

FIG. 01 | JINGZHANG COMMONS: daily life with human override

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

Three linked layers

A City for people

Retention, skills, inclusion, night, screen-free green

B City for machines

API, rule-based access, embodied test, reversibility

C Institutional moat

Energy research, resilience, sandbox, versions

Three cores: Zhongzhiyuan, AI-origin community, Dazhongsi
Two wings: tech service / Xiaoyuehe scenarios

FIG. 02 | Shared-cut concept land use: reversible space and services

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

FIG. 03 | Three key areas: public space, scenario cards, landmarks

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

01 Zhongzhiyuan

Problems—protocol—shared lab; human review, minimization, and exit are inside each G0 card.

02 AI-origin community

Retention—learning—care; human review, minimization, and exit are inside each G0 card.

03 Dazhongsi

Culture—business—explainable service; human review, minimization, and exit are inside each G0 card.

FIG. 04 | People-first mobility rules and Xiaoyuehe resilience

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

- People first**
Walking, access, human service
- G0 observation**
Robot, air, flood begin as rules
- Blue-green gate**
No engineering conclusion before evidence
- Night care**
Auditable service and screen-free space

FIG. 05 | Metrics—evidence—versions: every claim passes a concept gate

Candidate visual direction · official_boundary=false · geometry_role=provisional_constraint

Spatial recomputation

- Provisional scope
11,412,825.386 sqm
- Green layer 879,519.159 sqm
- Public-space layer
123,473.537 sqm

G0 scenario gate

- 10 scenario cards
- 6 personas
- 100% human fallback

Versioned governance

- Problem release
- Public/professional review
- Release note and exit

One algorithm, one rounding rule, one provisional-boundary warning: recomputable metrics are not legal or scoring areas.

Figure 10 | Taskbook, public space and annual

agent.4 public space · agent.5 cultural narrative · agent.6 global events/long-term operation; all remain concept evidence

agent.4 Public space

Three landmarks bring problems, human override and exit rules into daily space.
L-01 Open Problem Mile Marker · L-02 Calibration Court · L-03 Human Override Beacon

agent.5 Cultural narrative

Timeline + problem line + human-service line; heritage review remains pending.
Centennial Jing-Zhang / Zhongguancun / AI culture

Four-season rhythm: make version governance visible in public time

Spring | Public Problem Week
Problem, data boundary, human Q&A

Summer | Xiaoyue River Walk
Older people, workers, accessibility seats

Autumn | Development Protocol Camp
Authorization, exit and explainable G0 protocol

Five conceptual families: spatial carrier → G0 gate → professional review → reversible release

PF-01
Human buffer and community retention

PF-02
Reskilling and night wellbeing

PF-03
City API and data governance

PF-04
Xiao blue hum

This board resolves only package JSON and taskbook relations; it is not an official score, confirmed event, open heritage permit, partnership or field result.
