

JING-ZHANG HANDOVER LINE

Intelligence moves. Responsibility stays visible.

SITE OVERVIEW

HANDOVER PROTOCOL

01 / BUILD TO VERIFY

Models, robots, compute and data enter tests with versions, risks and shutdown rules.

02 / VERIFY TO SHARE

Results, licences, failures and limits travel together; open source never means exposing personal data.

03 / SHARE TO SERVE

Civic services retain a human desk, a no-AI equivalent, appeal and exit records.

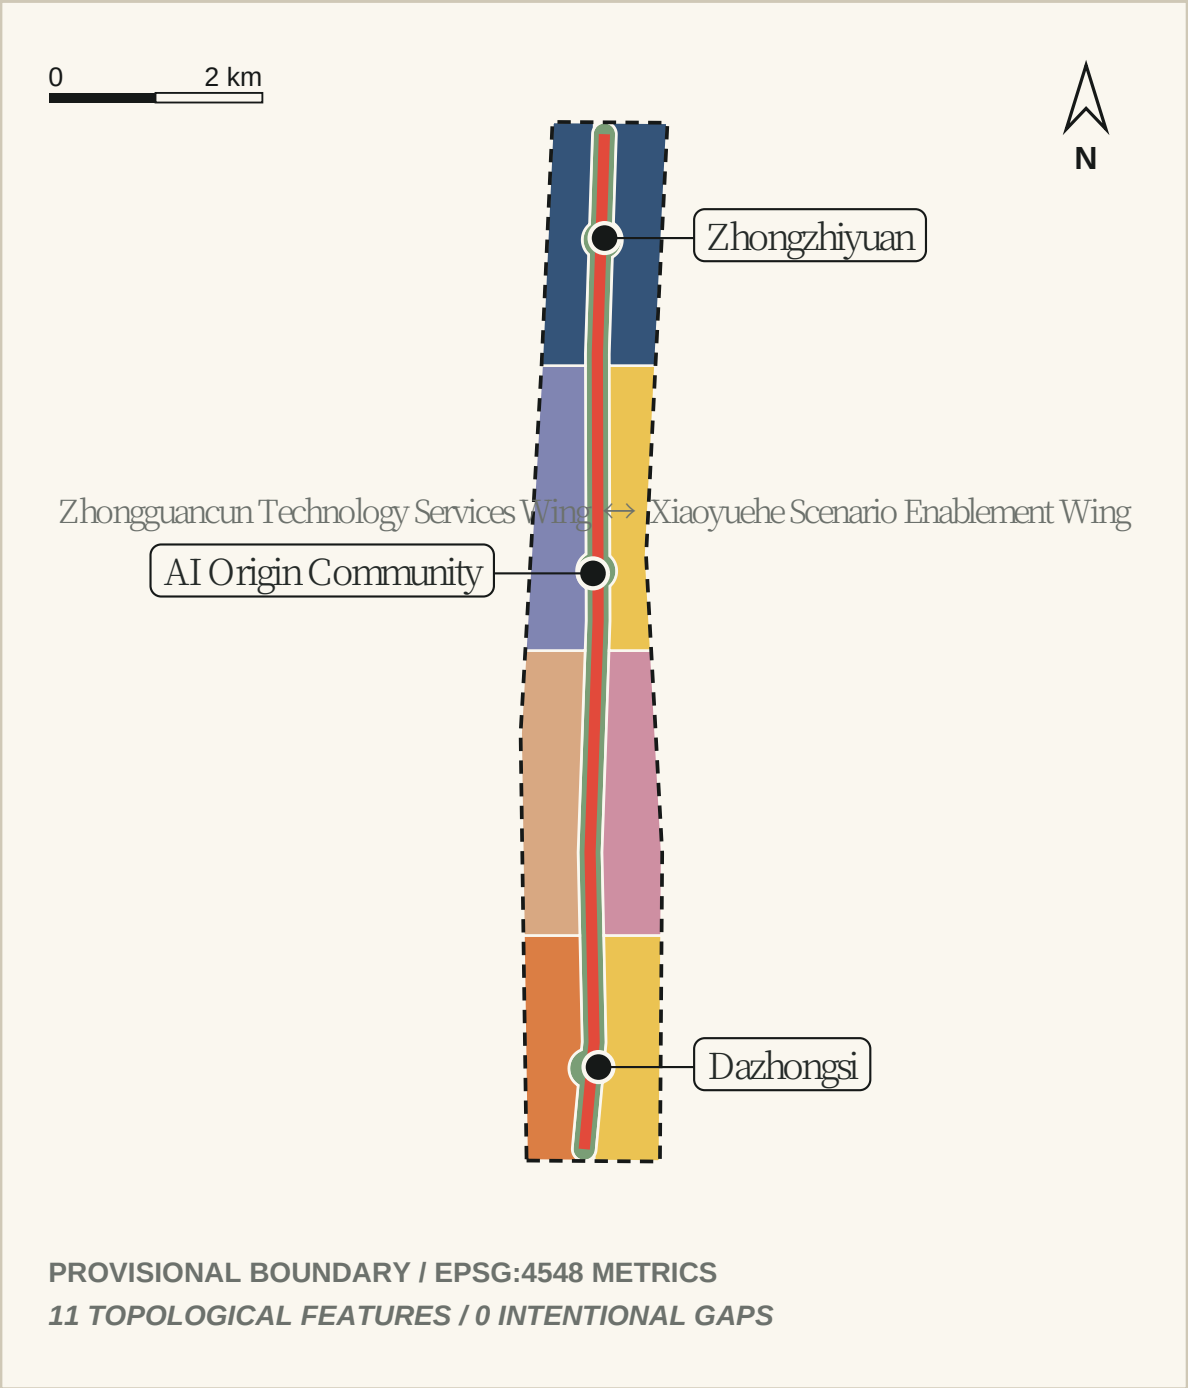

04 / RETURN THE PROBLEM

Complaints, repairs and shutdown causes travel back to research as public learning.

Human takeover is not a fallback feature. It is civic infrastructure.

Full coverage, no statutory fiction

3 YARDS

KEY AREAS
Detailed validation

Design recommendation: all zones recalculate when official boundaries arrive; no ownership or statutory land-use claim.

Data: land_use.geojson and site_boundary.geojson; codes from the public MNR subset

Official positions land in space, synergy lands in interfaces

Three positions, five functions, three areas and two wings x within belt- within city- municipal- regional

POSITION 01

Centennial Jing- Zhang Culture Belt

Century Logbook, oral- history booth and the Tsinghuayuan Station anchor form one continuous public record.

POSITION 02

Urban AI Life Experience Belt

Twelve reversible scenarios sit on continuous public handover ground: enterable, refusable, exitable.

POSITION 03

AI Integrated Innovation Belt

Eight shared stacks interface across the three areas in a build-verify-share-serve-feedback loop.

WITHIN BELT

Three areas and two wings organise the research-validation-service loop; objections and shutdown reasons travel back north.

WITHIN CITY

Connects to the official "two zones and one belt" framework, matching Zhongguancun technology supply to this belt's validation and scenario demand.

MUNICIPAL

Future Science City, Huairou Science City and BDA form an original-research / engineering-validation / scale-delivery division; this belt is the public-validation output end.

REGIONAL

Compute, energy and scenario interfaces reserved toward Zhangjiakou and other Beijing- Tianjin- Hebei nodes; feasibility to be confirmed by authorities.

Movement and blue-green public ground

The smart layer is removable; ordinary movement and human service stay online

F / 04

One spine, eight stitch links, twelve takeover points

The smart layer is removable; basic access and human service stay available

MOVEMENT / SERVICE

- Continuous walk-cycle spine
- East-west stitch links (8)
- Blue-green comfort ground
- Human-takeover scenario node (SCN)
- Civic landmark point

A OFFLINE BY DEFAULT

Static signs, light, tactile maps and human help do not rely on a model.

B GRADED TAKEOVER

Low confidence, boundary breach, objection or outage calls the duty person.

C EXIT IS RECORDED

Shutdown cause, deletion and service continuity enter the public logbook.

SECTION The handover section: order and adjacency only, no dimensions

Handover counter	Accessible walk	Takeover Kiosk Zero	Retained track	Machine-only lane	Planting and rest
Walking surface (continuous, no level change) The staffed counter precedes the smart interface and still works once the smart layer is removed	Never interrupted by equipment, advertising, temporary occupation or charging posts	The physical stop control is reachable from the footway without downloading or registering	Set flush in the paving, a trace rather than an obstacle	Separated from walking; crossing the edge stops the machine, safety staff take priority	Non-commercial dwelling; seats and shade carry no spending condition

Adjacency rule: counter, walk and stop control stay continuously reachable; the machine lane never comes between them

Conceptual connectivity, not road redlines or engineering feasibility; lengths calculated in EPSG:4548
