

THE POROUS

GROUND CONTRACT

A PORE MUST EXCHANGE AIR WITHOUT
DELIVERING NOISE.

A MULTI-PHYSICS CONTRACT FOR SECTIONS, GROUND-FLOOR
PORES, AND STATION-CITY BUFFERS

ONE THESIS

A pore must exchange air/heat, block direct sound, retain shade/quiet side, and remain removable.

E0 explains the conflict; OSM only orients rail/road/park context.

RAIL-CORRIDOR CONFLICT | REAL-COORDINATE CONTEXT

THREE SCOPE LOCATOR

T3 TYPE LOCATOR · UNANCHORED · NOT MAPPED

- 43.6 km² research context
- 11.4 km² overall carrier
- 368.4 ha three key areas
- rail
- road
- building
- park/green
- S1/S2 concept cut
- T3 not mapped

NORTH IS RIGHT · LOCAL METRIC APPROXIMATION · OSM ODbL 2026-06-17 · NOT SURVEY/OFFICIAL/AUTHORIZATION

PLAN—SECTION—NODE CONTINUITY INDEX

S1 Zhongzhiyuan | back-of-house—evidence

S1 A-A' → S1 PLAN → S1 SECTION → N1

RELATIVE-COORDINATE CONCEPT

PROV-KEY-001 · ROAD-PGC-04

S2 AI Origin | multi-directional crossing—quiet learning edge

S2 B-B' → S2 PLAN → S2 SECTION → N2

TYPE ONLY / UNANCHORED

PROV-KEY-003 · NO MAP CUT

TWO WINGS

HAIDIAN NORTH: rules, tool versions, exit assets

NW BEIJING: authorised, minimised, licensed methods only

S1 Zhongzhiyuan | back-of-house—evidence interface—public front

S1 A-A' → S1 PLAN → S1 SECTION → N1

Relative concept plan: controlled back-of-house to evidence interface to public front

SECTION: SOURCE—PATH—RECEIVER / ZERO-POWER SERVICE REMAINS

Matching section: source—path—receiver layers are not interchangeable

SECTION TYPE SCALE 0 / 2 / 5 / 10 m · PARAMETER ENVELOPE

Node N1 | evidence interface: only signed slices may be published

Failure mode: back-of-house noise/access leaks through the public front.

Relative concept plan:
controlled back-of-house to
evidence interface to
public front

Matching section:
source—path—receiver layers
are not interchangeable

Node N1 | evidence
interface: only signed
slices may be published

Failure mode: back-of-house
noise/access leaks through
the public front.

RELATIVE DESIGN COORDINATES
ARE NOT FIELD SURVEY

S2 AI Origin | multi-directional crossing—quiet learning edge

S2 B-B' → S2 PLAN → S2 SECTION → N2

Relative concept plan: cross-movement is offset from the quiet learning edge

SECTION: SOURCE-PATH-RECEIVER / ZERO-POWER SERVICE REMAINS

Matching section: shared path stays continuous; setback protects the quiet edge

SECTION TYPE SCALE 0 / 2 / 5 / 10 m · PARAMETER ENVELOPE

N2

Node N2 | visible learning window: legible without crossing the quiet edge

Failure mode: crossing flows spill into the quiet edge, producing false openness.

Relative concept plan: cross-movement is offset from the quiet learning edge

Matching section: shared path stays continuous; setback protects the quiet edge

Node N2 | visible learning window: legible without crossing the quiet edge

Failure mode: crossing flows spill into the quiet edge, producing false openness.

RELATIVE DESIGN COORDINATES ARE NOT FIELD SURVEY

T3 Dazhongsi | UNANCHORED type frame

T3 TYPE → T3 PLAN/SECTION → N3

Type plan only: prototype room—removal path—temporary receiving ground

0 10 20 40 m TYPE SCALE

SECTION: SOURCE-PATH-RECEIVER / ZERO-POWER SERVICE REMAINS

Type section: define removability first; await a canonical anchor

SECTION TYPE SCALE 0 / 2 / 5 / 10 m · PARAMETER ENVELOPE

N3

Node N3 | mechanical release: no cutting, no burial, verifiable clear-down

Failure mode: a type diagram is mistaken for a located proposal.

Type plan only: prototype room—removal path—temporary receiving ground

Type section: define removability first; await a canonical anchor

Node N3 | mechanical release: no cutting, no burial, verifiable clear-down

Failure mode: a type diagram is mistaken for a located proposal.

T3 carries no WGS84 location; type scale only.

RECEIVER, CLEAR WIDTH, EGRESS, AND ACCESS DO NOT MOVE; AI CHANGES DELETABLE VARIABLES ONLY.

SPATIAL DELTA + ABLATION GATE

x_pore	pore position	AI variable / hypothesis
d_shade	shade depth	AI variable / hypothesis
w_clear	continuous clear width	INVARIANT / hard gate
R	receiver position	INVARIANT / protected
E3/E4	field/mock-up evidence	0 / 0

01 FREEZE INPUT/VERSION

02 HELD-OUT TEST VS B1

03 STABLE, EXPLAINABLE, NOT B1-DOMINATED

04 FAIL: DELETE AI, DO NOT MOVE KPI

AI NEVER TRIGGERS CONSTRUCTION, OPENING, SAFETY, RESTORATION, OR C-I STATE TRANSITION.

PHASE-I-C CANDIDATE | PUBLIC-CONTEXT LOCATOR

© OPENSTREETMAP CONTRIBUTORS / ODbL CONTEXT ONLY · SNAPSHOT 2026-06-17 · NOT SURVEY / NOT OFFICIAL / NOT AUTHORIZATION

Public records only orient a 'Zhichun Rd–North 4th Ring' candidate context; exact section, title, boundary, area, shelter/fire/access conditions await authority and field E3. This is not a pilot location.

HARD GATES

Any element without a canonical carrier, named A/R, baseline, BoQ/restoration reserve, or exit evidence stays at C-I. OSM is context only; T3 remains UNANCHORED; E3=0 and E4=0.

AI HAS NO STATE-TRANSITION AUTHORITY • MACHINE PASS IS NOT DESIGN QUALITY OR FIELD RELEASE

KNOWN

Task scales, key-area names, provisional geometry, submitted metrics, public standards, and methods.

UNKNOWN

Official geometry, real section, sources, authority, fire/access, instruments, quotes, and performance.

HARD BOUNDARY / HOLD

Machine PASS is not design quality; C-I stays HOLD until E3/E4, reversible mock-up, and restoration evidence.

MINIMUM NEXT STEP: obtain one lawfully authorised real section, pre-register B0/B1/AI no-harm comparison, and reserve restoration funding; any missing item stops production.
