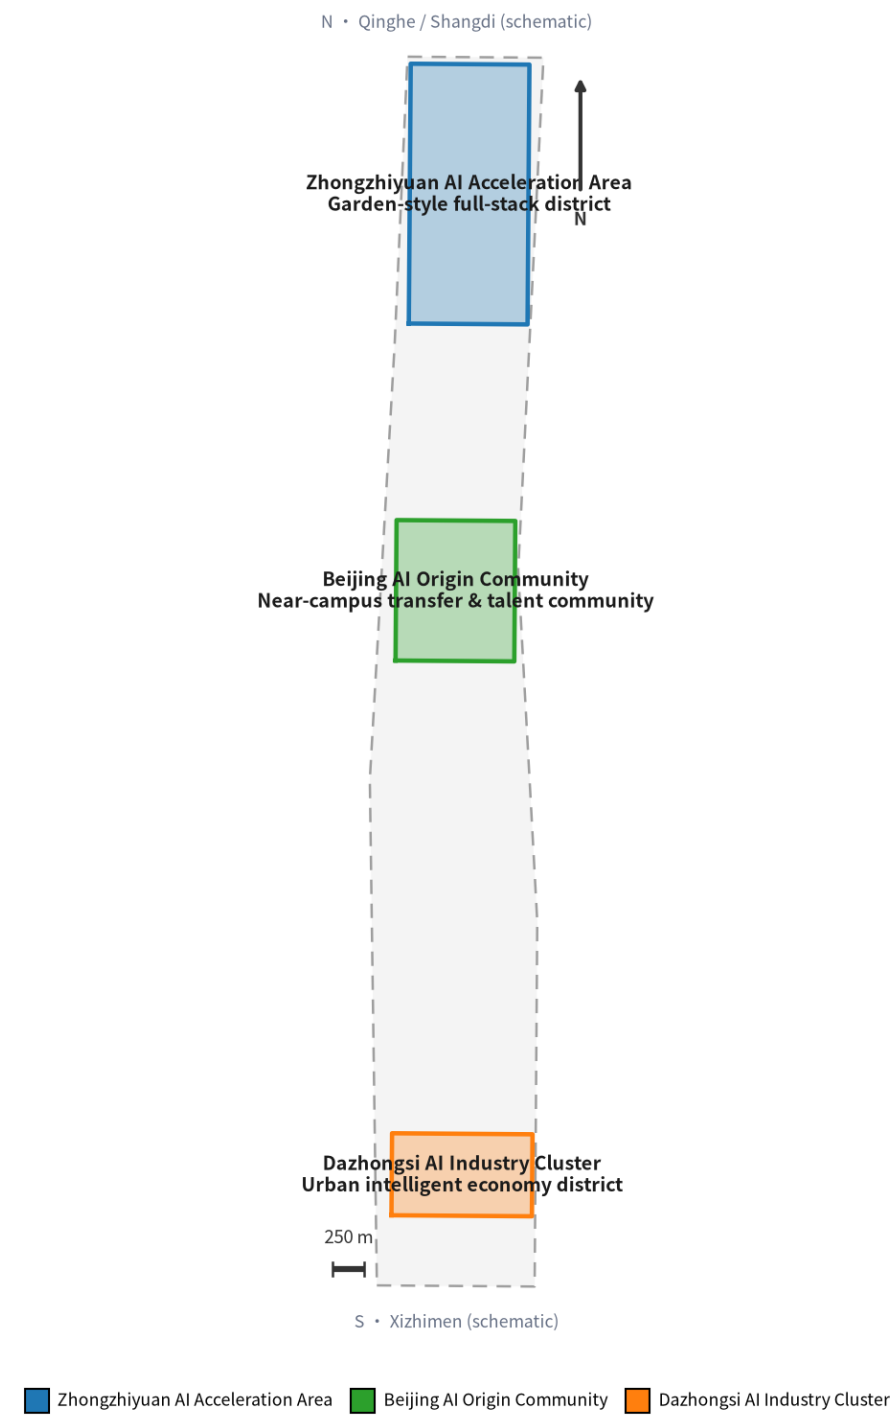

Source: geometry/land_use.geojson (agent-generated, land_use_code per public classification); site is a provisional constraint.

Figure: Land-use structure and east-west stitching

Three key areas detailed design index

Three Key Areas: Detailed Design Index

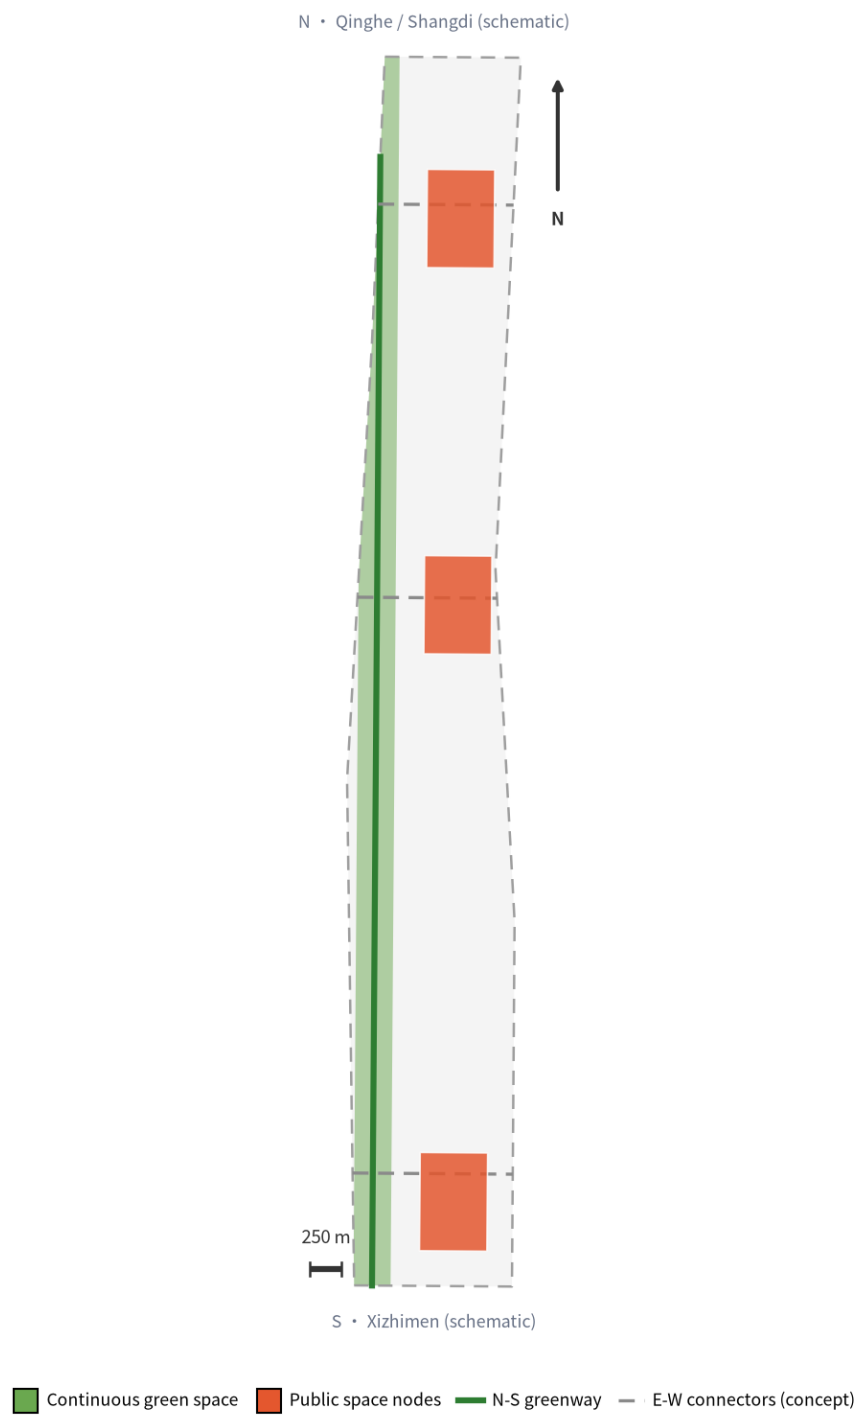

Source: geometry/key_areas.geojson; key areas are provisional constraints, areas are directional only.

Renewal project list

ID	项目 / Project	类型 / Type
JZ-01	Jing-Zhang heritage park slow-mobility gap stitching	Public space / transport
JZ-02	Zhongzhiyuan Qinghe innovation interface	Blue-green / industry display
JZ-03	Origin Community near-campus result-transfer street	Urban renewal / industry service
JZ-04	Dazhongsi station four-quadrant connectivity	Rail integration / slow mobility
JZ-05	AI public services and edge-computing nodes	New infrastructure / public service
JZ-06	Global AI activity-week public route	Operation / brand

Core metric recalculation

指标 / Metric	值 / Value	单位 / Unit	状态 / Status
Overall design area	11,412,825	sqm	known
Building footprint	427,895	sqm	known
Green ratio	0.216	ratio	known
Public space ratio	0.109	ratio	known
Key areas	3	count	known
FAR (pending)	unknown	ratio	unknown
Green area	2,460,533	sqm	known
Public space area	1,242,886	sqm	known

Risk and compliance

This proposal uses provisional boundaries and provisional key areas, which are not an official redline, approval basis, or precise-area basis; all layers and metrics must be recalculated after official polygons replace them. The proposal claims no official approval, approved control, final property rights, final scale, or guaranteed implementation.
