

READ THE CITY: Where Are Problems Robust?

100 m grid + WorldPop + OSM + 5,000 weight samples

01 / SPATIAL STORY

Grow with Jingzhang: one spine, three urban lenses

A 9.7 km green corridor links public services, blue-green systems and daily community life.

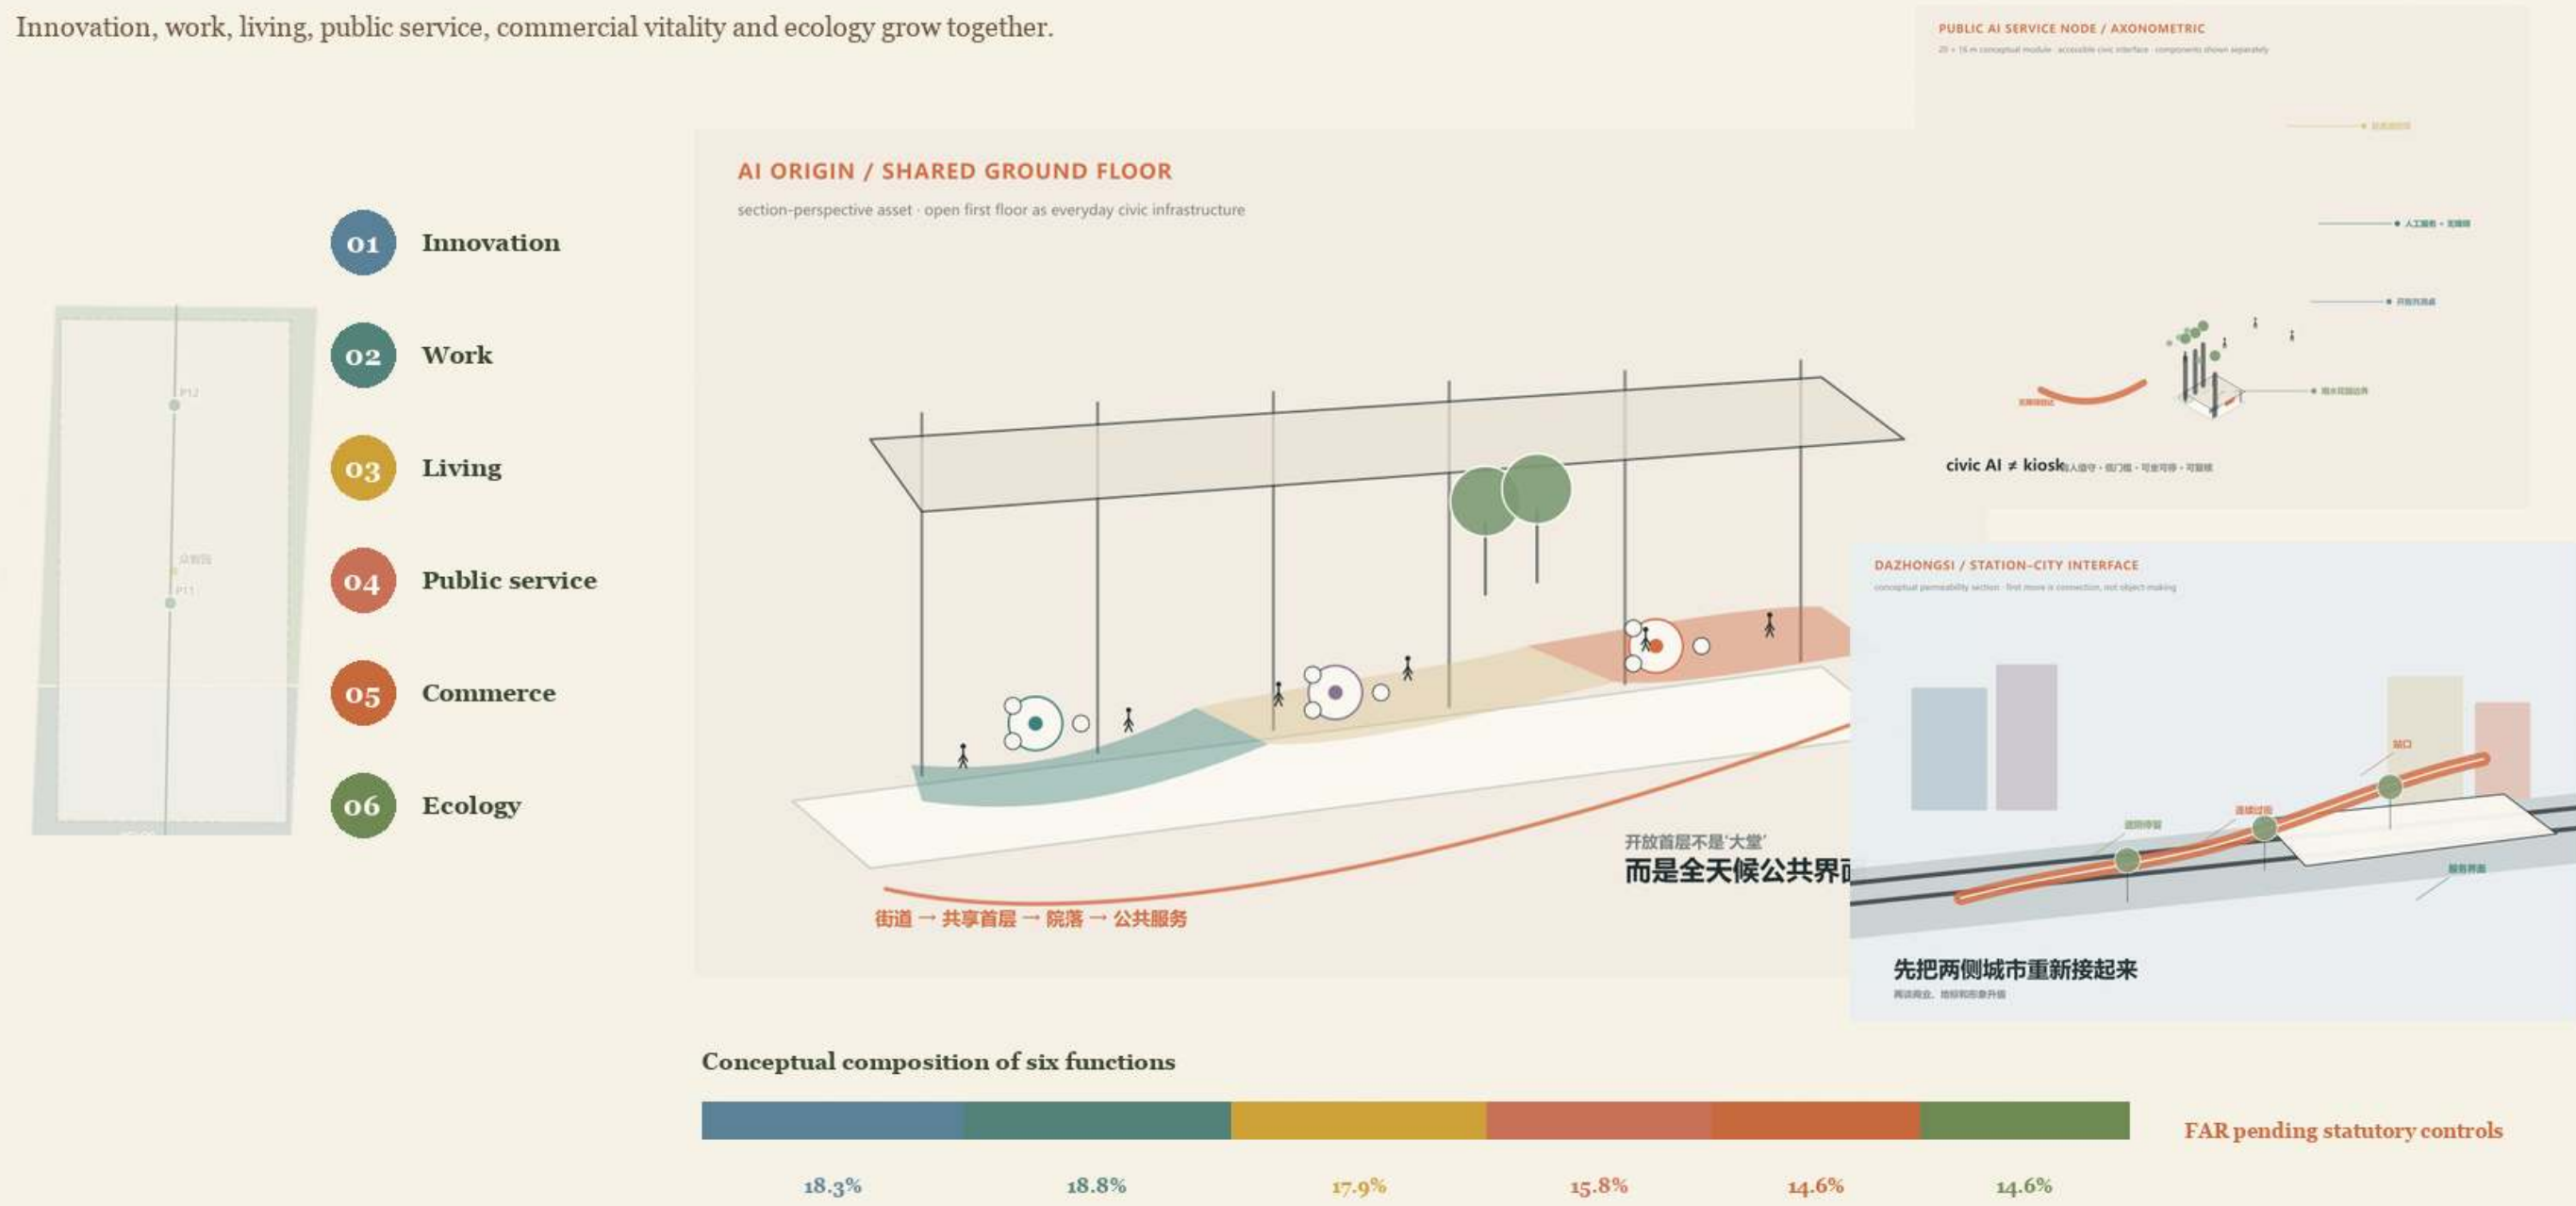

WorldPop + OSM + Sentinel-2 + submitted design geometry; concept renders are illustrative, not approved construction.

02 / MIXED-USE DNA

Six mixed-use functions permeate one urban spine

Innovation, work, living, public service, commercial vitality and ecology grow together.

Conceptual mixed-use structure; not a substitute for statutory land-use, ownership or FAR controls.

05 / EVIDENCE CONTRACT

From baseline to design, impact and acceptance: one evidence chain

Model population, service gaps, robustness and implementation triggers are converted into testable commitments.

Scenario impacts are model/designs audit results, not built outcomes; controls because acceptance evidence only after field verification.

# DESIGN THE BELT: Let Evidence Change Key Areas, Nodes and the Pilot

8 retained + 4 consensus replacements; CORRIDOR-04 lead; different first move in each key area

03 / THREE URBAN CASES

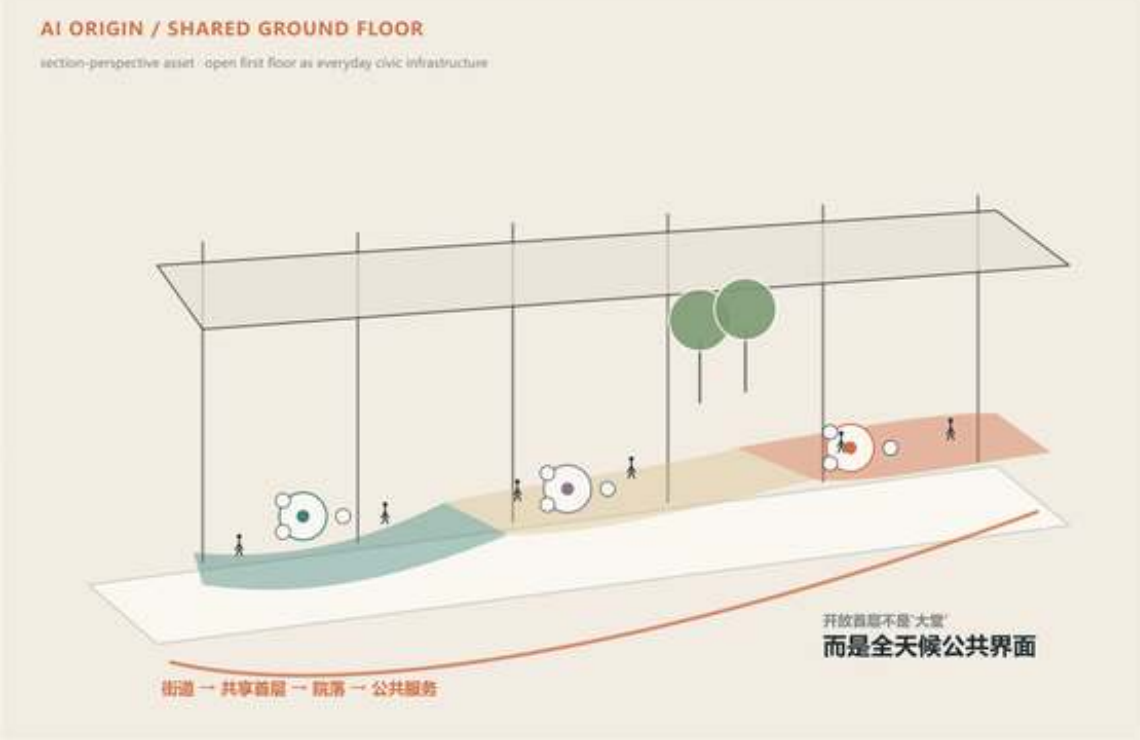

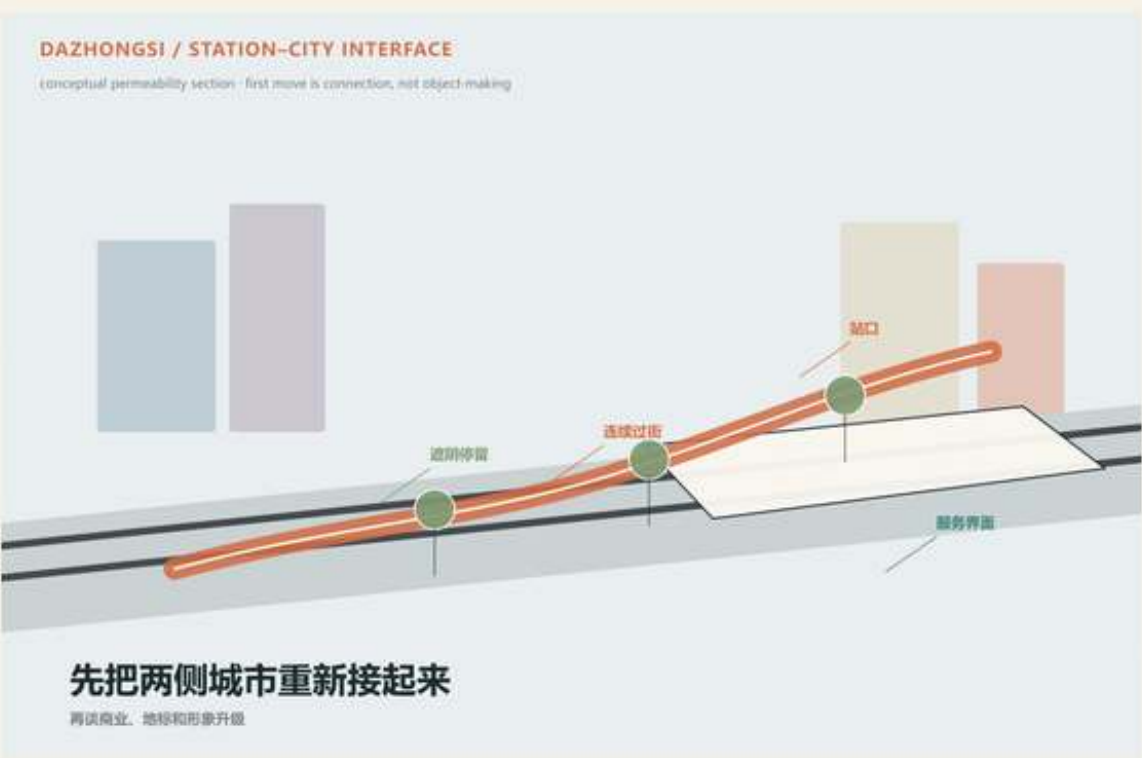

## Three focus areas, three distinct urban prototypes

Industrial memory, co-learning community and ecological garden form three different implementation prototypes.

01 Zhongzhiyuan

02 AI Origin Community

03 Dazhongsi

heritage renewal × mobility

co-learning × shared life

ecological garden × healing

industrial memory + rail connection + public life

knowledge sharing + co-creation + shared community

wetland repair + healing + nature education

Focus-area boundaries are provisional study constraints; accessibility uses OSM walking-network proxies.

04 / CONTINUOUS INFRASTRUCTURE

## Walking, blue-green and climate systems become one living infrastructure

Three continuous systems organise the 9.7 km corridor: active travel, water/ecology and shade/stay.

Walk + cycle

Water + ecology

Shade + stay

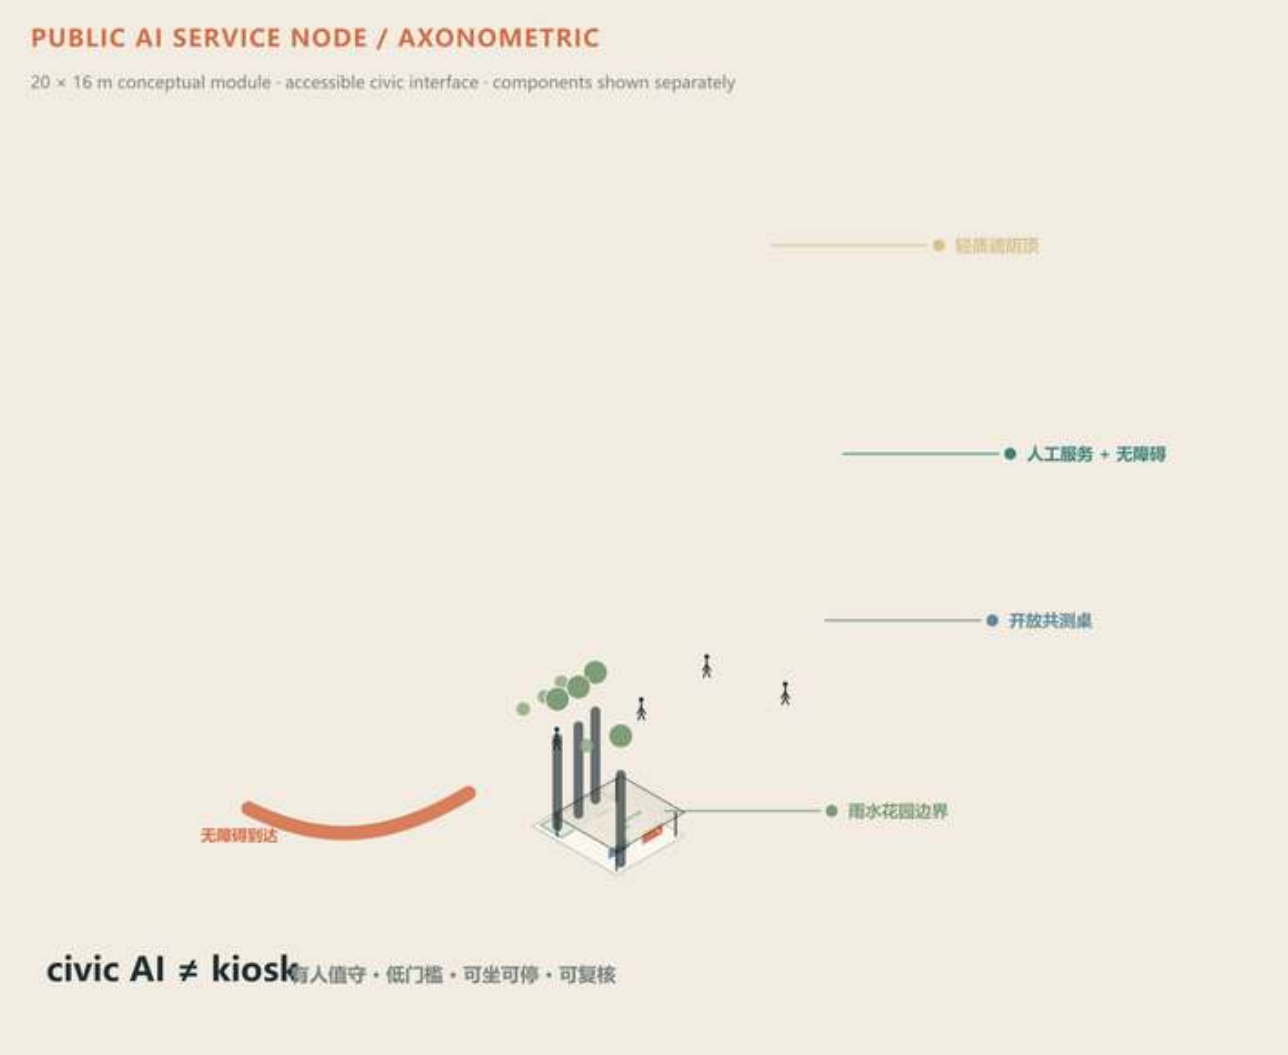

NASA POWER climate baseline + Sentinel-2 vegetation + OSM network; engineering controls require statutory review.

05 / EVIDENCE CONTRACT

## From baseline to design, impact and acceptance: one evidence chain

Model population, service gaps, robustness and implementation triggers are converted into testable commitments.

Sustainable park hub • public AI service node

Scenario impacts are model/designs audit results, not built outcomes; controls become acceptance evidence only after field verification.

192.6k  
model population

61.9%  
Vo gaps coverage

99.86%  
pilot robustness

9  
core KPIs

Implementation triggers - any one may activate

- official redline approved
- road/land corridor confirmed
- utility conditions ready
- rail safety assessment passed
- fire access compliant
- official data refreshed
- site verification completed

# MAKE IT WORK: Turn Concept Design into Reviewable, Reversible Packages

320 m² node modules + 1 km pilot + 0-24 month delivery + AI governance loop

10 / SERVICE NODE GUIDE

### Public-service Node Delivery and Operations Guide

A 320 m² prototype defines site, program, staffing, utilities, acceptance and exit requirements

NODE AXONOMETRIC INTENT | 20 m × 16 m | continuous accessible loop

#### NODE DELIVERY + OPERATIONS

210-400 m² program range | 320 m² prototype

01

FOOTPRINT

320 m²

20 m × 16 m prototype with demountable components  
ACCEPT site and built-area check

02

HUMAN SERVICE

24–36 m²

counter, waiting, storage and staffed position  
ACCEPT hours and staffing roster

03

MICROCLIMATE

≥70%

continuous shade across principal day street  
ACCEPT summer solar study + field audit

04

RESPONSE

60 s / 24 h

human acknowledgement and routine fault logging  
ACCEPT monthly response + work-order log

#### HANDOVER + EXIT MANAGEMENT

- joint utilities, fire access and site permit review
- facility list, duty register and monthly inspection record
- remove equipment if operations lapses retain basic civic amenities

spatial.joon · implementation-operation-contract.joon · generated service-node-axonometric.jpg

node delivery integrates utilities, fire review, accessibility and operating maintenance

10

09 / TYPICAL SECTION

### Typical-section Controls for the Jingzhang Pilot

A 12-m typical section addresses walking gaps, mixed traffic, limited rest and stormwater drainage

PILOT DELIVERY VIEW | accessible walk + rain garden + two-way cycling + human service

#### SECTION CONTROLS + ACCEPTANCE

12.0 m total | four continuous functional bands

01

WALKING

≥3.0 m

continuous clear width, tactile and kerb-ramp links  
ACCEPT field width survey

02

STORMWATER

≥2.5 m

complete inflow, overflow and drainage route  
ACCEPT hydraulic check + flow test

03

CYCLING

≥4.0 m

two-way operation with speed control at crossings  
ACCEPT marking width + conflict review

04

SERVICE EDGE

≥2.5 m

seating, shade and staffed wayfinding  
ACCEPT facility list + access audit

#### DELIVERY INTERFACES

- coordinate rail protection and maintenance access
- integrate street links, utilities and existing trees
- retain physical wayfinding and human service during outages

spatial.joon · generated corridor-section.jpg · Beijing walk/cycle standards

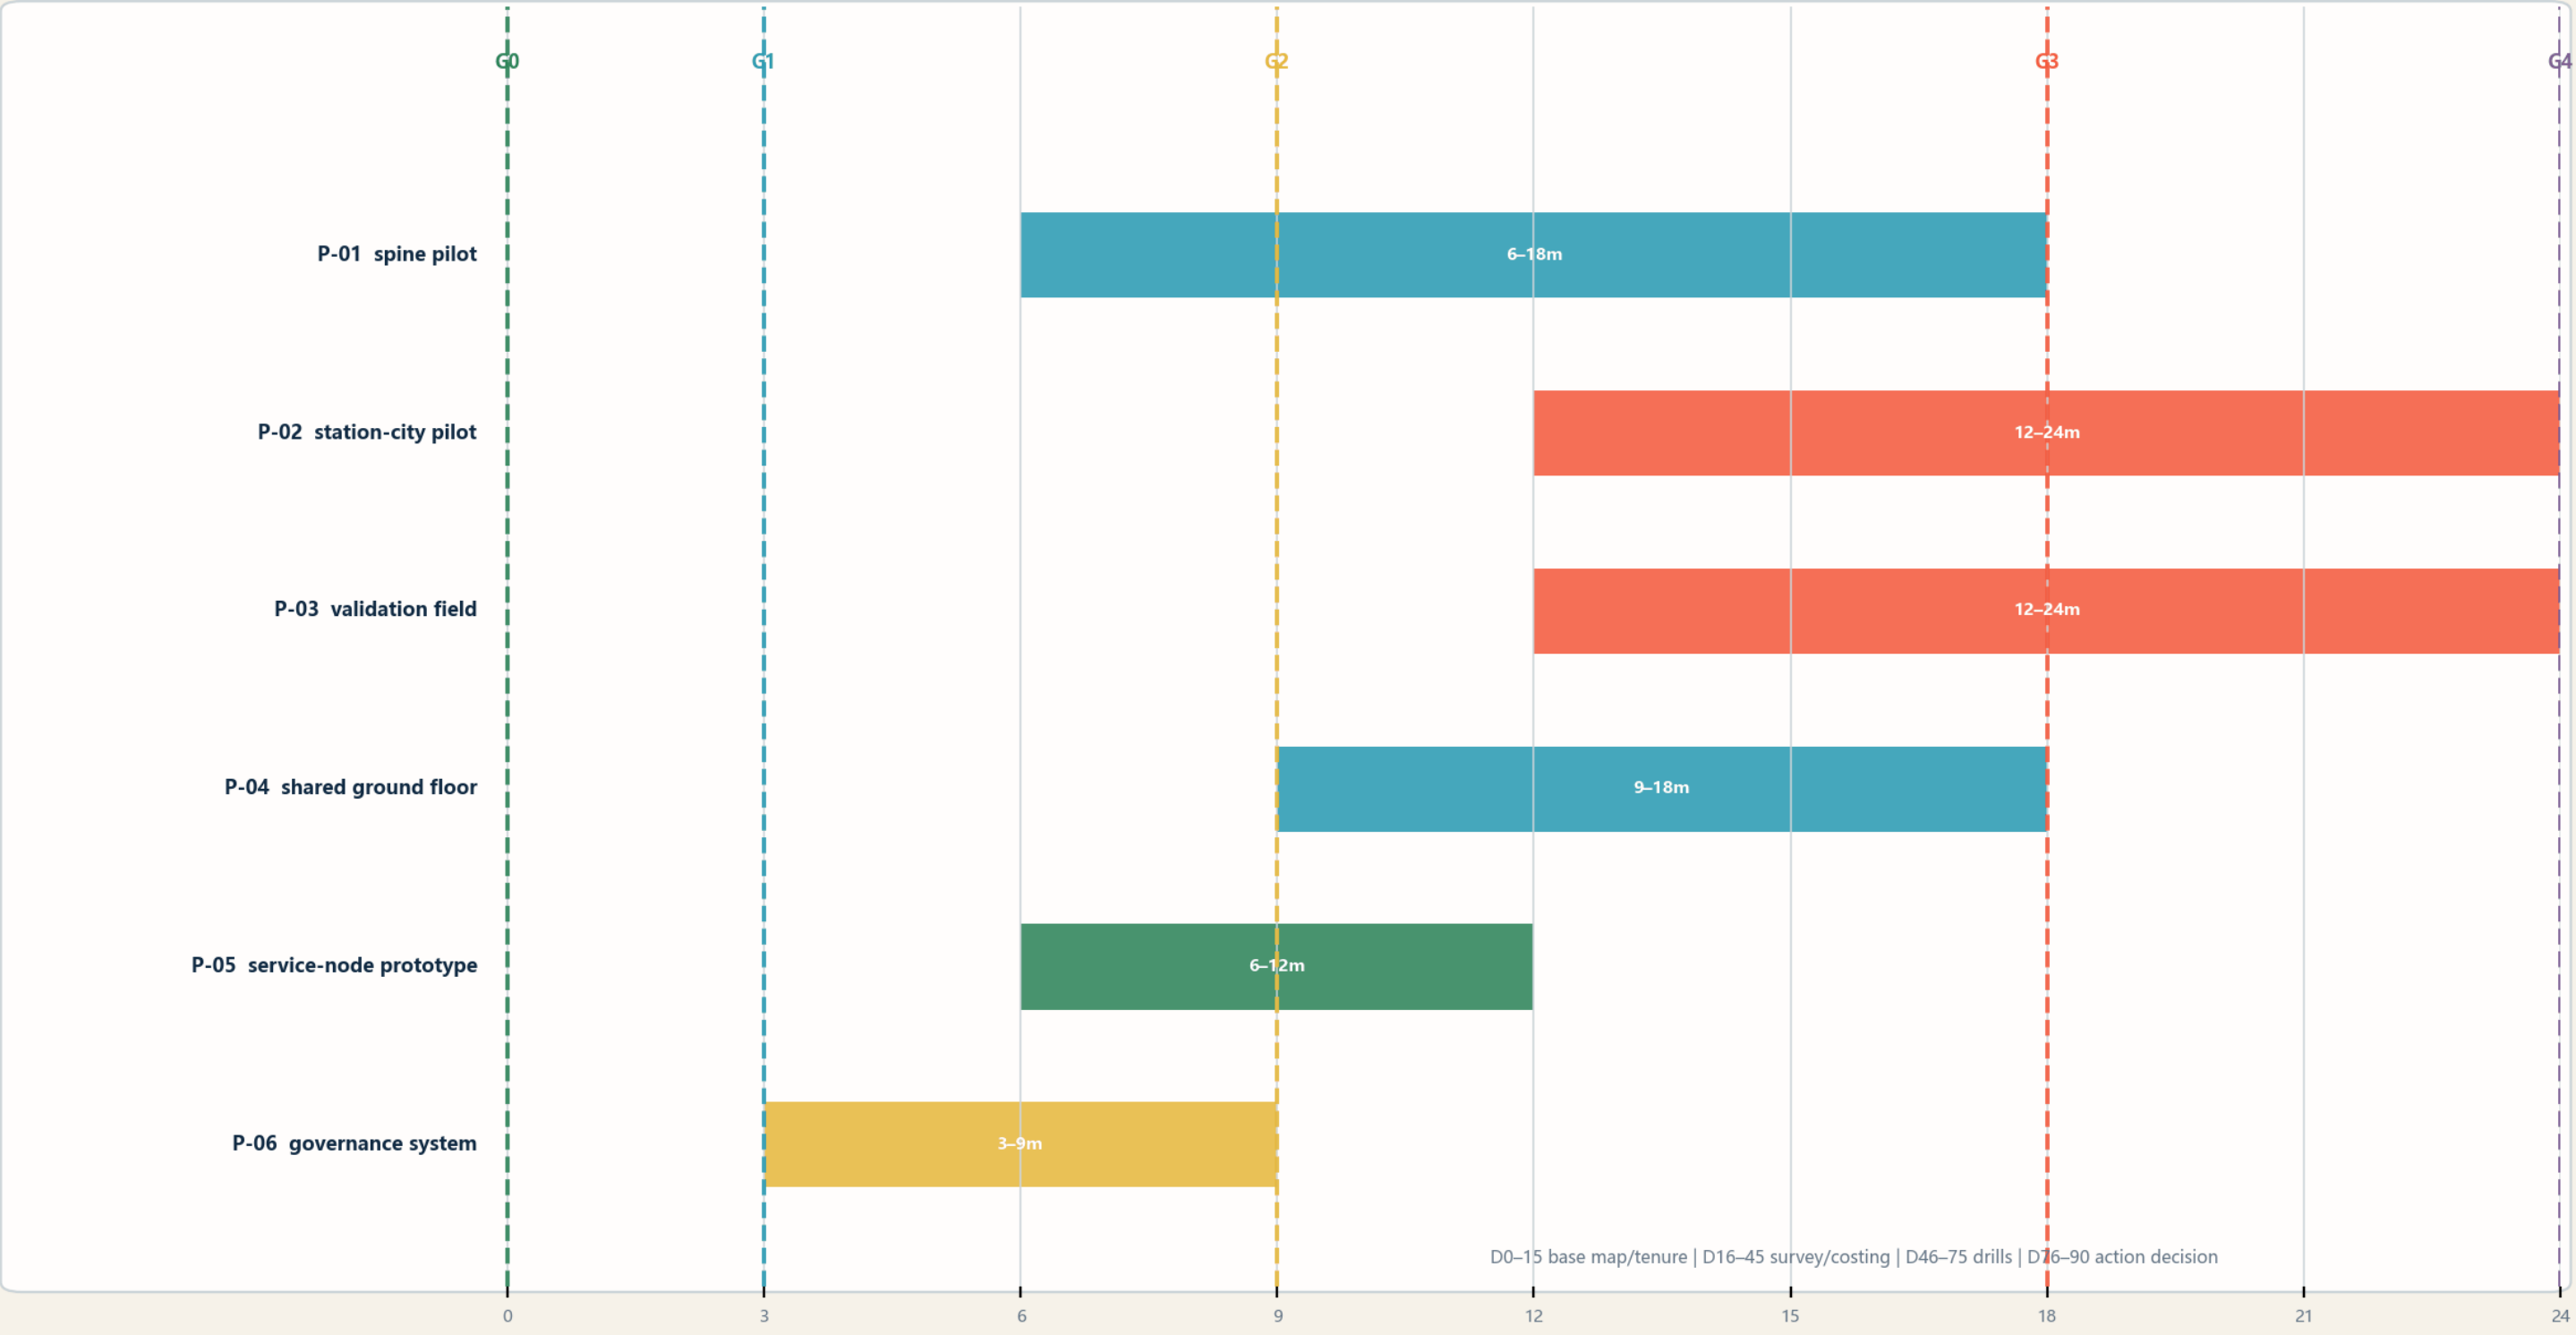

section dimensions are developed with rail safety, street limits, utilities and existing trees

09

13 / PHASED DELIVERY

### Phased Delivery Plan and Annual Evaluation

Complete 90-day preparation, then advance six projects by readiness with monthly scheduling and annual evaluation  
PROPOSED 0-24 MONTH DELIVERY WINDOW

DO-15 base map/tenure | D16-45 survey/costing | D46-75 drills | D86-90 action decision

implementation-operation-contract.joon · user-cohort-plan.joon

delivery sequencing is updated with boundaries, tenure, specialist review and funding

13

06 / SERVICE MANAGEMENT

### Project Review Requirements for Public AI Services

Review accountable owner, human service, data use-stop authority, complaints and annual evaluation for twelve proposed services

12

PROPOSED SERVICES

8

REVIEW CONDITIONS

4

EARLY TRIAL SERVICES

5

MANAGEMENT STAGES

#### TWELVE PROPOSED SERVICES

SERVICE | LOCATION | OWNERS | FIRST | STARTED ROUTE

|     |                                        |                                         |     |                                       |                                         |
|-----|----------------------------------------|-----------------------------------------|-----|---------------------------------------|-----------------------------------------|
| S01 | AI literacy room                       | Daxingmen · named operating body        | S02 | Multilingual Jing-Zhang guide         | central · named operating body          |
| S03 | Youth urban issues studio              | AI Origin · named operating body        | S04 | Learning and career support           | AI Origin · named operating body        |
| S05 | Intergenerational digital service desk | senior residents · named operating body | S06 | Accessible-route co-mapping           | senior residents · named operating body |
| S07 | Child-safe dialogue evaluation         | Zhongguoyuan · named operating body     | S08 | Low-speed robot route test            | Zhongguoyuan · named operating body     |
| S09 | Privacy-preserving learning tool test  | AI Origin · named operating body        | S10 | Edge-office and energy test           | Zhongguoyuan · named operating body     |
| S11 | Facility maintenance training          | Zhongguoyuan · named operating body     | S12 | AI service notice and public feedback | 3 districts · named operating body      |

#### APPLICATION REVIEW

- owner + funding
- staffed or physical route
- necessary data + retention
- personal-data protection
- fault switching + emergency
- stop + termination authority
- fees, status + complaint notice
- records + annual review

APPLICATION

JOINT REVIEW

TRIAL OPERATION

HANDOVER

ANNUAL REVIEW

project brief

review options

action list

handover record

adjustment list

growth-runbook.joon · implementation-operation-contract.joon

review records feed project initiation, trial operation, handover and annual review

06

Scenario impacts are not built-performance commitments; annual review and re-selection triggers remain explicit

# CULTURE, GOVERNANCE & OPERATIONS Support Long-term Urban Life

Competition tasks remain complete but are separated from existing-condition spatial evidence

14 / PUBLIC IDENTITY

## Public-space Identity and Wayfinding Guidelines

A three-level system coordinates corridor gateways, direction signs and service confirmation

### HIERARCHY + APPLICATION

A continuous, legible and all-age public information system

#### L1 | CORRIDOR GATEWAY

All district entrances and station-city interfaces, show identity and overall direction

#### L2 | DIRECTION SIGN

At major decision, show destination, distance, accessible route and street change

#### L3 | SERVICE CONFIRMATION

All service nodes, show hours, human scale, safety and feedback route

### INFORMATION + MAINTENANCE

Separate project identity from government entities and maintain a clear information boundary

Every AI service point includes a human service sign and non-digital access instructions

Card marks day, service space and stop information, may not carry report notice messages

Inspect monthly (create and publish a notice-lead work order within 12 hours)

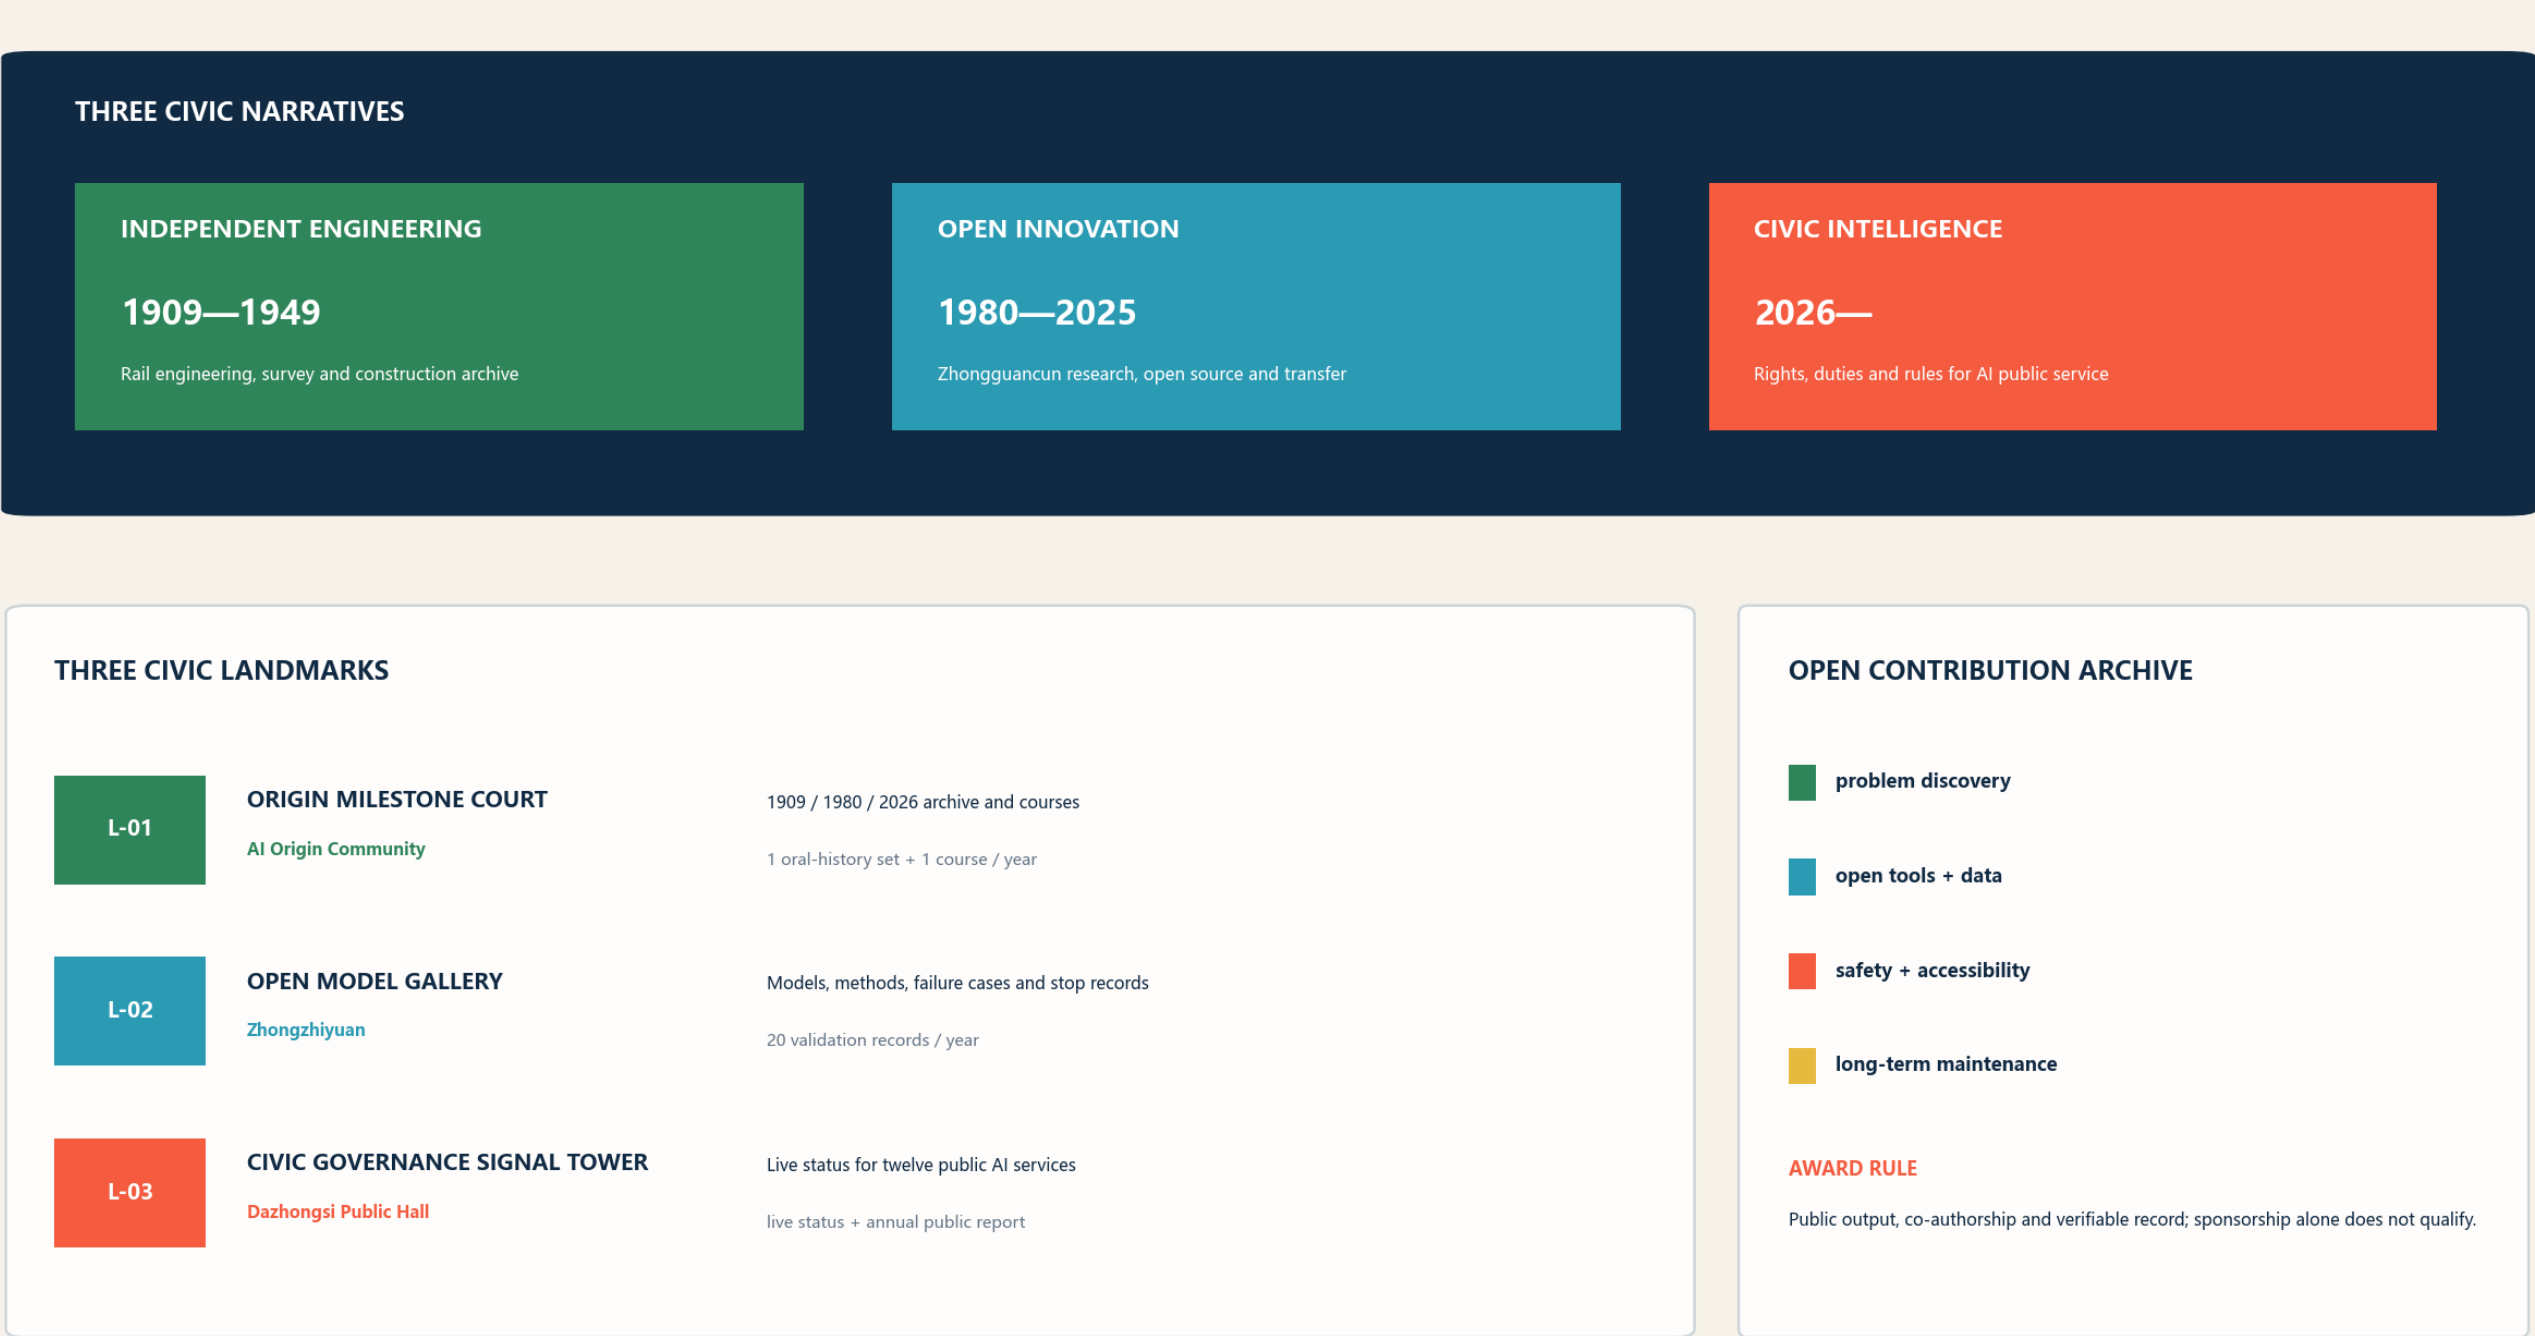

public identity is designed, installed and maintained through the delivery program

14

17 / CULTURE + LANDMARKS

## Cultural Narrative, Civic Landmarks and Recognition

Three narratives become everyday civic facilities; contributions receive annual review

landmarks combine access, rest, learning, wayfinding and staffed service

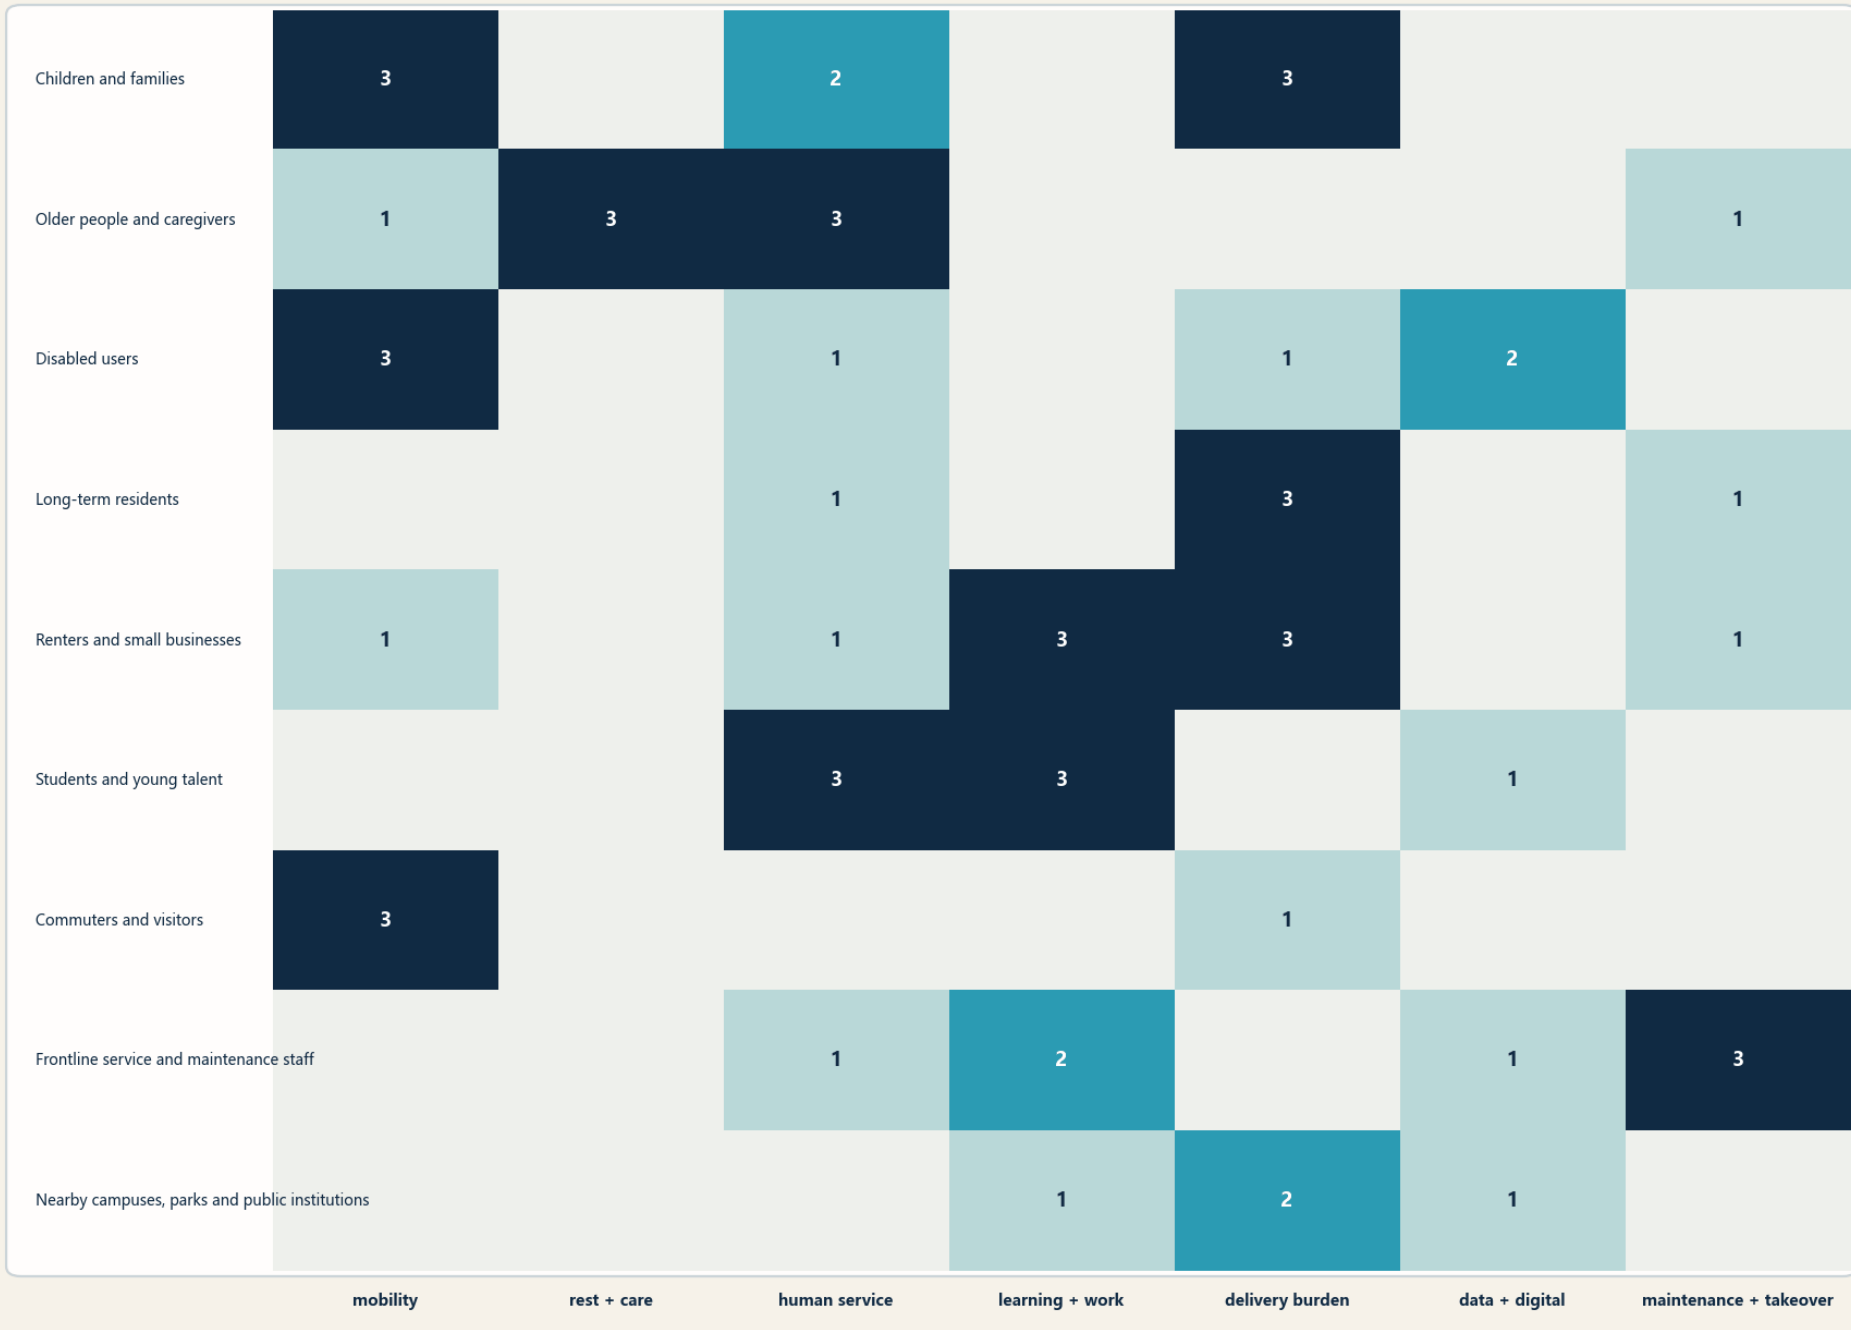

17

07 / INCLUSIVE SERVICES

## Priority-user Needs and Project Rectification List

Complete priority user walk-throughs before initiation and record issues, rectification duties and responses

REGISTERED USER ISSUES 0-3

### SURVEY + ACTION ARRANGEMENT

9类

priority user groups

6项

participation steps

1套

rectification register

Coverage is calculated after population, employment and time-of-day flow baseline; current action follows group issue list.

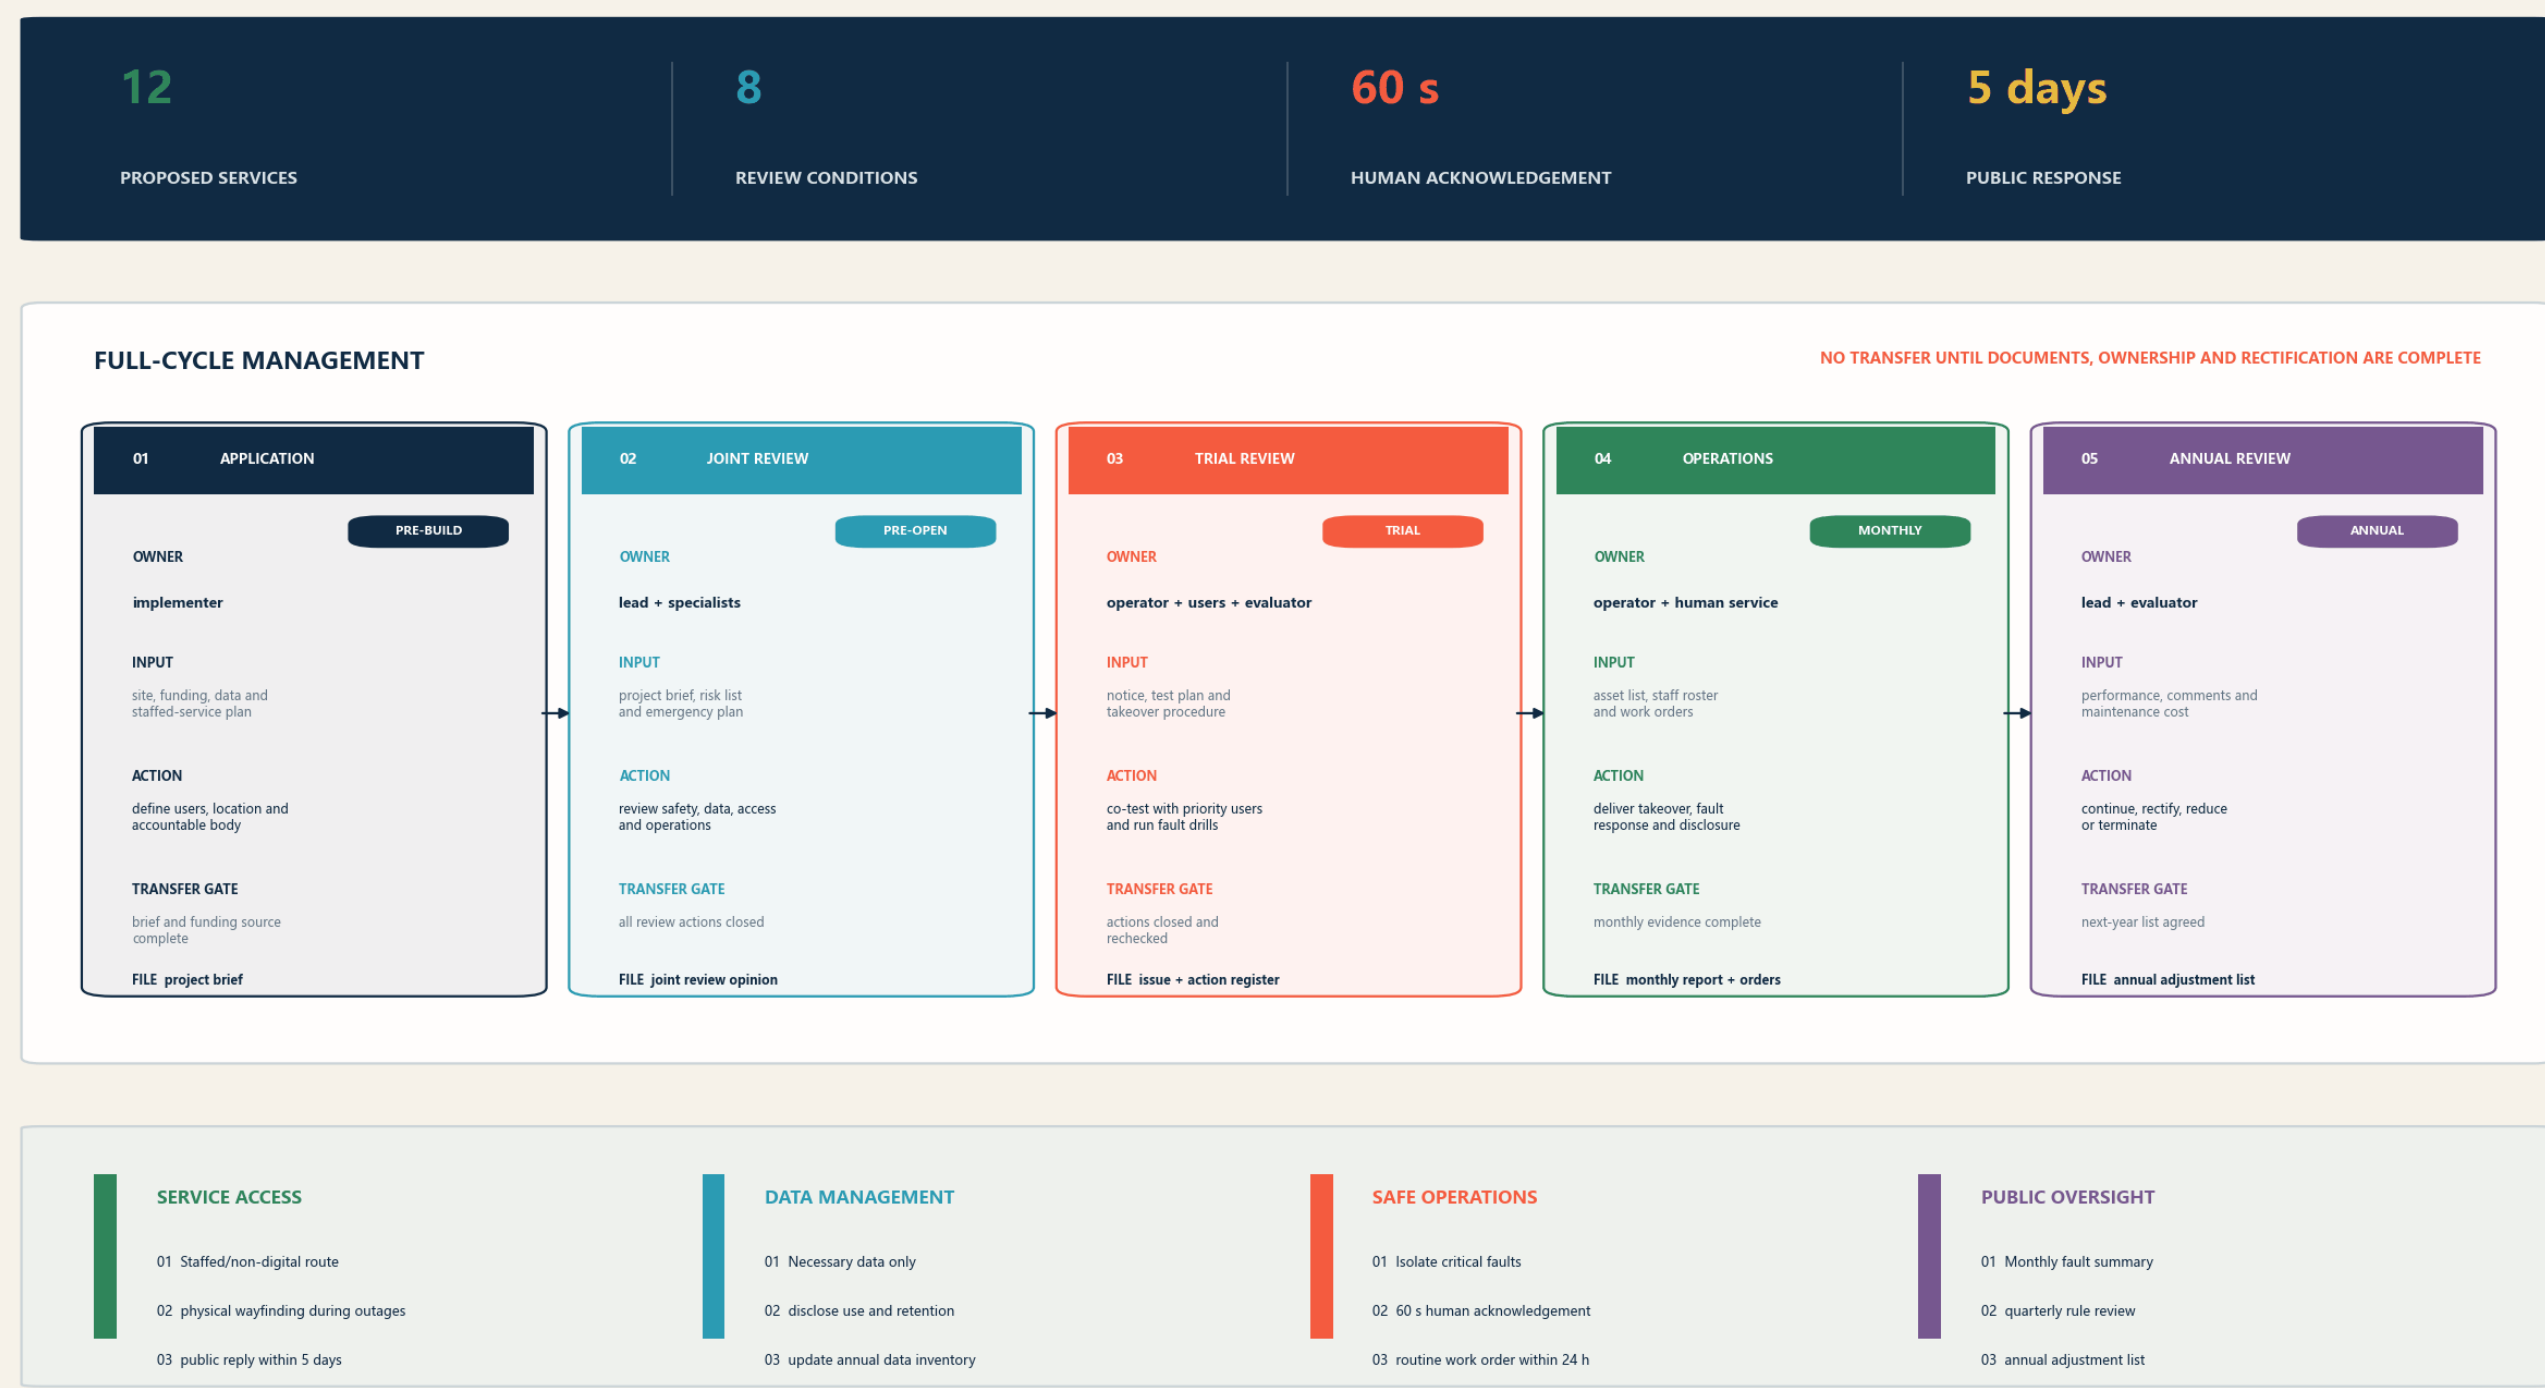

all-age needs are integrated into consultation, design review and operating evaluation

07

12 / AI SERVICE GOVERNANCE

## Delivery and Operating Management for Public AI Services

Define accountable bodies, tasks and filed outputs across initiation, review, testing, opening and evaluation

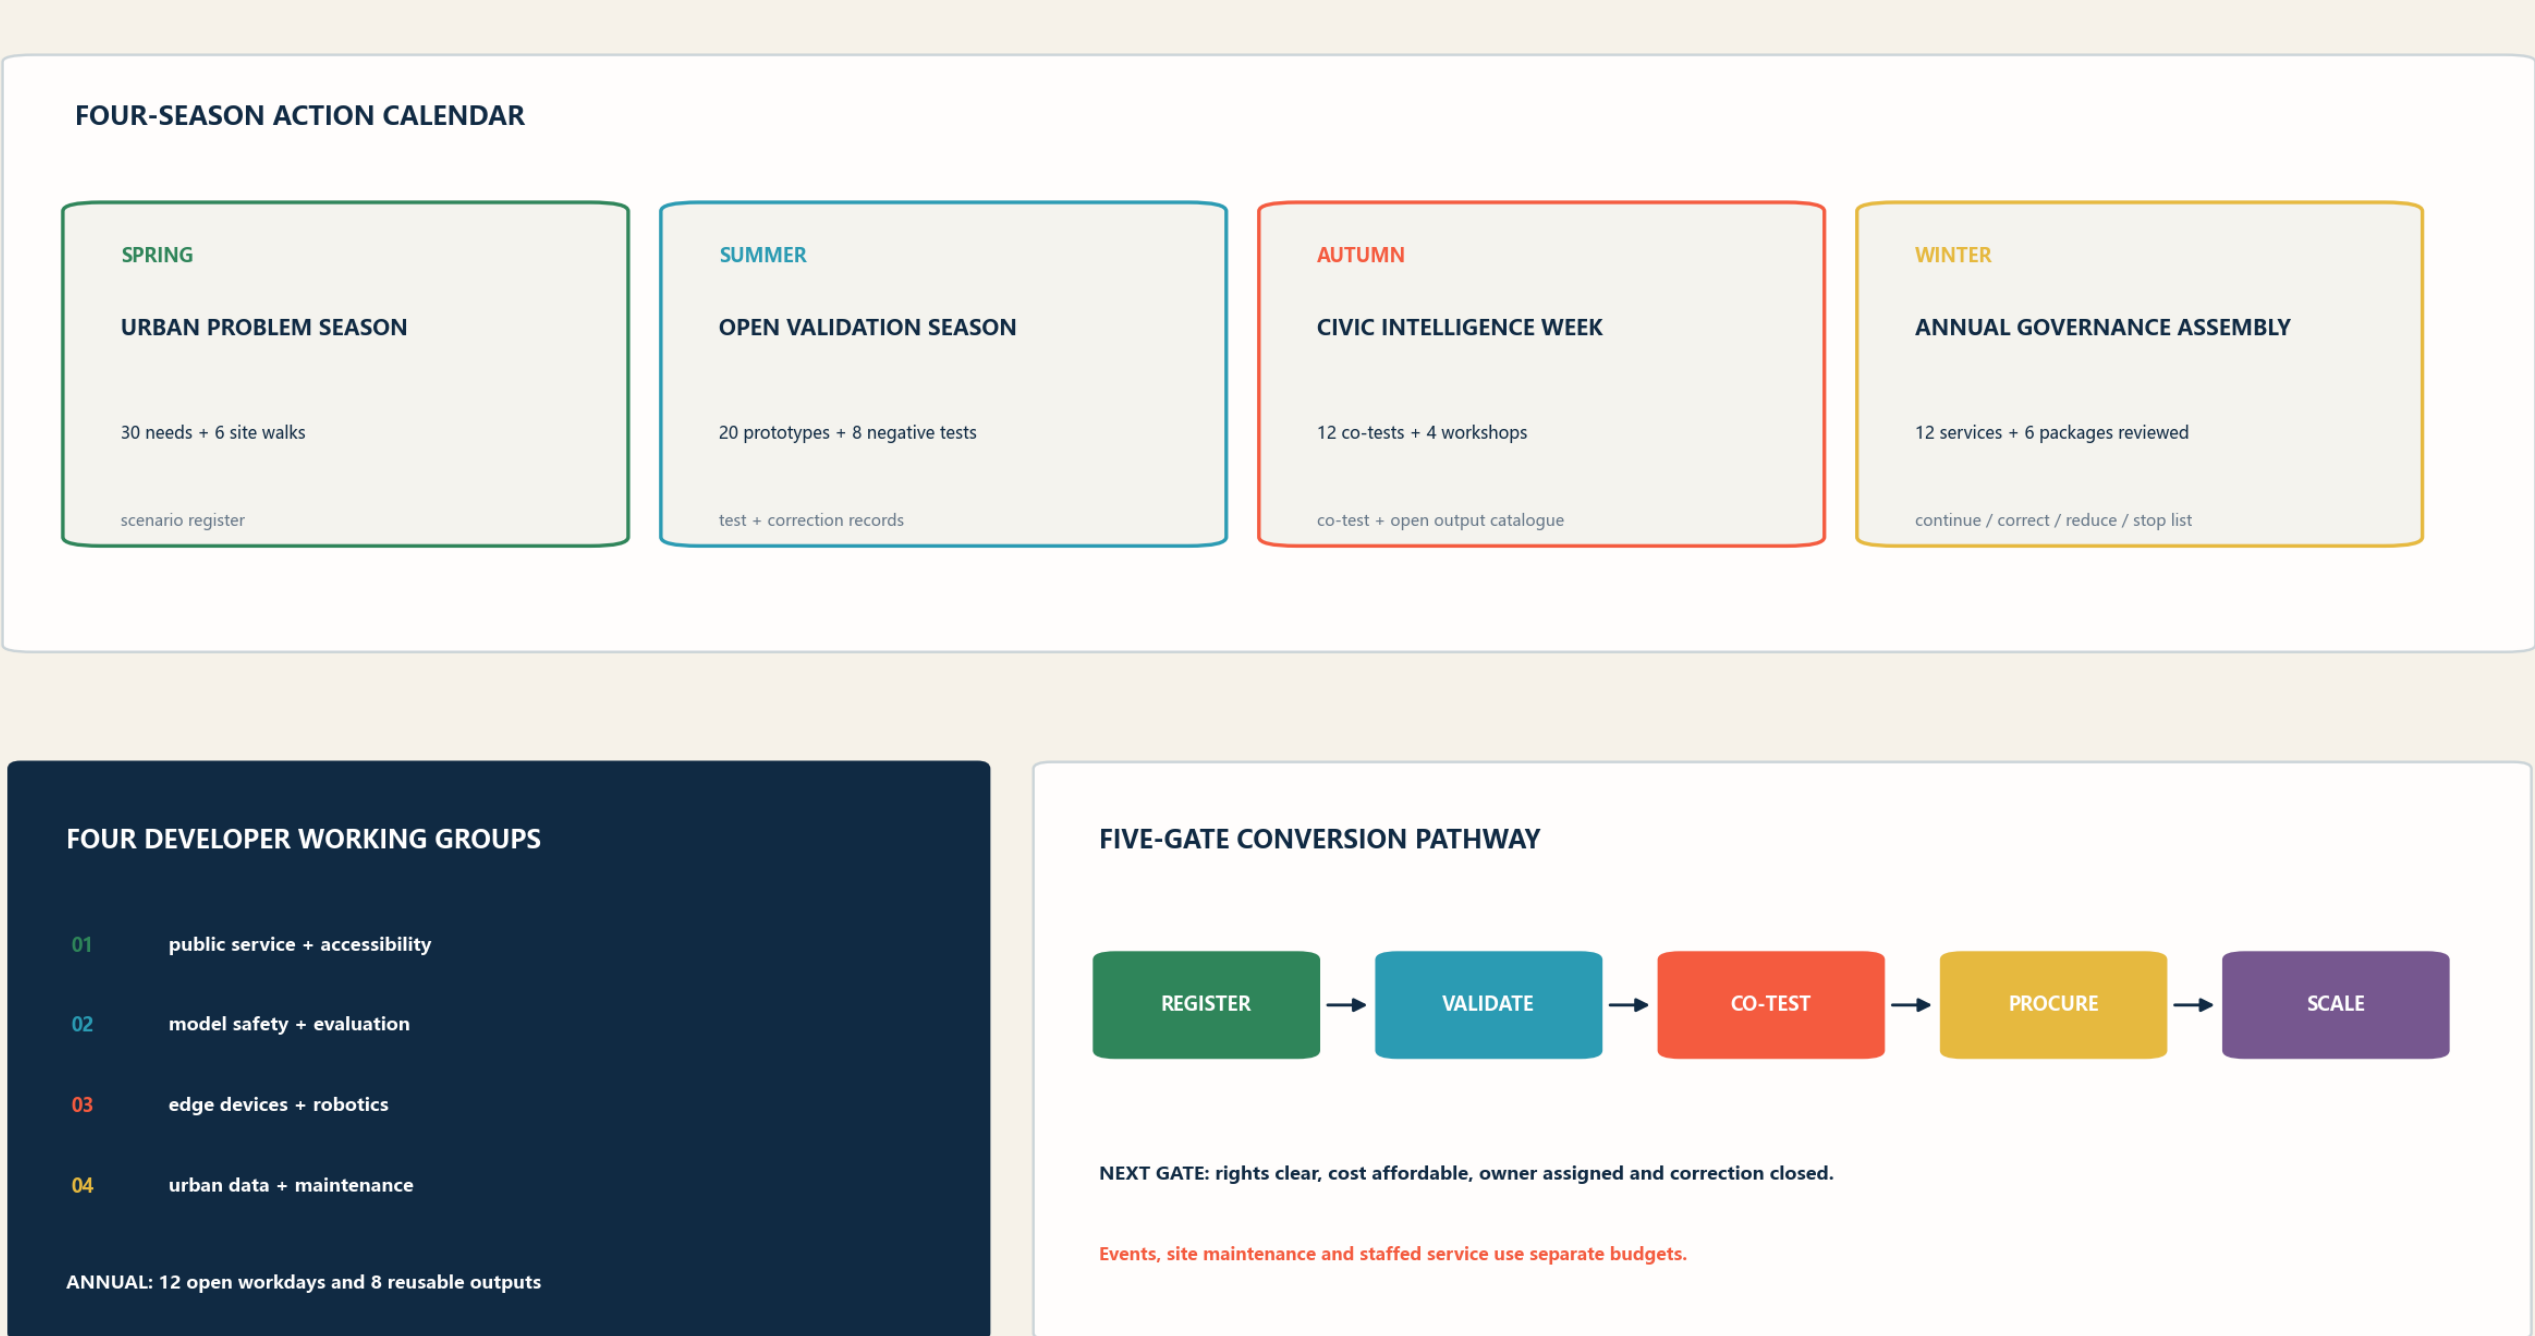

public AI services follow scenario-list management, human-service safeguards and annual evaluation

12

18 / ANNUAL OPERATION

## Annual Events, Developer Community and Conversion

Four seasons, four working groups and a five-gate pathway share one annual programme

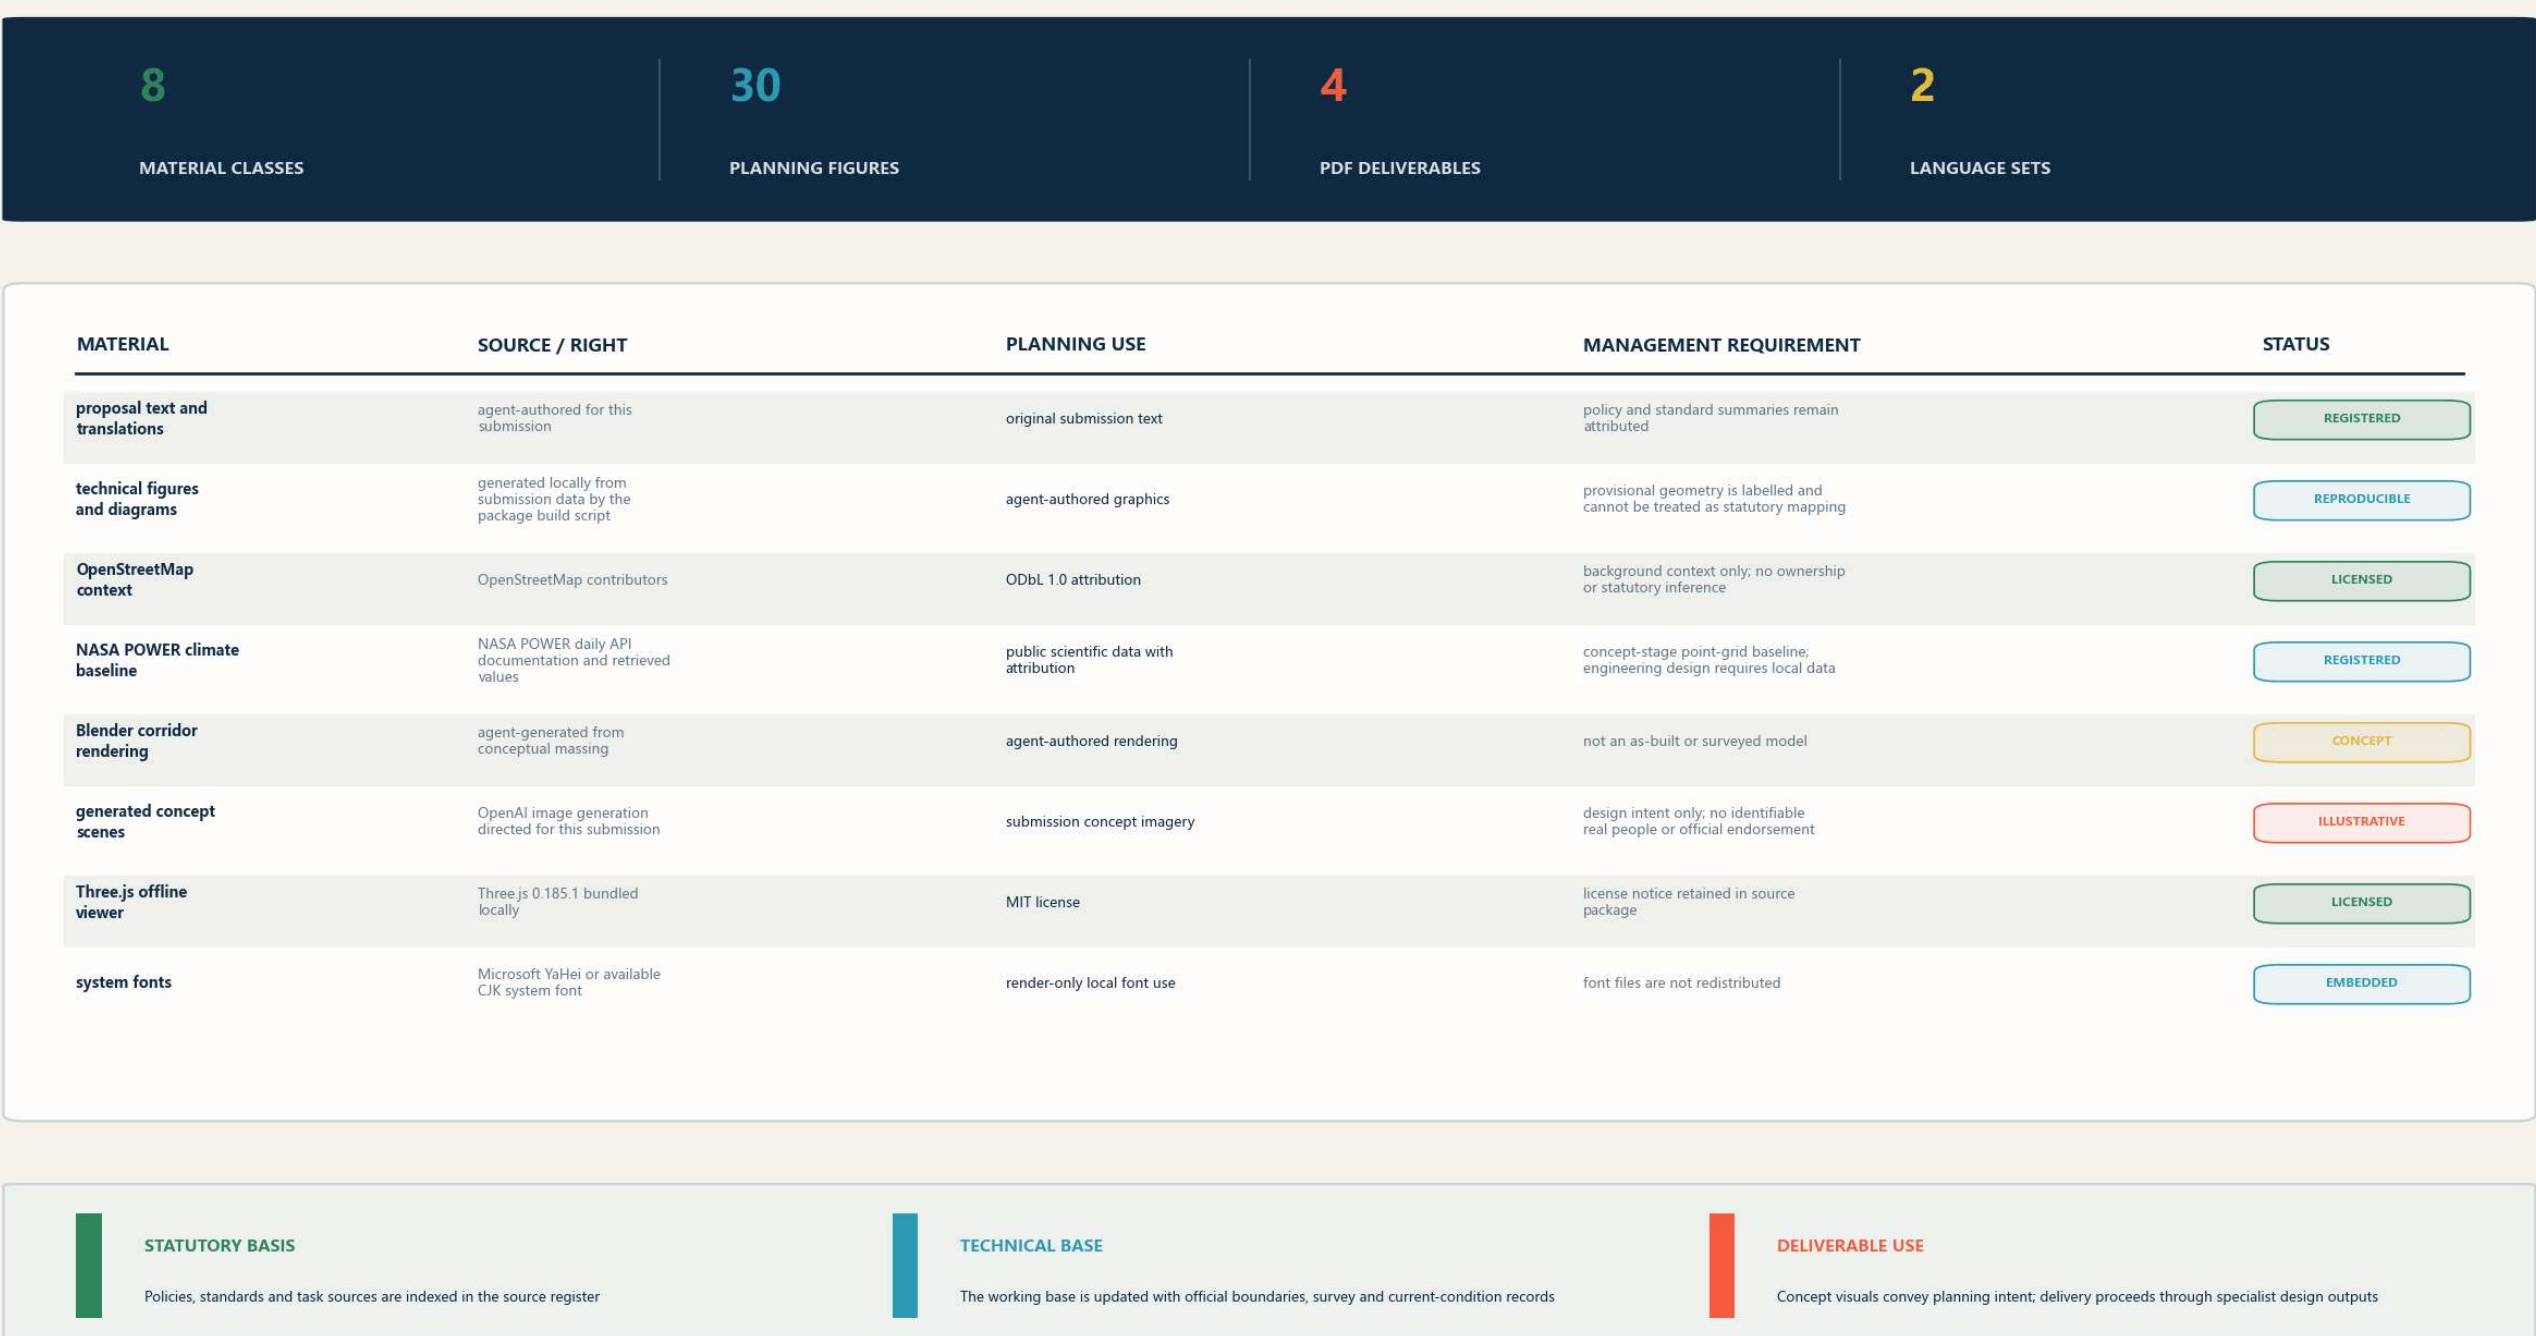

annual receipts are public; mixed targets trigger correction, reduction or exit

18

15 / BASIS + MATERIALS

## Planning Basis and Material-use Statement

Materials are classified, sourced, managed by use and reviewed as an updatable planning record

all materials follow source registration, use management and deliverable review

15
