

JING-ZHANG HANDOVER LINE

A railway shift handover becomes a civic AI accountability protocol

SITE OVERVIEW

THREE HANDOVER YARDS

HANDOVER PROTOCOL

01 / BUILD TO VERIFY

Models, robots, compute and data enter tests with versions, risks and shutdown rules.

03 / SHARE TO SERVE

Civic services retain a human desk, a no-AI equivalent, appeal and exit records.

02 / VERIFY TO SHARE

Results, licences, failures and limits travel together; open source never means exposing personal data.

04 / RETURN THE PROBLEM

Complaints, repairs and shutdown causes travel back to research as public learning.

IDENTITY & COLOUR

Licence: non-commercial public, academic and community use; commercial use by separate grant; no implied endorsement

Human takeover is not a fallback feature. It is civic infrastructure.

BUILD→VERIFY

VERIFY→SHARE

SHARE→SERVE

PHASE GATES

Gate-driven progression, no calendar commitment

PHASE 1 / PHASE-001

Baseline and southern civic service pilot

Recomputed area
4.84 km²

PHASE 2 / PHASE-002

Share handover yard and the middle link

Recomputed area
3.55 km²

PHASE 3 / PHASE-003

Build handover yard and belt operations

Recomputed area
3.03 km²

Three Scopes, Land-use Topology and Key Areas

Full coverage without statutory fiction; three yards, three shifts of duty

Land-use topology and three scopes

LAND USE

- 0802 R&D / validation
- 0804 Learning / open source
- 09 Commercial and business services
- 0701 Talent living
- 0702 Community service
- 0803 Culture / civic service
- 1401 Continuous parkland
- Handover Line main axis
- Handover yard node

43.6 km² → **11.4 km²** → **3 YARDS**
RESEARCH Industry + future city OVERALL DESIGN Spatial + delivery system KEY AREAS Detailed validation

Design recommendation: all zones recalculate when official boundaries arrive; no ownership or statutory land-use claim.

Data: land_use.geojson and site_boundary.geojson; codes from the public MNR subset

Three handover yards, three shifts of duty

Each key area answers programme, space, scenario and human-takeover gates
Extents from key_areas.geojson; points from public_space.geojson; one shared scale

- Handover Line main axis
- East-west stitch links
- Public scenario / landmark

Ecosystem Map and Regional Innovation Synergy

Eight shared stacks x three areas, two wings; synergy across belt-city- municipal-regional tiers

EIGHT SHARED STACKS / INTERFACE AND DUTY OWNER VISIBLE

Land	Zhongzhiyuan
Reversible space supply	
Space	All three
Open labs, validation workshops, community rooms	
Industry	Zhongzhiyuan
Model, chip, robot and vertical-app interfaces	
Finance	Services wing
Transparent navigation; no subsidy promised	
Talent	Origin Community
Universities, developers, maintainers, residents	
Compute	Zhongzhiyuan
Edge metering first, access on demand	
Data	All three
Consent, minimisation, withdrawal, audit	
Scenarios	Scenario wing
Problems, test rules, results, exit records	
No company list, investment or output figures: industry metrics are defined, not assigned	

WITHIN BELT	Three areas and two wings organise the research-validation-service loop; objections and shutdown reasons travel back north.
WITHIN CITY	Connects to the official “two zones and one belt” framework, matching Zhongguancun technology supply to this belt’s validation and scenario demand.
MUNICIPAL	Future Science City, Huairou Science City and BDA form an original-research / engineering-validation / scale-delivery division; this belt is the public-validation output end.
REGIONAL	Compute, energy and scenario interfaces reserved toward Zhangjiakou and other Beijing-Tianjin-Hebei nodes; feasibility to be confirmed by authorities.

Eight stacks x three areas / two wings — placement matrix

Shared stack	Zhongzhiyuan	Origin Community	Dazhongsi	Services wing	Scenario wing
Land					
Space					
Industry					
Finance					
Talent					
Compute					
Data					
Scenarios					

Placement follows the duty-owner tags at upper right; "All three" = one dot each in Zhongzhiyuan, Origin Community and Dazhongsi, not a separate fourth owner

Phase gates (three sequential gates, no calendar commitment)

PHASE 1 / PHASE-001 4.84 km² Baseline and southern civic service pilot Entry condition Official boundary and key-area extents available; once condition, ownership, user and accessibility baselines are complete, low-risk human-led pilots may begin. Rollback: withdraw the temporary intelligent layer; keep fixed wayfinding, lighting, access and human service.	PHASE 2 / PHASE-002 3.55 km² Share handover yard and the middle link Entry condition Inherit Gate 1's outcomes; once ownership, fire safety, community consultation, accessibility and ongoing operating duties clear review, first-floor opening and result relay may proceed. Rollback: revert to Gate 1 usable state; halt expansion and restore ordinary ground floor and community human service.	PHASE 3 / PHASE-003 3.03 km² Build handover yard and belt operations Entry condition Inherit Gate 2's outcomes; once transport, utilities, heritage, privacy, safety, emergency response and ongoing budget clear professional review, cross-area validation networks may be discussed. Rollback: retract to validated segments; halt cross-area linkage and keep basic civic service and heritage interpretation.
--	--	--

Renewal structure and building decisions

One spine, eight stitches, three yards; priority areas in three tiers, buildings in four steps

F / 07

Renewal structure and priority renewal areas

One spine, eight stitches, three yards; three tiers, operate first, reversible next, fixed last

Renewal spatial structure

Handover Line / renewal spine
East-west stitch links ×8
Handover yards ×3

Priority renewal tiers

- Tier 1**
The three handover yards and their walkable surrounds
Led by a coordinating body, multiple owners join by agreement
- Tier 2**
Stitch-spine junctions and low-efficiency space beside the heritage park
Renewal units bundled by district, one public interface
- Tier 3**
The remaining frontage along the line
Signage, shade and frontage tidying only; ownership untouched

Twenty typology test units (10 per side)

- Verify workshop
5
26.6%
- Shared service stack
5
26.6%
- Open R&D house

Retain-first adaptive reuse 14 • investigate building by building 6

Source: submitted geometry buildings/roads/key_areas/phasing; conceptual structure, no demolish-or-keep conclusion

JING-ZHANG HANDOVER LINE / PACKAGE v1.15

R / RETAIN

Keep in use

Keep in use and complete the condition record.

A / ADAPT

Low-impact repair

Fire safety, energy, accessibility and open ground floor first.

I / INSERT

Removable trial

Removable elements and short-term use only.

D / INVESTIGATE

Not demolition

Awaits survey, structure, ownership, fire and heritage review.

Twelve reversible scenarios and human takeover

Movement, blue-green ground, human takeover and no-AI equivalents

F / 04

One spine, eight stitch links, twelve takeover points

The smart layer is removable; basic access and human service stay available

MOVEMENT / SERVICE

- Continuous walk-cycle spine
- East-west stitch links (8)
- Blue-green comfort ground
- Human-takeover scenario node (SCN)
- Civic landmark point

A OFFLINE BY DEFAULT

Static signs, light, tactile maps and human help do not rely on a model.

B GRADED TAKEOVER

Low confidence, boundary breach, objection or outage calls the duty person.

C EXIT IS RECORDED

Shutdown cause, deletion and service continuity enter the public logbook.

SECTION The handover section: order and adjacency only, no dimensions

Handover counter	Accessible walk	Takeover Kiosk Zero	Retained track	Machine-only lane	Planting and rest
Walking surface (continuous, no level change) The staffed counter precedes the smart interface and still works once the smart layer is removed	Never interrupted by equipment, advertising, temporary occupation or charging posts	The physical stop control is reachable from the footway without downloading or registering	Set flush in the paving, a trace rather than an obstacle	Separated from walking; crossing the edge stops the machine, safety staff take priority	Non-commercial dwelling; seats and shade carry no spending condition

Adjacency rule: counter, walk and stop control stay continuously reachable; the machine lane never comes between them

Conceptual connectivity, not road redlines or engineering feasibility; lengths calculated in EPSG:4548

JING-ZHANG HANDOVER LINE / PACKAGE v1.15

SCN-01

Model red-team desk

Human review + paper risk log

SCN-02

Robot right-of-way sandbox

Safety staff + physical stop

SCN-03

Edge energy test station

Manual shutdown + offline meter

SCN-04

Data-consent rehearsal

Paper consent + deletion desk

SCN-05

Accessible-route copilot

Tactile map + human direction

SCN-06

Public translation desk

Human desk + multilingual paper

SCN-07

Campus research relay

Human curation + open catalogue

SCN-08

Visible maintenance stop

Phone report + human dispatch

SCN-09

Community care roster

Staff telephone roster

SCN-10

Night-shift safety light

Fixed light + human patrol

SCN-11

Jing-Zhang oral-history booth

Human guide + paper catalogue

SCN-12

Global Handover Week route

Fixed signs + volunteers

F / 05

Known values recalculate; statutory FAR and height remain unknown

RULE CHECK

EVIDENCE CHAIN

JING-ZHANG HANDOVER LINE / PACKAGE v1.15

PHASE 01	Return to baseline: official data, inventory, wayfinding and three low-risk human-led pilots.
PHASE 02	Open-source yard: ground floors, research relay and community service after ownership and community review.
PHASE 03	Belt-wide operation: complex validation networks only after transport, utilities, heritage, privacy and safety conditions.

Unknown by design: FAR, height, ownership, road redlines, utility capacity, investment and output.
