Barrier-Free and Age-Friendly Environment System

Coordinated research approx 43.6 km2 | Overall design approx 11.4 km2 | Key areas approx 368.4 ha (official announcement basis)

All boundaries are provisional concept geometry; concept suggestion, not an official redline; recompute when official data is published

Overall Design Overview (Provisional Concept Geometry)

Coordinated research ~43.6 km2 - Overall design ~11.4 km2 - Key areas ~368.4 ha (official announcement basis)

- Overall design scope (provisional)
- Conceptual green space
- Key areas (3 locations)
- Heritage awareness zone (concept)
- Barrier-free slow-traffic spine (concept)
- East-west stitching links (concept)
- Three nodes (concept locations)

Three scopes (official basis)

Segment size only expresses structural tier
Coordinated research approx 43.6 km2
Overall design approx 11.4 km2
Key areas approx 368.4 ha
This package: sub-scope within overall percentages, classification design barrier-free age-friendly system
land/sea use classification guide; recompute when official data is published.

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE WHEN OFFICIAL DATA IS PUBLISHED

Boundaries on this figure are provisional concept geometry: design intent and spatial relations only; not a redline or area basis; recompute when official geometry is published

This board is a conceptual research expression: it is not an approval basis, redline, area basis or engineering conclusion.

Retain-first renewal; no FAR, building height, demolition or investment figures are preset.

AI scenarios process anonymized aggregates only, with human review of key decisions and no over-surveillance.

Public feedback channels, annual publicity and annual evaluation are conceptual operating mechanisms.

Overall design scope (provisional)

Continuous accessible route - crossing - ramp - rest - shade - information and human service (conceptual interface, not an engineering drawing)

Overall design scope (provisional)

Wu'ai Post: barrier-free slow traffic and transit service node (ramp, inquiry, rest, human service).

Yilao Block: age-friendly community renewal demonstration unit (ramps, lift-feasibility review, wayfinding upgrades).

Zhiban Pavilion: AI-assisted age-friendly public information pavilion (voice interaction, booking, on-device processing).

The three nodes are linked by a continuous accessible slow-traffic spine; all are concept locations and require professional review before implementation.

- Conceptual green space
- Overall design scope (provisional)
- Crossing
- Rest
- Shade
- Information
- Human service
- Three nodes (concept locations)

- Continuous barrier-free system element
- Continuous accessible spine linking 3 nodes
- Step-free rail station link routes
- Age-friendly crossings (curb ramps + signals)
- Rest seats and shade network
- Multilingual / voice wayfinding and signs
- Human service fallback (volunteer duty)
- The slow-traffic spine links the three nodes; crossing / rest / shade / information / human-service points are conceptual suggestions

Land-Use Structure (Conceptual Indication)

CONCEPTUAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE WHEN OFFICIAL DATA IS PUBLISHED

Conceptual land-use structure: no verified percentages are claimed.

Phasing: near 1-3 years | mid 3-5 years | long 5-10 years.

Green ratio and public-space ratio are geometry-derived (low confidence, reduced display precision); recompute when official data is published.

Data layer: anonymized aggregate only - Model layer: human review of key decisions - Scene layer: testable and exitable - no over-surveillance

Five persona groups: entrepreneurs, AI developers, residents, students and senior neighbours (co-creators).

10 scenario cards plus 3 industry test scenarios (concept protocols: users/data/space/model/operator/fallback/metrics/exit).

International communication copy, developer community, open-scene, honors display and component library are concept mechanisms.

PROVISIONAL CONCEPT - NOT AN OFFICIAL REDLINE - RECOMPUTE WHEN OFFICIAL DATA IS PUBLISHED | 临时概念边界 • 非官方红线 • 官方数据发布
