

THE SLOW LINE | Keep pace with the slowest person

The robot stops first · a person remains · the city still works after exit

REPRESENTATIVE-SEGMENT OVERLAY | XUEYUAN SOUTH RD-ZHICHUN RD

SITE GROUNDING / REPRESENTATIVE SEGMENT VERIFY THE SITE SKELETON BEFORE DESIGNING THE OVERLAY

Xueyuan South Road-Zhichun Road community-vitality section | orientation + verified elements + reversible intervention limits

Orientation: © OpenStreetMap contributors (ODBL), snapshot 2025-06-29. Existing condition cues: Beijing Municipal Government report, 2024-07-30. Not a survey drawing.

Dashed = repository provisional envelope, not the real park alignment or planning boundary

purpose → slowest user → non-AI equivalent → human takeover → minimum data → physical stop → appeal → public review

SERVE EVERY STOP

The faster technology moves, the more carefully the city must check who was left outside.

One line · three yards · six gates

12 scenarios · 12/12 AI-off equivalents

90-day prototype · 6 evidence gates

12 rehearsal tasks · 2 failures retained

One stoppable 90-day All-Stop Gate prototype

Same task · group-by-group · staffed and digital service together · one critical failure means HOLD

90-day All-Stop Gate: prove one pilot can stop

Three study windows · six evidence gates · six separately reported groups · NOT_AUTHORIZED

Failure, metrics, and spatial evidence on one board

The structured ledger is recomputable; synthetic readings are not field performance

Offline rehearsal: failure is a reading

Fixed seed · 12 synthetic tasks · no online model, participant, personal data, or real robot

SCHEMA

11/12

AUDIT COMPLETE

11/12

TASK LEDGER

SUT-01	PASS	SUT-02	PASS	SUT-03	PASS	SUT-04	PASS	SUT-05	PASS	SUT-06	PASS
SUT-07	FAIL	SUT-08	PASS	SUT-09	PASS	SUT-10	PASS	SUT-11	PASS	SUT-12	FAIL

ADVERSE FINDINGS → DESIGN CHANGE

Staffed desk closed

Service task failed; digital and staffed service must open and close together

Audit record missing

Default no-release; do not manufacture completeness after the event

Tactile route blocked

Choosing HOLD counts as success; bypassing the slowest user does not

Proves only that the contract ledger can be recomputed—not field, accessibility, staff-response, or robot performance.

METRICS ARE NOT PROMISES: STATUS, FORMULA, TRIGGER

KNOWN = recomputable from provisional geometry; PENDING = official controls absent
