

Why Jing-Zhang: The Openline 100

Urban design proposal for the Haidian Jingzhang heritage corridor • A3 plate book

This book collects 24 plates, all re-rendered on real OSM urban fabric and proposal geometry.

The full narrative lives in [proposal.md](#) / [proposal.en.md](#) and [report/proposal.html](#).

Graphic standard: Sasaki v1.2 (palette / type scale / scale bars / north arrows / title blocks).

Openline 100 Studio • kenshin-ai-101 • 2026-08 • v1.2

01 Site overview: five-layer structure and corridor axonometric

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

02 Regional structure: the corridor in northwest Beijing

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

03 Regional bond: university, innovation and cultural ties

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

04 Land use and structure: one spine, three cores, five segments

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

05 Three key areas: Co-Wisdom Garden, Origin, Dazhongsi

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

06 1:2000 key-area masterplans on real OSM urban fabric

07 Massing and skyline control

Six typical streets, one Openline grammar

Section series A - F • not engineering • walking $\geq 50\%$ at all times • robot band never becomes car lane

A • L1 Fact Line (walkable rail)

B • L2 Service Line (stations dock)

C • Collaboration St. (logistics behind)

D • Transfer St. (windows on edge)

E • Native St. (trial / life split)

F • Deck (e-vehicle / people / view)

OPENLINE-100 • key-sections • walking $\geq 50\%$ always • BOARD v1.2

08 Six typical cross-sections

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

09 Five urban-eye place sections

Wudaokou stitch deck: a reversible 3-level crossing

On existing pier logic • no unproven tunnels • pending red-line confirmation (concept, not construction)

OPENLINE-100 • wudaokou-stitch-deck • reversible 3-level structure on existing pier logic • BOARD v1.2

10 Wudaokou stitch deck: three vertical layers

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

Wudaokou stitch deck: the boldest move drawn as credible everyday life

Section-perspective • material / level / real people • hand edges keep concept honest | OL-07

11 Signature: deck section-perspective • material, levels, real people

12 Rails made visible: the old alignment stitched into real fabric

Let the rails grow into the ground: five material translations

Components enter the public library, versioned via Inherit • sound & inscriptions pilot only after review

Ground • rail as paving

No unreachable exhibits

Section • archaeology trench

No mass excavation

Furniture • rails reused

No fake authenticity

Narrative • question stones

No trivializing history

Sound • steam x white-noise

No noise nuisance

Three rules before entering the library

- ① Reuse only after clearance & safety testing
- ② Versioned via Inherit: join / exit / inherit
- ③ Sound & inscriptions pilot after permit & review

All five share one ground: rails stay in the street.

Heritage made soulful: grading • voices • rails of humanity

From preserving heritage to continuing Jing-Zhang | 3 grades × 3 voices × 3 turns | A-HERITAGE-001 framework

以人为轨

Rails of humanity

In 1909, the 「人」

drew the line's shape.

In this century, it names

whom the line belongs to.

Railway anatomy → today

switchback = Verify / Exit gates

safety siding = Failure Case Library

test track = governance sandbox

rail = human values, not compute

Each in its place

grading • for the fabric

voices • for the people

the turn • for the century

grading is a literature framework, pending survey

voice slots are empty, awaiting real collection

14 Heritage made soulful: grading • voices • rails of humanity

15 Slow mobility and blue-green network

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

Ecological commitments in numbers: verifiable targets each phase

Carbon budget • runoff capture • heat island • biodiversity net gain • canopy | sensors to trust, Verify gate publishes | targets per A-ECO-001

16 Ecological commitments in numbers: verifiable targets each phase

Who meets on the Openline: the AI innovation ecosystem

Role types + flows + spatial interfaces · no named institutions, no fabricated lists

Four flows (the edges)

Question→R&D

Origin → Zhongzhiyuan: questions to full-stack R&D

R&D→Adoption

Zhongzhiyuan → Dazhongsi: gated capabilities to street

Resources

base — corridor: compute via stations, capital at interfaces

Public

rules — forum: join/exit, inherit components & minutes

8 mechanisms: land, space, industry,

capital, talent, compute, data, scenarios

Open Ticket institutional section: the fare system of the Openline

The right-of-way rewritten for the digital century | Join • Verify • Exit • Inherit × govern / space / data / time | governance concept

18 Open Ticket institutional section: Join • Verify • Exit • Inherit

What is recalculated, what still awaits official data

Type 1 recalculated (provisional) • Type 2 structure known / intensity unknown • Type 3 performance in assumptions

- Honesty
- Never mix 1668.2 ha control area with 1141 ha submission
 - 2026-08-11 approval triggers text alignment, not re-geometry
 - Official parcels → full package recalculation

19 Metrics evidence: every number traces to metrics.json

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

Public space first, intensity follows: 0 - 1 • 1 - 3 • 3 - 10 yrs

Same actions as OL-01 - 10 • phasing is not a funding plan | real OSM fabric | dashed = not yet built

0 - 1 yr • prototype

1 - 3 yr • streets

3 - 10 yr • network

0 - 1 yr • prototype

- Arrival first
- KMO + M-stitch sample
- Single station prototype

1 - 3 yr • streets

- One unit cluster opens
- Native street pilot
- License window & hall

3 - 10 yr • network

- Three-area network
- OL-07 deck mid-term
- Governance center

OPENLINE-100 • key-phasing • 0 - 1 / 1 - 3 / 3 - 10 on real fabric • BOARD v1.2

20 Phasing: 2026 → 2030 → 2035

PROVISIONAL boundary • discussion-grade concept • not approval geometry • full recalc on official data

Capital logic of phasing: reversibility is low risk

Each phase answers build / pay / operate / return | bond → pooling → adoption relay | magnitude only, A-CAPITAL-001

Three financing scenarios · relay, not either-or

What reversibility buys

- deck unbolts → asset relocates
- a wrong demo is not sunk cost
- the real reason to go first

21 Capital logic of phasing: reversibility is low risk

22 Immersive ①: morning on the L1 ground walk

23 Immersive ②: afternoon on the Wudaokou deck

24 Immersive ③: dusk aerial over the Dazhongsi segment
