THE SLOW LINE

Keep pace with the slowest person

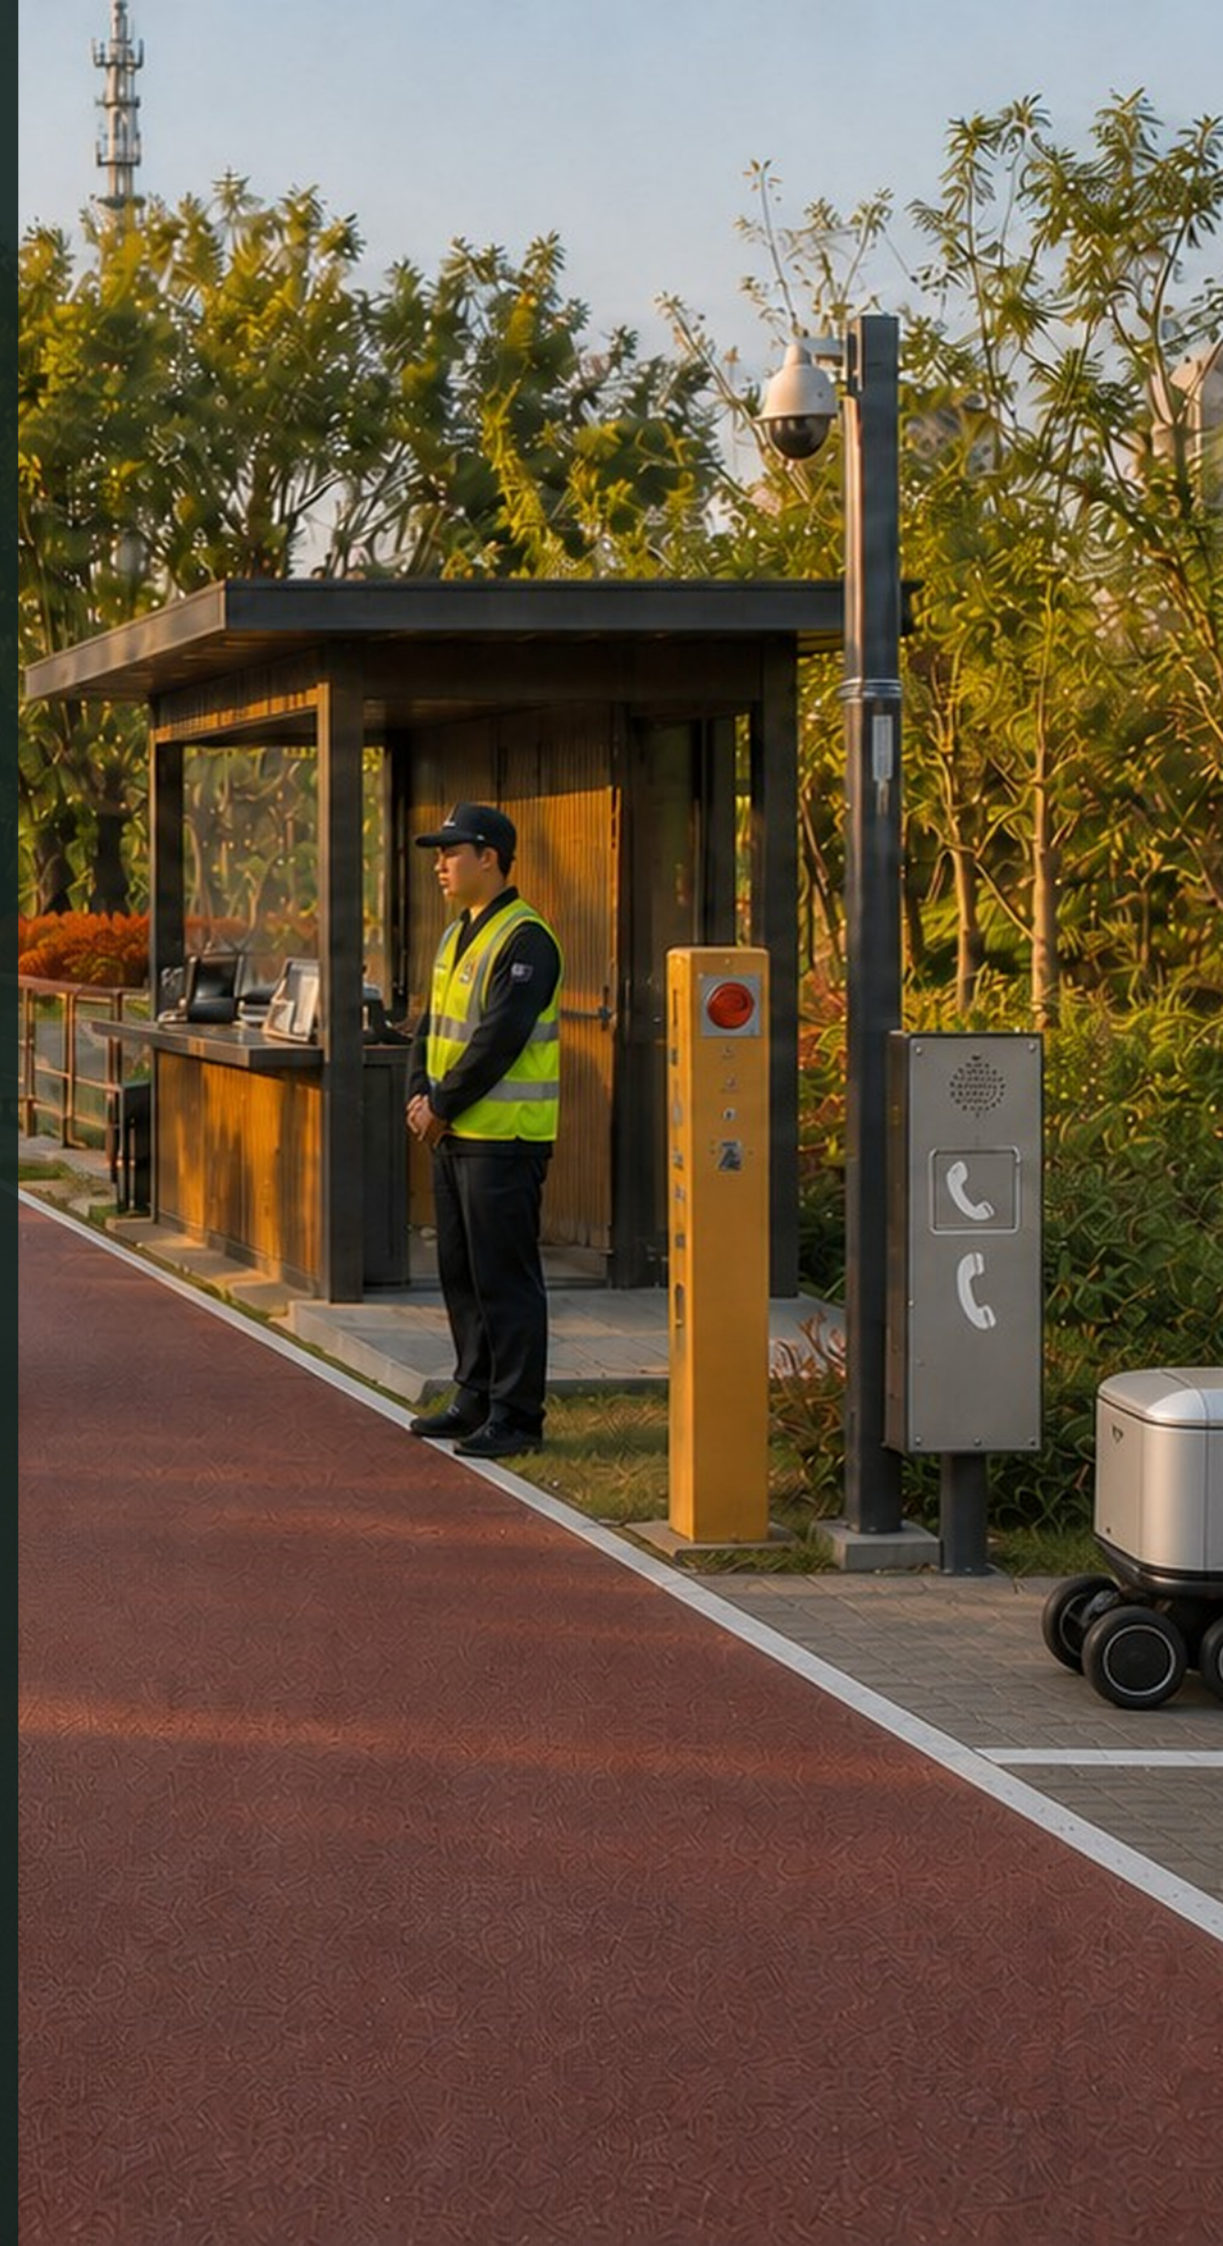

Verify the real site skeleton before adding reversible civic service.

VERIFY THE REAL SKELETON BEFORE ADDING THE OVERLAY

Xueyuan South Road–Zhichun Road | representative segment, not an exact site

REAL / ADD / DO NOT

Keep the restored rails, blue acoustic barrier, and red main slow path. Add only a staffed kiosk, physical E-stop, and paved side spur. The robot waits behind the line: never on the main path and never across the rails.

REAL

rails · barrier · red main path

ADD

staffed service · E-stop · side spur

STOP

rail crossing / path occupation / unattended launch

90-day All-Stop Gate: from card to hand-off

No real-world action is authorized; every gate defaults closed

ADVERSE FINDINGS → DESIGN CHANGE

Staffed desk closed
Service task failed; digital and staffed service must open and close together

Audit record missing
Default no-release; do not manufacture completeness after the event

Tactile route blocked
Choosing HOLD counts as success; bypassing the slowest user does not

Proves only that the contract ledger can be recomputed—not field, accessibility, staff-response, or robot performance.

A recomputable spatial container, not a surveyed city

Provisional boundary, concept land use, and mobility/blue-green system

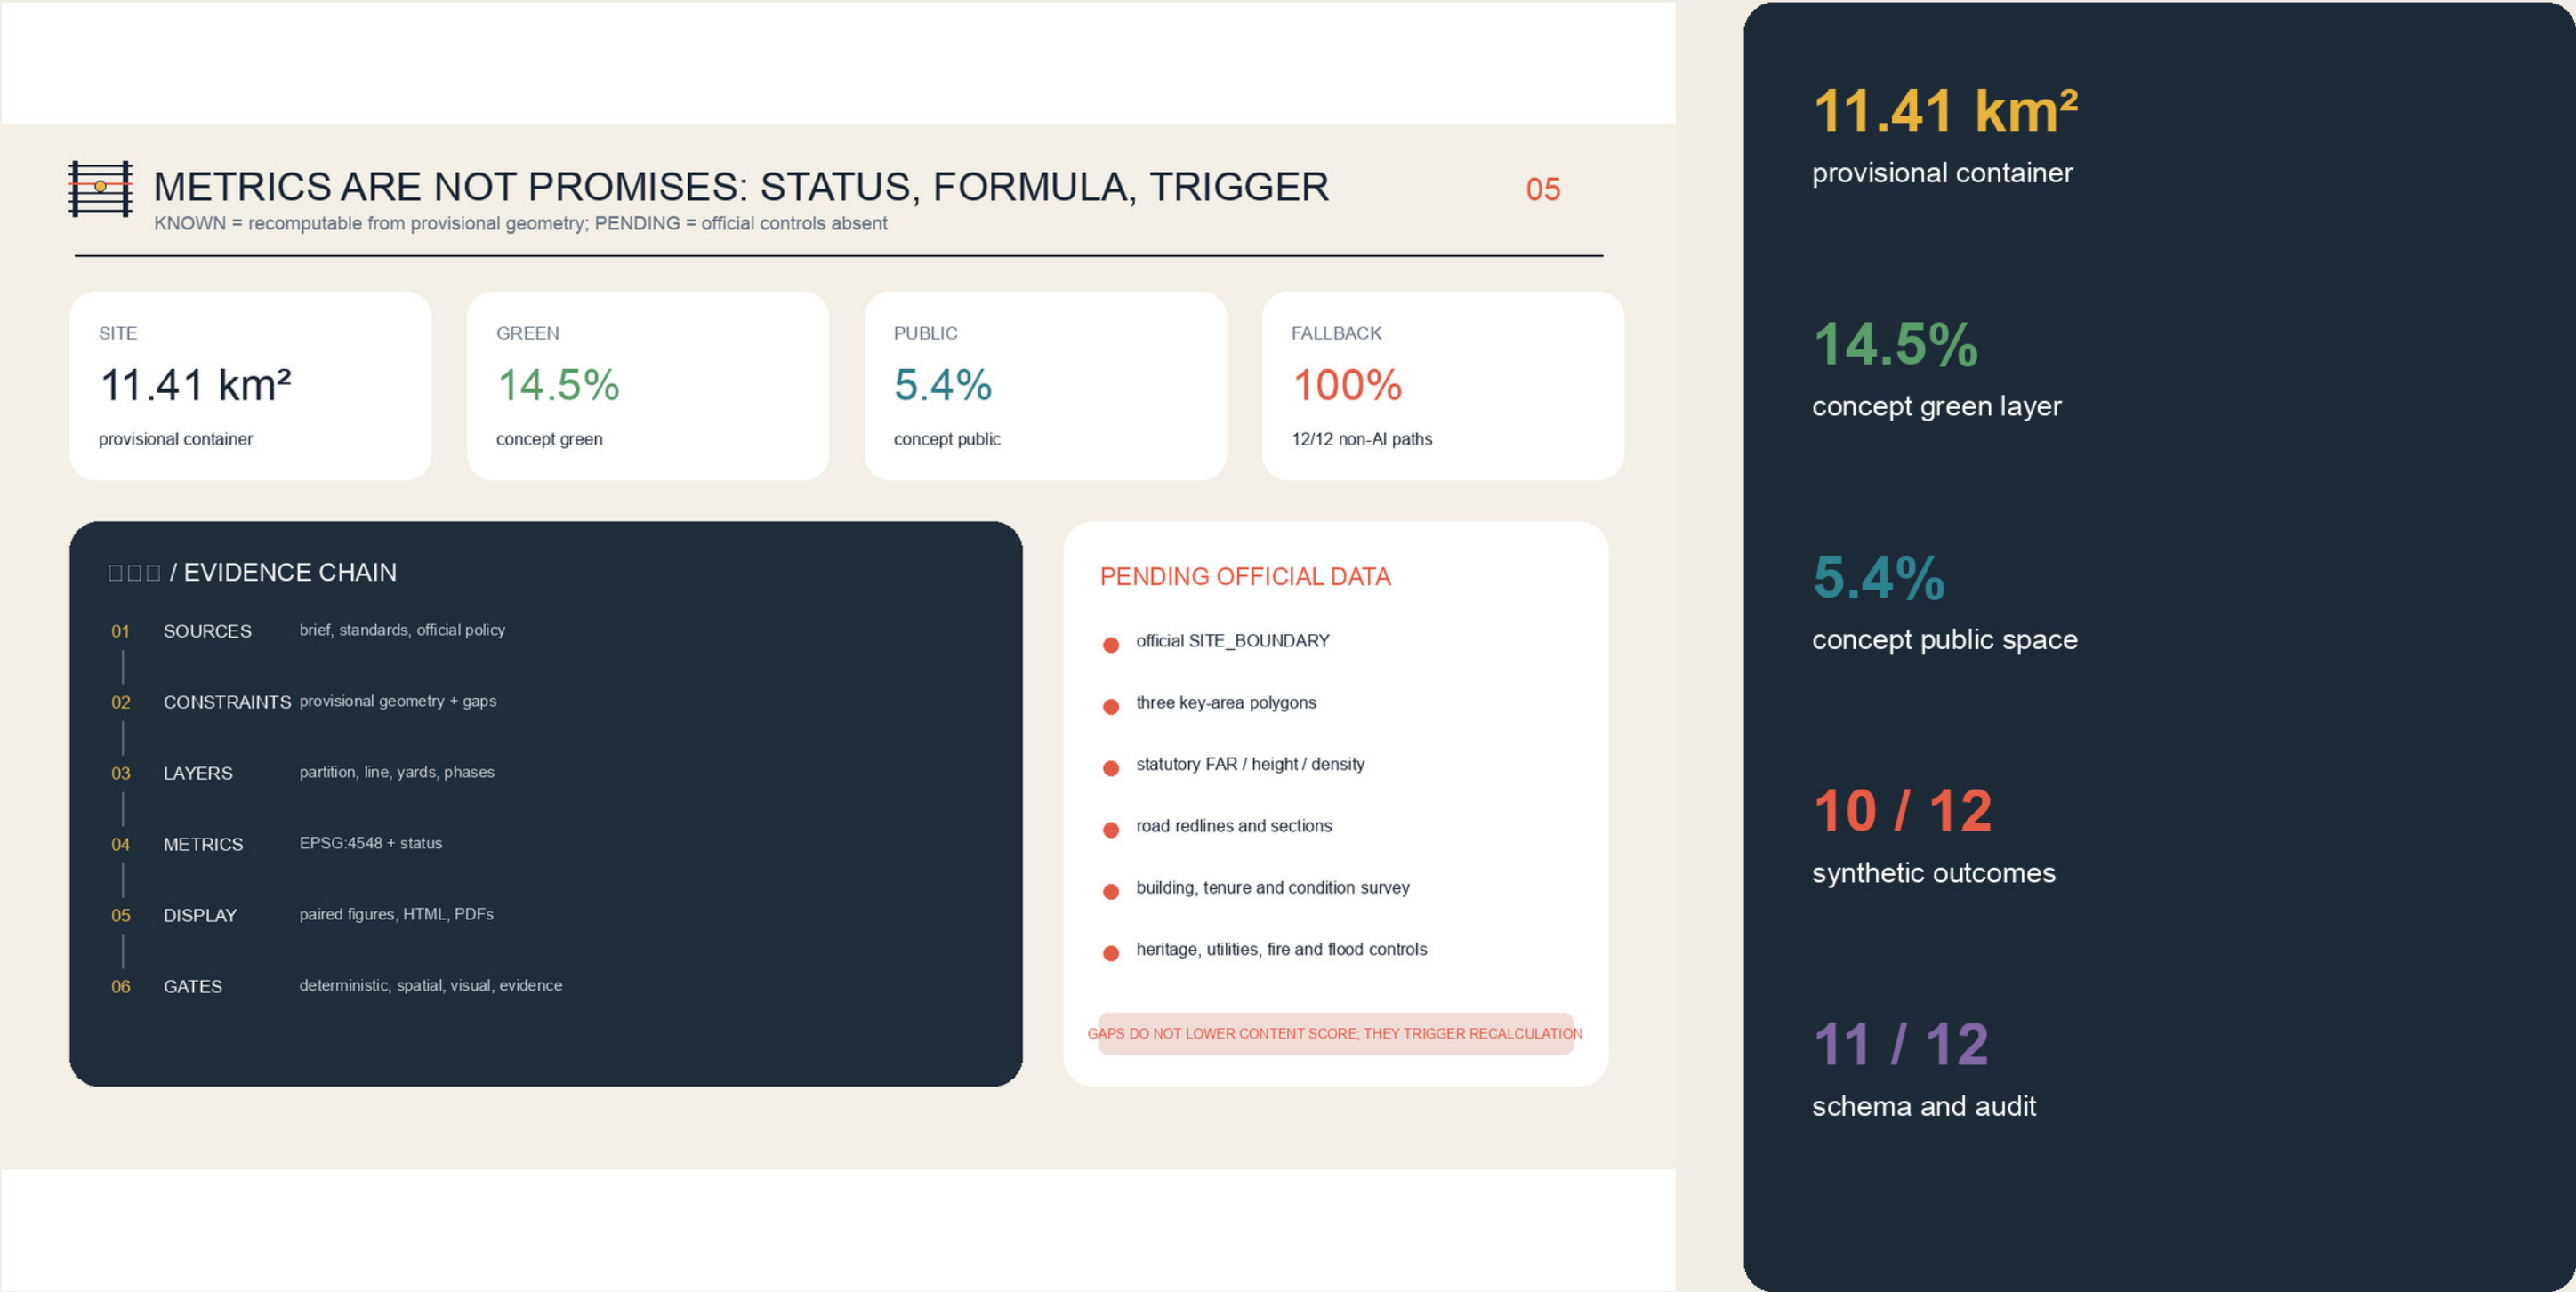

FROM STRATEGY TO GROUND: THREE LEVELS, ONE DECISION CHAIN 02

All five accountable roles remain unassigned: site rights holder, accessibility co-designer, service operator, safety/privacy professional, and independent reviewer. No named duty, staff roster, exit budget, or restoration evidence means no procurement.
