

Overall design: three areas, two wings and three nodes

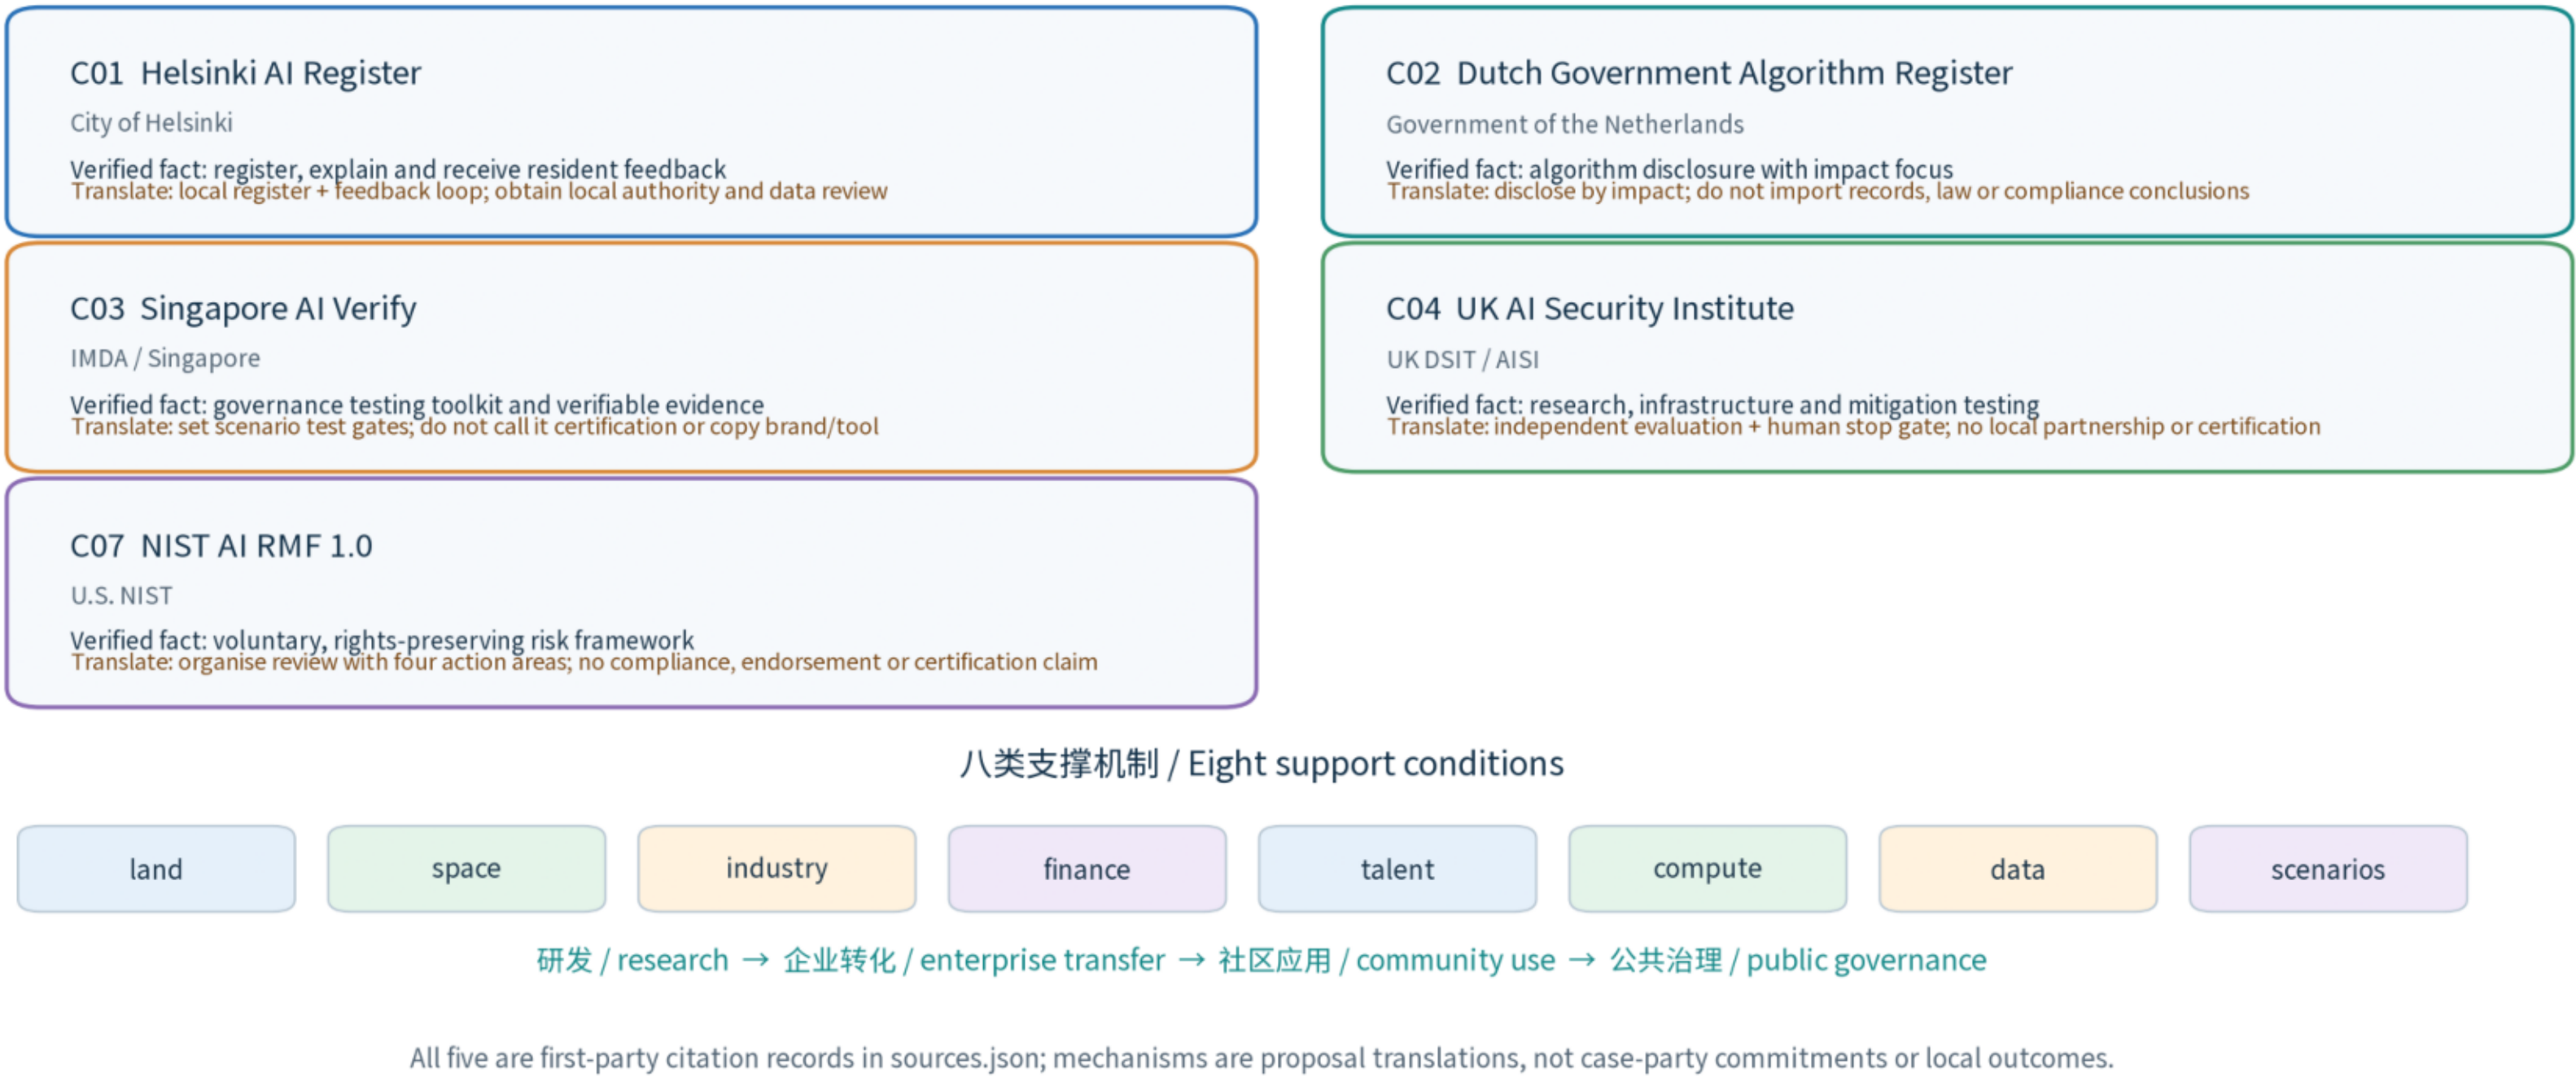

One heritage gateway / one dual-use spine / three accountable spatial units

PROVISIONAL CONCEPT - not an official redline; recalculate after official records

Global AI innovation ecosystem: five verified mechanism cases

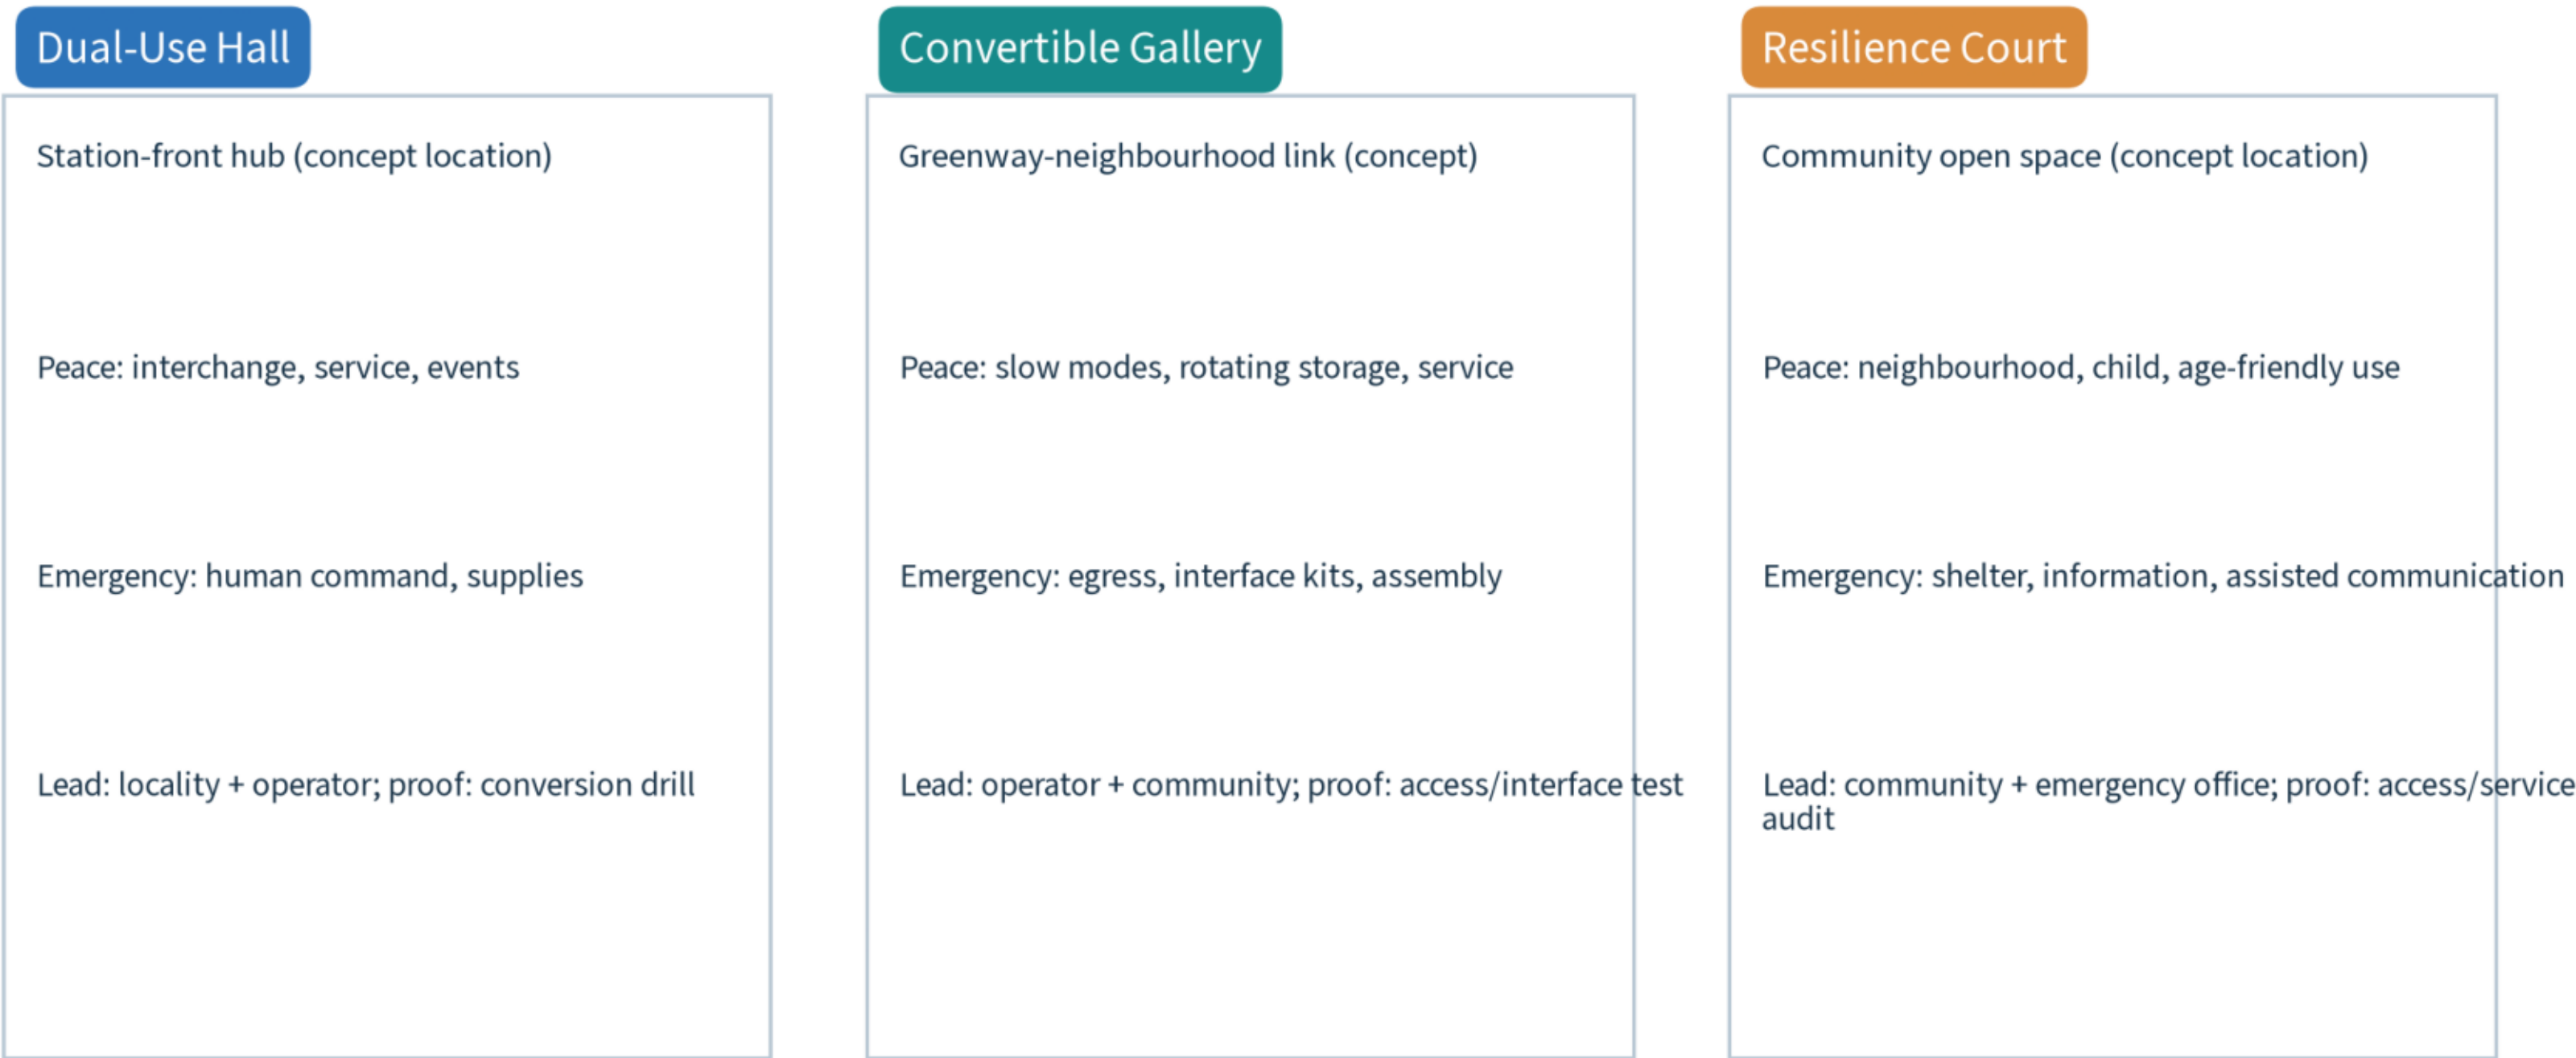

First-party facts -> transferable mechanism -> local non-copy condition (citation is not partnership)

PROVISIONAL CONCEPT - not an official redline; recalculate after official records

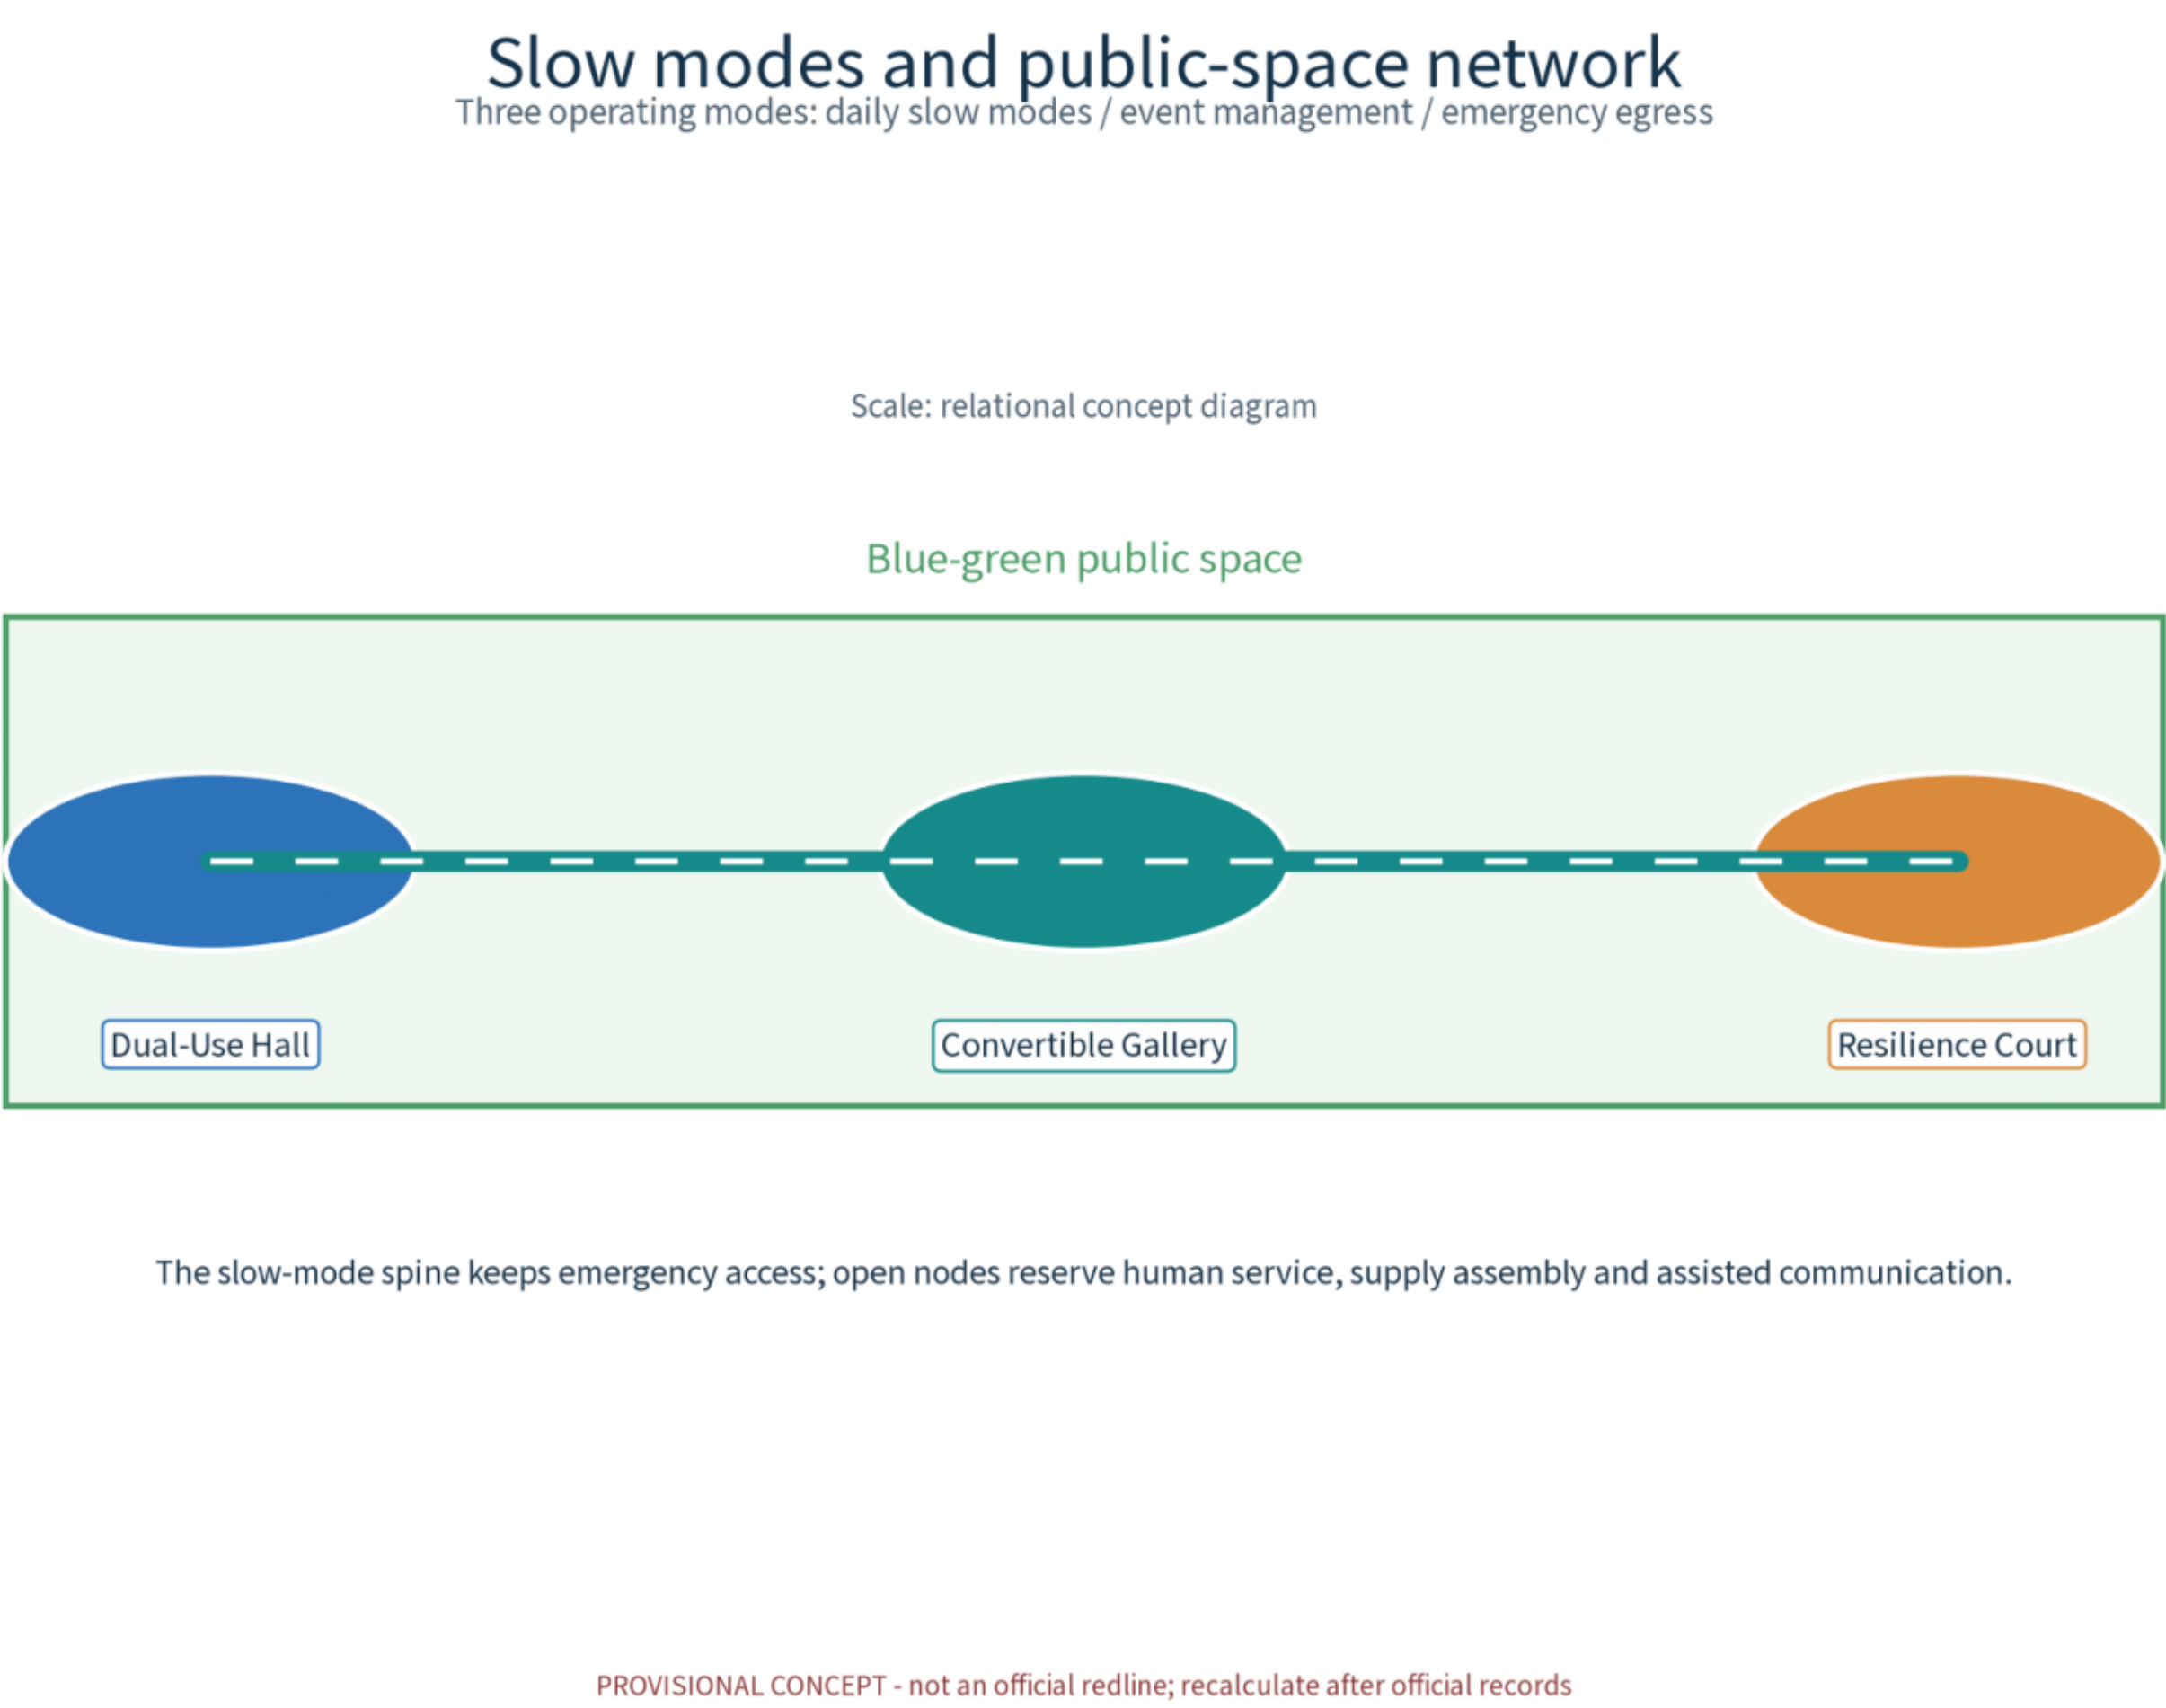

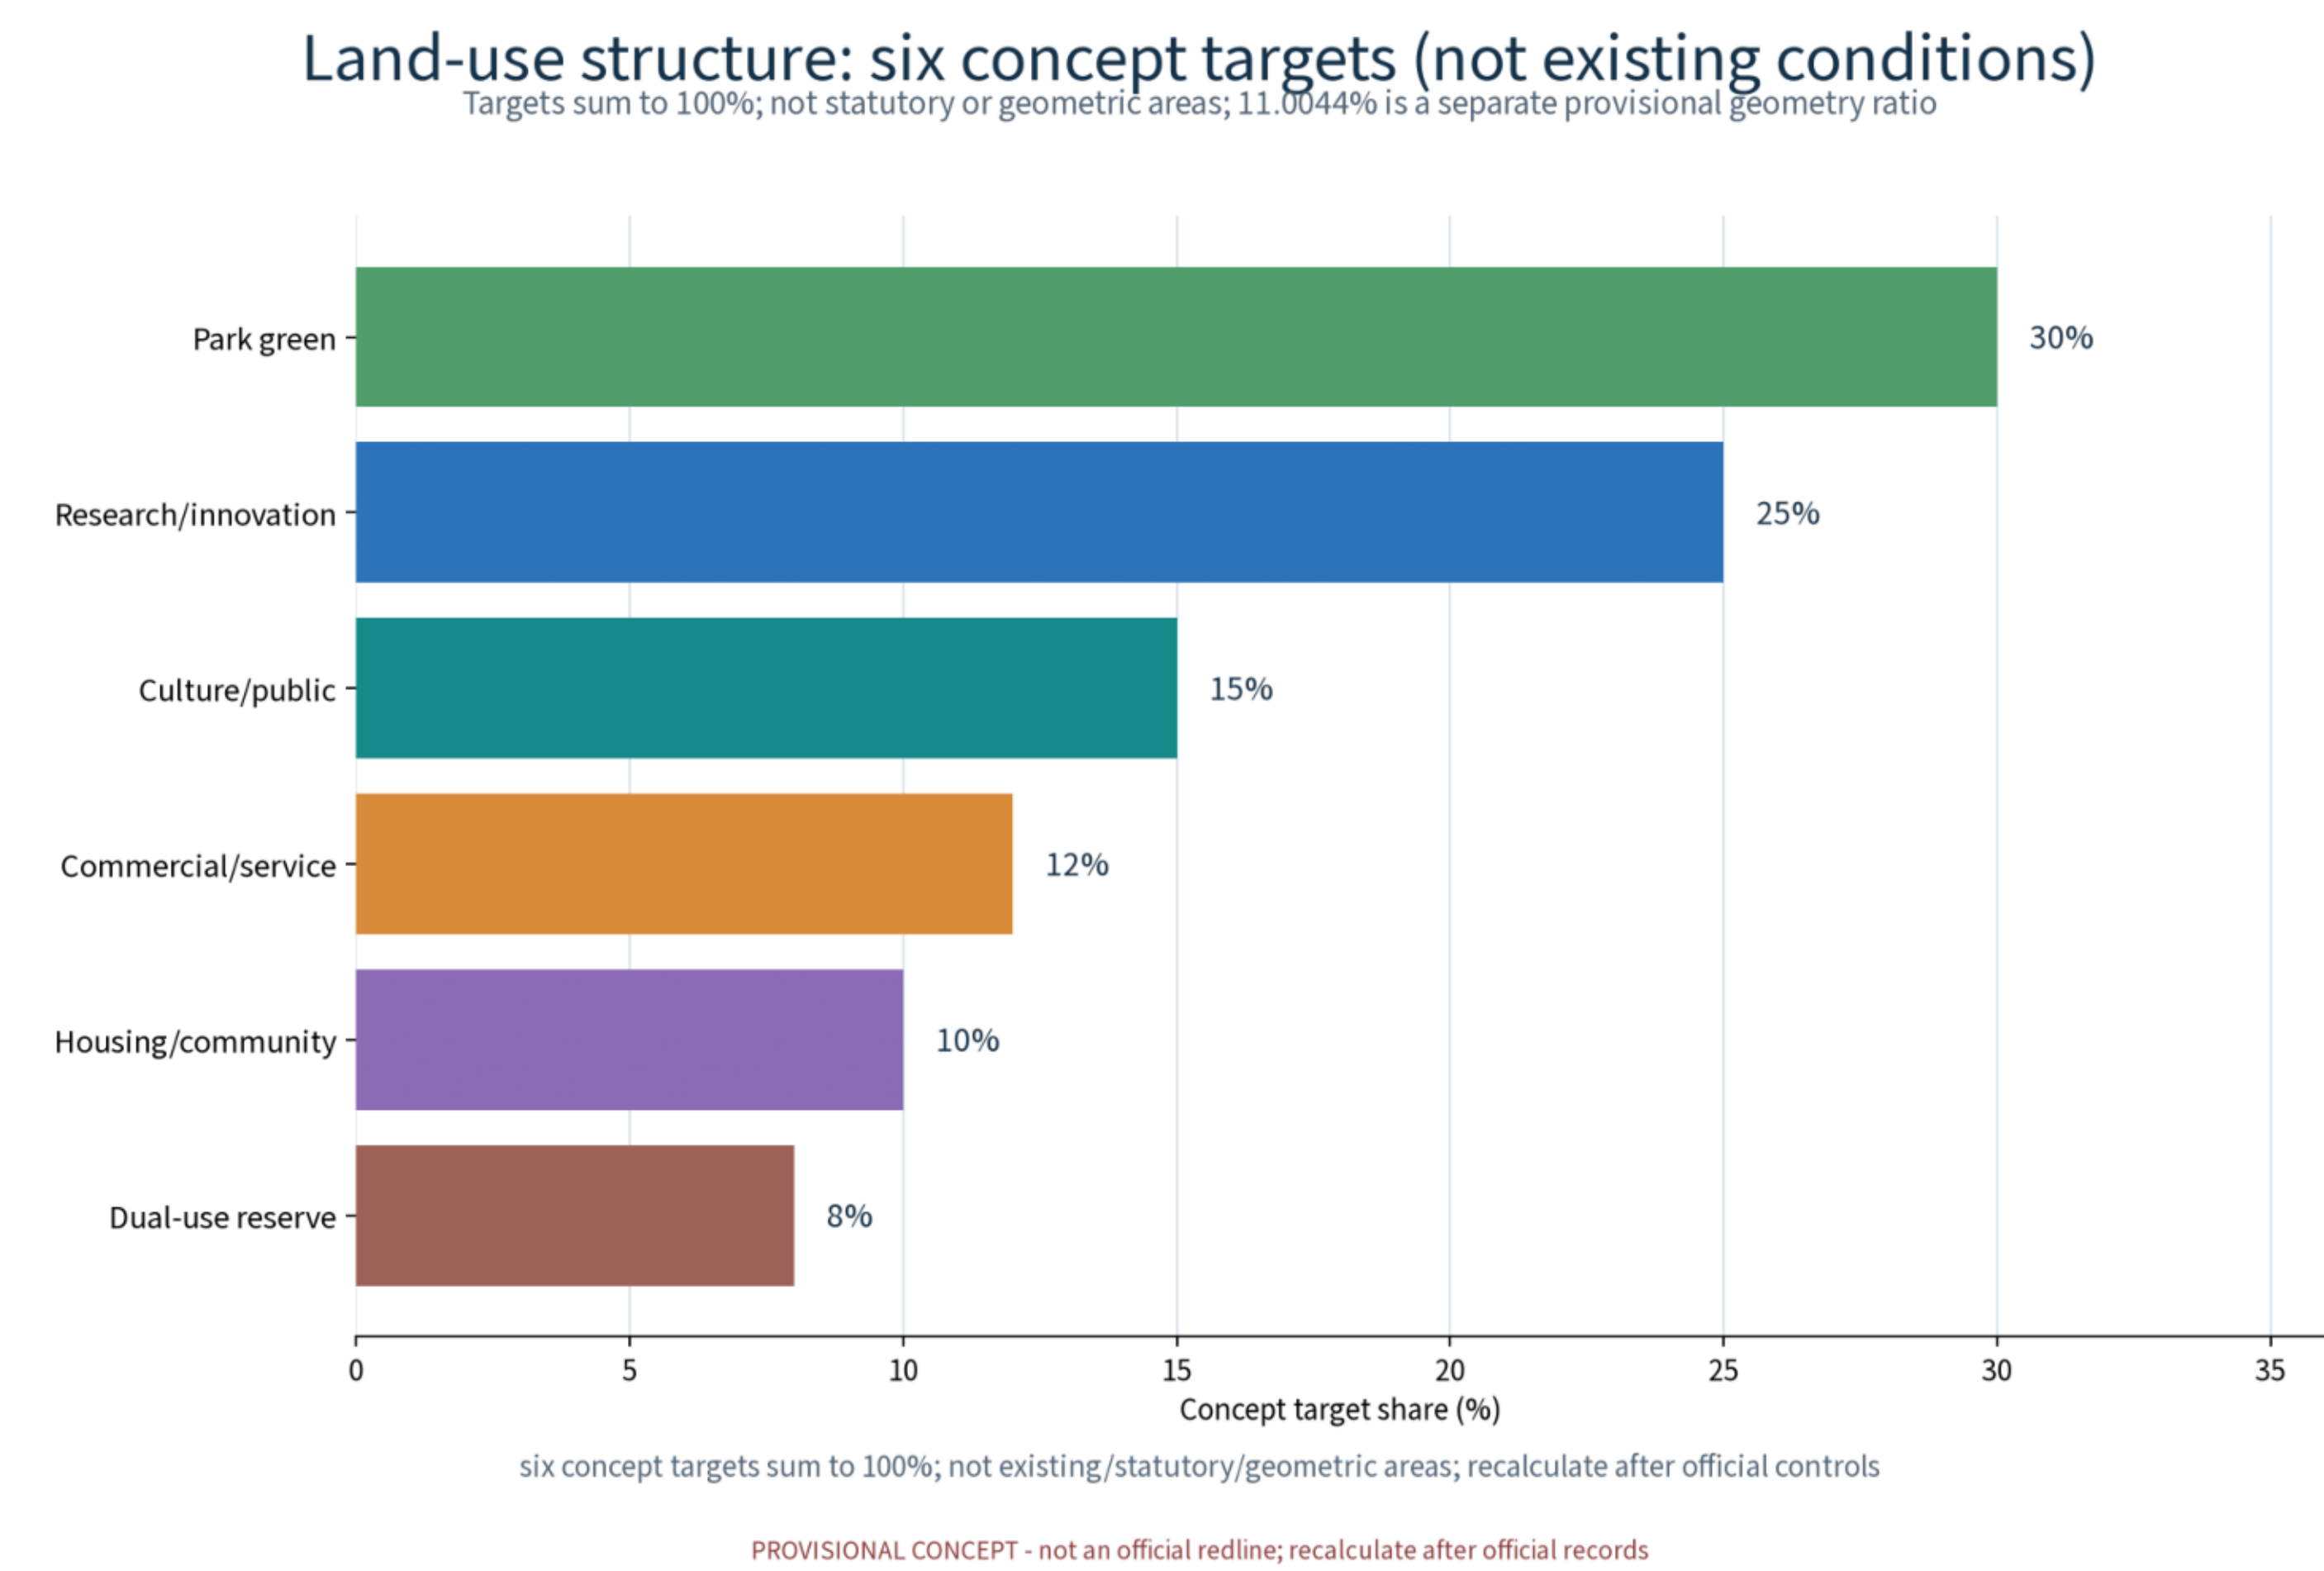

Three nodes: differentiated dual-use tasks

One belt, three nodes • peacetime operation - emergency conversion - accountable acceptance

All three are provisional concept locations; relocate and accept only after official boundary, ownership, rail, fire, heritage and utility checks.

PROVISIONAL CONCEPT - not an official redline; recalculate after official records

Metrics evidence

From metrics.json • provisional geometry • ratios and counts use separate axes
