

Zhichun Road Smart-Core | Transit-Hub Station-City Integration & AI Mobility (Concept)

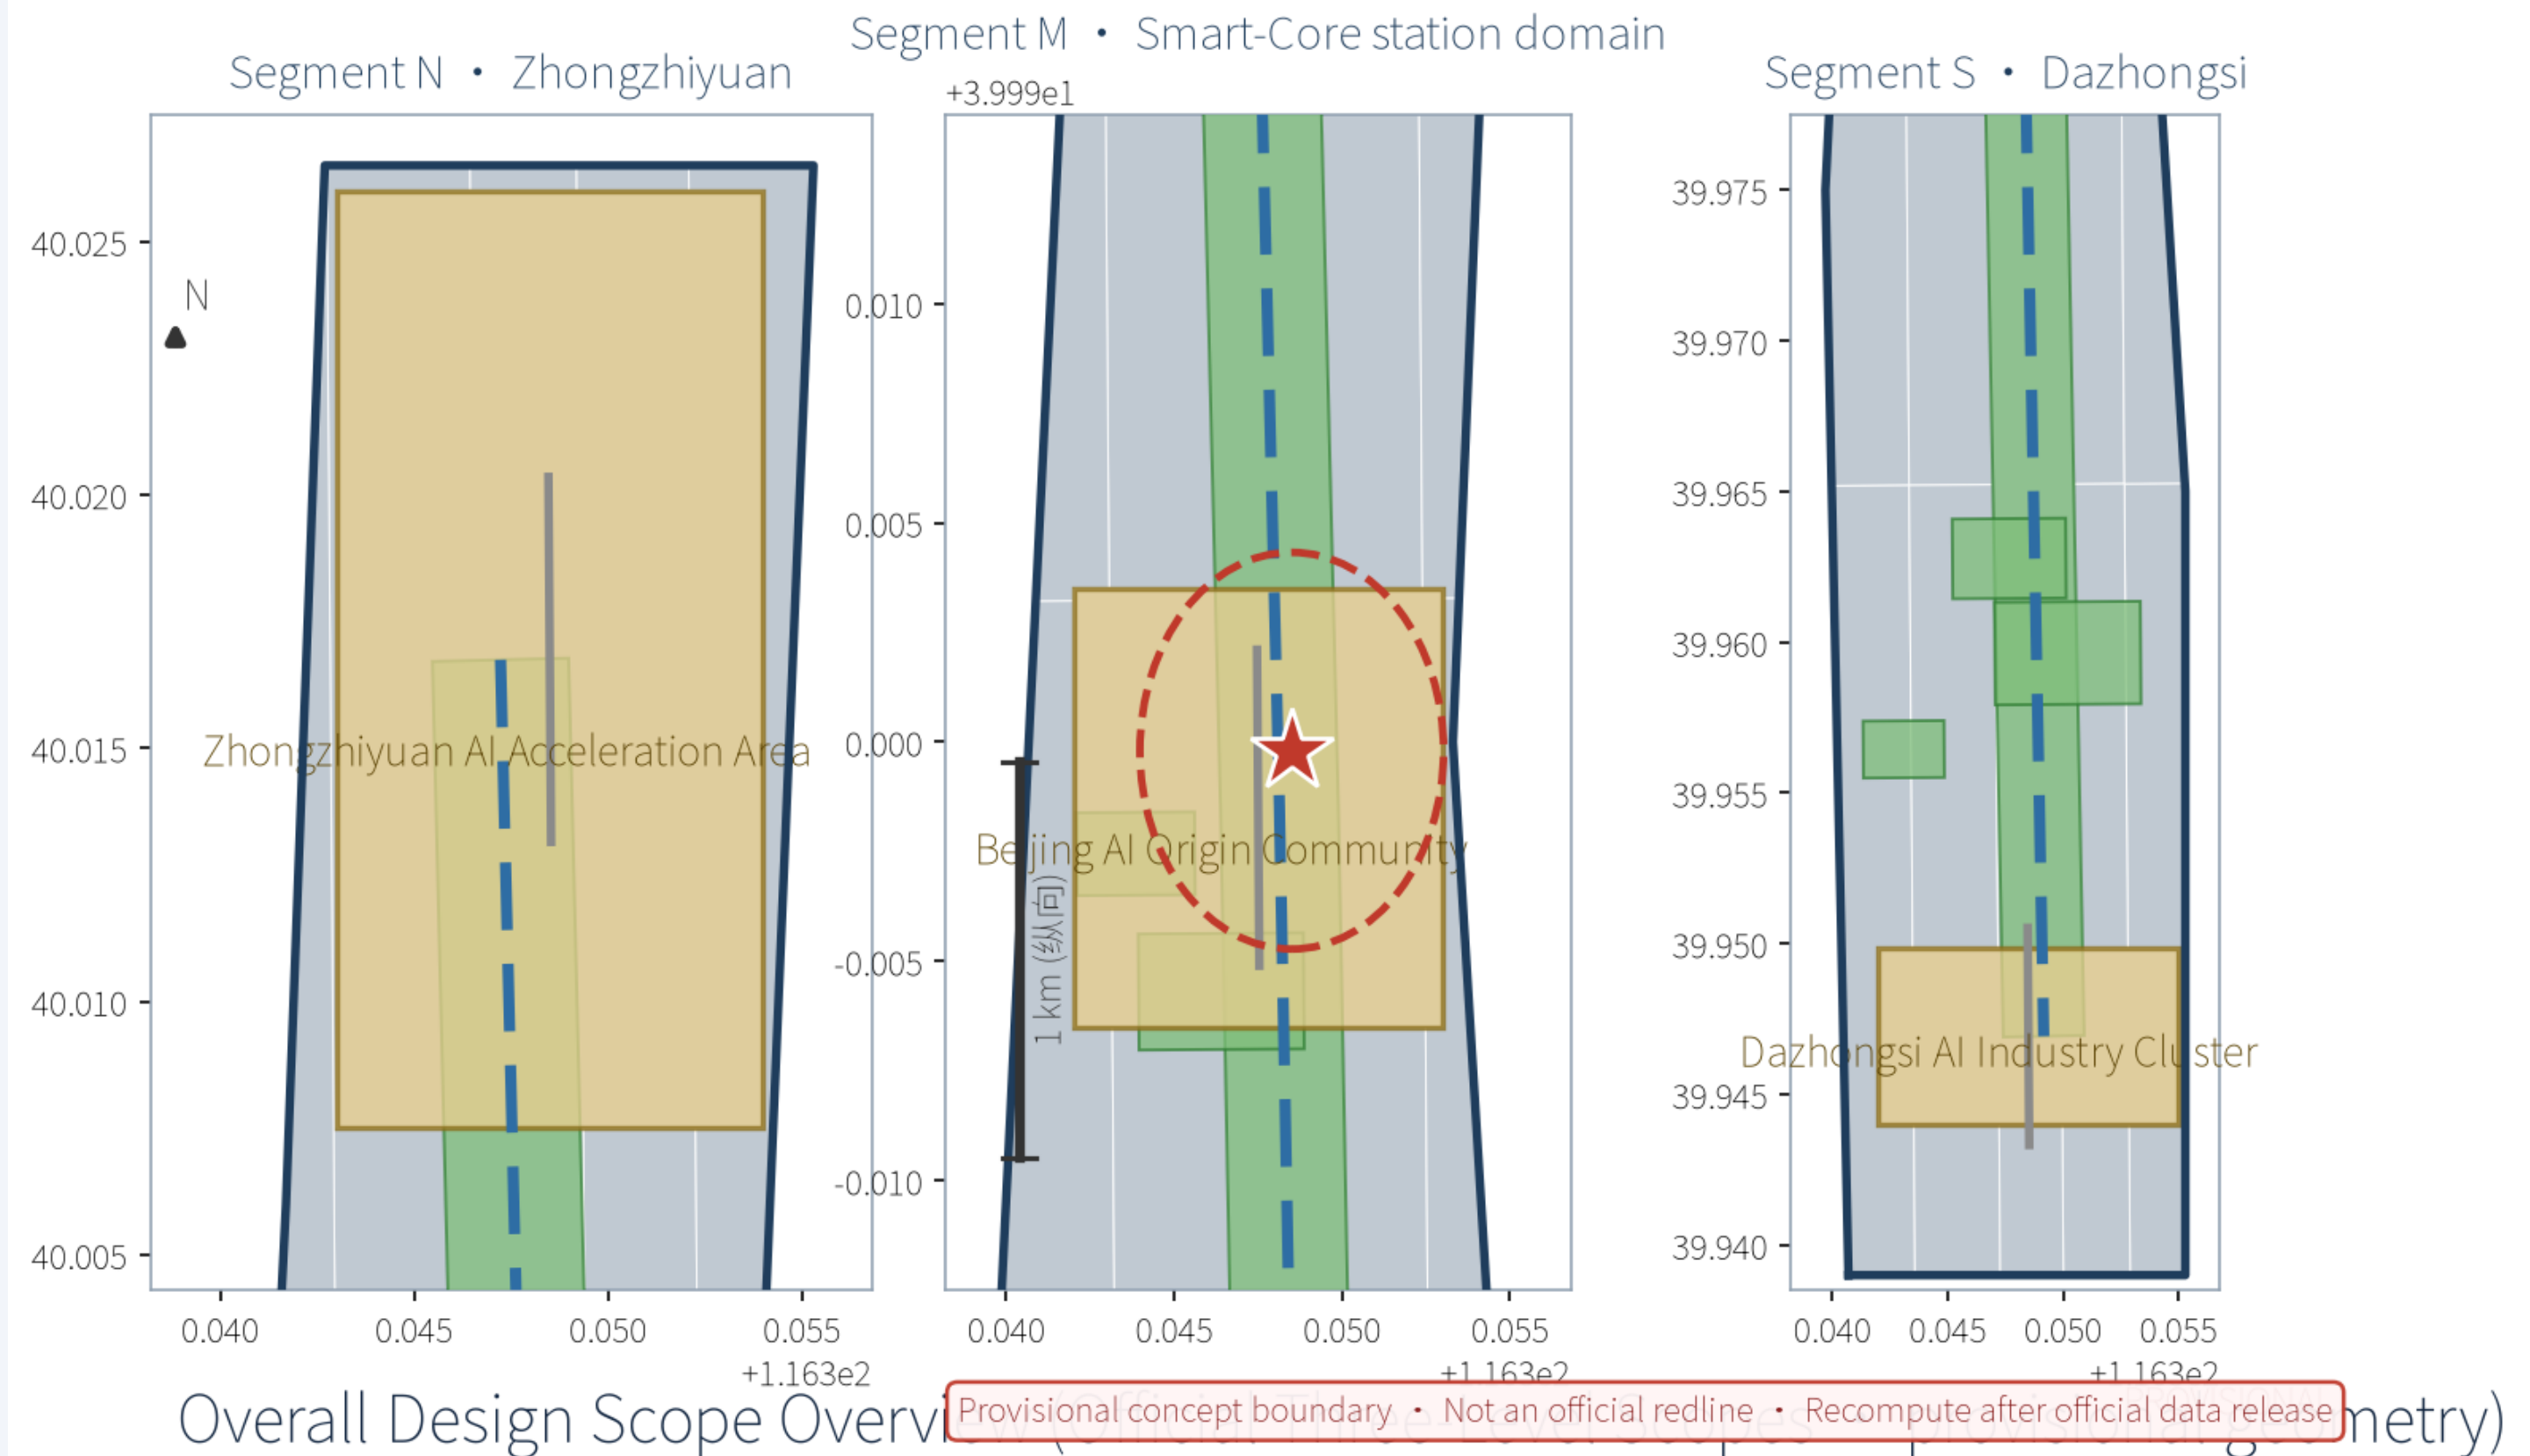

Centennial Jing-Zhang AI Innovation Belt Call • Concept

Sub-scope: 500 m Zhichun Rd station domain (N1-N3 chain) | Official scopes: 43.6 km² / 11.4 km² / 368.4 ha

All concept suggestions on provisional boundaries; recompute after official data release

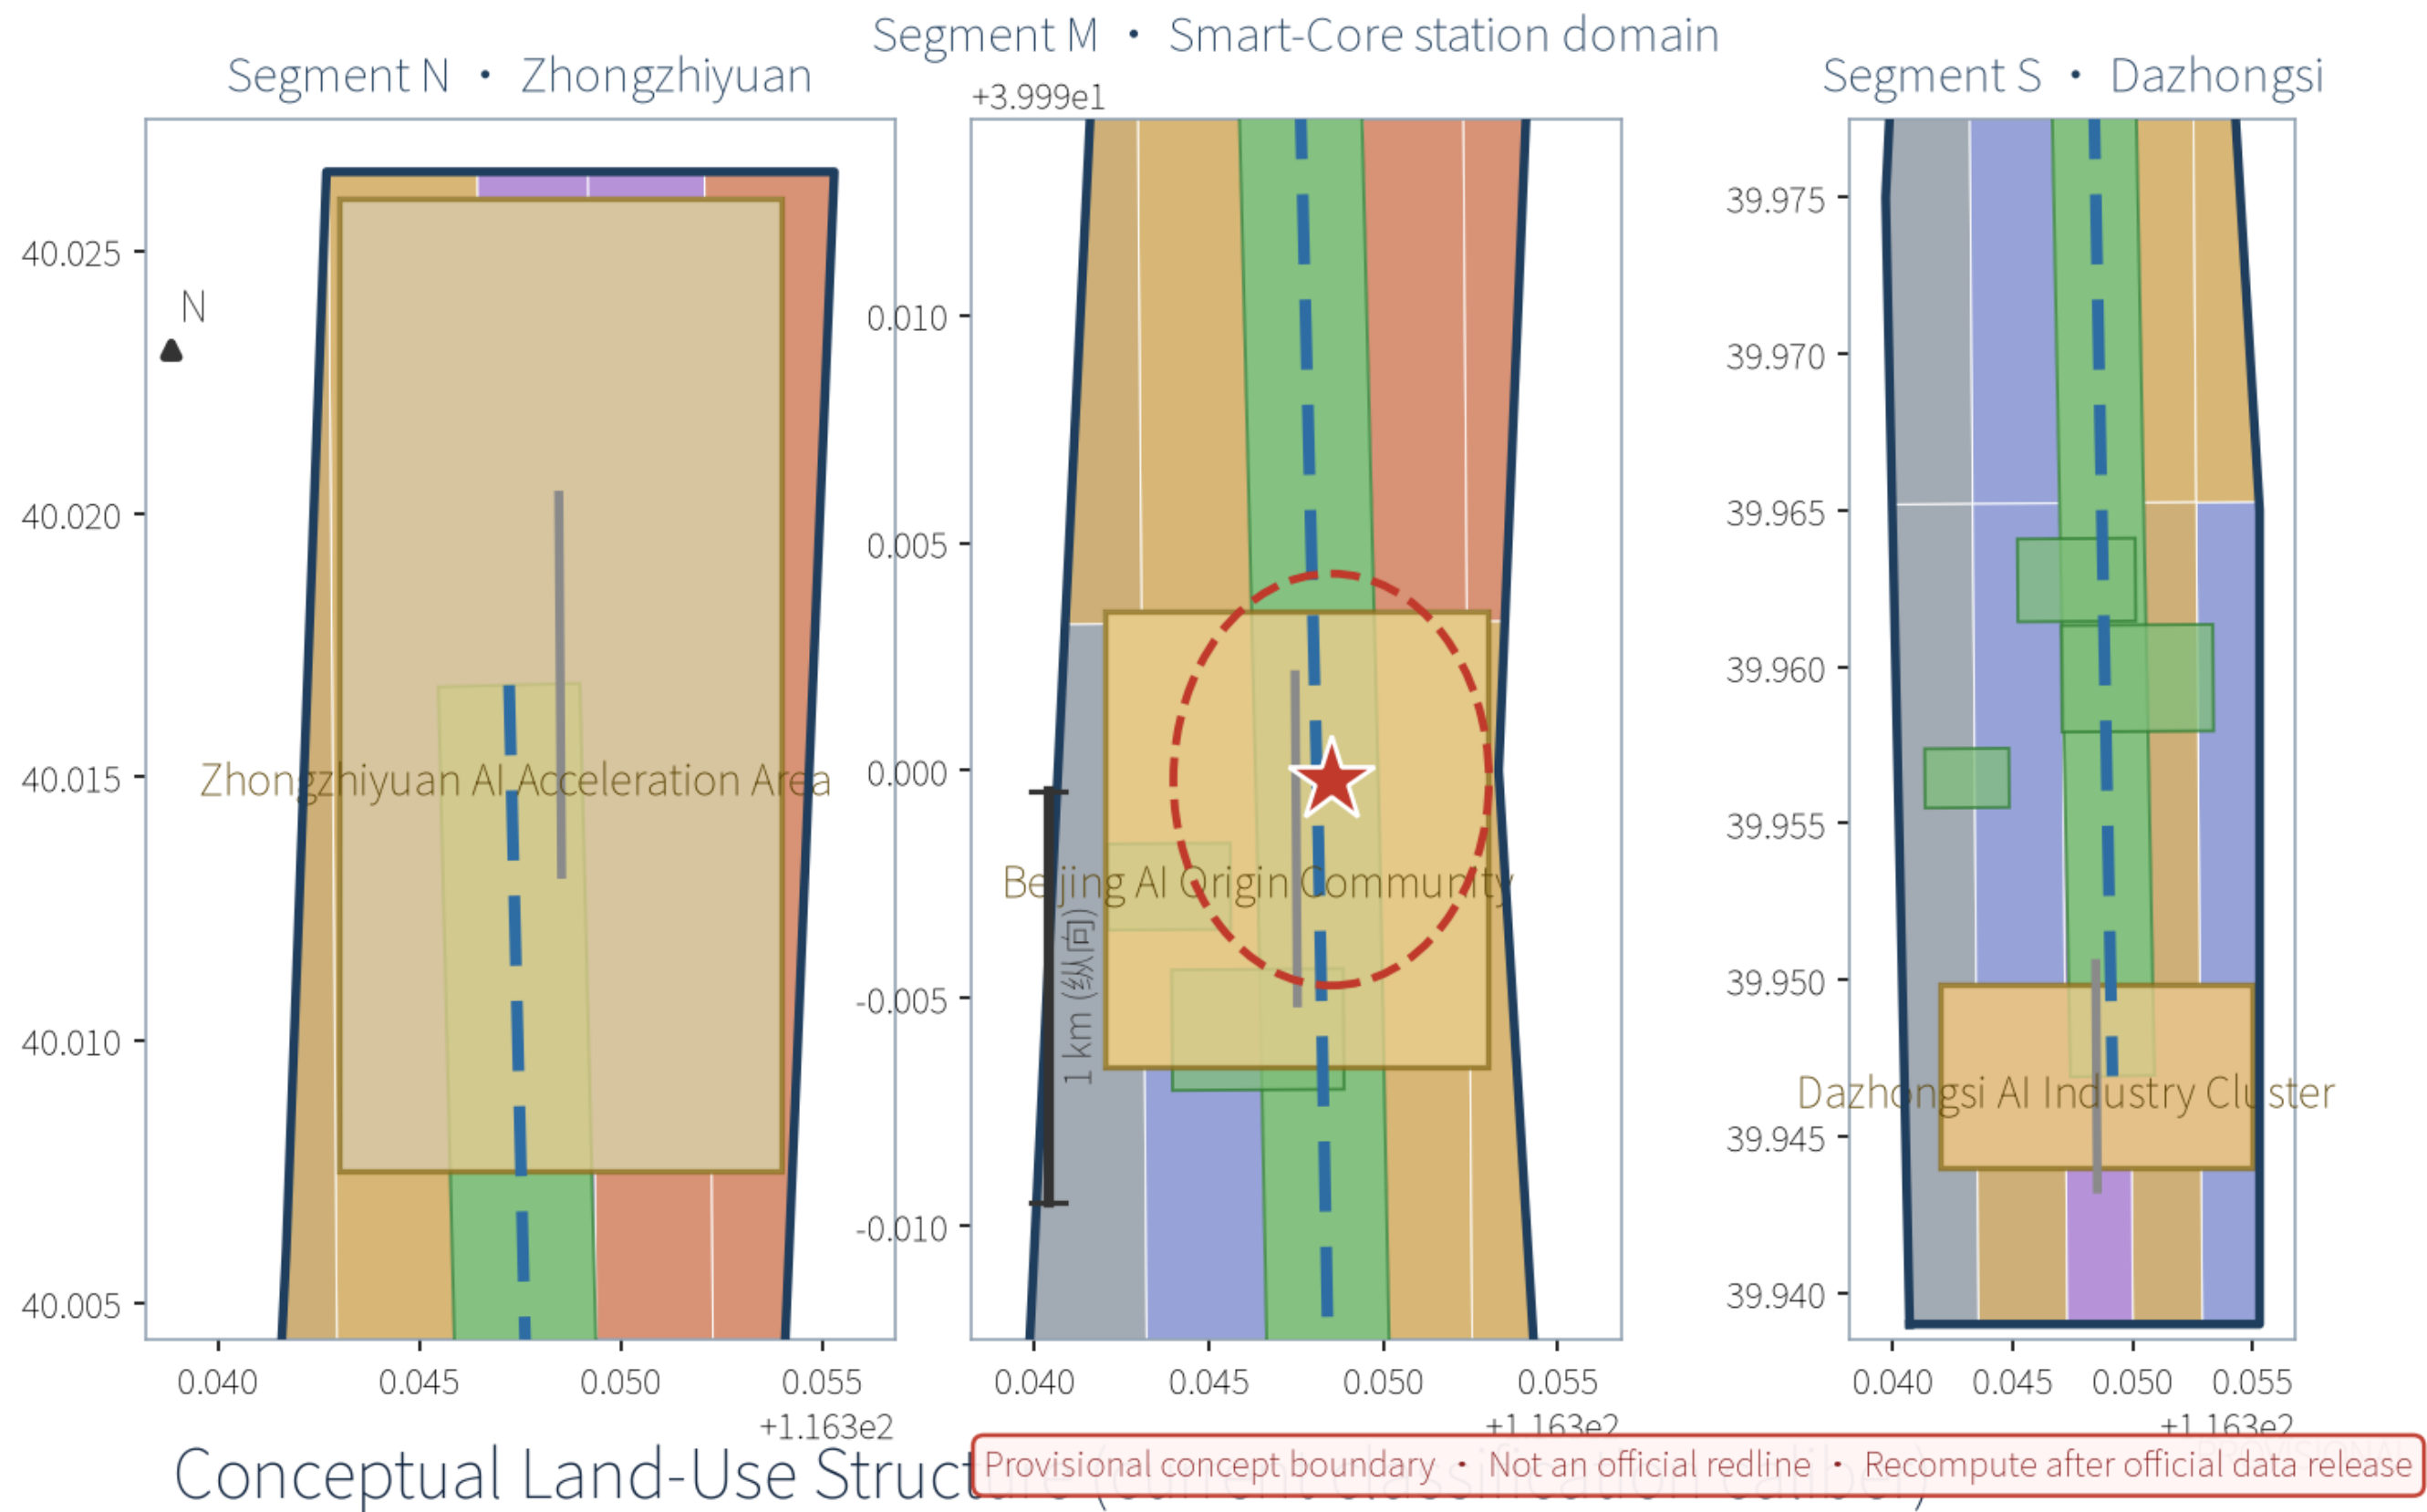

Scope System: Official Three Levels + Station-Domain Sub-scope

Concept suggestion • reference proposal • all geometry provisional; overall recompute after official data release

Provisional concept boundary • Not an official redline • Recompute after official data release | Concept suggestion / reference proposal only

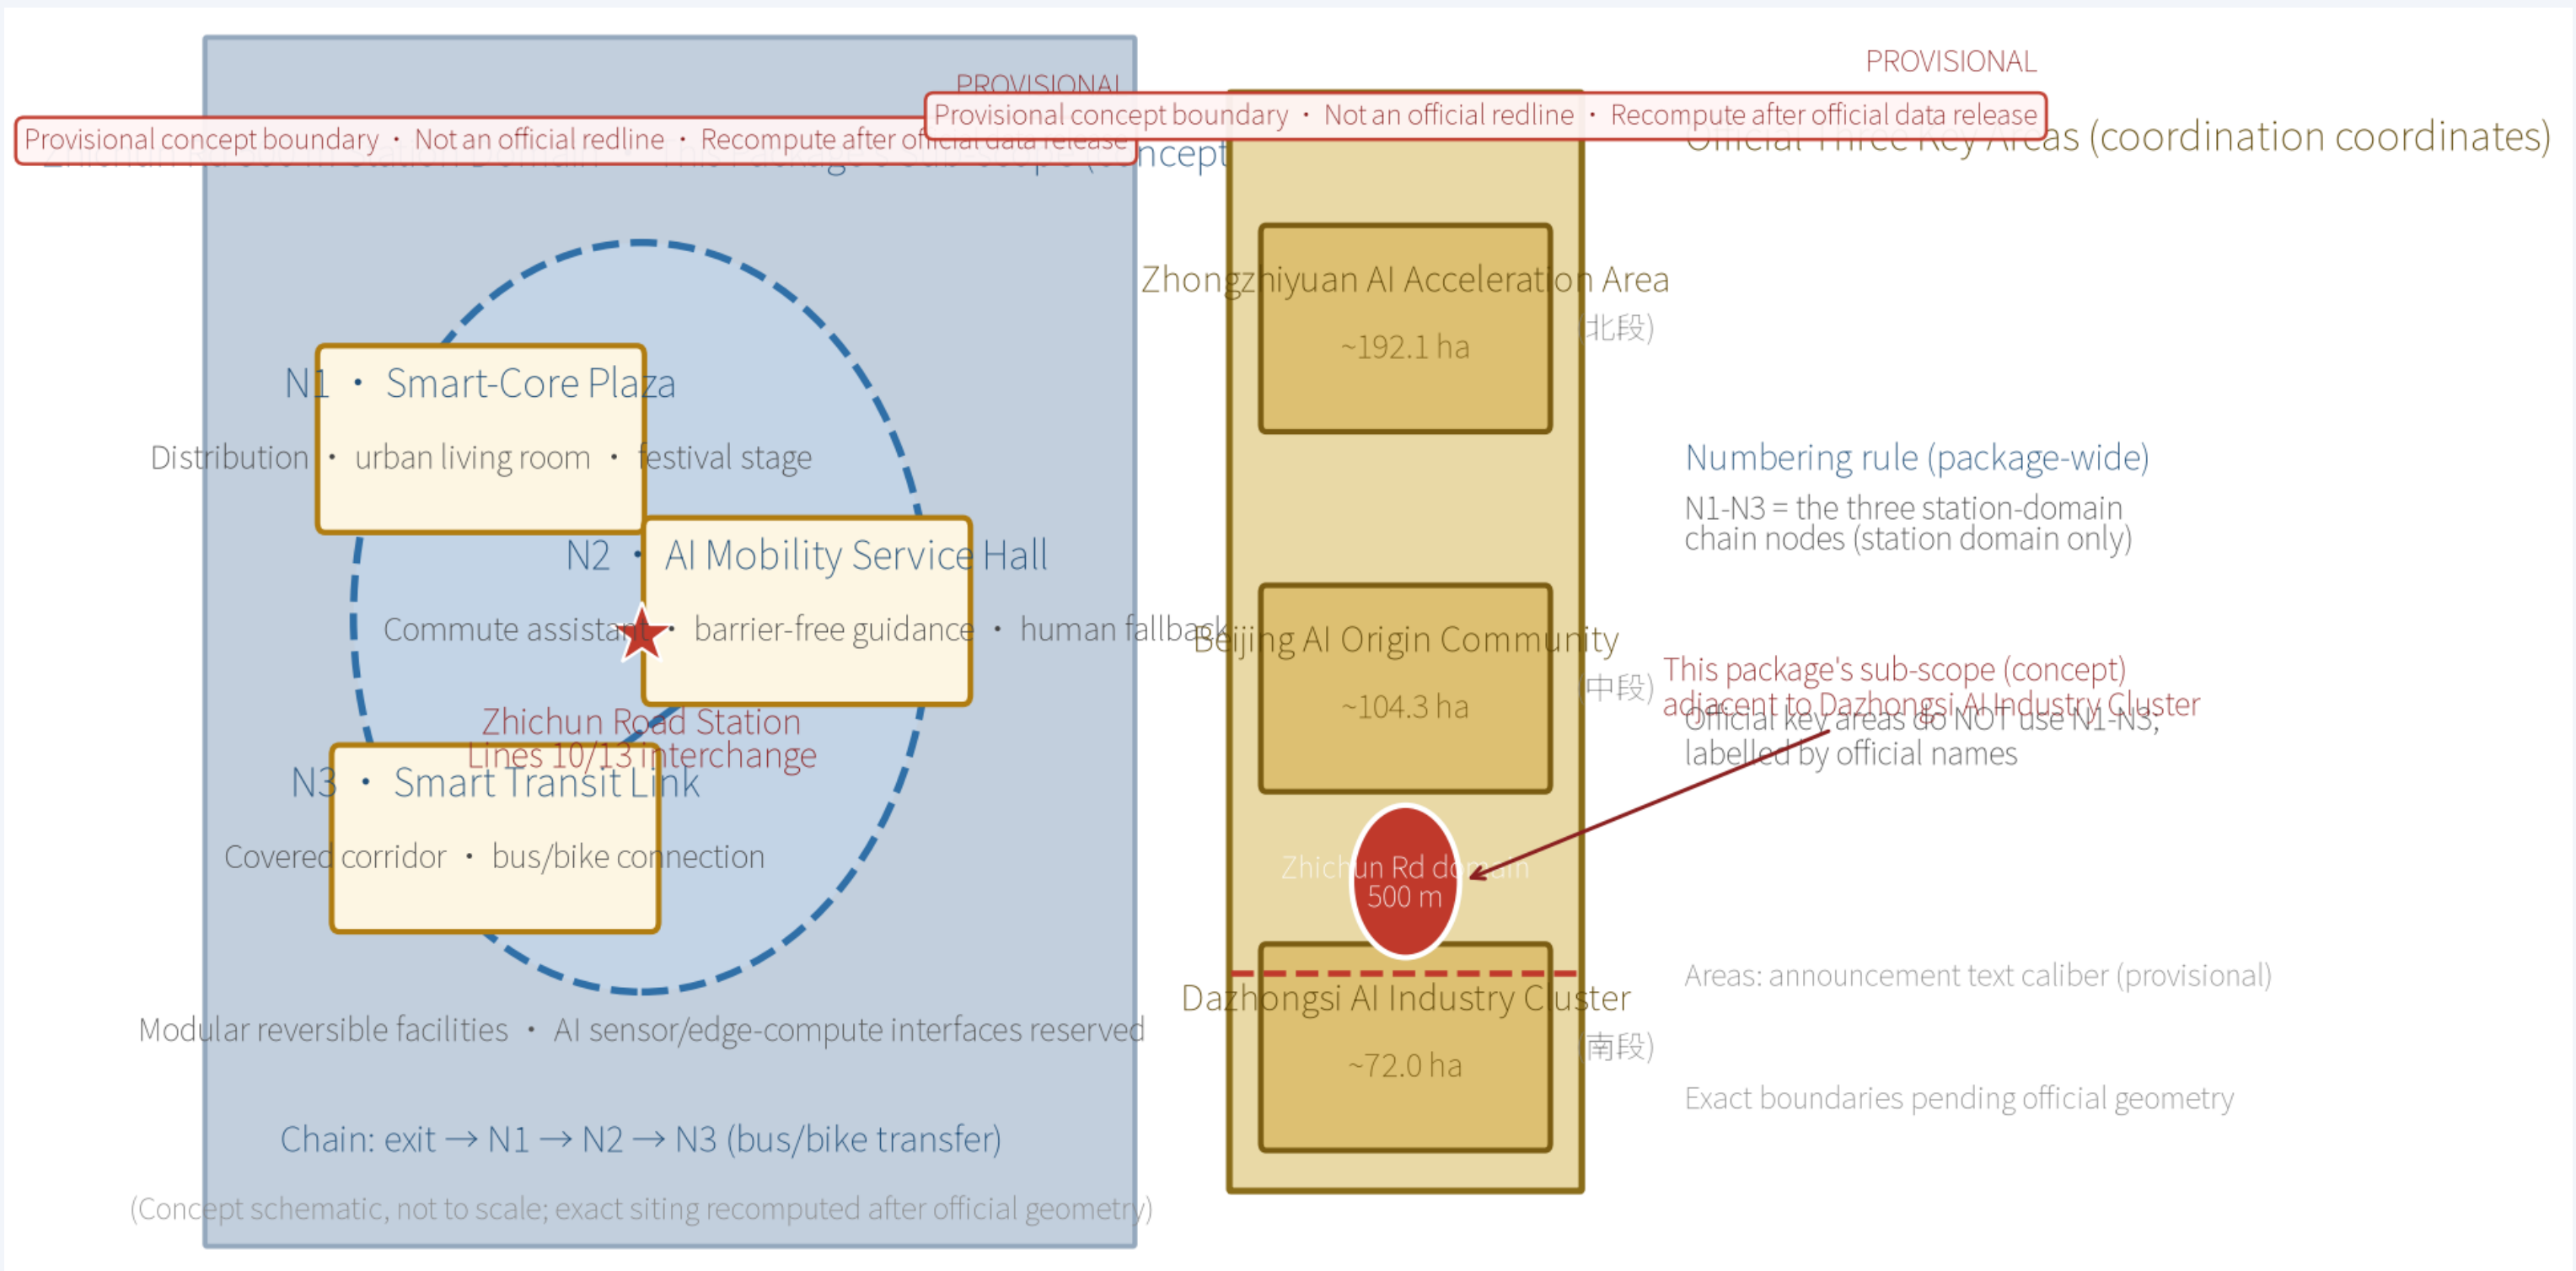

Land-Use Structure (concept)

Concept suggestion • reference proposal • all geometry provisional; overall recompute after official data release

Provisional concept boundary • Not an official redline • Recompute after official data release | Concept suggestion / reference proposal only

Key Areas: N1-N3 Station-Domain Chain (unified numbering)

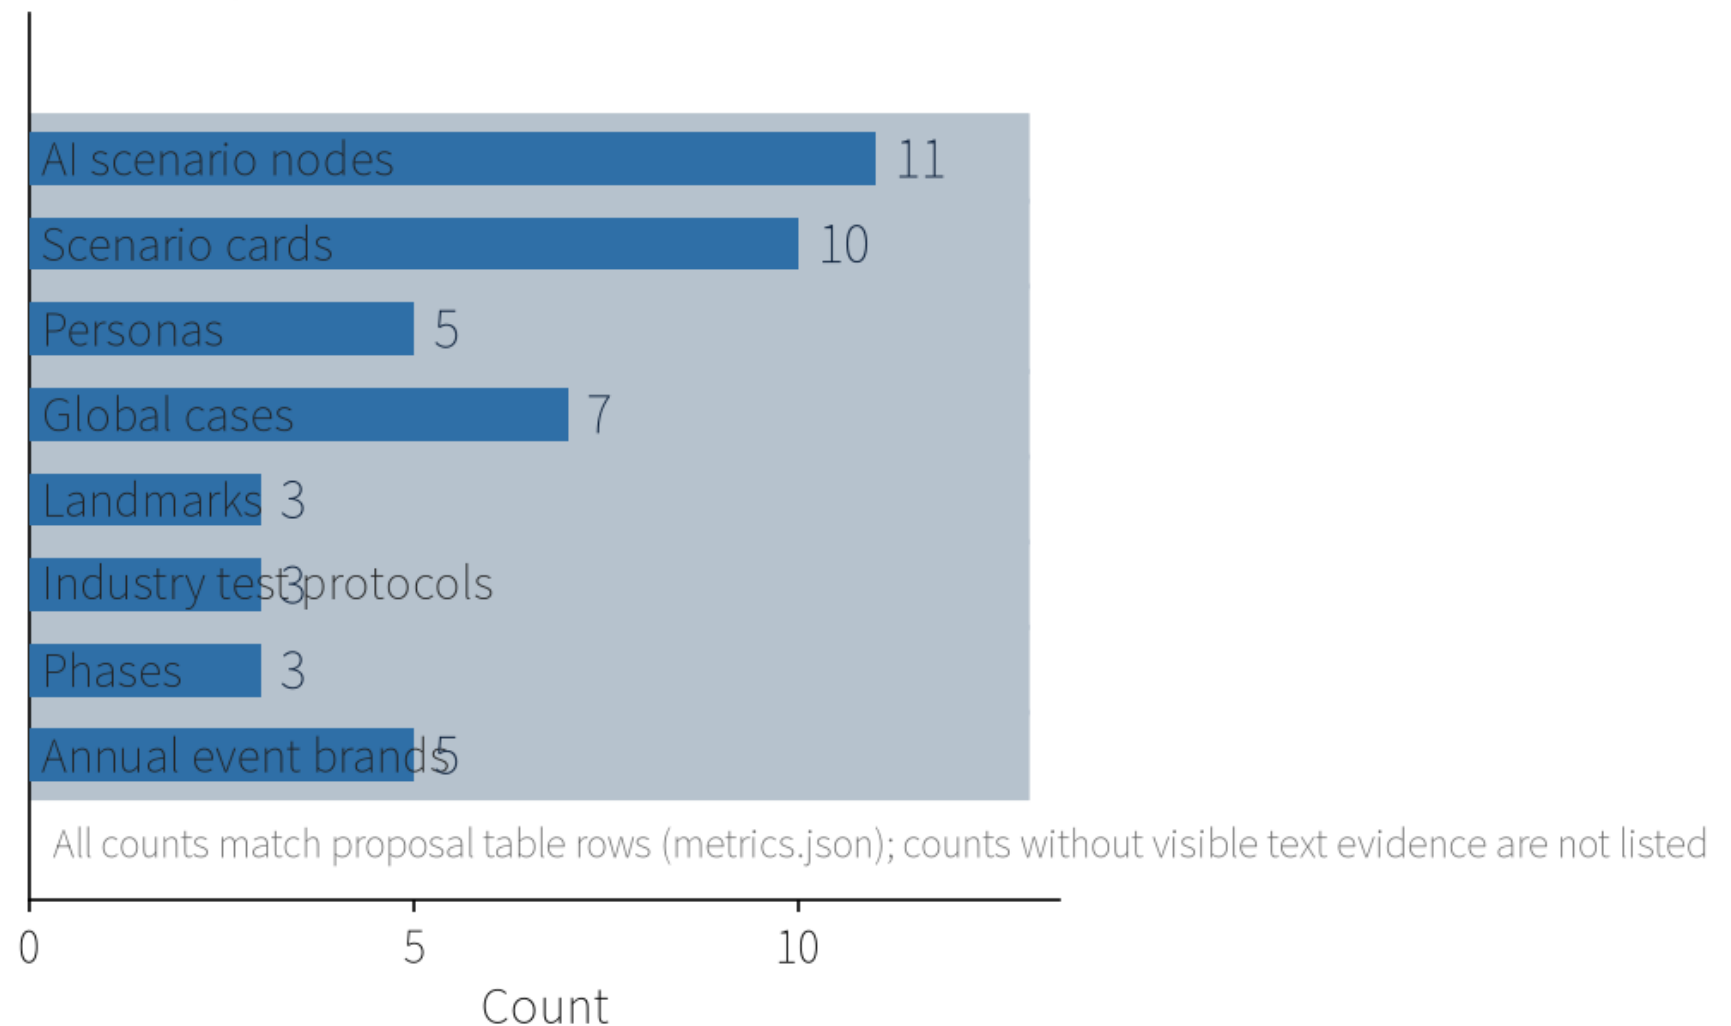

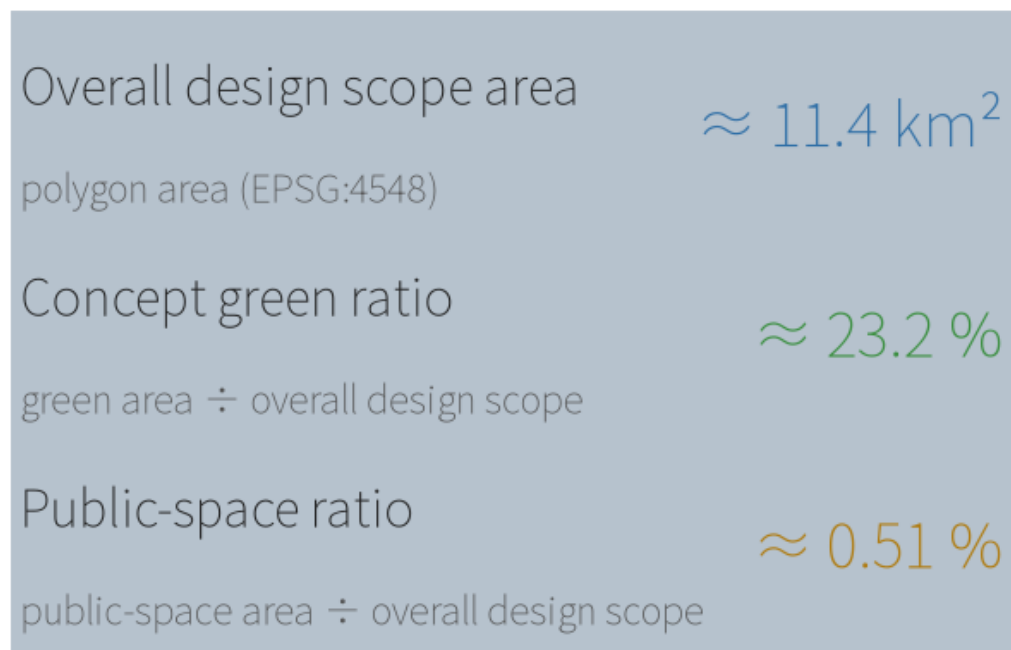

Scenarios & Metrics (concept caliber)

Key Metrics Evidence Chart (concept caliber • provisional)

PROVISIONAL

Provisional concept boundary • Not an official redline • Recompute after official data release

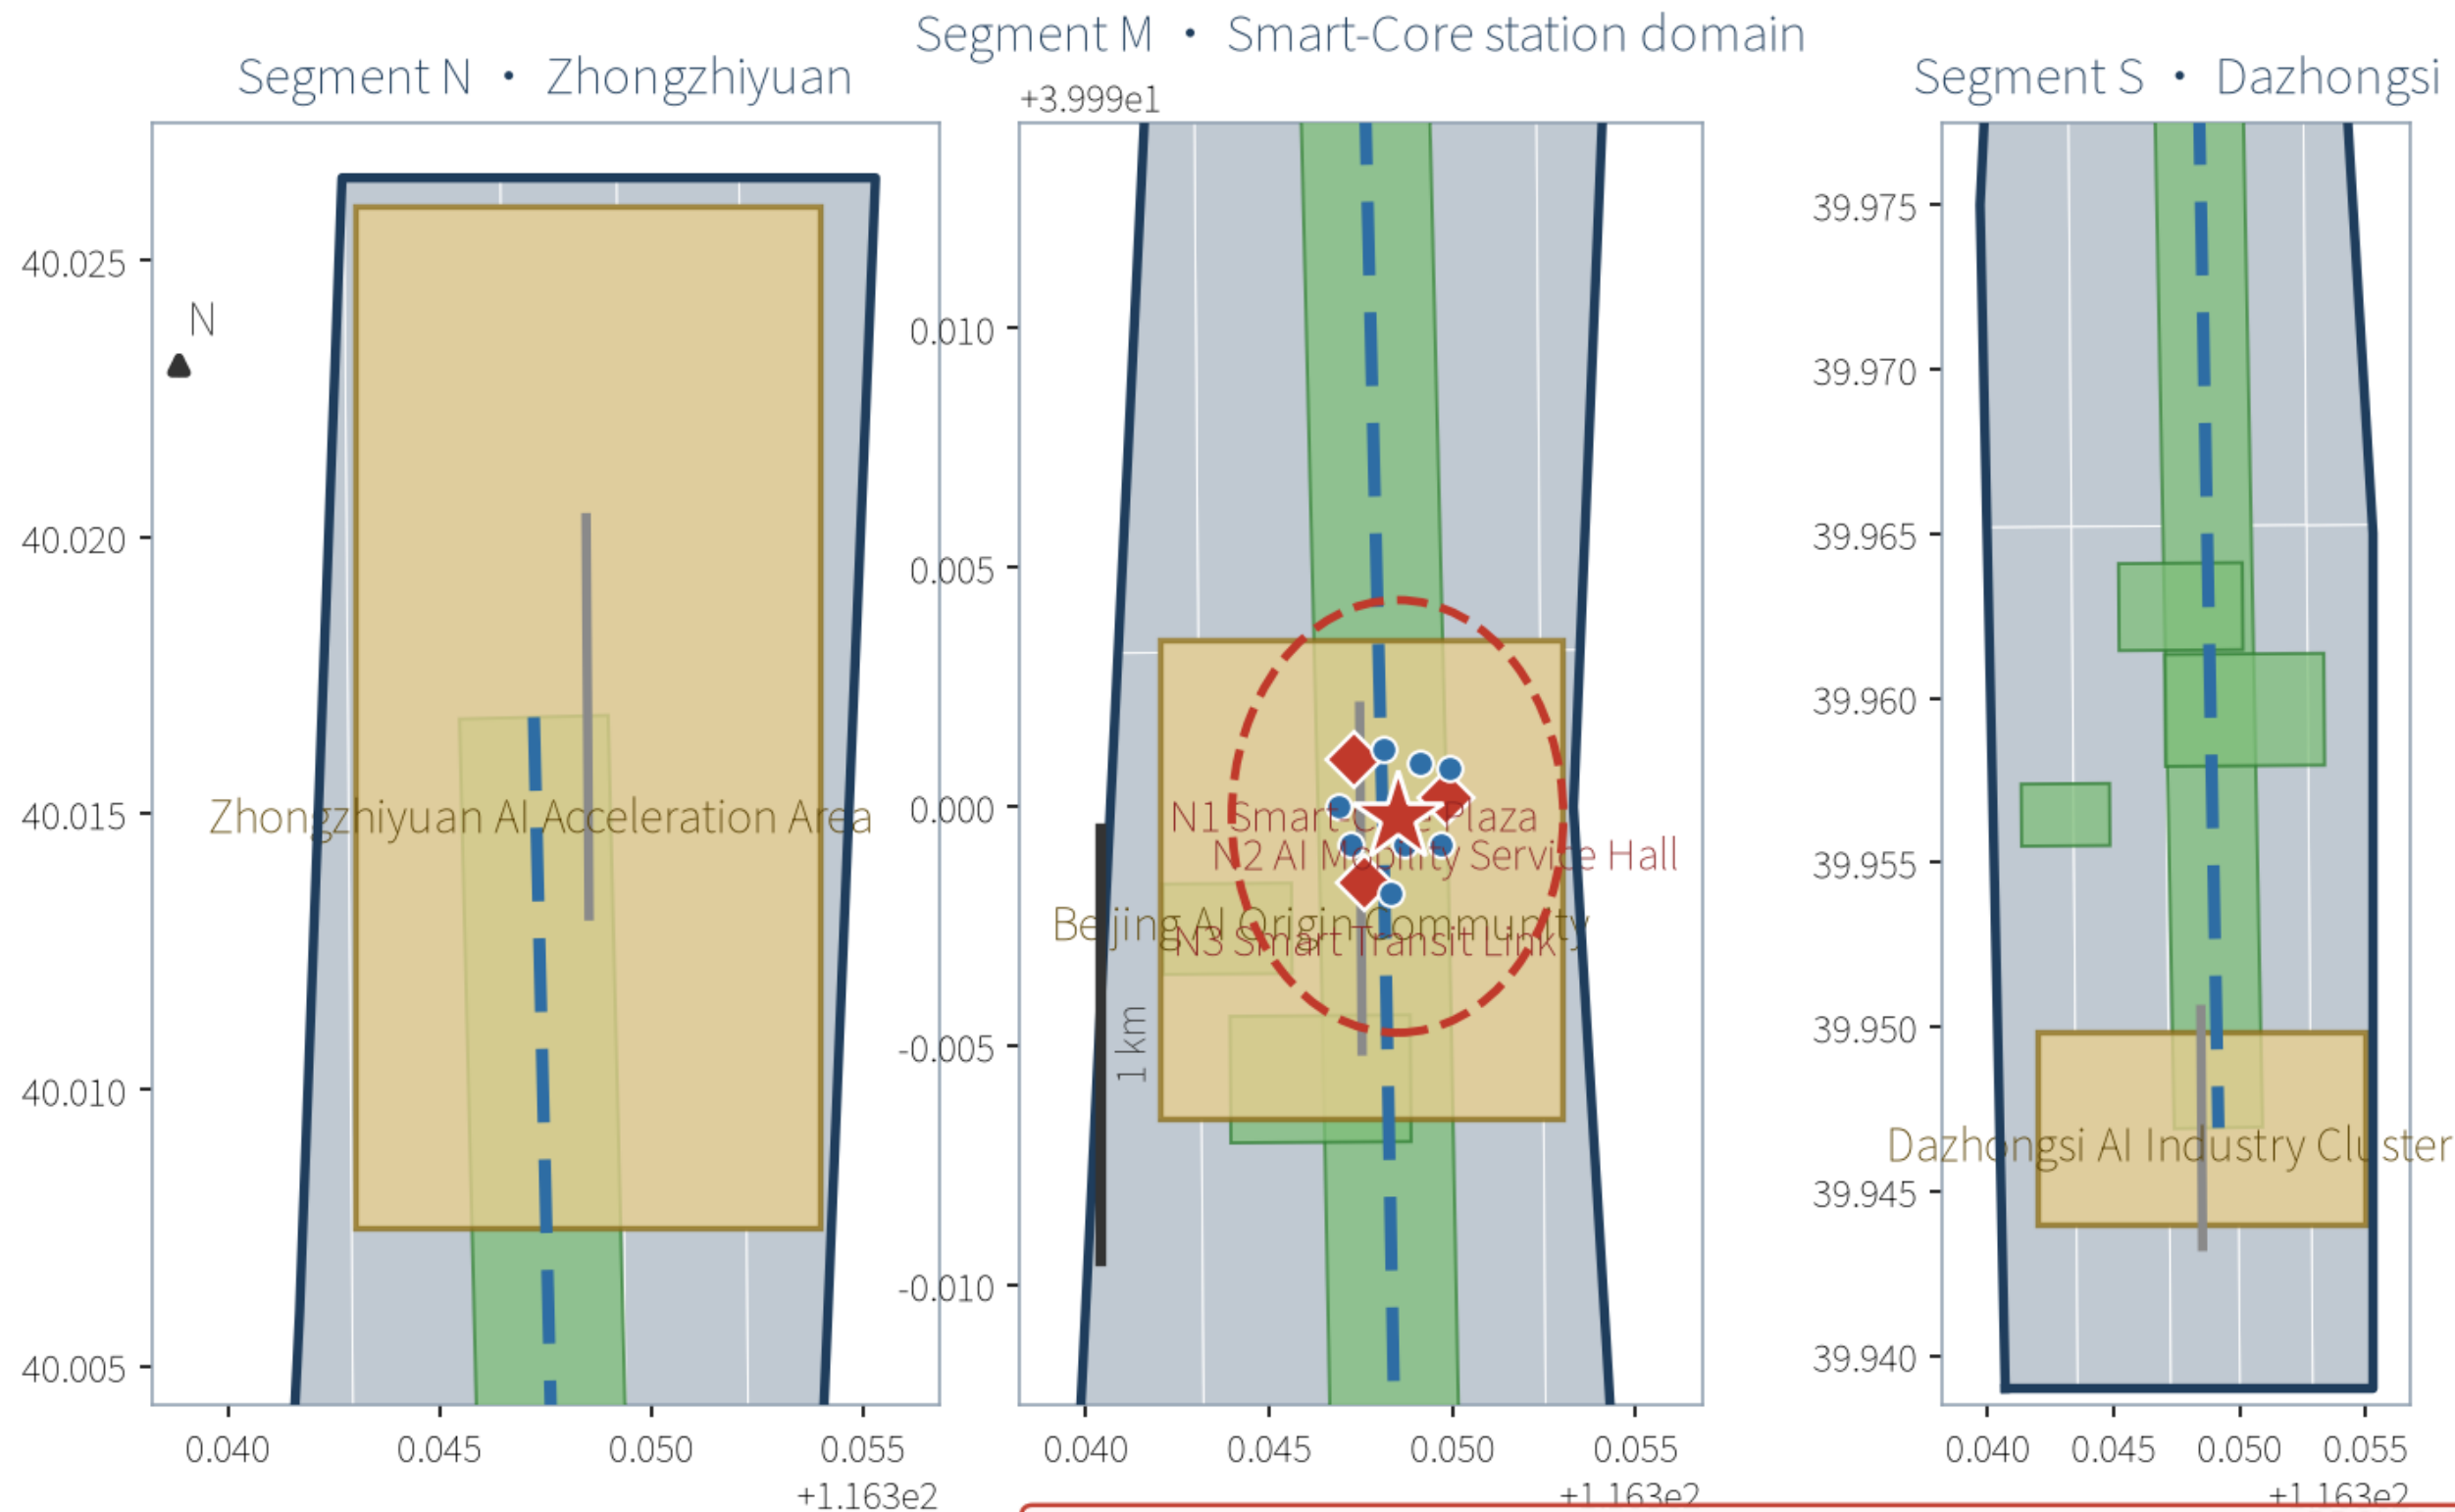

i. Area & Ratio Indicators (separate axis) Count Indicators (separate axis; ratios and counts never share an axis)

Confidence: site_area_sqm=medium / ratios=low / counts=high (geometry-recomputable)

Recompute trigger: uniform recalculation after official geometry/network/ridership release (provisional)

Mobility & Blue-Green Network (5-10 min = to-be-verified goal)

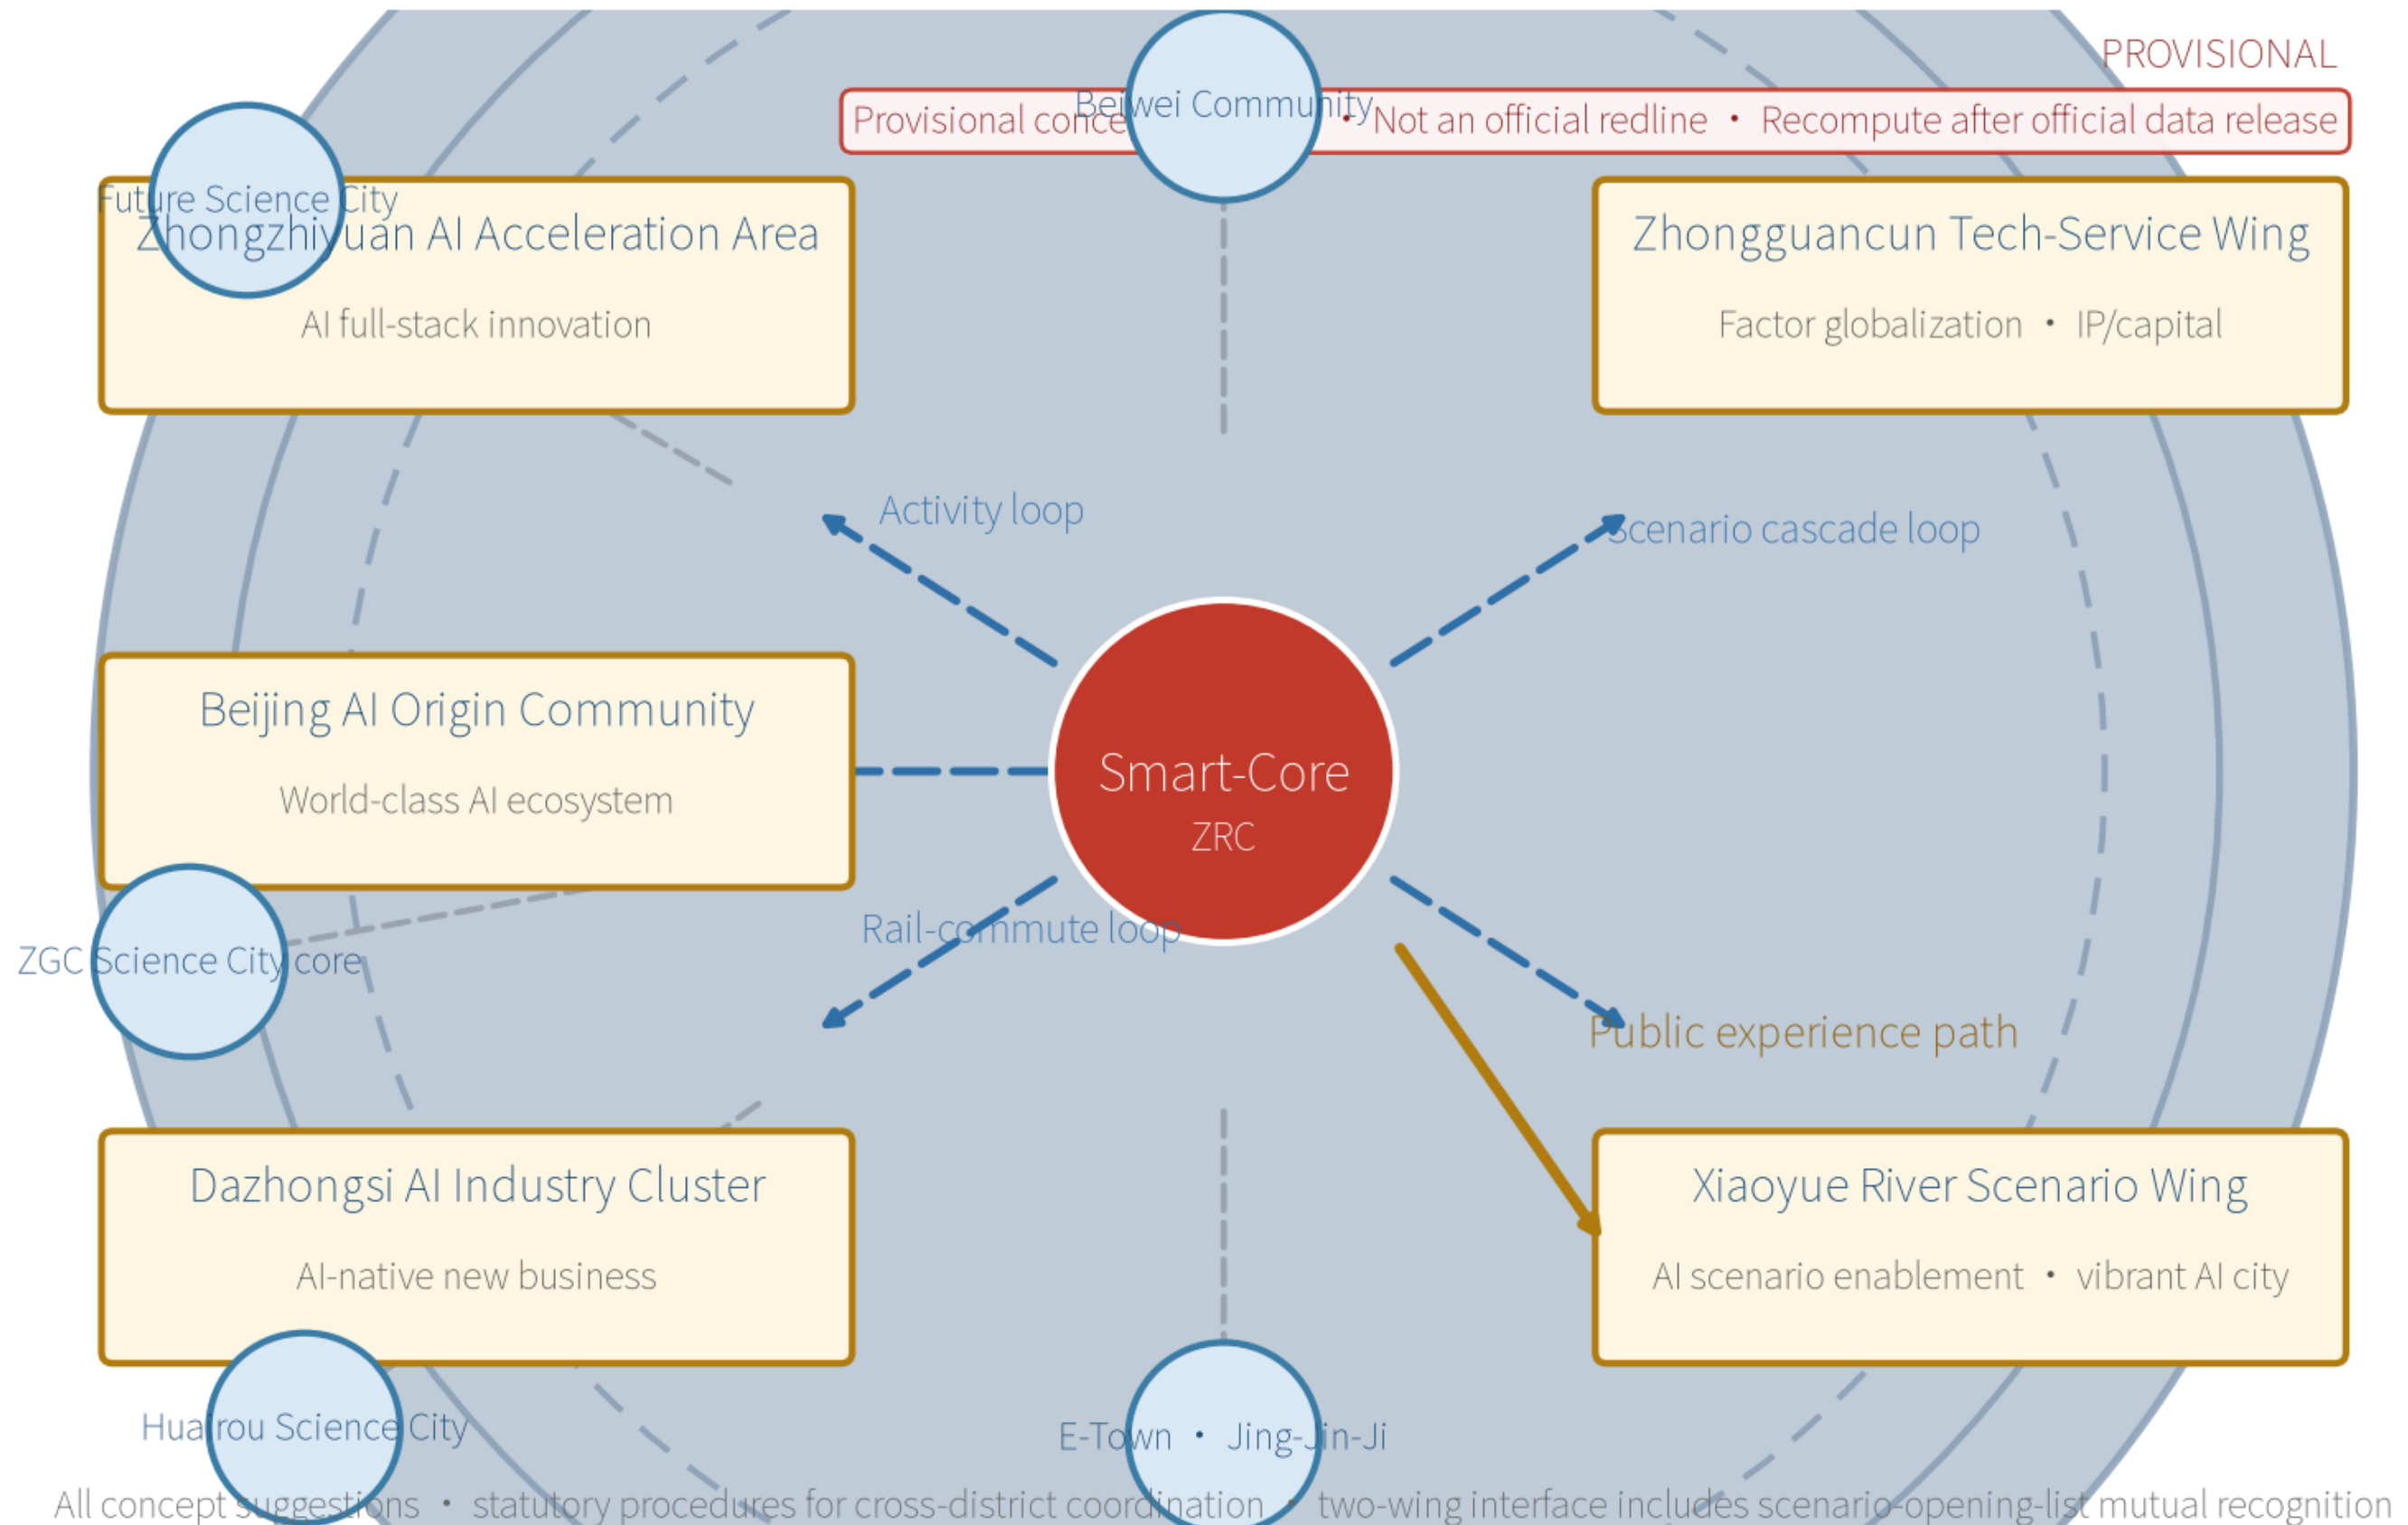

Mobility & Blue-Green Network Analysis (concept)

- Concept green
- Stitch RD-CROSS
- AI scenario nodes (8)
- Official key areas (coords.)
- 5-10 min access (to-be-verified goal)
- Spine RD-SPINE
- N1-N3 Smart-Core landmarks
- Zhichun Rd station • 500 m domain

Three Districts, Two Wings Loops & Regional Nodes

Zhichun Road Smart-Core: Three Districts, Two Wings Loops & Regional Nodes (concept)

Phasing and Compliance (concept)

- Phasing: near 1-3y (plaza micro-renewal, corridor I, AI Hall pilot) / mid 3-5y (corridor network, frontage opening) / long 5-10y (over-track concept study)
- Implementation: government + market + residents; concession pilot; modular reversible facilities (concept)
- Governance: anonymous aggregation + human review; monthly resident meetings & annual disclosure; AI-governance triad (aggregate only, human review for key decisions, no over-monitoring)
- Risk & rights: provisional boundary; brand names treated as internal working codenames until trademark clearance
