

京张长实验 JINGZHANG OPEN LAB

Building the Centennial Jing-Zhang AI Innovation Belt into a continuously operating city-scale AI test line

The proposal organizes the 9km heritage park and flanking districts as a continuously operating city-scale AI test line: urban space is the test bench, AI scenarios are experiments, citizens and Agents are co-experimenters, public return is the mandatory

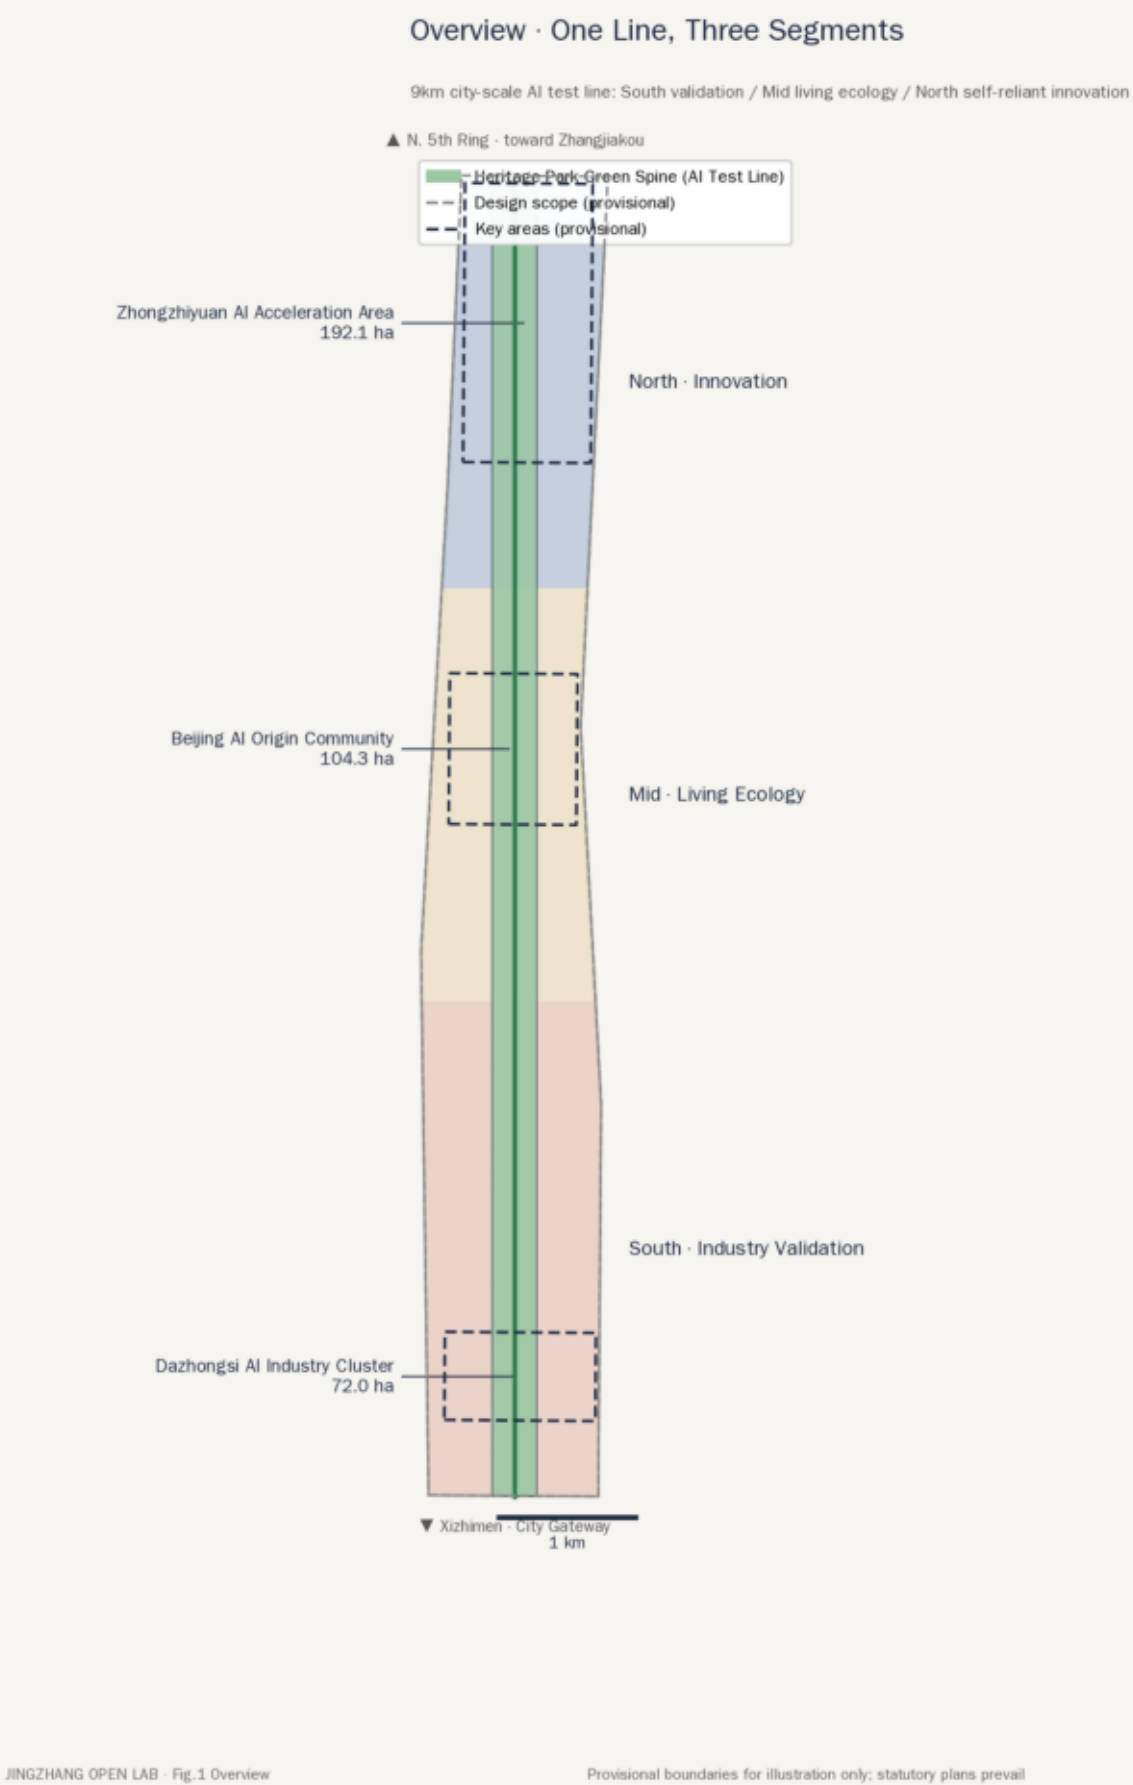

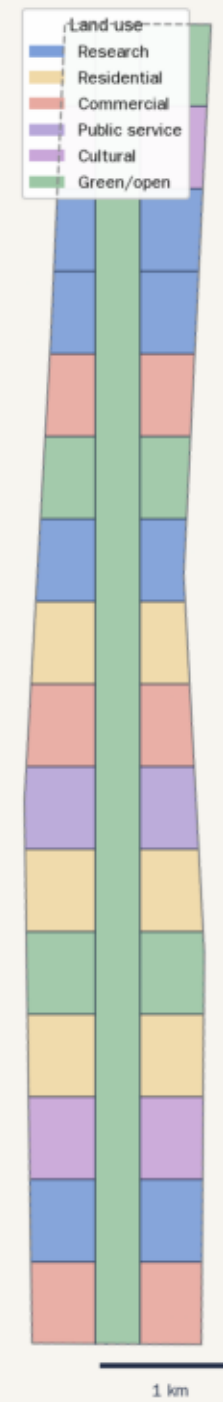

Fig.1 · Overall structure of the 9km AI test line

Land Use · Sixteen Bands

Land Use · One Line, Sixteen Bands

32 parcels, full coverage (0.000% gap) · continuous green spine · national land-use code subset

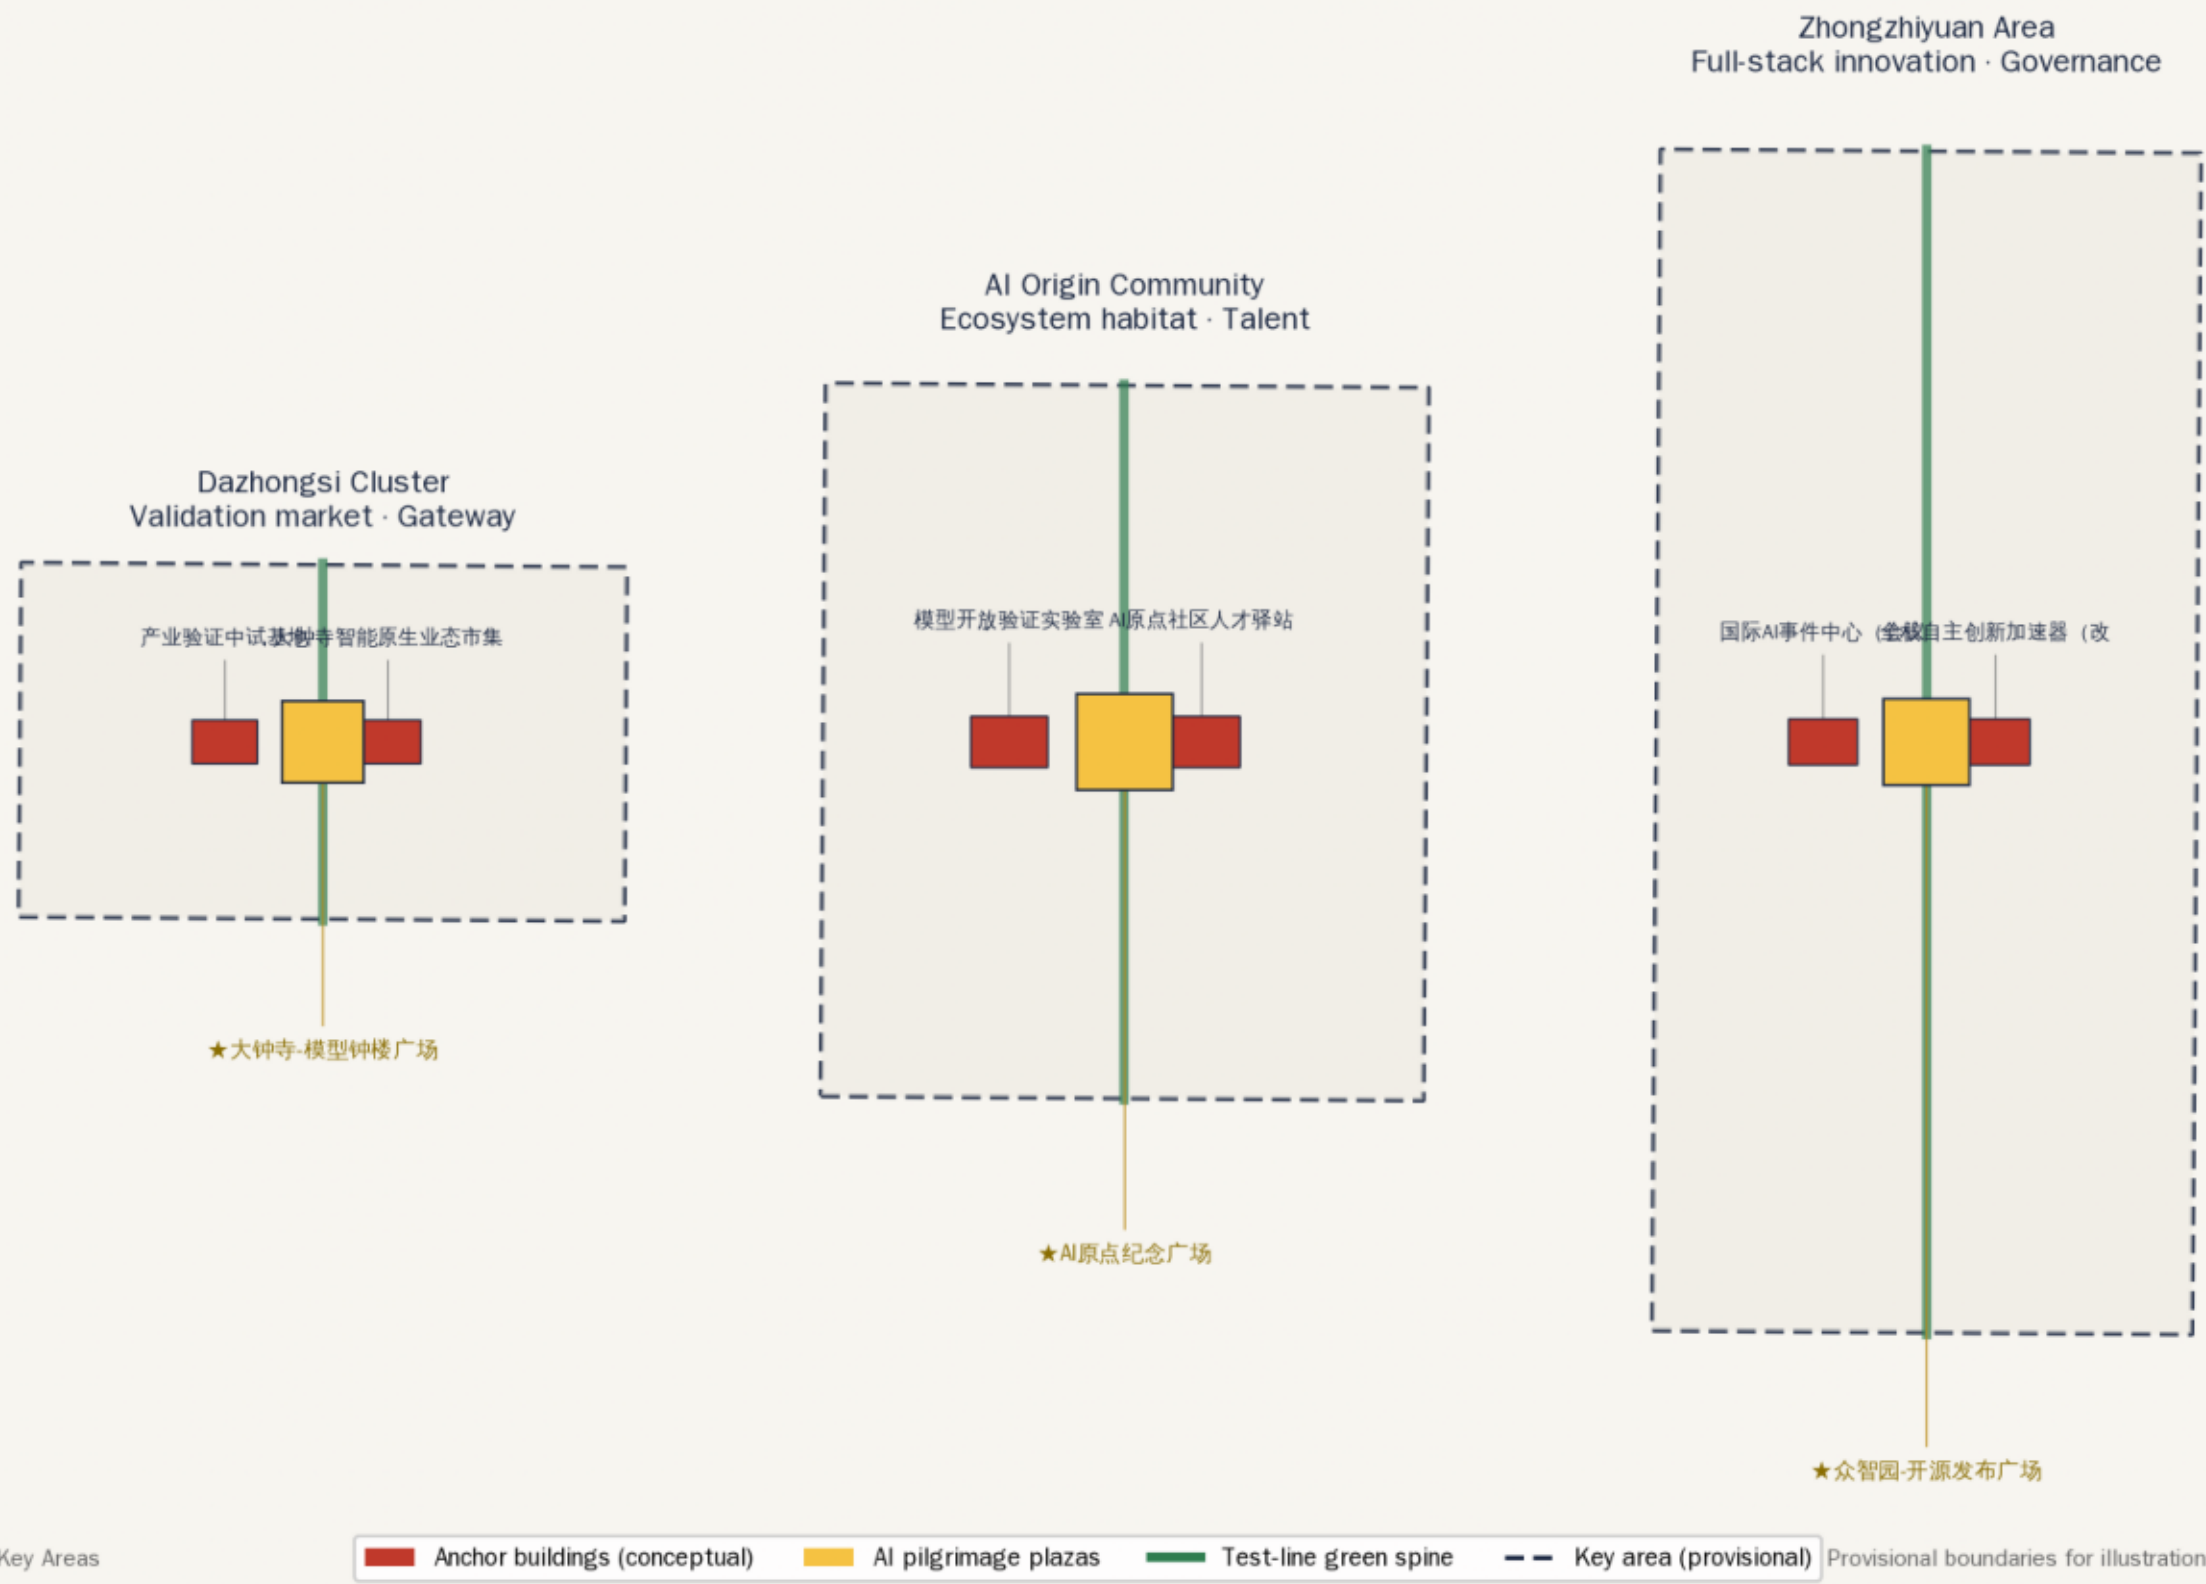

JINGZHANG OPEN LAB · Fig.2 Land Use

Provisional boundaries for illustration only; statutory plans prevail

Fig.2 · 32 parcels, full coverage, national code subset

Conceptual proposal for the open agent call; provisional boundaries are illustrative, not official redlines; not statutory planning, government commitment, or engineering conclusion.

Key Areas · Structure and Anchors

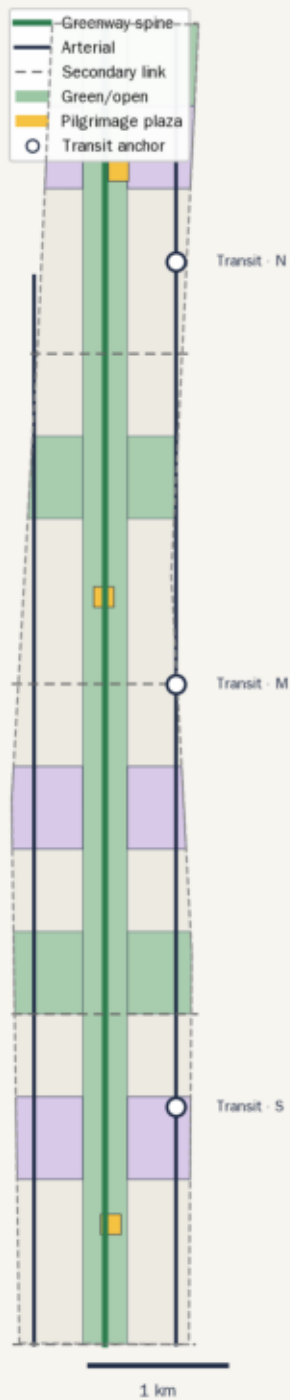

JINGZHANG OPEN LAB · Fig.3 Key Areas

Fig.3 · Three key areas, anchors and plazas

Conceptual proposal for the open agent call; provisional boundaries are illustrative, not official redlines; not statutory planning, government commitment, or engineering conclusion.

Mobility and Blue-Green System

Slow-mobility spine - two arterials - five stitching links - blue-green network

JINGZHANG OPEN LAB - Fig.4 Mobility & Blue-Green

Provisional boundaries for illustration only; statutory plans prevail

Fig.4 · Greenway spine, arterials, links and open space

Conceptual proposal for the open agent call; provisional boundaries are illustrative, not official redlines; not statutory planning, government commitment, or engineering conclusion.

Metrics Evidence Chain: geometry → metrics → matrices → self-check

Site area	11.413 km ²	Announced 11.4 km ² · dev. 0.1%	known/medium
Key areas total	3.693 km ²	Announced 3.684 km ² · dev. 0.2%	known/medium
Green/open ratio	41.2 %	green spine + stitching parks	known/medium
Public space ratio	14.6 %	9 nodes · 3 pilgrimage plazas	known/medium
Anchor footprint	5.8 ha	6 conceptual anchors only	known/low
FAR	not asserted	official controls missing	unknown
Height limit	not asserted	official controls missing	unknown

Chain: geometry/*.geojson (EPSG:4548) → metrics.json → matrices → self_check.json
All areas based on provisional boundaries; full recalculation upon official redline release

Fig.5 · Verifiable chain from geometry to self-check

Key Areas and Metrics Overview

Dazhongsi AI Industry Cluster 72.0 ha · South AI-native business validation market · Model Bell Tower Plaza · open-source bell ceremony
Beijing AI Origin Community 104.3 ha · Mid Innovation ecosystem habitat · Origin Memorial Plaza · international talent community
Zhongzhiyuan AI Acceleration Area 192.1 ha · North Full-stack acceleration matrix · Open-Source Release Plaza · International AI Event Center

Core metrics (EPSG:4548, provisional boundary)

场地面积	11.413 km ²	Announced 11.4 · dev. 0.1%
重点区合计	3.693 km ²	Announced 3.684 · dev. 0.2%
绿地开敞占比	41.2 %	green spine + parks
公共空间占比	14.6 %	9 nodes + 3 plazas
容积率/限高	TBC	official controls missing
