

LIVE • JZ: Fifteen-Minute Living Loop (Concept)

A0 Board 1/2 - Overall Concept & Spatial Structure

官方范围层级（公告文本口径）

Coordinated research area approx. 43.6 km2
Overall design area approx. 11.4 km2
Key areas approx. 368.4 ha
Sub-scope: 15-minute life circle & community service network (concept)

结构：一轴连三心、多点织成网

Concept slow-traffic spine (along the Jing-Zhang Heritage Park) links the 15-min service hub (Zhongzhiyuan), micro station (AI Origin Community) and community living room (Dazhongsi); embedded micro points follow facility inspection.

核心指标（参与者临时模型数据）

site_area_sqm approx. 11,412,825 m2
green_ratio approx. 0.129
public_space_ratio approx. 0.0045
(recomputed from provisional geometry; recalculate when official data is published)

Overall Design Overview: One Axis, Three Centres, Network of Points (provisional)

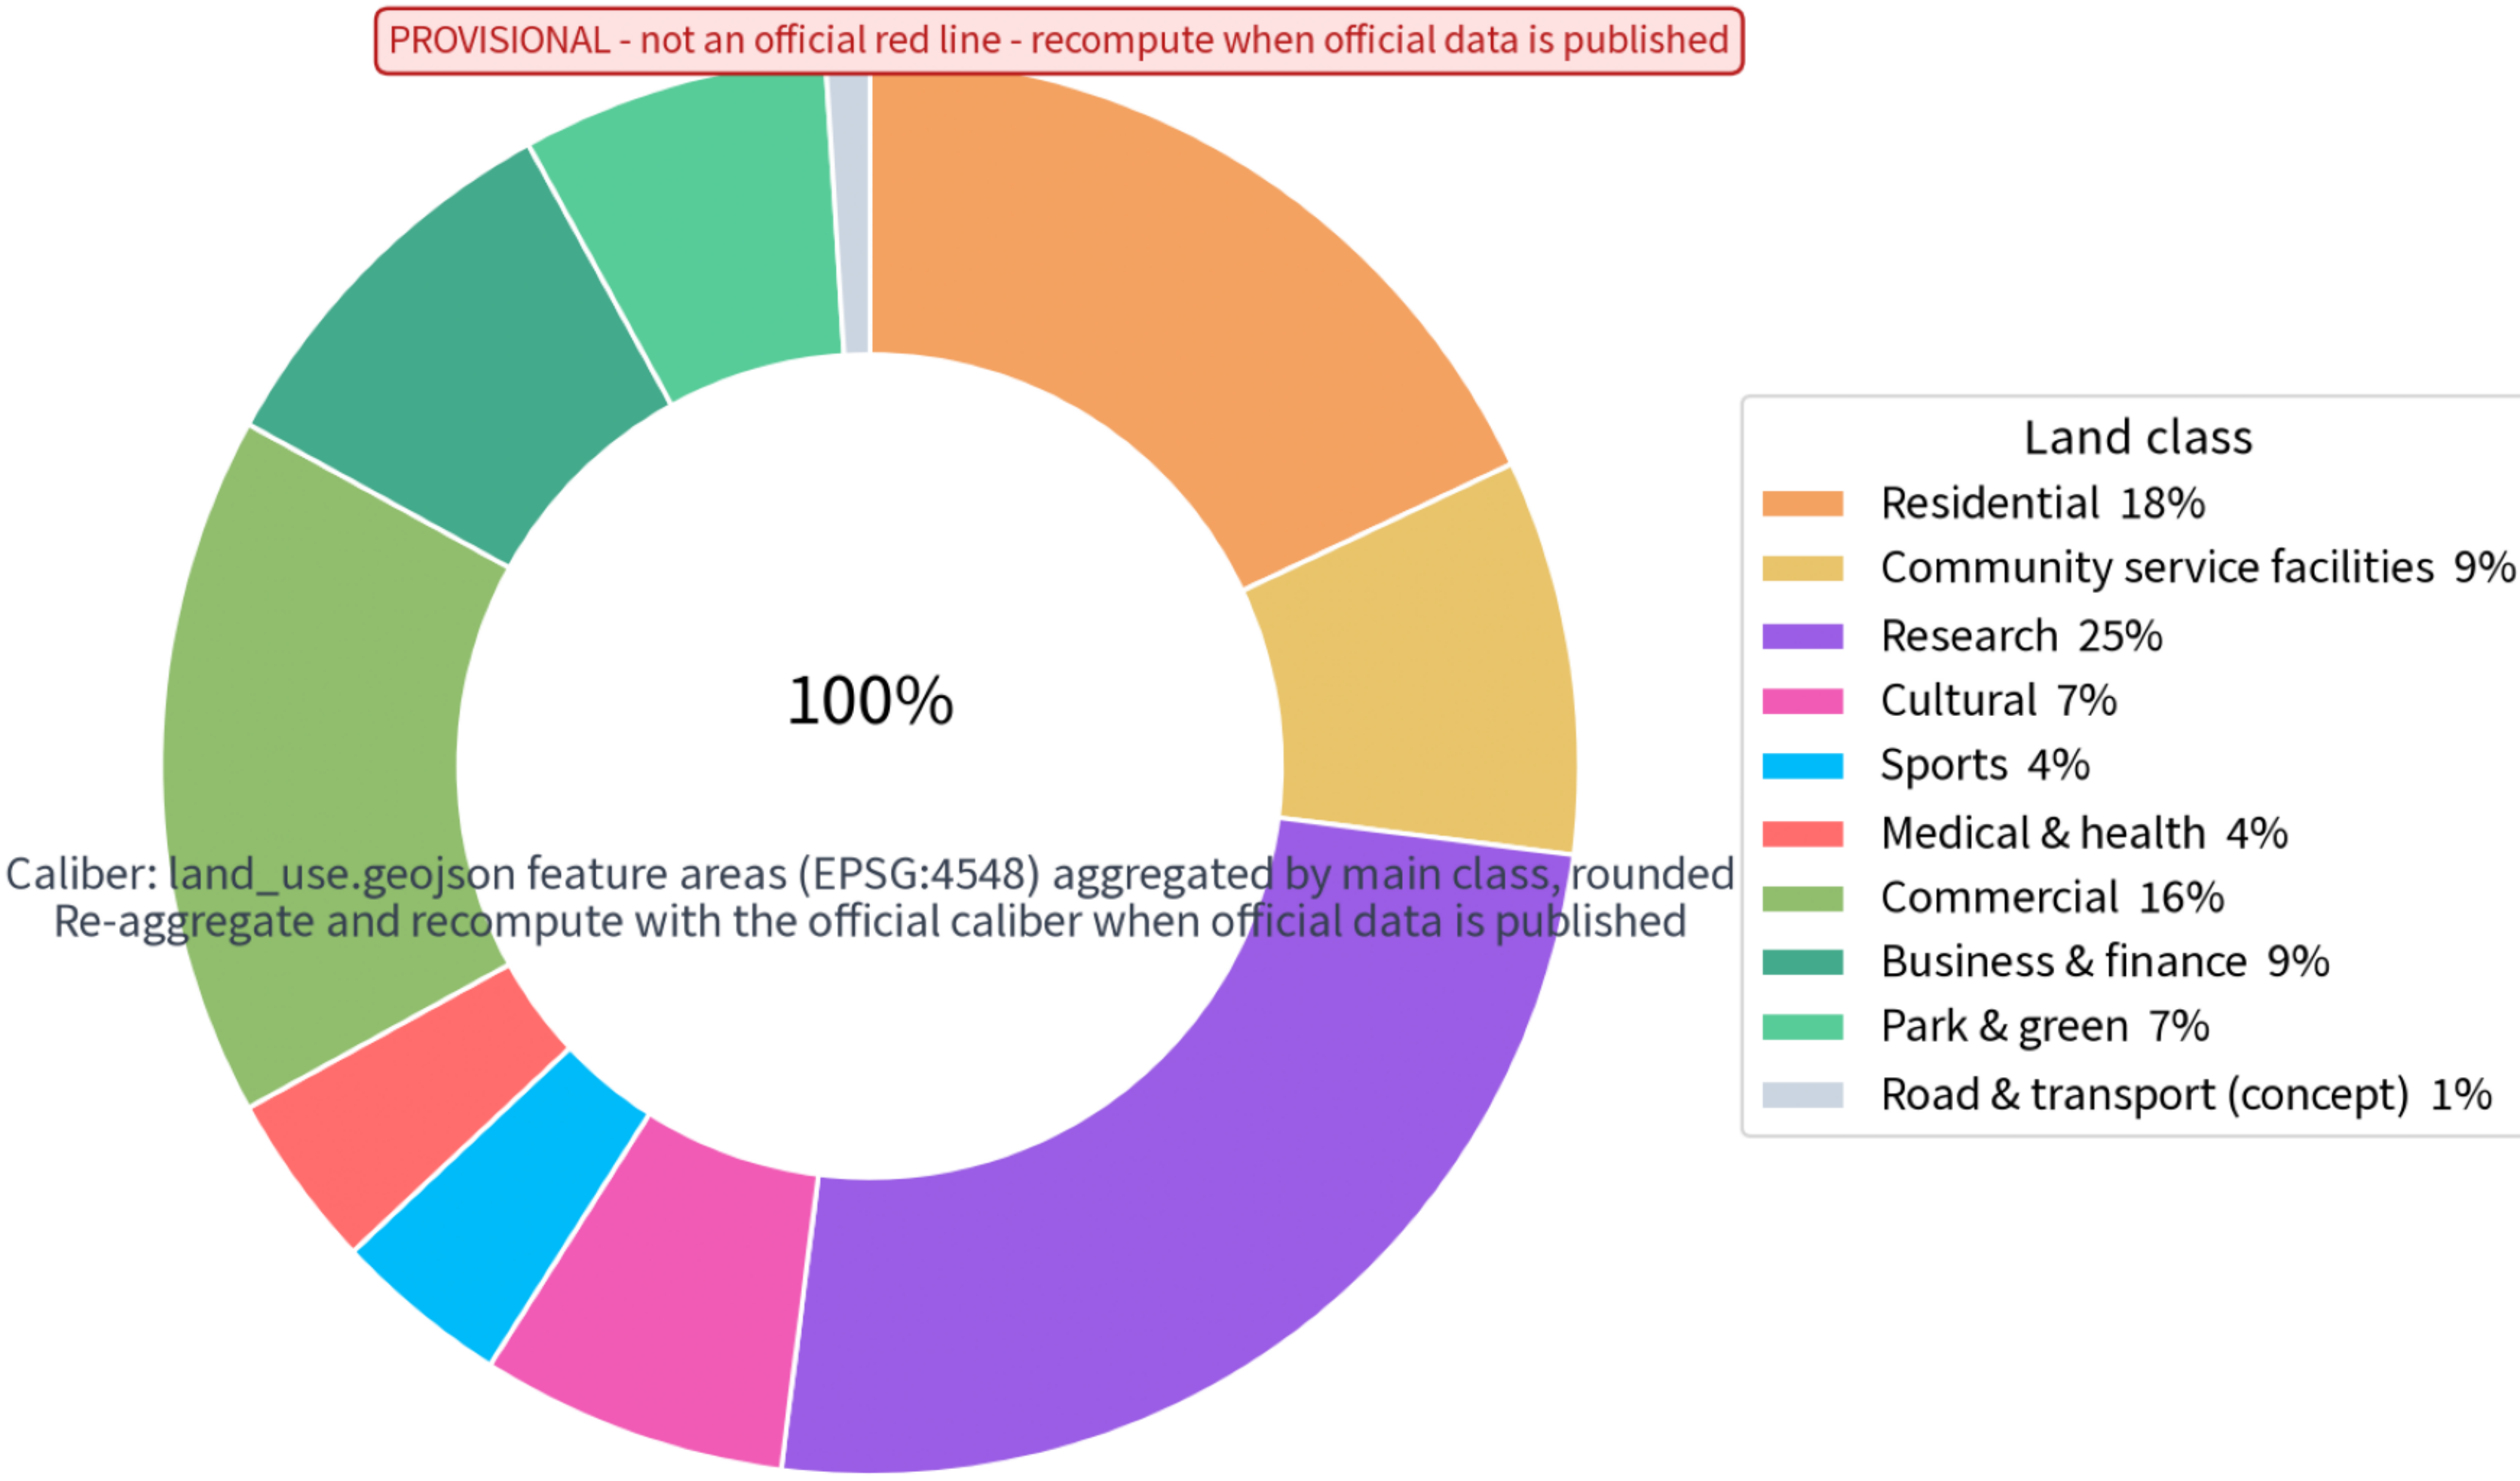

Land Use, Scenarios & Indicators (Concept)

AI场景卡（12张）与测试验证场景（3项）

C01-C12: guide / scheduling / elderly-accessibility / matching / feedback / inspection / emergency - all anonymised aggregation + human review + non-AI equivalent channels; T1-T3 give falsifiable hypotheses, data input, model boundaries, sandbox processes, a

Land-Use Structure (single caliber: 9 main classes + road, provisional)

指标体系（公式・置信・复算触发）

green_ratio = green area / overall design area (low confidence; recompute when official geometry is published)
public_space_ratio = public space area / overall design area (low confidence; same)
global_case_count=8 + annual_program_count=4 + persona_count=6 + industry_test_scenario_count=3 (high confidence; visible table counts)
