

01 THREE SCALES + REGIONAL EXCHANGE

CONCEPT / PROVISIONAL

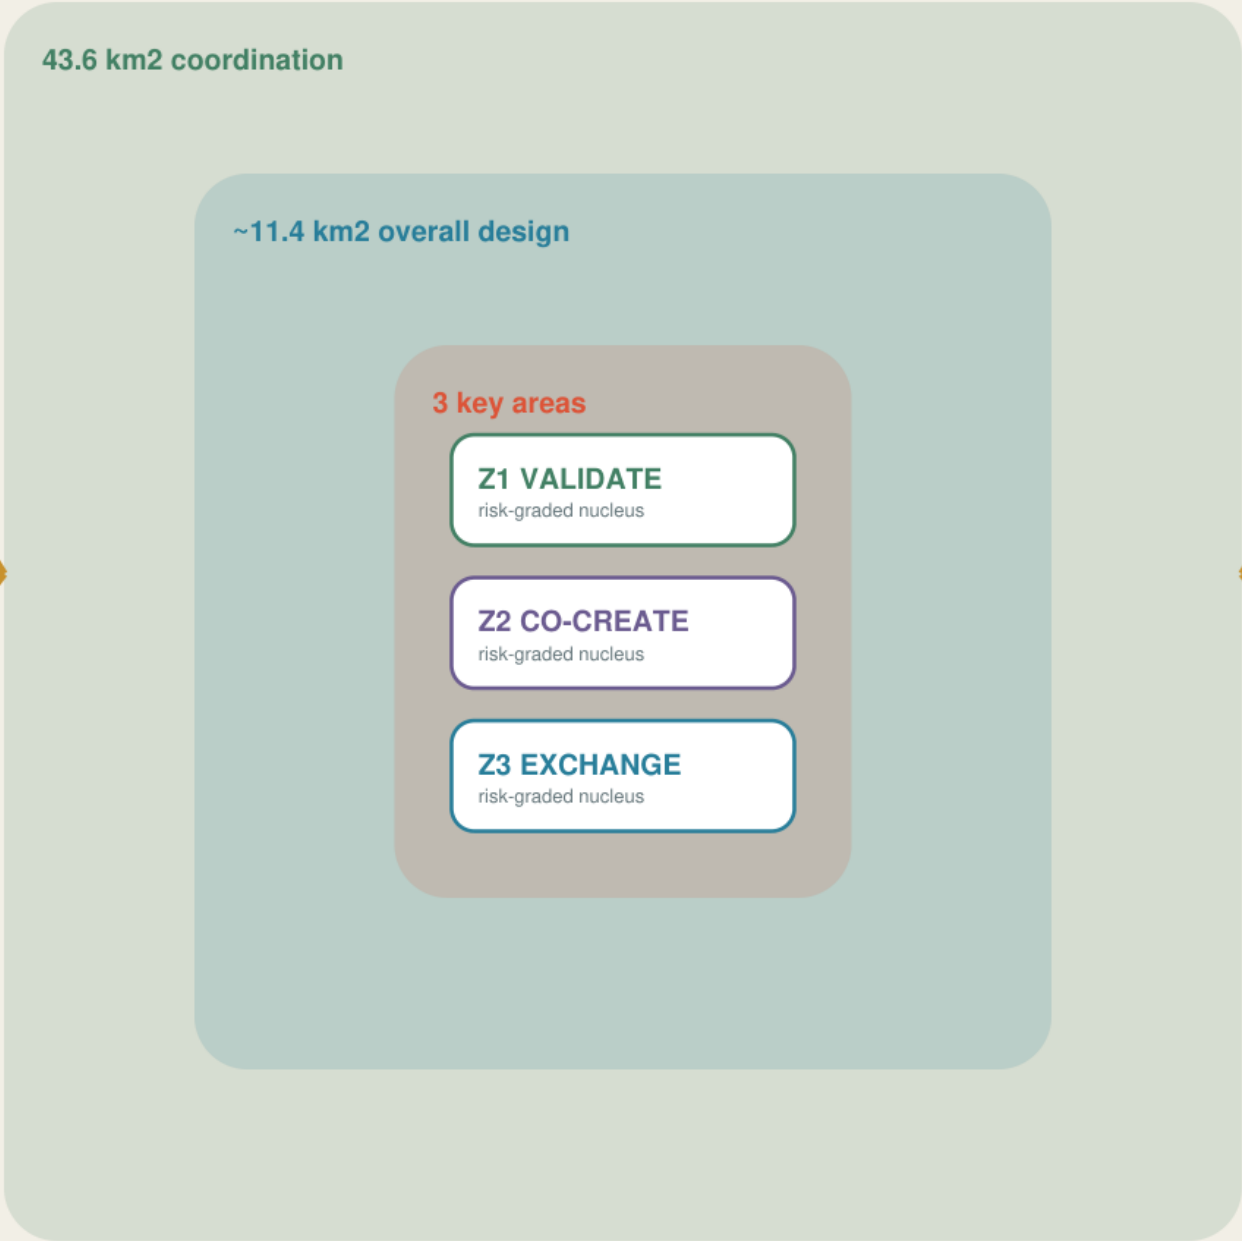

Resources enter through protocols; they do not imply approved construction links

Future Science City

life science / energy

Huairou Science City

facilities / outreach

ETDA

robotics / scale-up

BTH universities

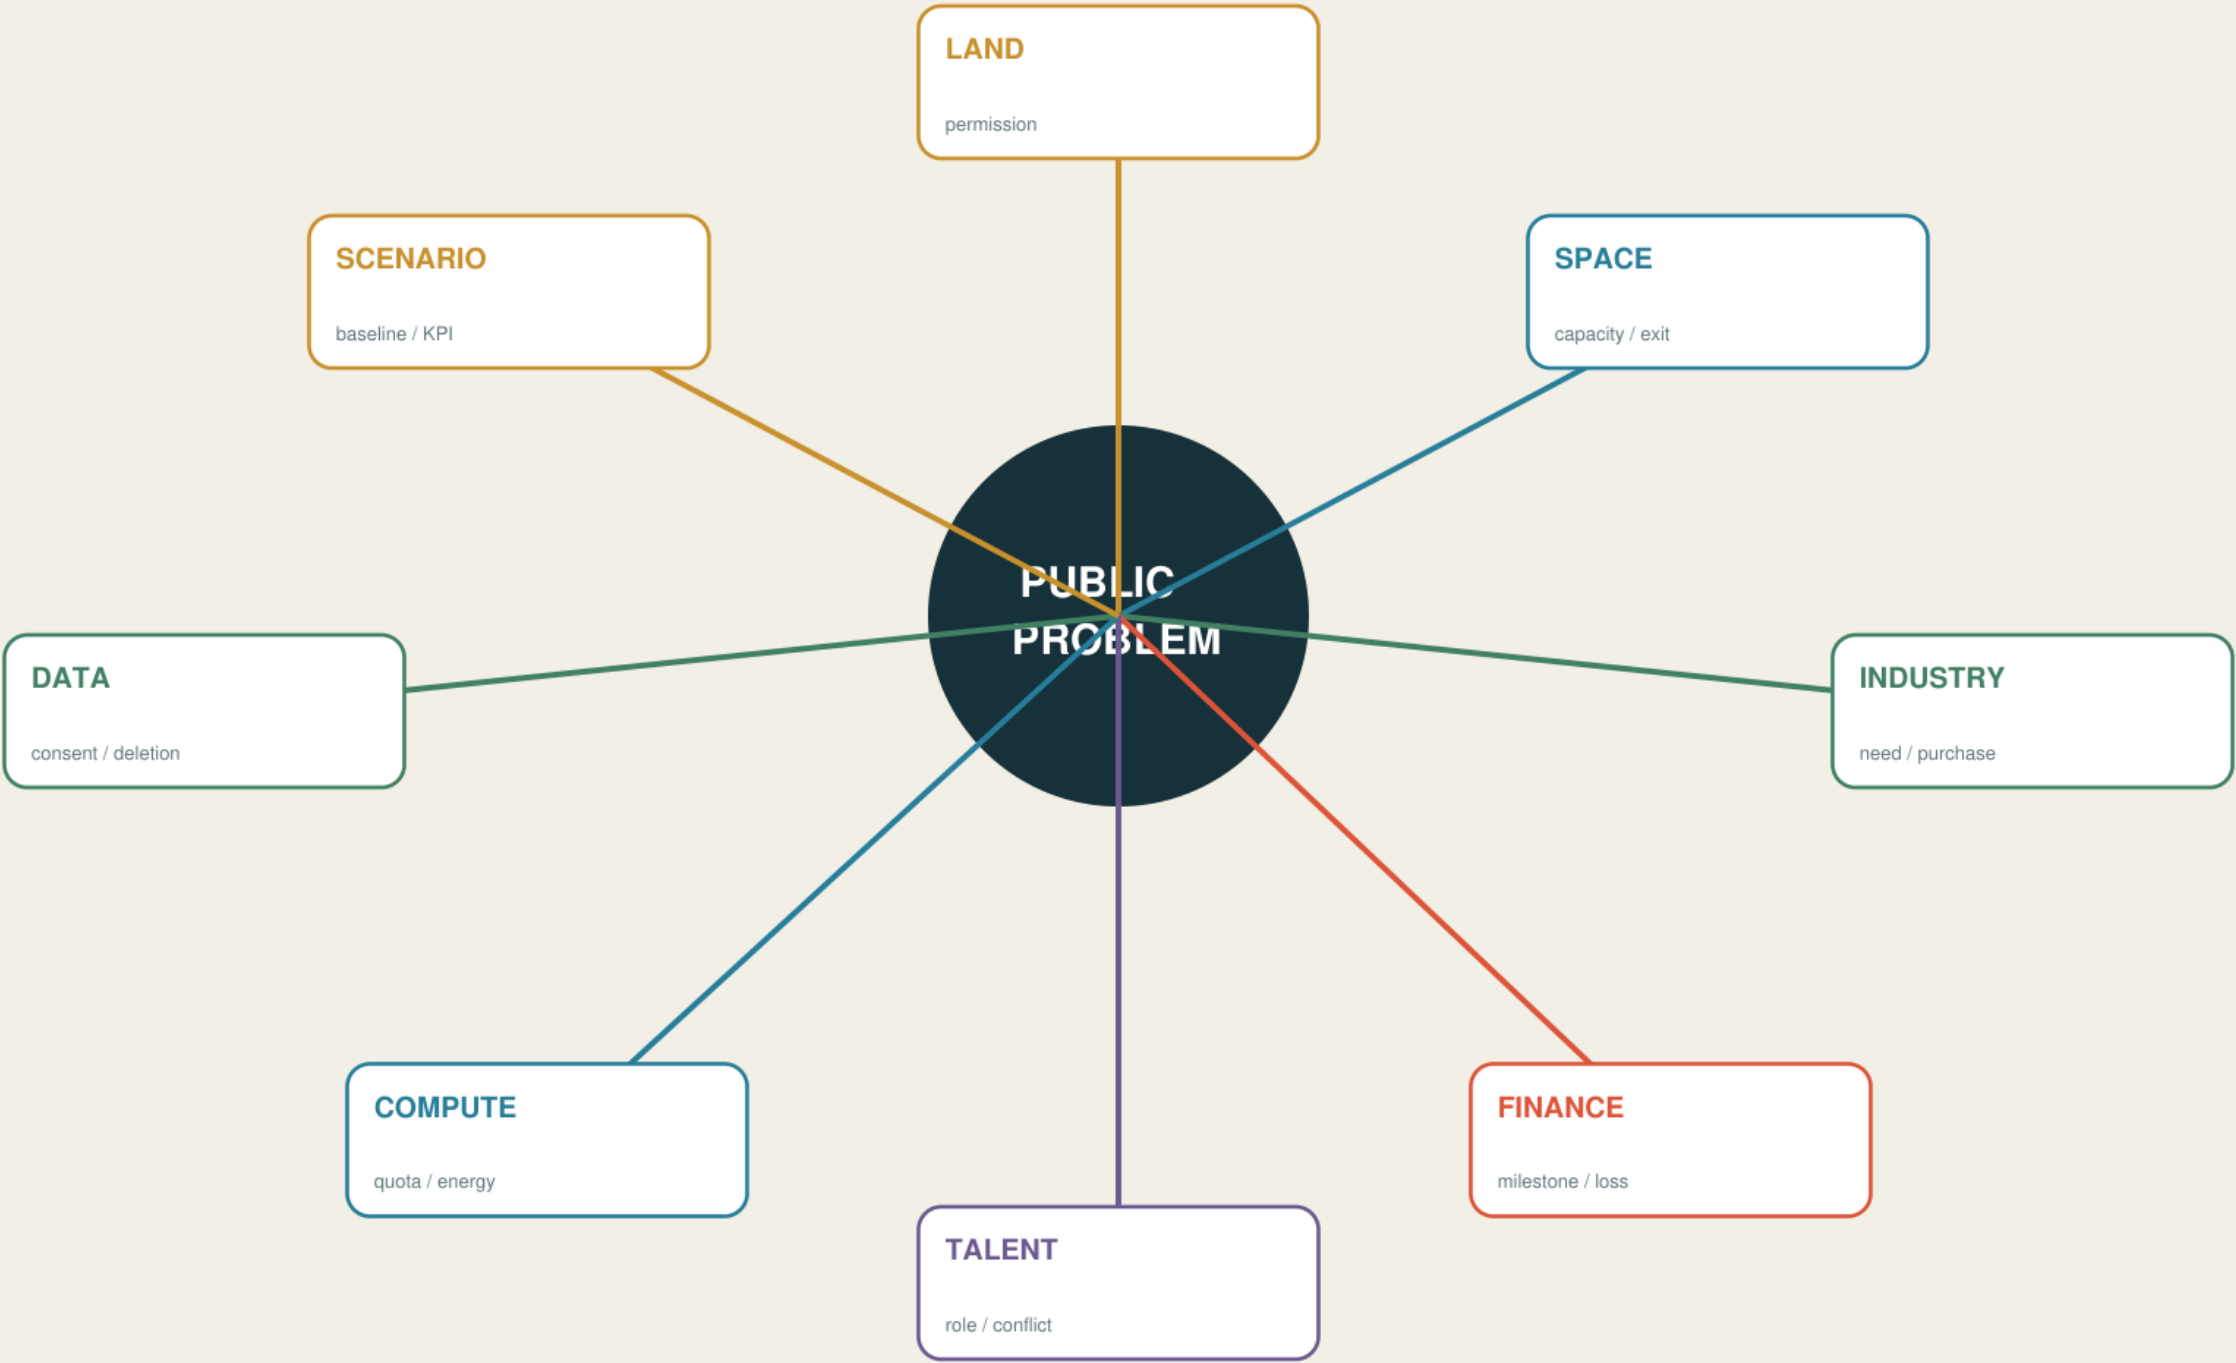

talent / joint courses

Need -> joint R&D -> Jingzhang test -> external scale-up -> public review

02 EIGHT-FACTOR INNOVATION LOOP

CONCEPT / PROVISIONAL

Every scenario must close spatial, resource, accountability, and evidence gaps

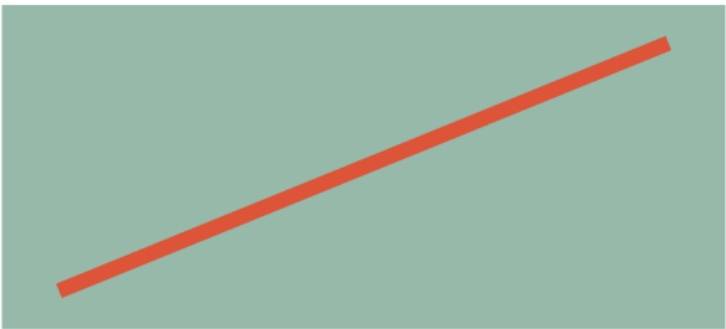

Outputs: problem closure / public improvement / procurement or translation / exit record

03 THREE KEY-AREA PROTOTYPES

CONCEPT / PROVISIONAL

Different permission structures, daily paths, and flagship tests

Z1 AUDITABLE TEST GARDEN

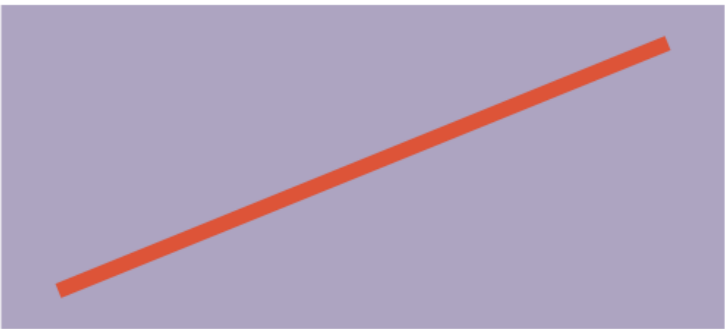

- 1. ecological buffer
- 2. public observation
- 3. isolated test yard
- 4. standard workshop
- 5. disconnectable compute

T3 safety + rights sandbox

90-day pilot / human review / stop rule

Z2 OPEN TRANSLATION STREET

- 1. campus-community seam
- 2. open release hall
- 3. mentor / legal desk
- 4. adaptable ground floor
- 5. feedback court

T2 public-service small model

90-day pilot / human review / stop rule

Z3 URBAN EXCHANGE STATION

- 1. at-grade quadrant link
- 2. international exchange
- 3. data-rights room
- 4. heritage display
- 5. night service desk

T1 pedestrian digital twin

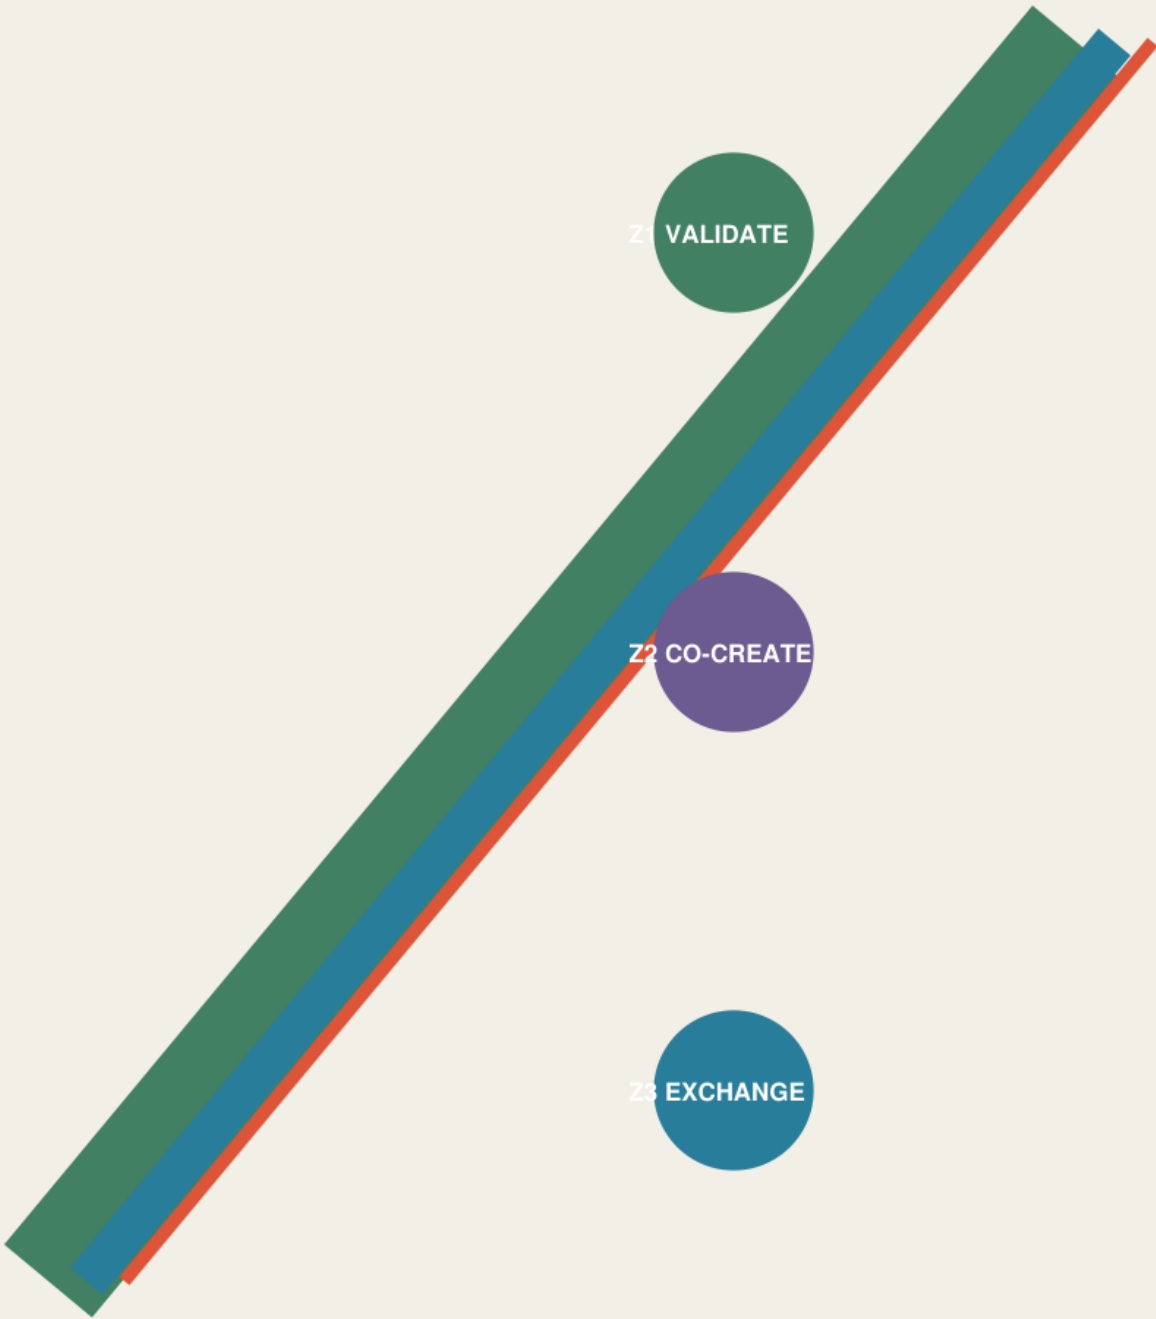

90-day pilot / human review / stop rule

Internal actions are topological prototypes, not surveyed building footprints or approved projects.

04 WALKING + BLUE-GREEN + HUMAN SERVICE NETWORK

CONCEPT / PROVISIONAL

Public space is the common interface; digital access is never the only route

CONTINUOUS WALKING

no test blocks clear width

BLUE-GREEN COMFORT

shade / removable stormwater

HUMAN SERVICE

paper / phone / staffed desk

EMERGENCY EXIT

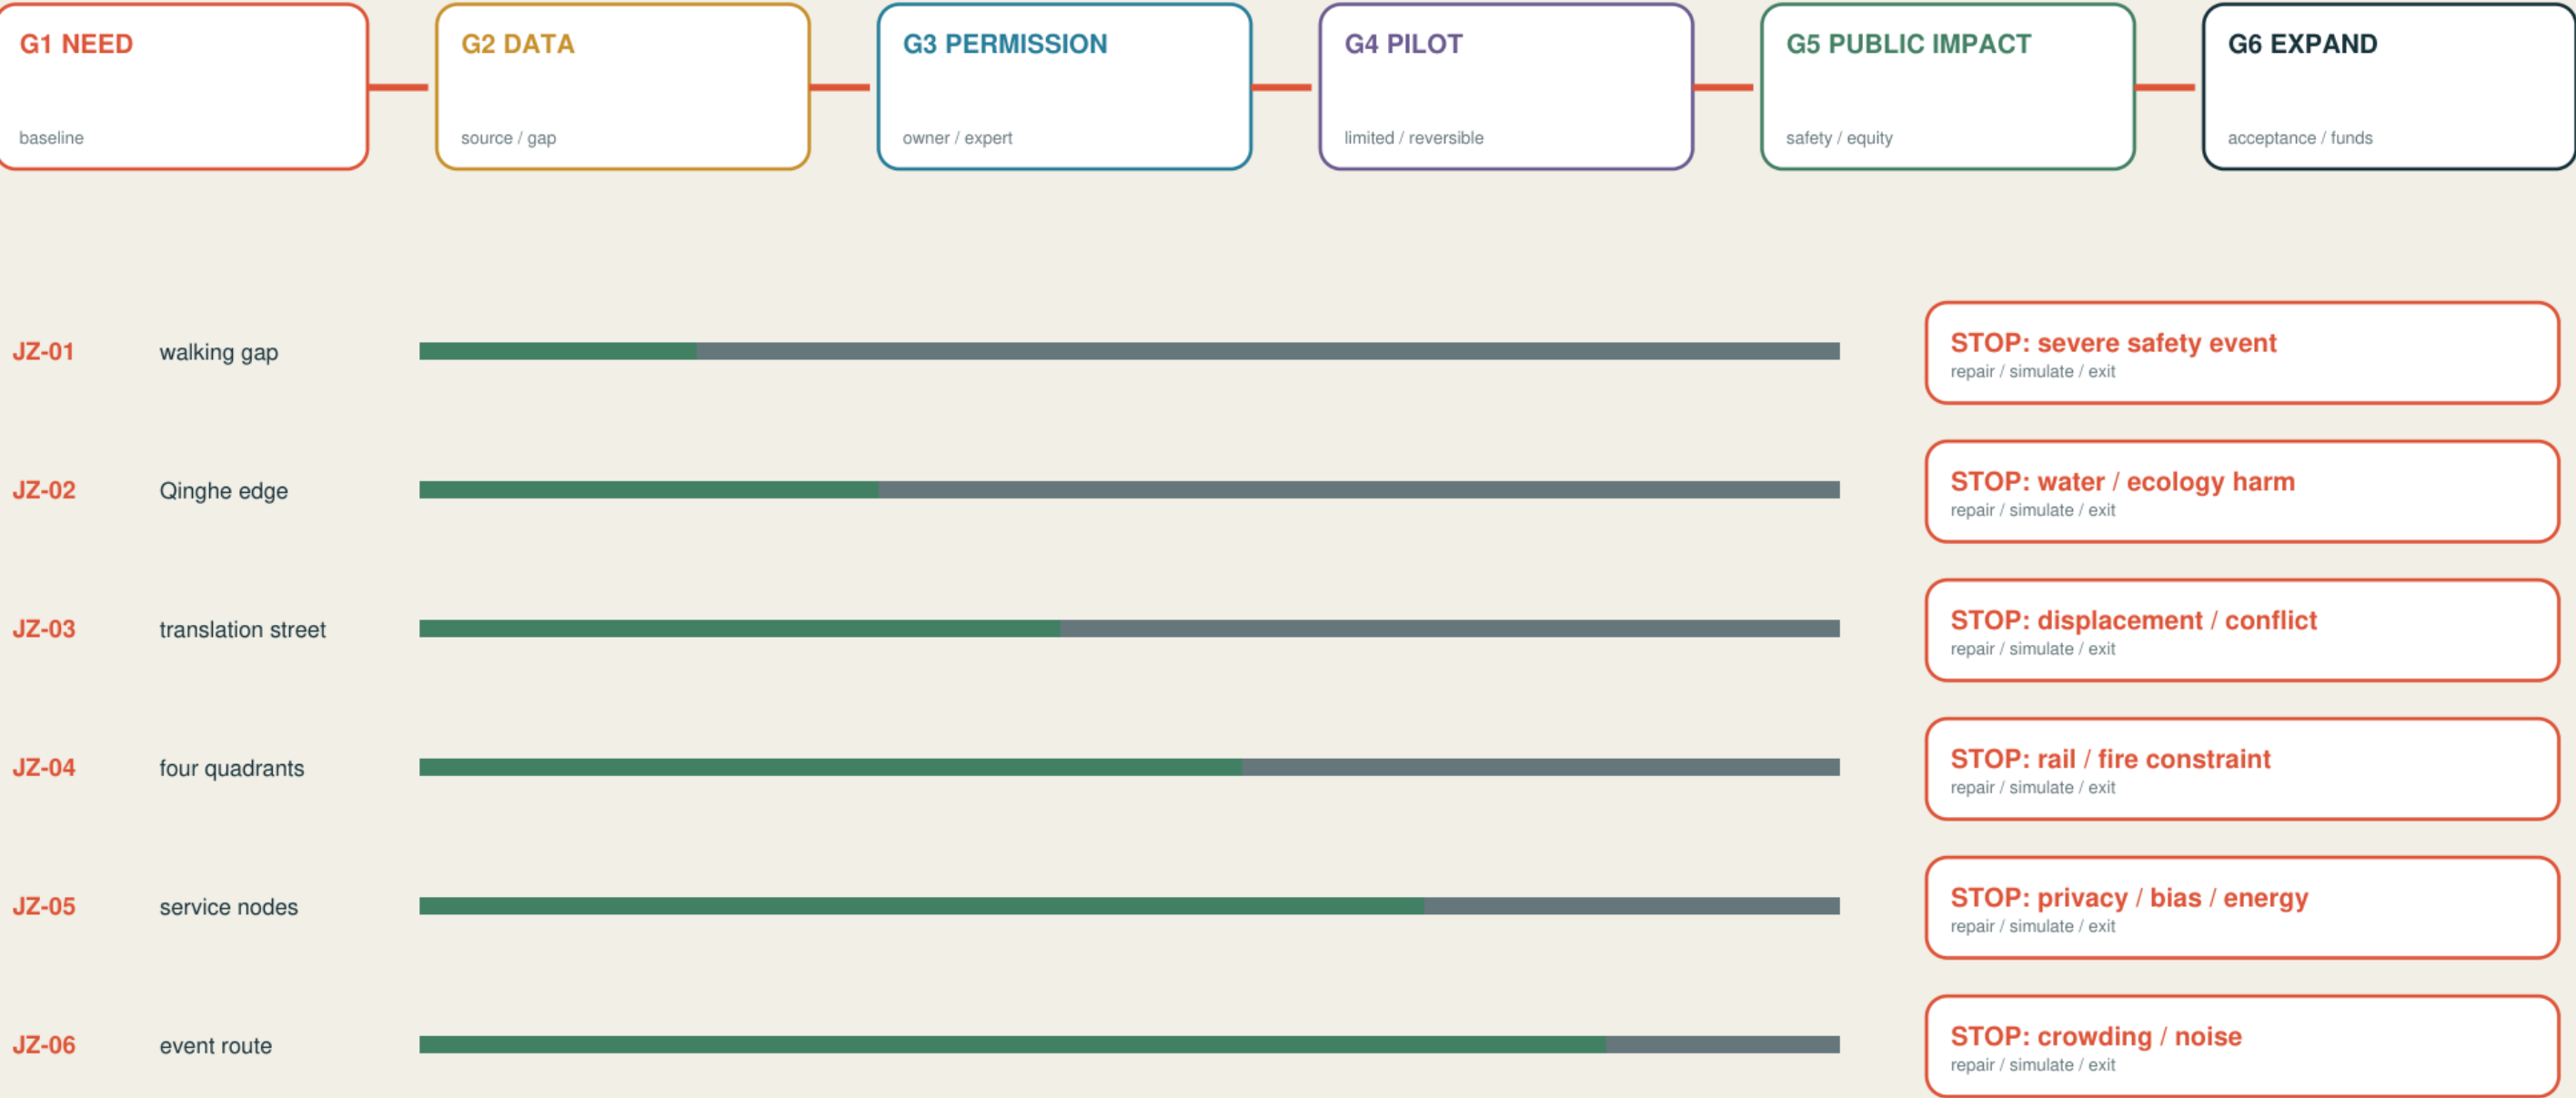

pause / correct / disconnect

Provisional geometry: complete GIS recalculation is required when official data arrives.

05 SIX DELIVERY GATES + STOP LOGIC

CONCEPT / PROVISIONAL

A pilot is not a one-way route to construction

Evidence: baseline -> permission -> pilot log -> takeover -> community feedback -> accept/stop -> 30/90-day review
