

PAR • JZ | Public participation loop

PAR • JZ

Three nodes • two wings • one issue–evidence–feedback loop

CONCEPT / PROVISIONAL

All nodes, routes and values are participant concept models; not official boundaries or implementation commitments.

Key areas | three participation nodes

PAR • JZ

Knowledge • verification • communication

CONCEPT / PROVISIONAL

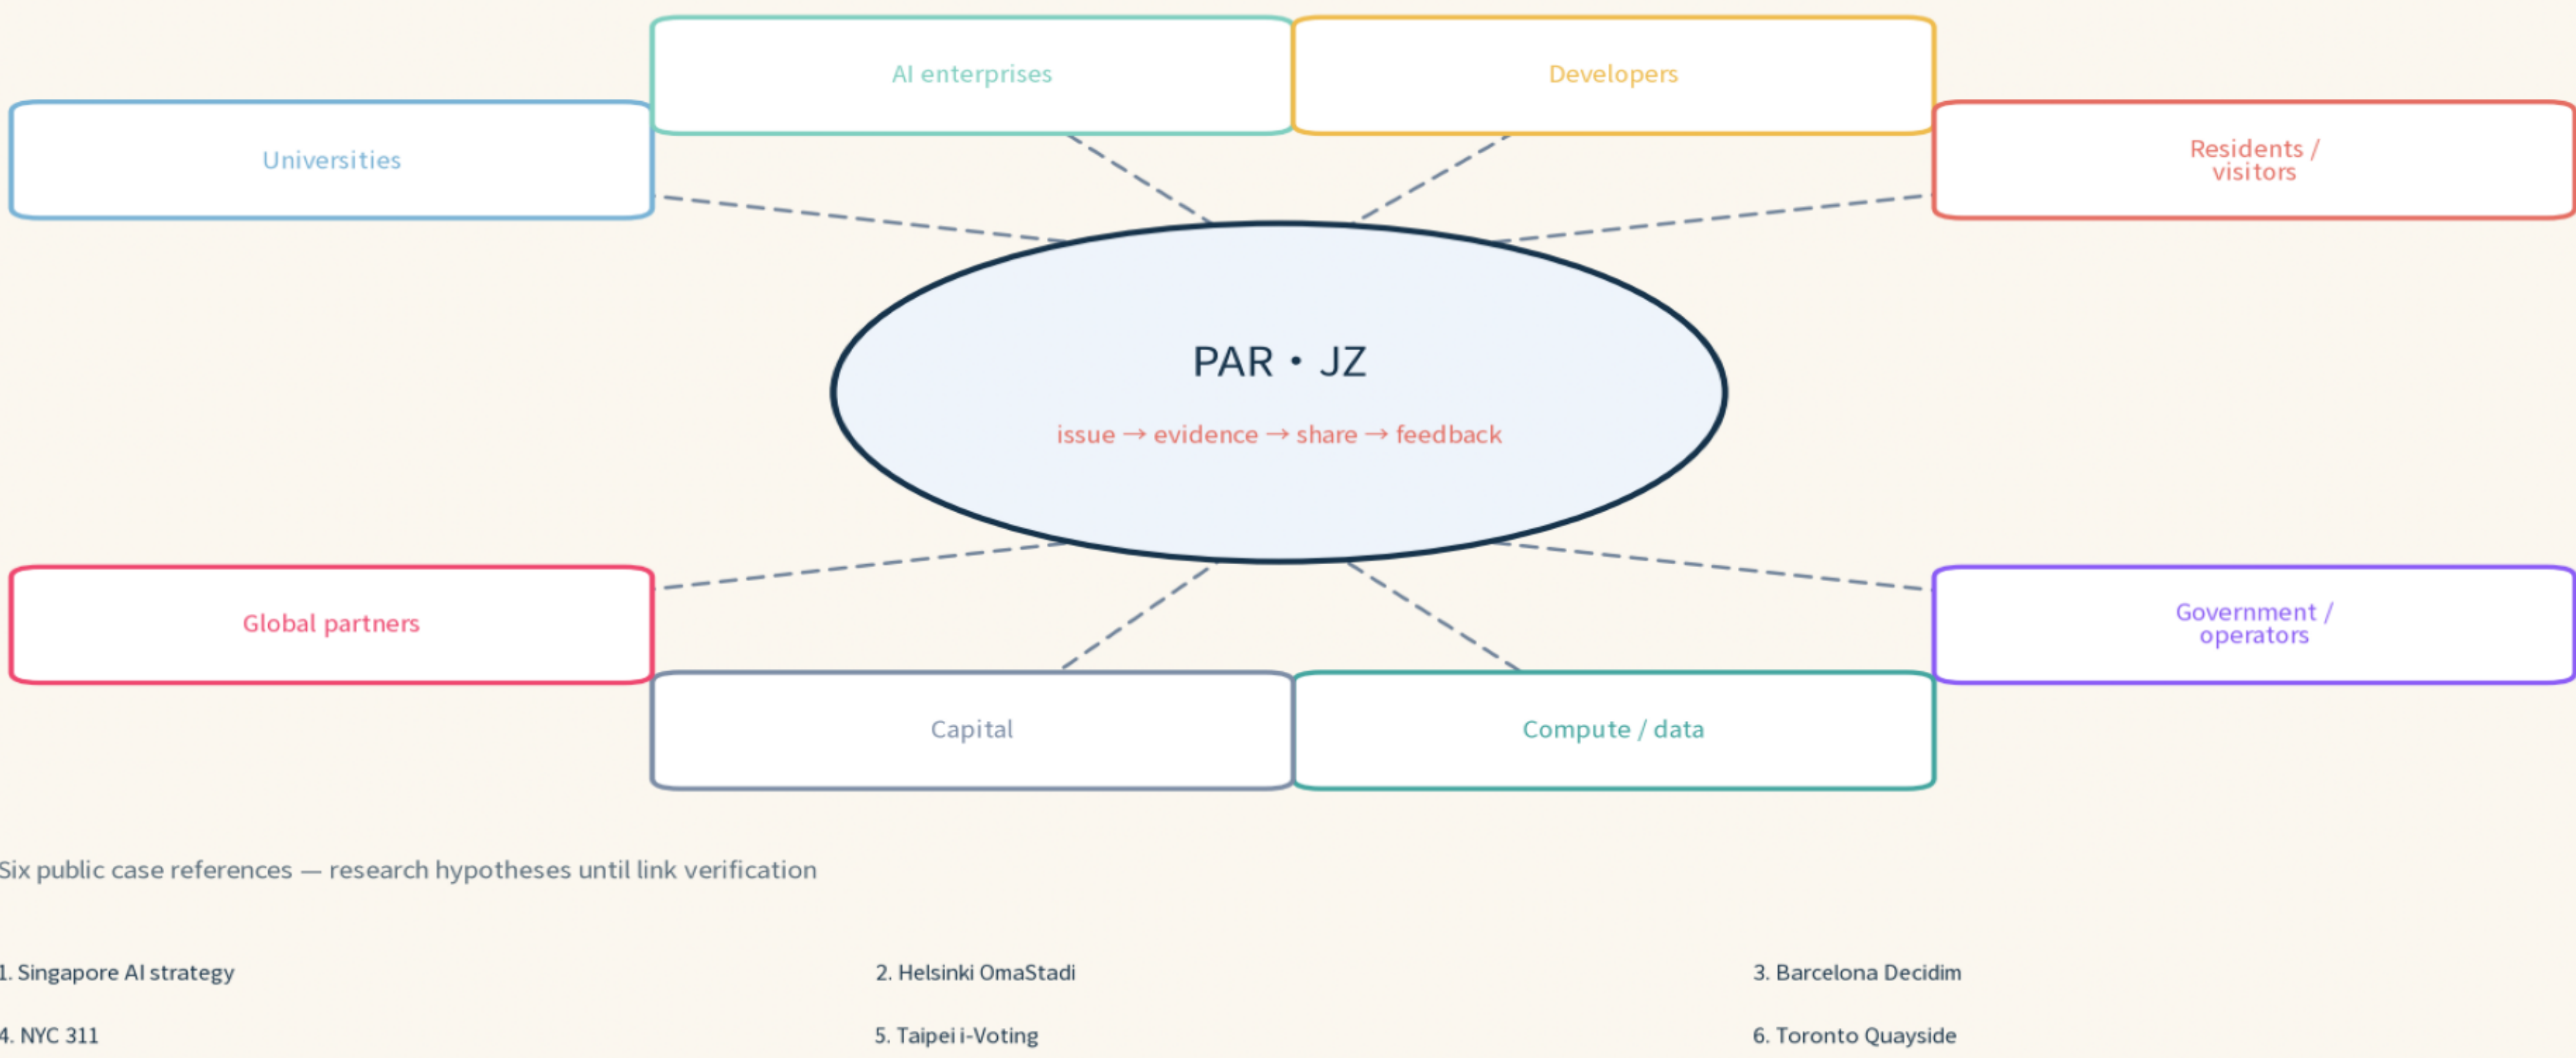

Candidate concept locations require survey, tenure, accessibility and authority checks before siting.

AI innovation ecosystem map

PAR • JZ

Actors • flows • open interfaces

CONCEPT / PROVISIONAL

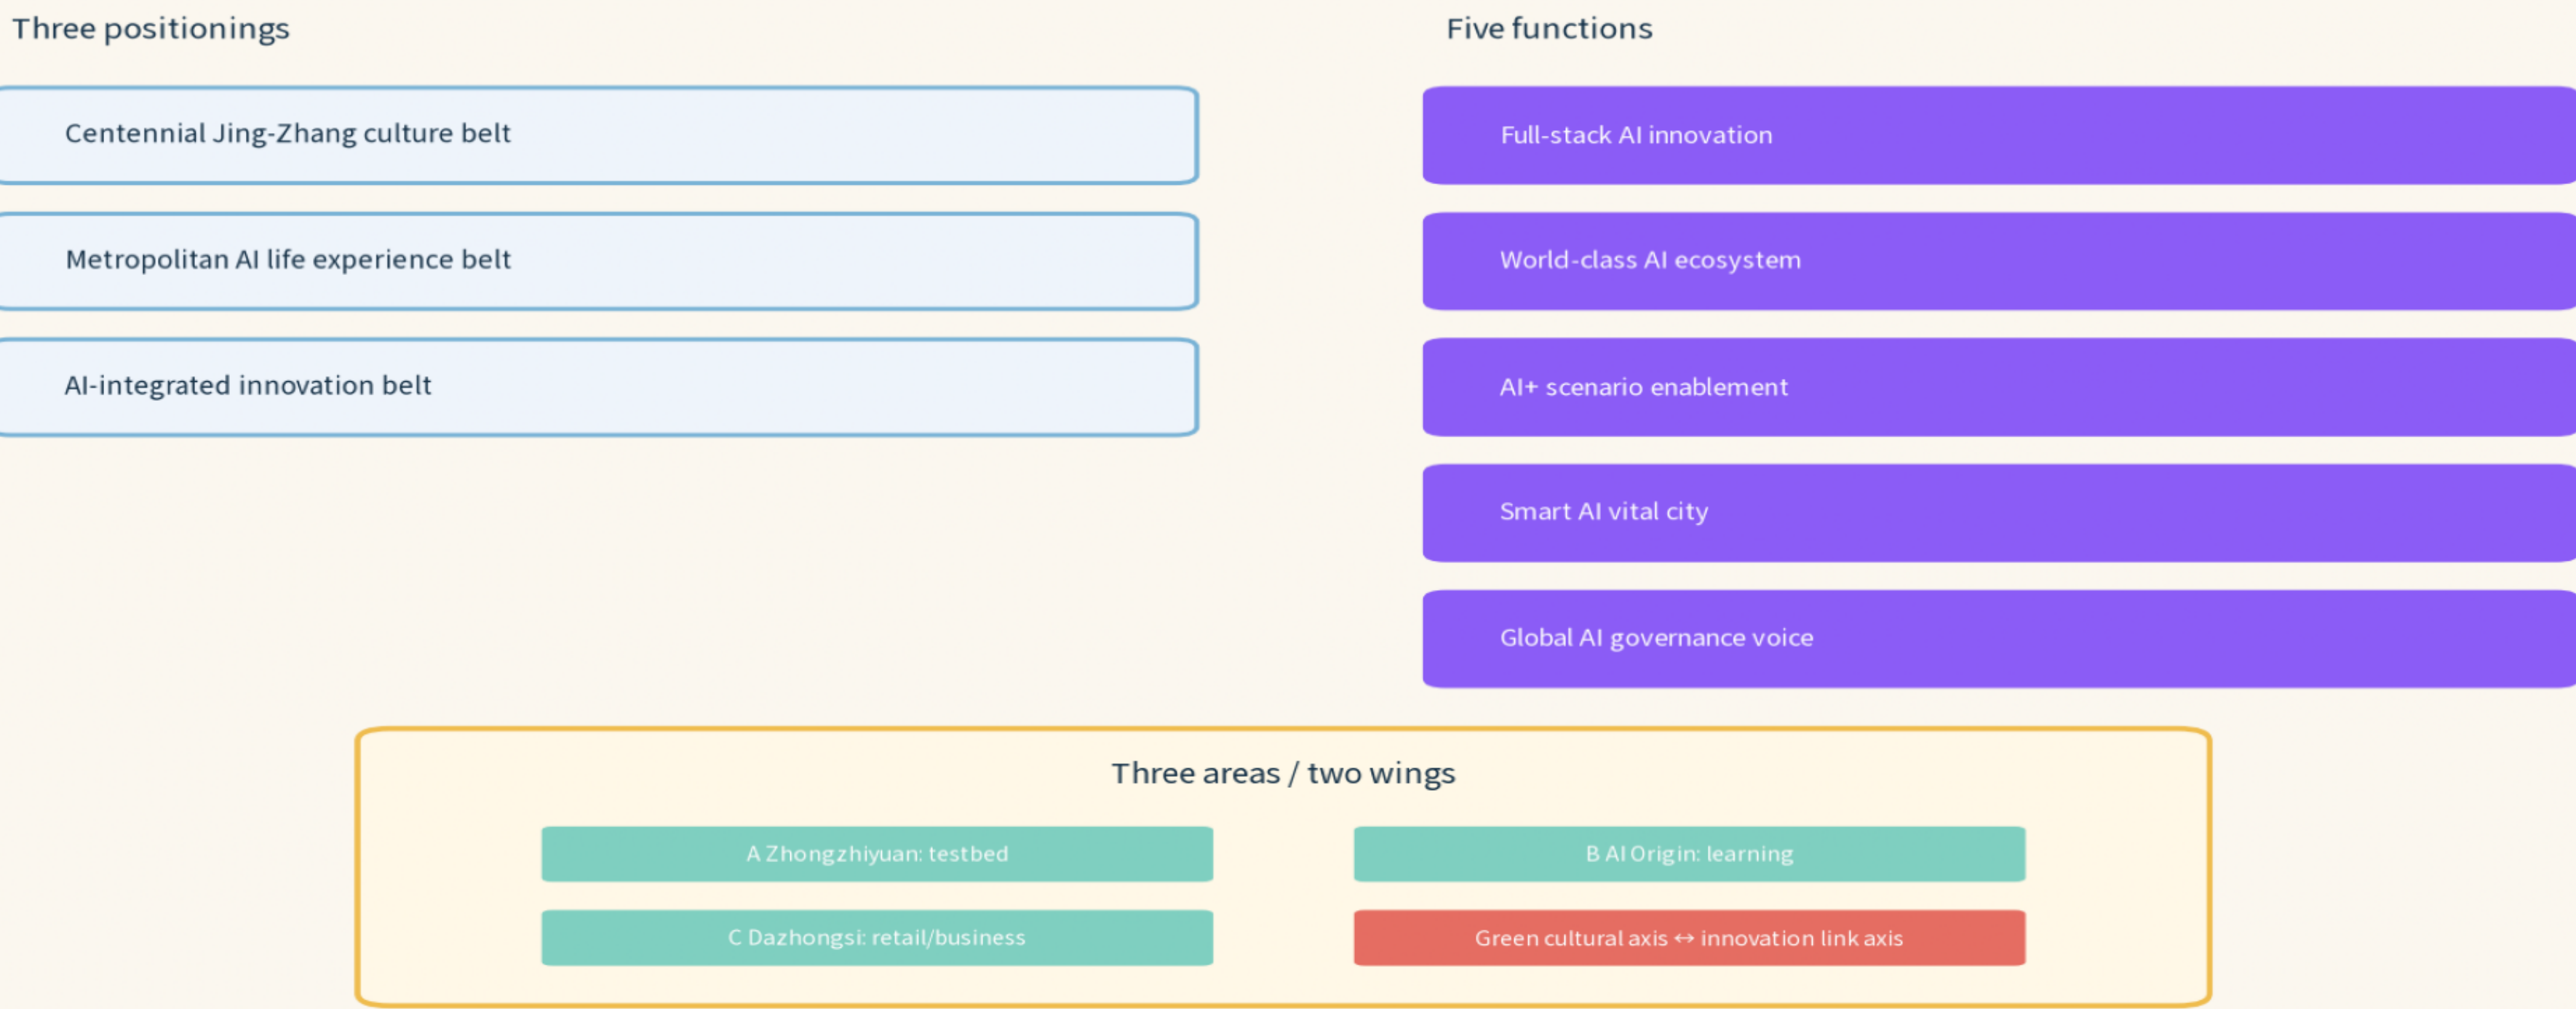

No partner, funding, capacity or implementation agreement is claimed; all interfaces remain unknown/to_verify.

Three areas • two wings • five functions

PAR • JZ

Concept mapping, not an authorized planning caliber

CONCEPT / PROVISIONAL

All spatial interfaces are concept reservations; official geometry, tenure and controls remain unknown/to_verify.

Slow mobility and blue-green network

PAR • JZ

CONCEPT / PROVISIONAL

Walk / cycle first • barrier-free alternatives • low intervention

Concept land-use structure

PAR • JZ

CONCEPT / PROVISIONAL

Single recompute caliber • no statutory conclusion

100% concept share; recalculate after official land-use and boundary data

No floor area, FAR, height or parcel-level control is preset.

Participant provisional model only, not an official land-use plan.

Metric evidence chain

PAR • JZ

CONCEPT / PROVISIONAL

Geometry → formula → reduced-precision display → recompute

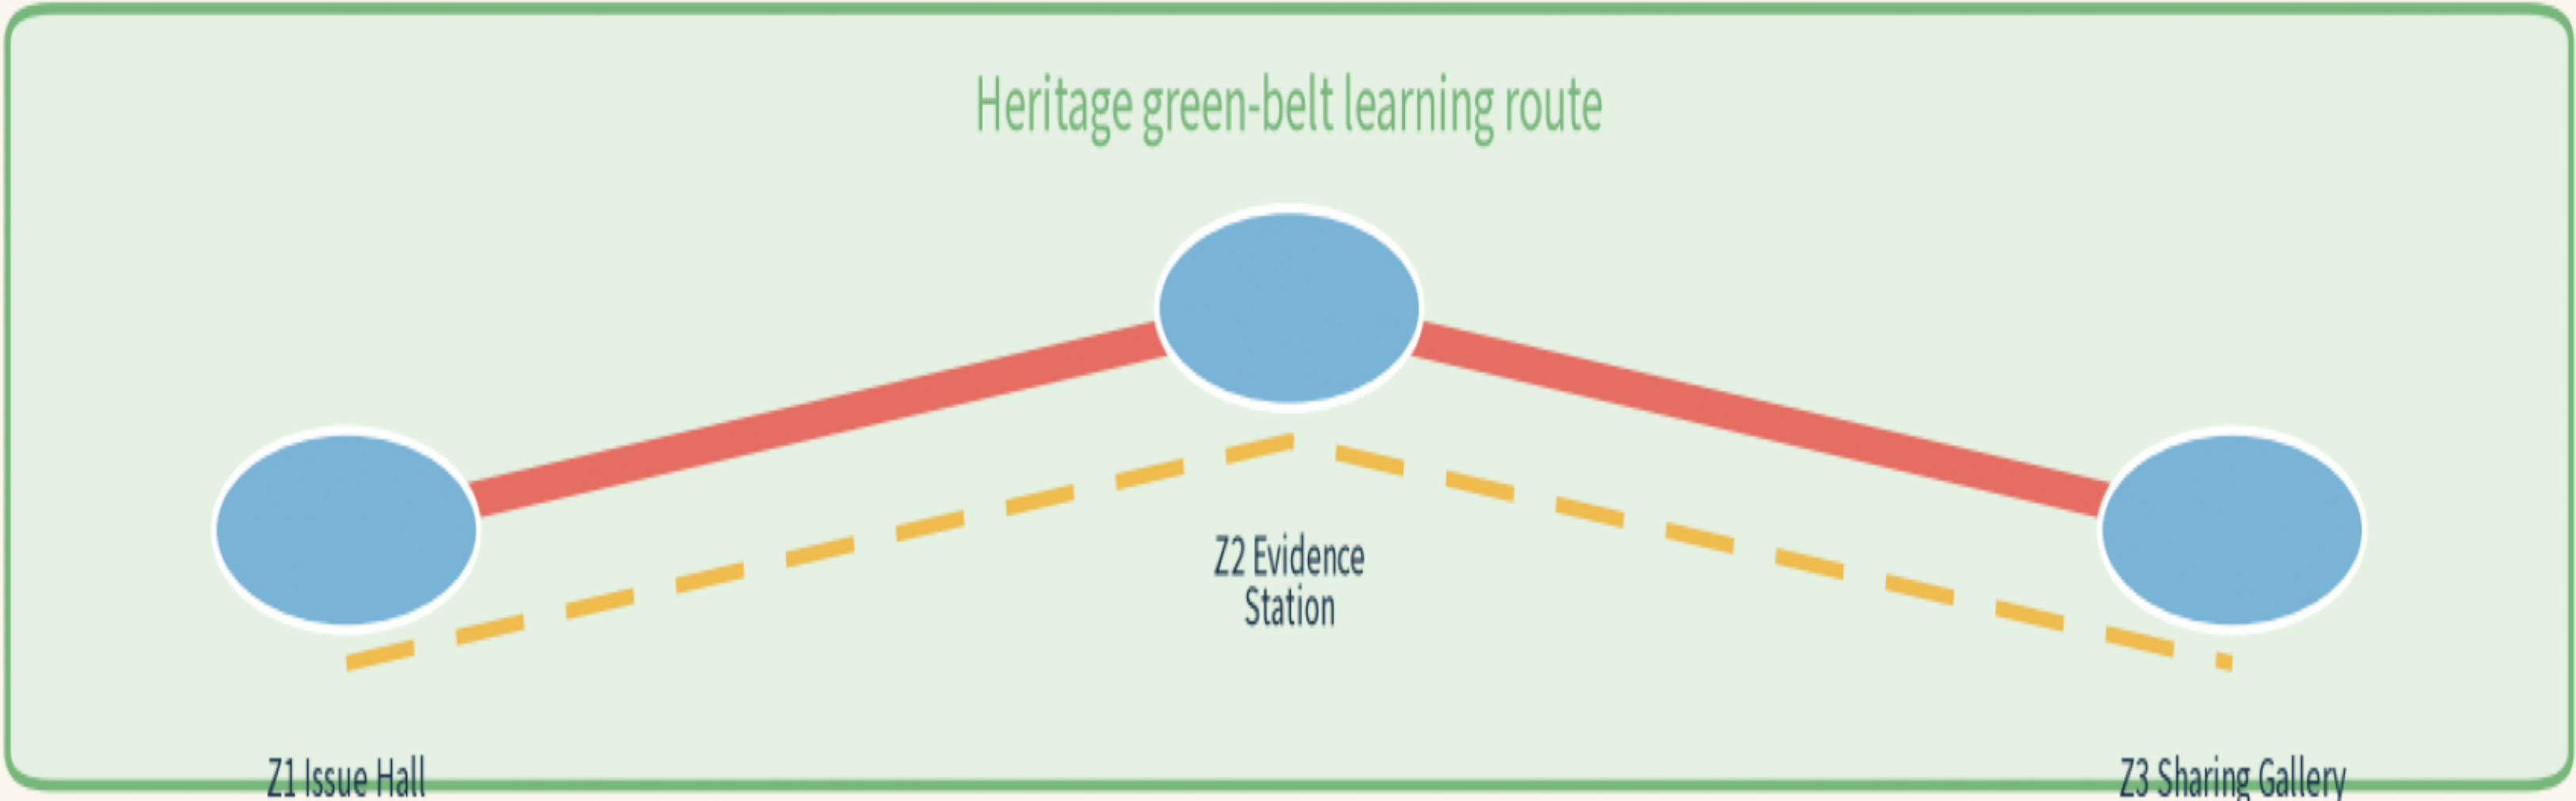

Metric	Displayed value	Recompute trigger
site_area_sqm	11,412,825 m²	official geometry
green_ratio	0.11	official green-line data
public_space_ratio	0.0032	official land-use data

Ratios and counts are not compared on one axis; all values are provisional.

Geometry source: package provisional GeoJSON; values are not authoritative or approval evidence.

Rail-station interface

Community / market interface

solid: participation axis

dashed: accessible alternative

Route continuity, station access and current accessibility remain unknown/to_verify until survey.
