

Why Jing-Zhang: The Openline 100

Urban design proposal for the Haidian Jingzhang heritage corridor • A3 plate book

This book collects 24 plates, all re-rendered on real OSM urban fabric and proposal geometry.

The full narrative lives in [proposal.md](#) / [proposal.en.md](#) and [report/proposal.html](#).

Graphic standard: Sasaki v1.2 (palette / type scale / scale bars / north arrows / title blocks).

Openline 100 Studio • kenshin-ai-101 • 2026-08 • v1.2

01 Site overview: five-layer structure and corridor axonometric

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

02 Regional structure: the corridor in northwest Beijing

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

03 Regional bond: university, innovation and cultural ties

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

04 Land use and structure: one spine, three cores, five segments

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

05 Three key areas: Co-Wisdom Garden, Origin, Dazhongsi

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

06 1:2000 key-area masterplans on real OSM urban fabric

07 Massing and skyline control

08 Six typical cross-sections

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

Why Jing-Zhang • Plate Book

09 Five urban-eye place sections

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

10 Wudaokou stitch deck: three vertical layers

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

Why Jing-Zhang • Plate Book

Base map © OpenStreetMap contributors

Wudaokou stitch deck: the boldest move drawn as credible everyday life

Section-perspective • material / level / real people • hand edges keep concept honest | OL-07

OPENLINE-100 • signature-wudaokou-deck • credible imagination, not a fake render • BOARD v1.2

11 Signature: deck section-perspective • material, levels, real people

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

12 Rails made visible: the old alignment stitched into real fabric

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

Let the rails grow into the ground: five material translations

Components enter the public library, versioned via Inherit · sound & inscriptions pilot only after review

Ground · rail as paving

No unreachable exhibits

Section · archaeology trench

No mass excavation

Furniture · rails reused

No fake authenticity

Narrative · question stones

No trivializing history

Sound · steam × white-noise

No noise nuisance

Three rules before entering the library

- ① Reuse only after clearance & safety testing
- ② Versioned via Inherit: join / exit / inherit
- ③ Sound & inscriptions pilot after permit & review

All five share one ground: rails stay in the street.

Heritage made soulful: grading • voices • rails of humanity

From preserving heritage to continuing Jing-Zhang | 3 grades × 3 voices × 3 turns | A-HERITAGE-001 framework

以人为轨

Rails of humanity

In 1909, the 「人」

drew the line's shape.

In this century, it names

whom the line belongs to.

Railway anatomy → today

switchback = Verify / Exit gates

safety siding = Failure Case Library

test track = governance sandbox

rail = human values, not compute

Each in its place

grading • for the fabric

voices • for the people

the turn • for the century

grading is a literature framework, pending survey

voice slots are empty, awaiting real collection

14 Heritage made soulful: grading • voices • rails of humanity

Open Ticket institutional section: the fare system of the Openline

The right-of-way rewritten for the digital century | Join • Verify • Exit • Inherit x govern / space / data / time | governance concept

The Openline is the road;
the Ticket is its rule of use.

- 1909: the fight for a Chinese right-of-way
- 2026: the citizen right-of-way, rewritten
- A line without a fare system is engineering;
with one, it becomes a public service

4 strata x 4 gates

govern: trusteeship • space: free
data: locked trust • time: traced

governance concept • not adopted policy
to be co-built with district & data authorities

18 Open Ticket institutional section: Join • Verify • Exit • Inherit

19 Metrics evidence: every number traces to metrics.json

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data
