01 01 Design Basis and Source List

Primary basis: the Qualification Pre-Announcement and the Agent Open-Call Taskbook (v0518); machine-readable basis: the site package and source registry. All spatial content is generated on the provisional boundary as a conceptual recommendation; it does not replace statutory planning and does not constitute approved government conclusions.

02 02 Three-Level Scope Framework

Three-level scope: Coordinated Research Area approx. 43.6 km² (strategy and regional synergy), Overall Design Area approx. 11.4 km² (urban renewal at RDP depth), Key-Area Detailed Design Area approx. 368.4 ha (three archive stations). The levels are continuous: research explains why the belt exists, design turns judgments into recomputable land use and projects, key areas verify implementability.

03 03 Coordinated Research Area: Industry and Future City

Spatial structure: one belt (Memory Spine) · three stations
(Source/Transform/Scenario) · two wings (Zhongguancun factor record,
Xiaoyue scenario record) · multiple points (name wall/Honor
Yearbook/commit stele) · two networks (blue-green slow traffic and
archive retrieval). Renewal uses archive-based units: anchors + spine
stitching + low-disturbance micro-renewal.

Mobility & blue-green

- 主脊绿道 (greenway)
1 条 南北贯通
- 东西缝合带 (branch)
3 条 对应三座档案站
- 道路中心线总长
37.3 km
- 绿地面积 / 占比
174 ha / 15.2%
- 公共空间面积

04 04 Overall Design Area: Urban Renewal and RDP-Level Design

Three archive stations: Source · Zhongzhiyuan (full-stack innovation, model evaluation and standards hall); Transform · AI Origin Community (commercialization, commit stele and Honor Yearbook); Scenario · Dazhongsi (AI-native new business, four-quadrant pedestrian connection). All key-area content is directional concept design.
