

OPEN THE GROUND WITHOUT SENDING RAIL-CORRIDOR CONFLICT TO PEOPLE

01

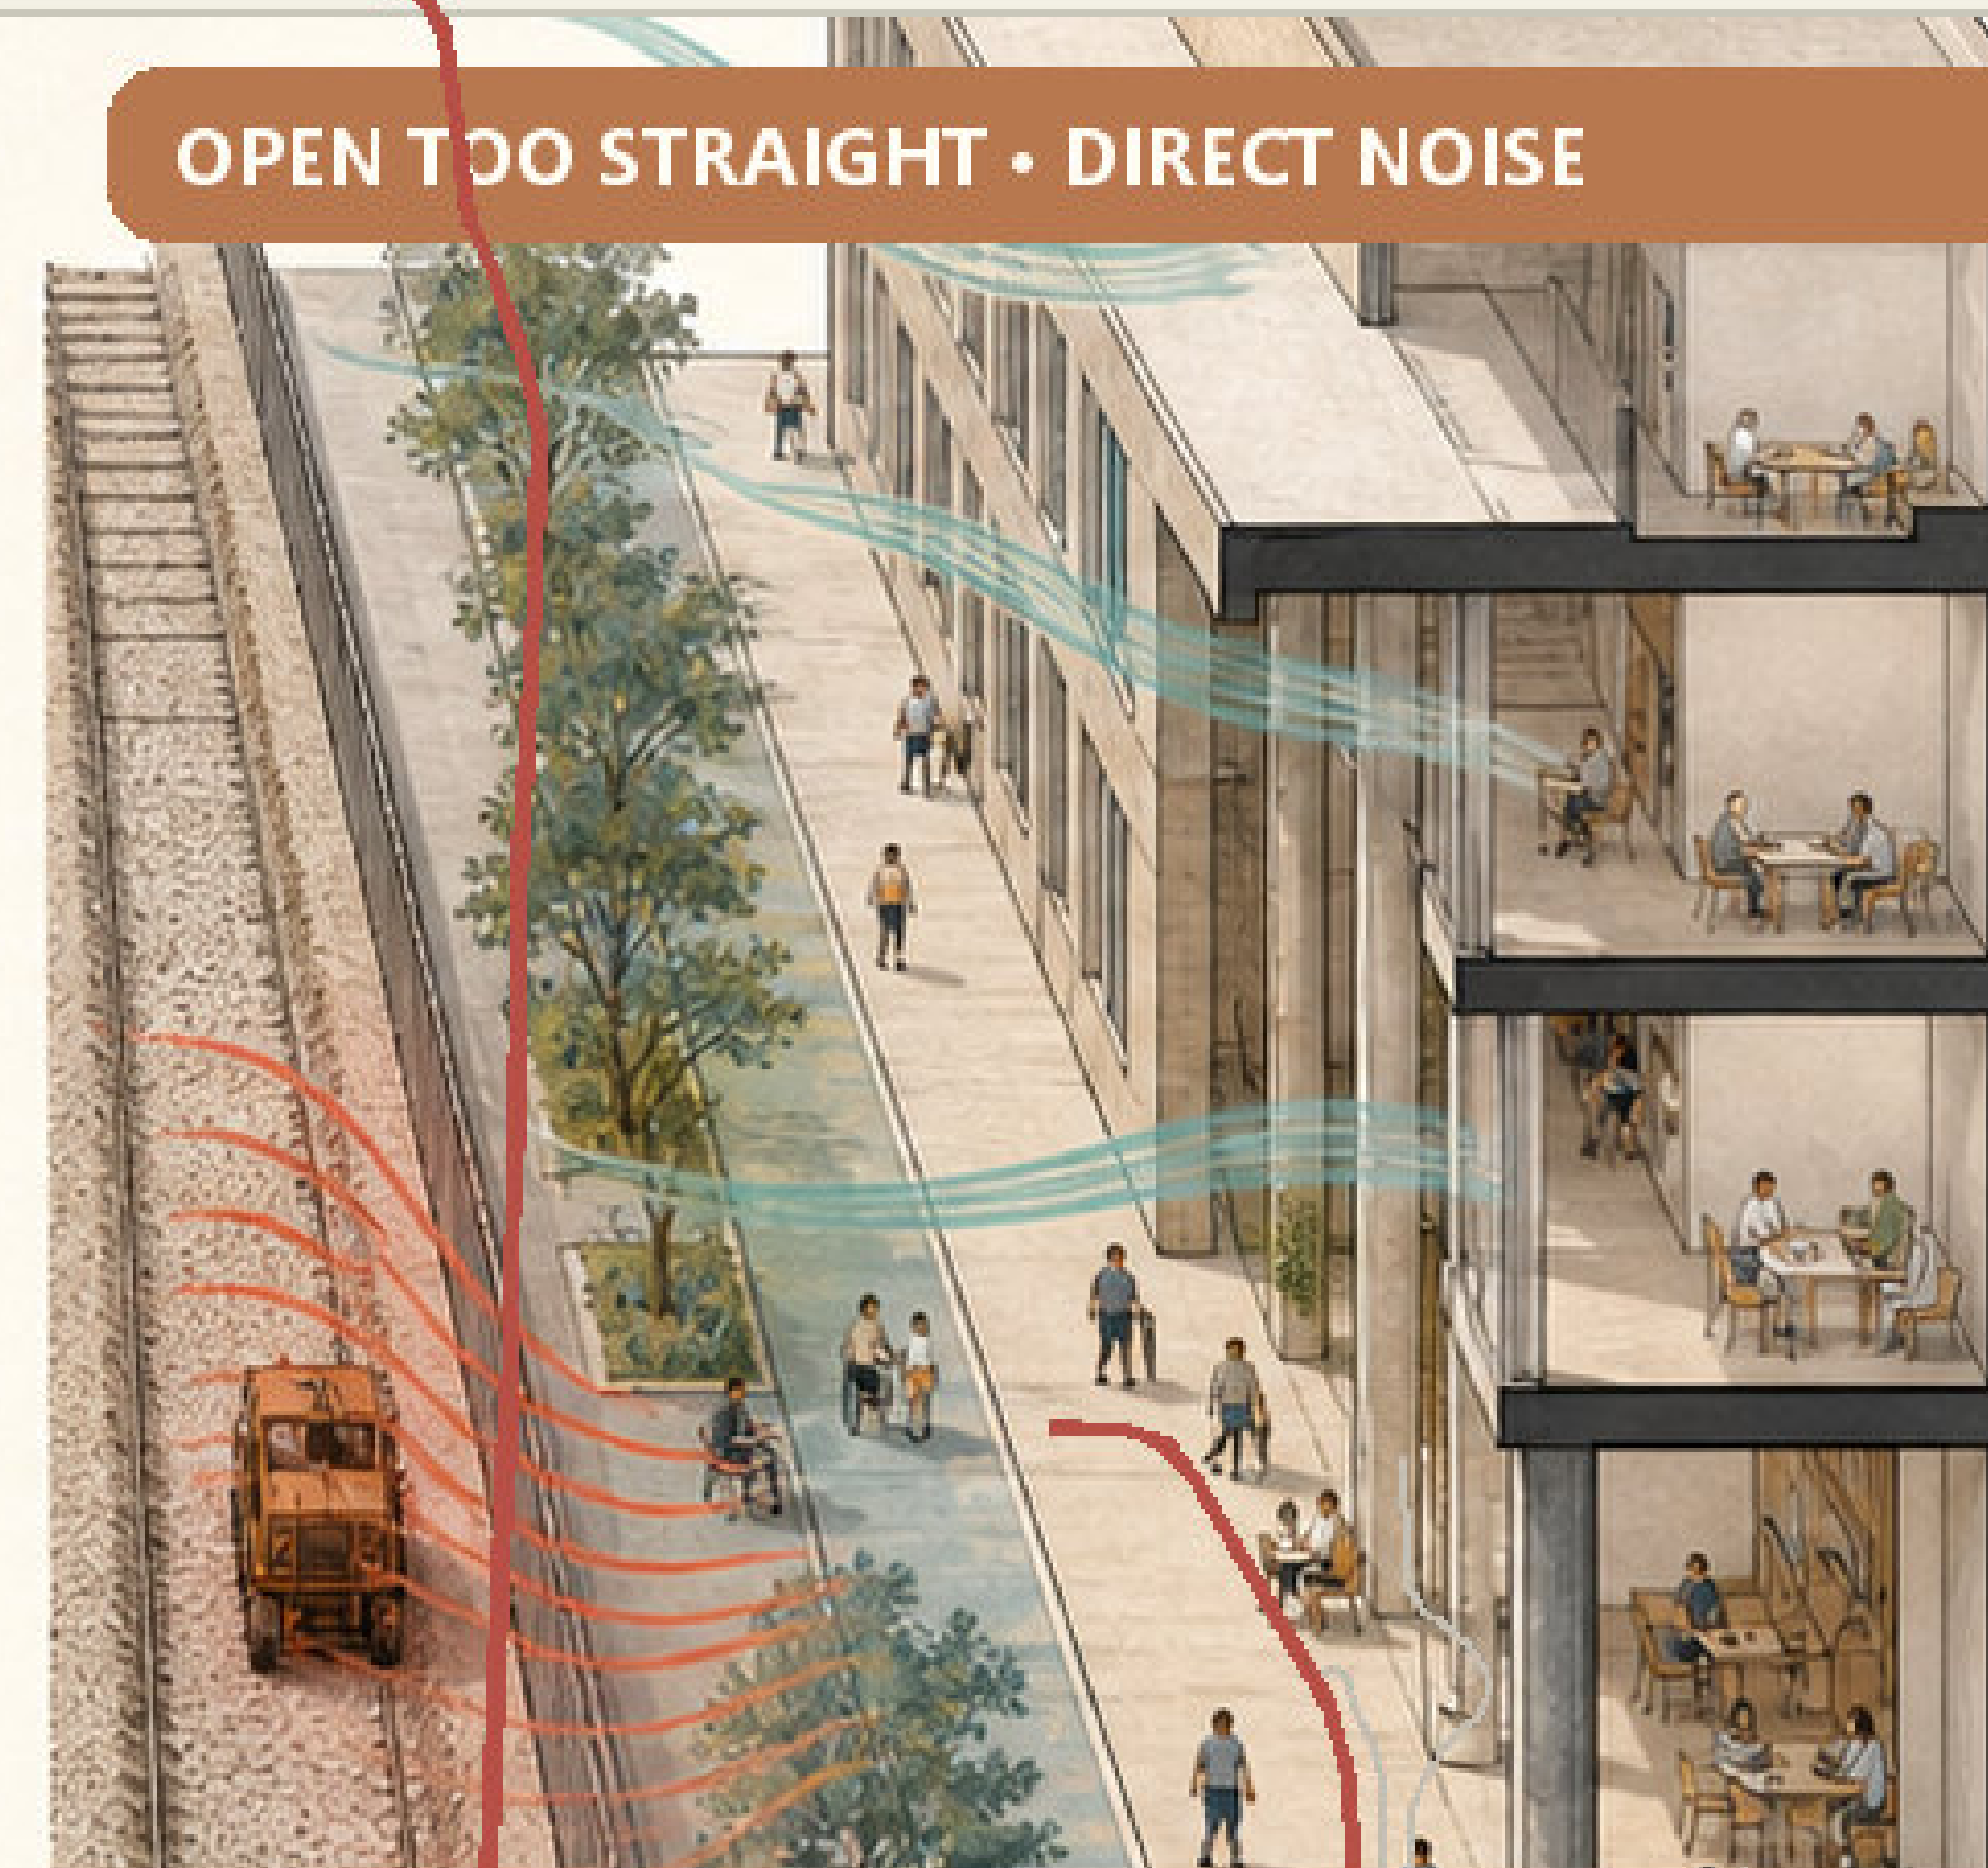

ONE THESIS: EVERY PORE NAMES SOURCE, PATH, RECEIVER, ZERO-POWER STATE, AND REVERSIBLE DUTY

C-I HOLD • E3=E4=0

OPEN TOO LITTLE • EXCHANGE DEFICIT

OPEN TOO STRAIGHT • DIRECT NOISE

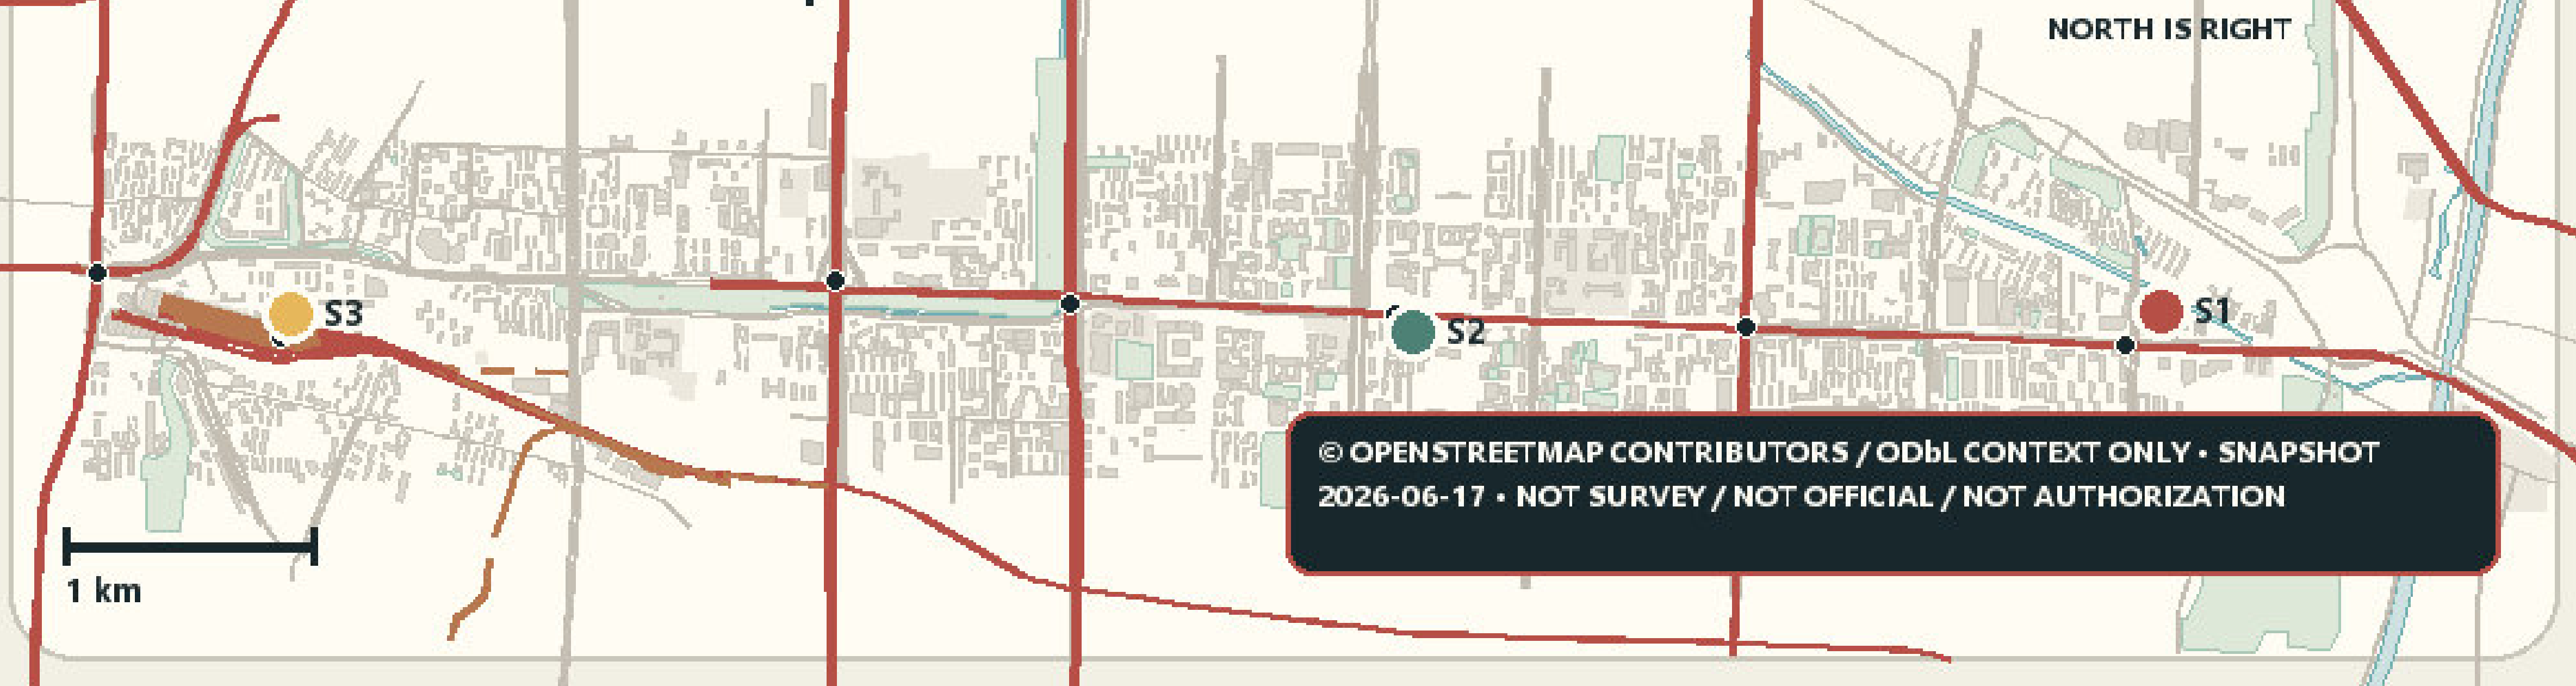

STAGGERED CONTRACT • NO-HARM

E0 • AI-GENERATED CONCEPTUAL ILLUSTRATION — NOT SITE EVIDENCE

RAIL-CORRIDOR CONFLICT | REAL-COORDINATE CONTEXT

© OPENSTREETMAP CONTRIBUTORS / ODbL CONTEXT ONLY • SNAPSHOT
2026-06-17 • NOT SURVEY / NOT OFFICIAL / NOT AUTHORIZATION

CONCEPT SPATIAL CONTRACT • NOT FIELD DATA / STATUTORY CONTROL / ENGINEERING RELEASE

FROM CORRIDOR CONFLICT TO PORE CONTRACT

SOURCE

PATH

RECEIVER

ZERO-POWER

OPENING IS NOT THE GOAL: VERIFIABLE EXCHANGE
WITHOUT RECEIVER HARM IS.

REMOVE

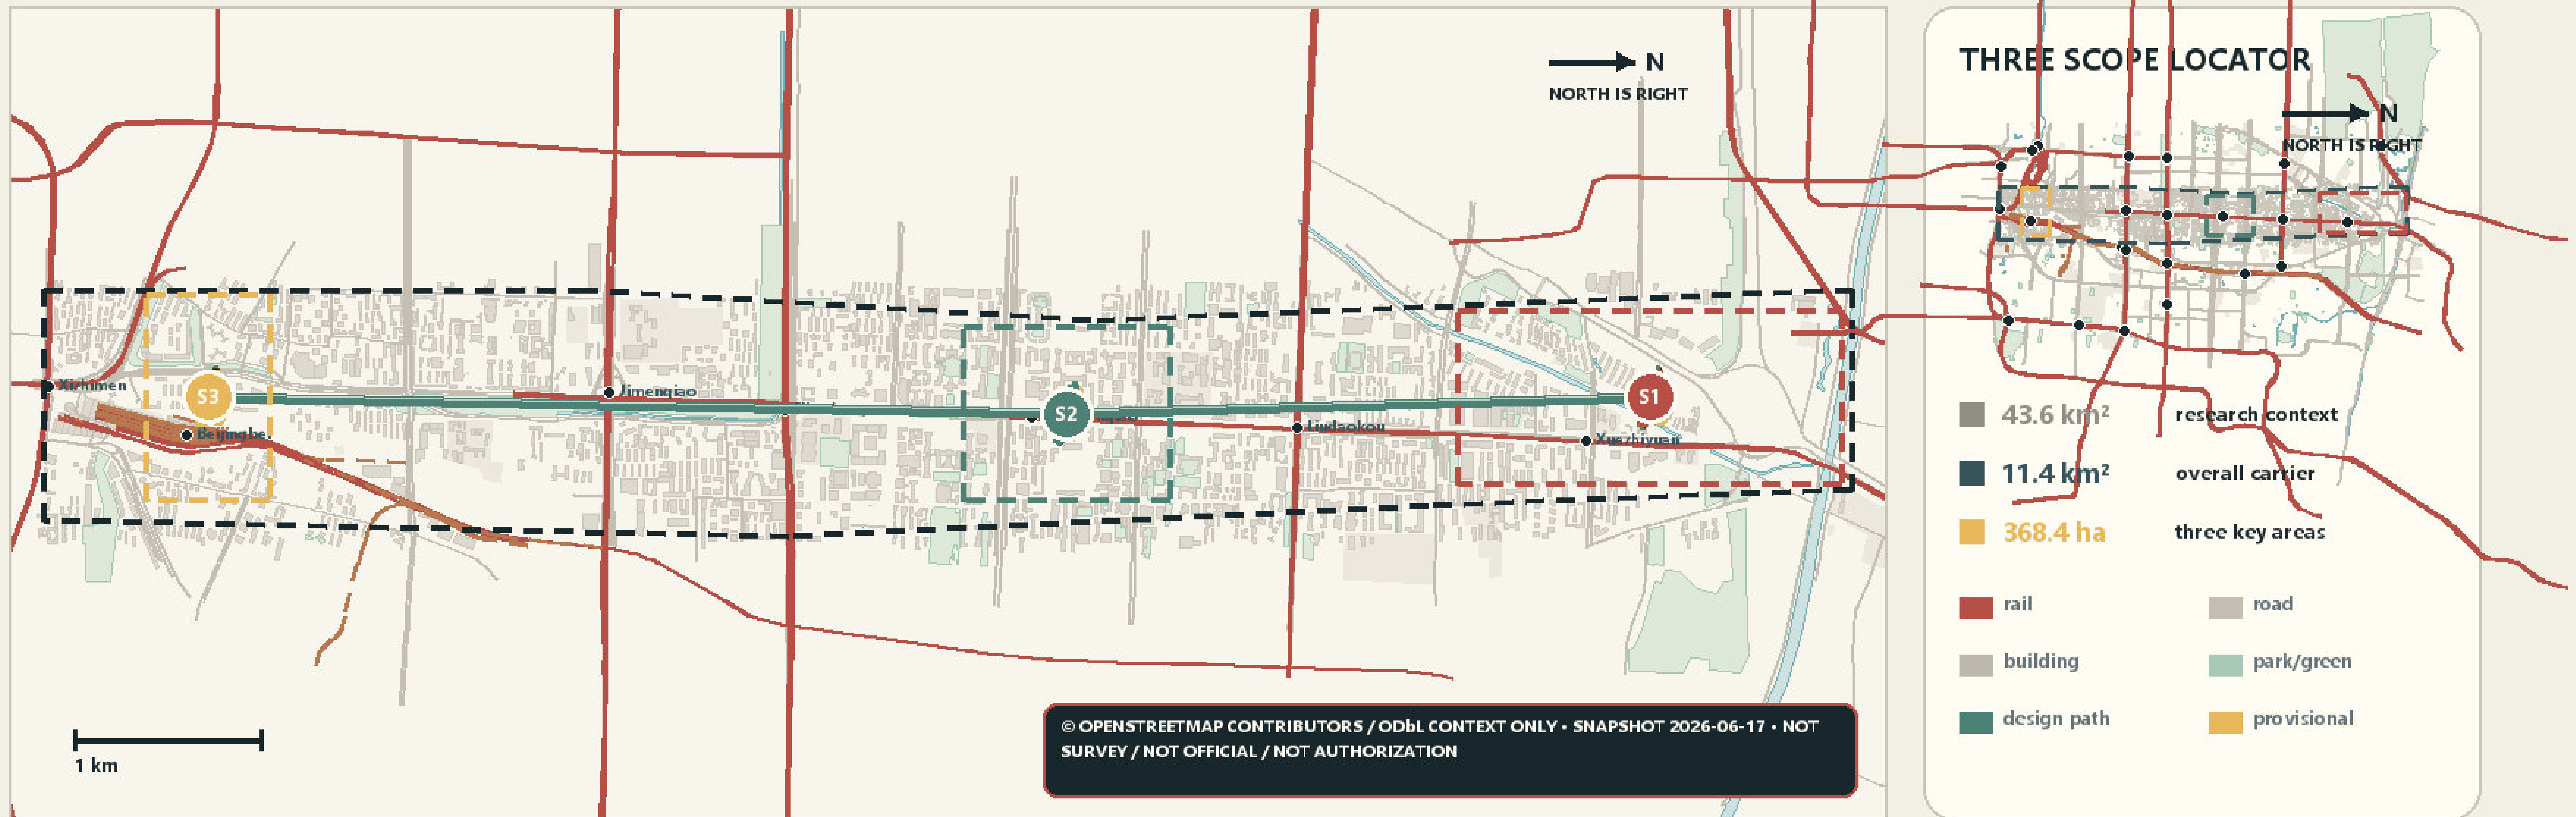

Source: spatial-control contract + gpt-image-2 E0 concept + OSM ODbL context snapshot; no field E3; not current-condition/survey/simulation/construction/approval evidence.

REAL-COORDINATE MASTERPLAN: ONE CORRIDOR, THREE SPATIAL CONTRACTS

02

WGS84 / OSM CONTEXT + PROVISIONAL DESIGN CARRIER; S1-S3 LOCK PLAN, SECTION, AND NODE TO ONE INDEX

C-1 HOLD • E3-E4=0

PLAN—SECTION—NODE CONTINUITY INDEX

S1 Zhongzhiyuan | back-of-house—evidence

PROV-KEY-001 • ROAD-PGC-04

RELATIVE-COORDINATE CONCEPT

TO BOARD 03 • NODE N1

S2 AI Origin | multi-directional crossing—quiet learning edge

PROV-KEY-002 • ROAD-PGC-03

RELATIVE-COORDINATE CONCEPT

TO BOARD 03 • NODE N2

S3 Dazhongsi | UNANCHORED type frame

PROV-KEY-003 • ROAD-PGC-02

TYPE ONLY / UNANCHORED

TO BOARD 03 • NODE N3

TWO WINGS

HAIDIAN NORTH: rules, tool versions, exit assets

NW BEIJING: authorised, minimised, licensed methods only

CONCEPT SPATIAL CONTRACT • NOT FIELD DATA / STATUTORY CONTROL / ENGINEERING RELEASE

Source: nine submitted GeoJSON layers (design/provisional) + public OSM ODbL context; 3,653 OSM features are orientation/section-index evidence only, not survey/official/authorization. Scale uses a local metric approximation.

THREE AREAS ARE NOT COPIES: DISTINCT PLAN, SECTION, AND NODE

03

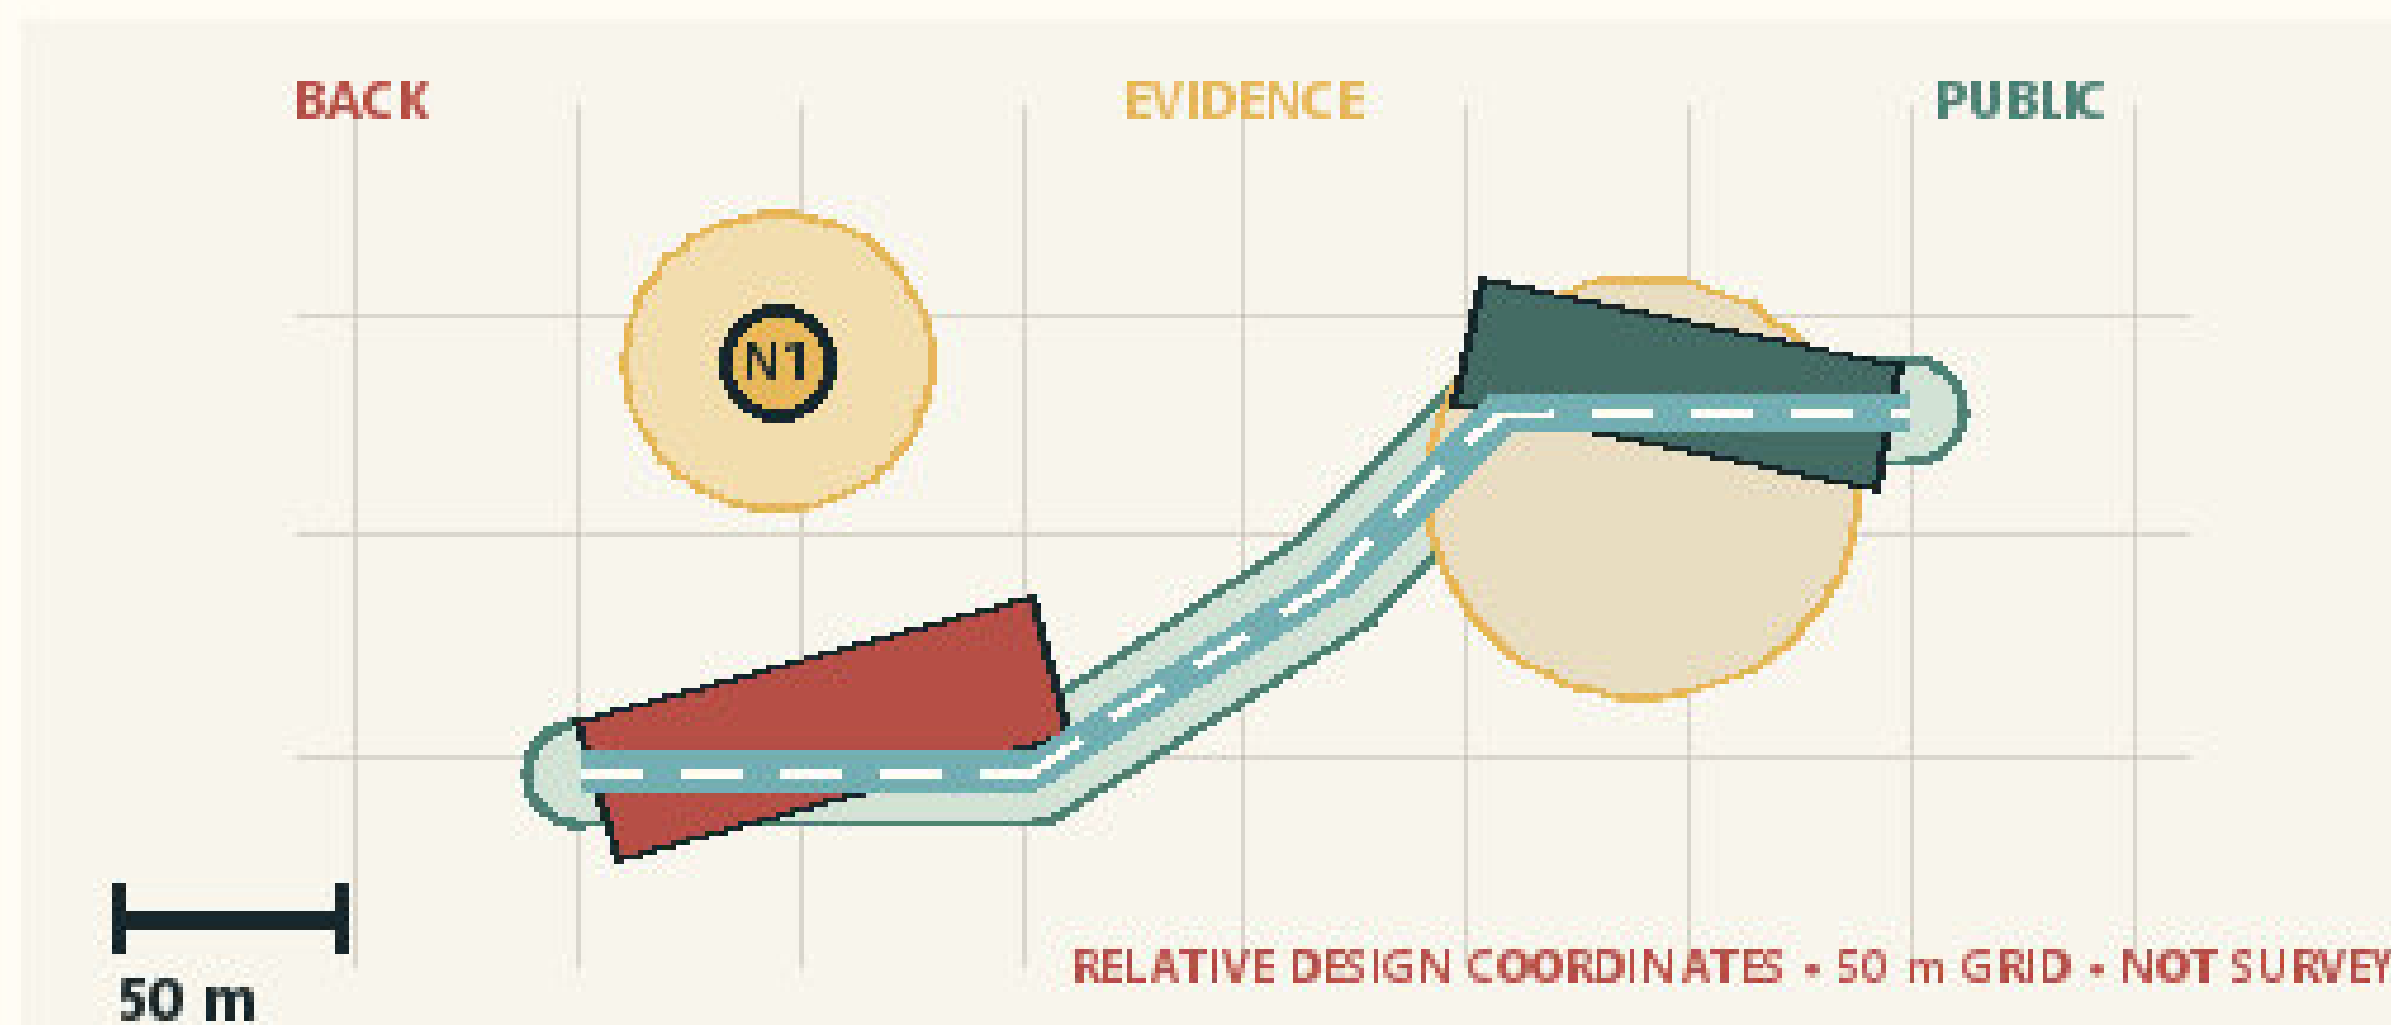

S1 NORTH: BACK—EVIDENCE—FRONT | S2 MIDDLE: MULTI-CROSSING—QUIET LEARNING | S3 SOUTH: UNANCHORED TYPE ONLY

C-I HOLD • E3=E4=0

S1 Zhongzhiyuan | back-of-house—evidence interface—public front

PROV-KEY-001 • ROAD-PGC-04 • PR-NORTH

Relative concept plan: controlled back-of-house to evidence interface to public front

SECTION: SOURCE—PATH—RECEIVER / ZERO-POWER SERVICE REMAINS

Matching section: source—path—receiver layers are not interchangeable

SECTION TYPE SCALE 0 / 2 / 5 / 10 m • PARAMETER ENVELOPE

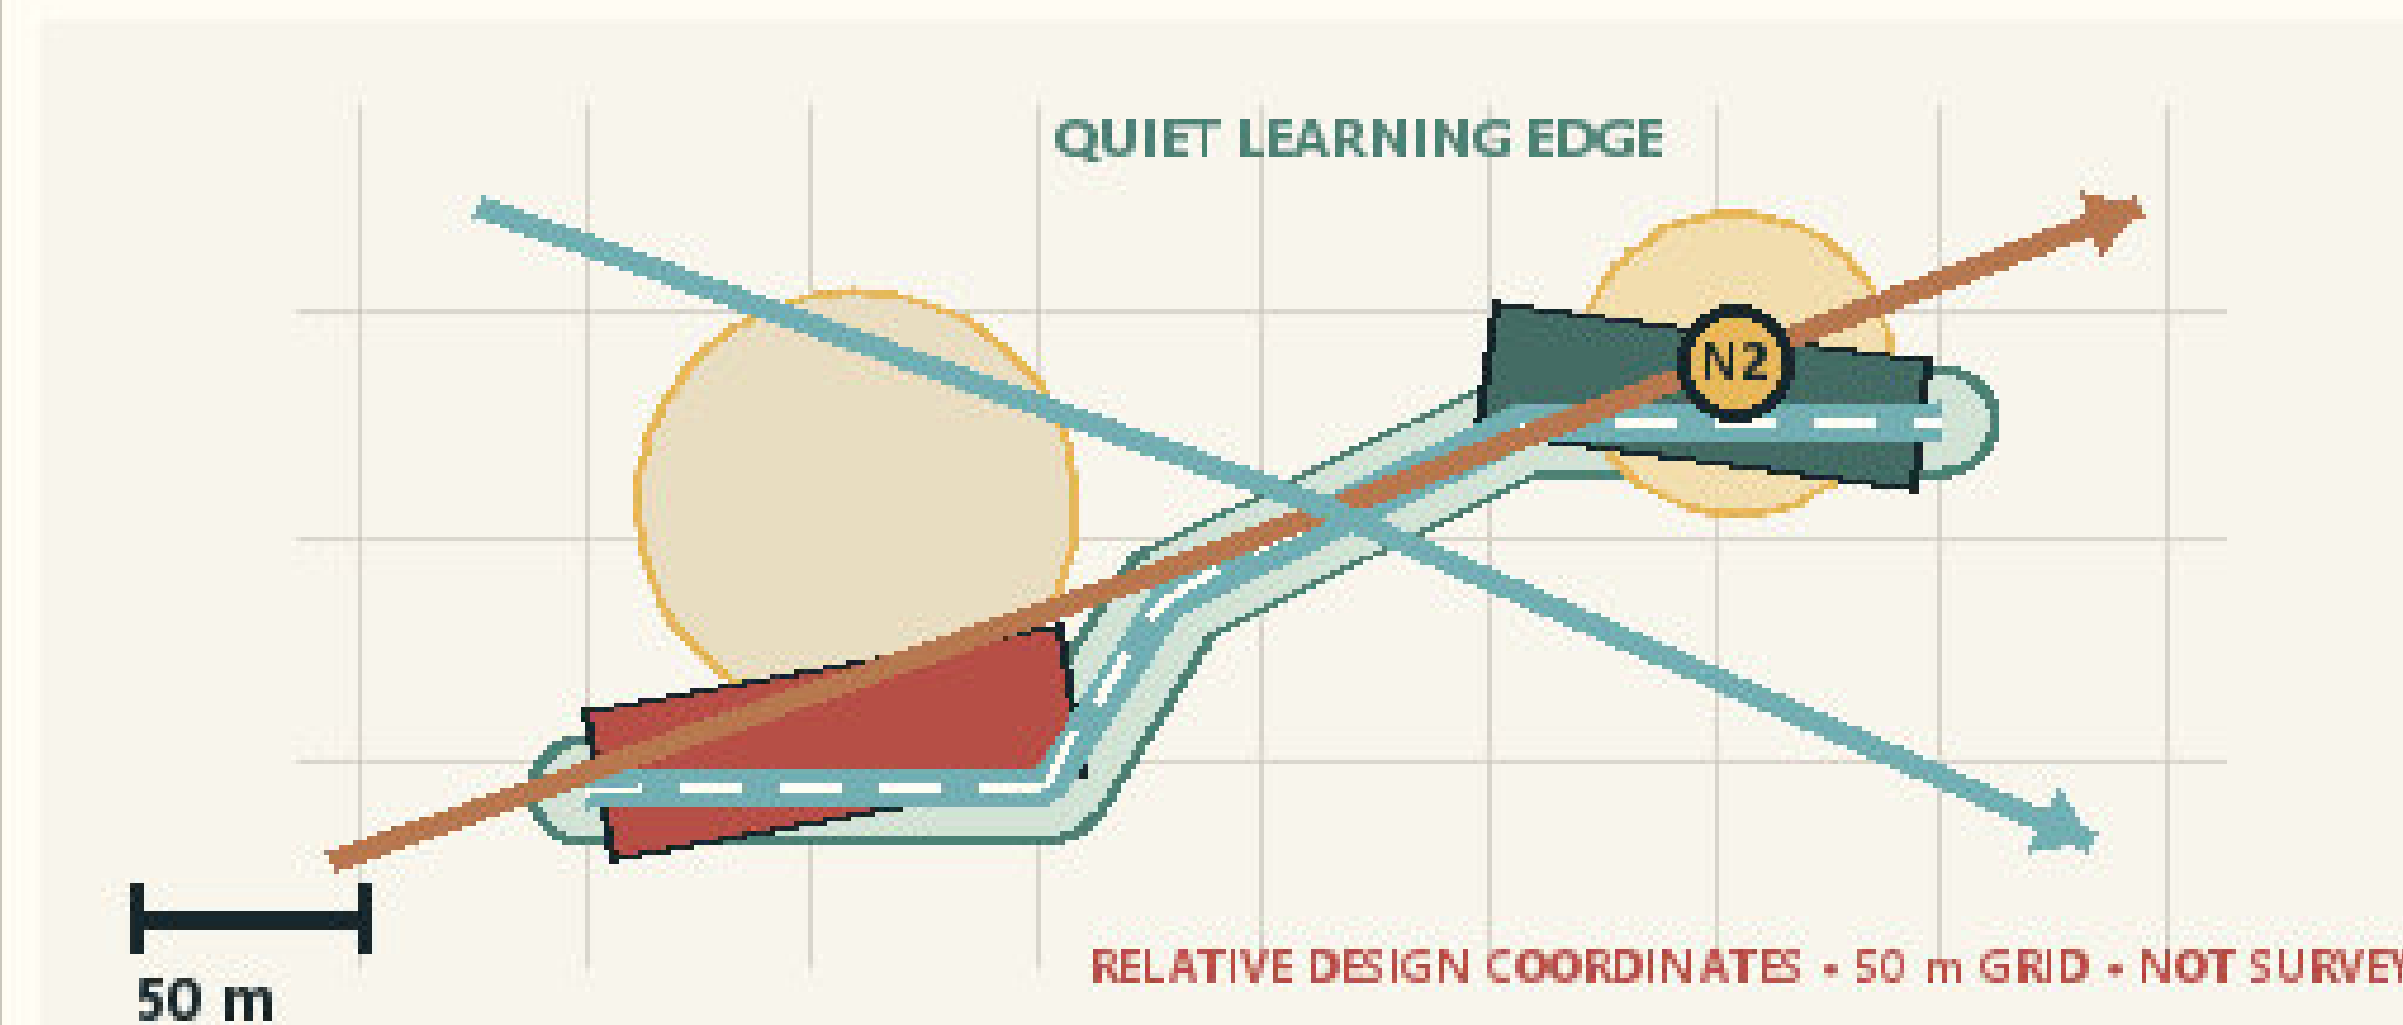

N1 Node N1 | evidence interface: only signed slices may be published

Failure mode: back-of-house noise/access leaks through the public front.

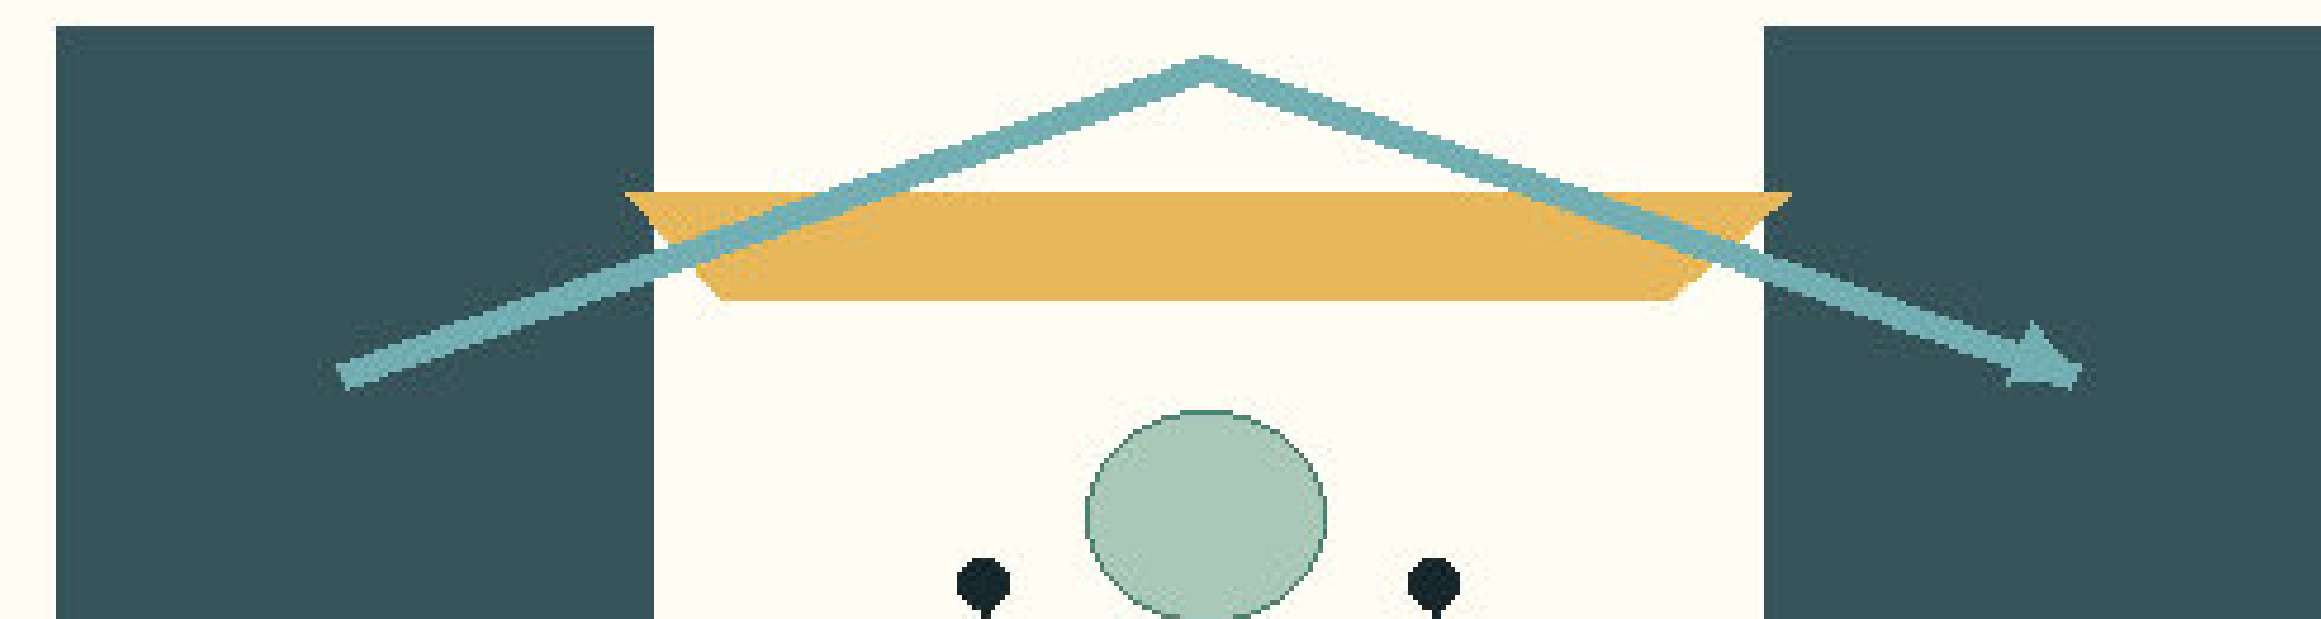

S2 AI Origin | multi-directional crossing—quiet learning edge

PROV-KEY-002 • ROAD-PGC-03 • PR-MIDDLE

Relative concept plan: cross-movement is offset from the quiet learning edge

SECTION: SOURCE—PATH—RECEIVER / ZERO-POWER SERVICE REMAINS

Matching section: shared path stays continuous; setback protects the quiet edge

SECTION TYPE SCALE 0 / 2 / 5 / 10 m • PARAMETER ENVELOPE

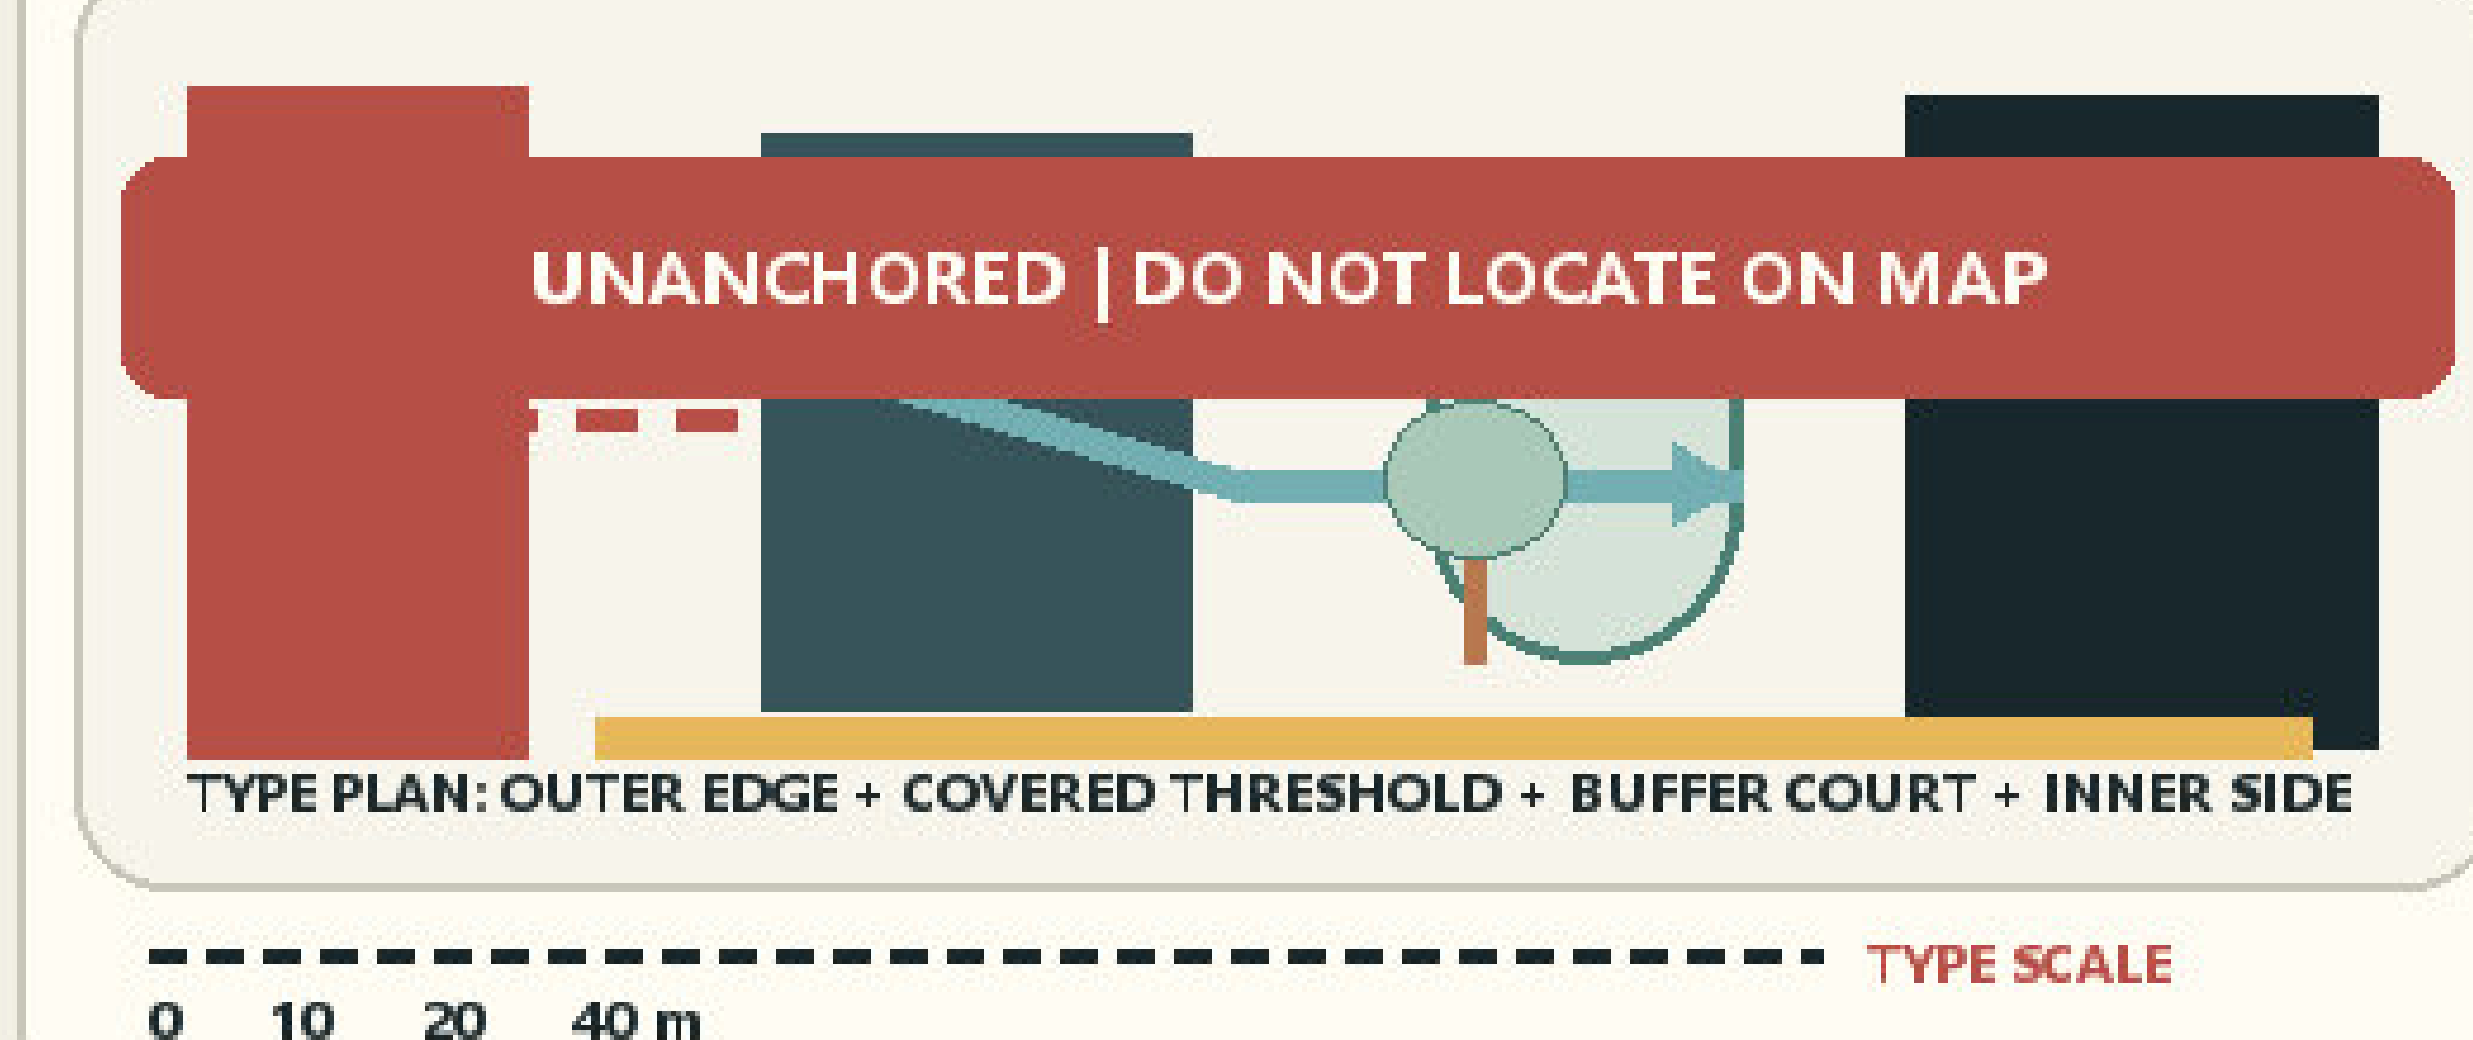

N2 Node N2 | visible learning window: legible without crossing the quiet edge

Failure mode: crossing flows spill into the quiet edge, producing false openness.

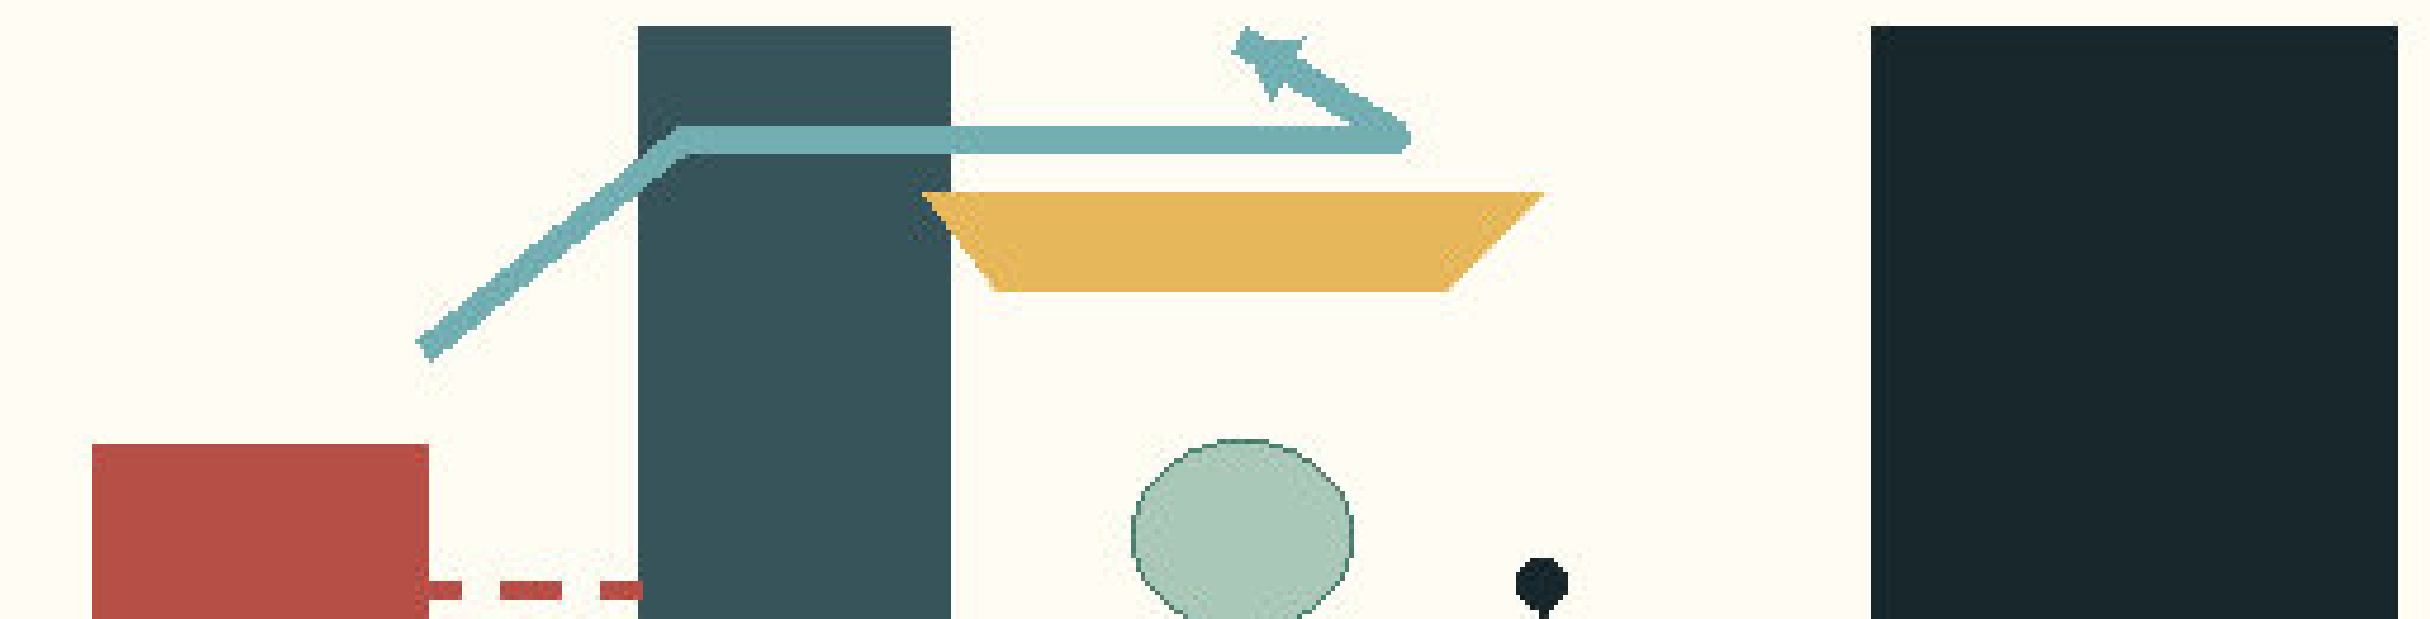

S3 Dazhongsi | UNANCHORED type frame

PROV-KEY-003 • ROAD-PGC-02 • PR-SOUTH

Type plan only: prototype room—removal path—temporary receiving ground

SECTION: SOURCE—PATH—RECEIVER / ZERO-POWER SERVICE REMAINS

Type section: define removability first; await a canonical anchor edge

SECTION TYPE SCALE 0 / 2 / 5 / 10 m • PARAMETER ENVELOPE

N3 Node N3 | mechanical release: no cutting, no burial, verifiable clear-down

Failure mode: a type diagram is mistaken for a located proposal.

ONE SECTION: SEE B1 FIRST, THEN SEE WHAT AI CHANGED

04

SPATIAL DELTA MUST BE VISIBLE; IF NOT BETTER THAN B1, DELETE AI WHILE B1 AND ZERO-POWER SERVICE STAY

C-I HOLD • E3=E4=0

B1

PROFESSIONAL BASELINE

SOURCE **RECEIVER**

B1 already works: source control, staggered pore, continuous shade, quiet-side dwelling.

A*

AI CANDIDATE

SOURCE **RECEIVER**

Candidate moves pore position and shade depth only; receiver, clear width, egress/access gates do not move.

DEL

DELETE AI

SOURCE **RECEIVER**

AI layer disappears; B1 space, KPI, zero-power service, and human duty remain.

SPATIAL DELTA + ABLATION GATE

x_pore	pore position	AI variable / hypothesis
d_shade	shade depth	AI variable / hypothesis
w_clear	continuous clear width	INVARIANT / hard gate
R	receiver position	INVARIANT / protected
E3/E4	field/mock-up evidence	0 / 0

01

FREEZE INPUT/VERSION

02

HELD-OUT TEST VS B1

03

STABLE, EXPLAINABLE, NOT B1-DOMINATED

04

FAIL: DELETE AI, DO NOT MOVE KPI

AI NEVER TRIGGERS CONSTRUCTION, OPENING, SAFETY, RESTORATION, OR C-I STATE TRANSITION.

ALLOW FAILURE • REQUIRE RESTORATION

90-DAY AUTHORITY, COST, EVIDENCE, AND EXIT ASSETS; NO AUTHORITY MEANS NO-GO

05

C-I HOLD • E3=E4=0

PHASE-I-C CANDIDATE | PUBLIC-CONTEXT LOCATOR

Public records only orient a 'Zhichun Rd–North 4th Ring' candidate context; exact section, title, boundary, area, shelter/fire/access conditions await authority and field E3. This is not a pilot location.

NAMED AUTHORITY

- 1 A-OWN site / A-EMG emergency authority: names UNKNOWN
- 2 R-PM pilot / R-OPS operations: names UNKNOWN
- 3 R-DATA steward / A-DES design sign-off: names UNKNOWN
- 4 C-FIRE / C-ACC accessibility / C-ENV acoustics
- 5 I-AUD independent log / I-PUB public notice

UNSIGNED A = NO-GO | AI CANNOT CHANGE STATE

BoQ L0 • QTY/QUOTES UNKNOWN

- | | |
|-------------------------|---------------------------|
| ■ survey/protocol | ■ instruments/co-location |
| ■ reversible components | ■ install/removal |
| ■ daily maintenance | ■ third-party review |
| ■ insurance/notice | ■ restoration reserve |

BEFORE PROCUREMENT: 3 COMPARABLE QUOTES OR LAWFUL BASIS

PHASE-I-C MECHANICAL INTERLOCK / FAIL-SAFE CLEAR

DRAFT SLO: PO ACK 5 min / ESCALATE 15 min; T_clear and restoration time require E4 mock-up, currently UNKNOWN.
