6—6—4 OPERATING GATES

6 START · ALL MUST BE VERIFIED

1.

Entrance, actual routes, and right-of-way availability verified

unknown
2.

Continuous accessible route and reasonable accommodation verified

unknown
3.

Ownership, heritage, utilities, fire, and safety boundaries verified

unknown
4.

Accountable operator and field lead confirmed in writing

unknown
5.

Only synthetic, paper, or permitted minimum-necessary material is used

unknown
6.

Both main lines, human takeover, and emergency stop are testable

unknown

6 STOP · ANY TRIGGER PAUSES/STOPS

1.

Provenance or permission is unproven, or the rehearsal requires live payment, personal trajectory, or covert identifiers

not_observed
2.

The entrance, accessible route, or either main line is not safely passable

not_observed
3.

Human takeover is unavailable or does not respond within the recorded time

not_observed
4.

An unresolved gap appears between the two lines in time, price, failure, basic output, or safety

not_observed
5.

Derivative mapping is incomplete, residual effects are undisclosed, or staffed/offline withdrawal is unavailable

not_observed
6.

Public return lacks beneficiary, due date, acceptance, or non-delivery status, or is framed as payment for consent

not_observed

4 RESUME · SAME-METHOD RETEST + JOINT SIGN-OFF

1.

Stop cause, affected scope, and responsible role recorded

unknown
2.

Corrective action completed and retested with the same method

unknown
3.

All start conditions are re-verified and no new stop trigger is present

unknown
4.

Site operator, safety reviewer, and field lead jointly sign the resume decision

unknown

OFFICIAL PROCESS EVIDENCE

2025-02-08 participation notice

A 2022-2035 draft was displayed from 2024-12-19 to 2025-01-19, with feedback decisions recorded. It does not prove final approval, a statutory drawing, or a polygon.

REPORTED APPROVAL EVIDENCE

2026-08-12 Beijing Daily / People.cn

A 2024-2035 version was reported approved, with textual bounds, nine blocks, about 1,668.2 ha, and a one-belt, one-axis, two-centres, multiple-nodes structure. It is not the approval document.
