SPATIAL OVERVIEW | PUT AREA CONSTRAINTS BACK INTO THE CITY

MAP 02

Basemap: © OpenStreetMap contributors, Overpass extract 2026-08-11. Provisional extent; not an official redline.

ONE SPINE • THREE YARDS • TWO WINGS • 12 WORKSTATIONS

A corridor located in its real urban fabric

Overall extent

Official text bounds + 11.4 km² constraint

Existing context

Roads, rail, water, parks, stations and campuses

Design overlay

Maker spine, three provisional key areas and cross-links

MAP CROSS-CHECK CORRECTION

The Dazhongsi key area is moved north to the station vicinity. Its ~72 ha area fit remains provisional, not an official polygon.

USE BOUNDARY

- OSM is context only; it does not create an official boundary
- Recompute the full package when official geometry arrives
- Roads and station interfaces still need survey and professional review

Provisional geometry

02
Shared-edge layers

03
Projected recalculation

04
Matrix mapping

05
Bilingual outputs

EXPLICITLY UNKNOWN

FAR, height, density, setbacks, ownership, utilities and rail-safety controls are not filled with plausible guesses.

UPDATE TRIGGERS

Official GIS/CAD, building and heritage survey, road/rail redlines, utilities, seasonal baselines and independent public review.

Every displayed value is reproducible from metrics.json and GeoJSON; unknown controls remain null.

Provisional boundaries only; no statutory-redline or precise Dazhongsi station-interface claim.

MOBILITY • BLUE-GREEN PUBLIC REALM | EMBED MAINTENANCE IN THE REAL NETWORK

MAP 02

Basemap: © OpenStreetMap contributors, Openmap extract 2026-08-11. Provisional extent; not an official redline.

READ CONTEXT BEFORE DRAWING LINKS

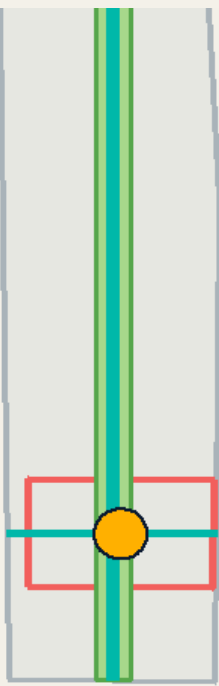

EXISTING ROADS
Low-contrast OSM context; not road redlines.

RAIL & STATIONS
Dazhongli, Wudaokou and Qinghuadongluokou as transfer anchors.

QINGHE & XIAOYUEHE
Public-map context only; official blue lines remain pending.

MAKER SPINE & CROSS-LINKS
Conceptual links; redraw against entrances, breaks, levels and safety.

PROFESSIONAL GATE
Entrances - footfall - accessibility - levels - rail safety - right-of-way

Lines express connectivity—not engineered alignments, transport capacity or confirmed station interfaces.

Public Maintenance Routes

OPEN 01

2026

17.5%
Continuous green spine
Shade, rain gardens, accessible movement and device display

1.98%
Public maker yards
Three visible, optional and human-overrideable shared places

8 FIELDS
Maintenance first
Every device needs a maintainer, spares and retirement route

DATA STILL NEEDED
Road/rail redlines, station interfaces, parking demand, utilities and accessibility baseline.

Conceptual programme partition—not statutory land use, property parcels or road redlines.
