

FINAL REVIEW EDITION

JING-ZHANG AI MAIN STREET

ONE ROUTE • THREE GATES • ONE PUBLIC LEDGER

Test AI services for safety, public understanding and useful first use in the real city before scaling.

ONE PUBLIC LAUNCH LINE

THREE EVIDENCE GATES

ONE TRACEABLE LEDGER

FIRST PROJECT

90-DAY DAZHONGSI ARRIVAL PILOT

Start from one observed walk and turn a temporary transfer problem into a handover-ready first project.

ADOPT/PAUSE/EXIT

USER + MAINTAINER + PROFESSIONAL REVIEWER + AUTHORISABLE OPERATOR

ONE AI SERVICE EARN'S PUBLIC TRUST ALONG ONE URBAN ROUTE

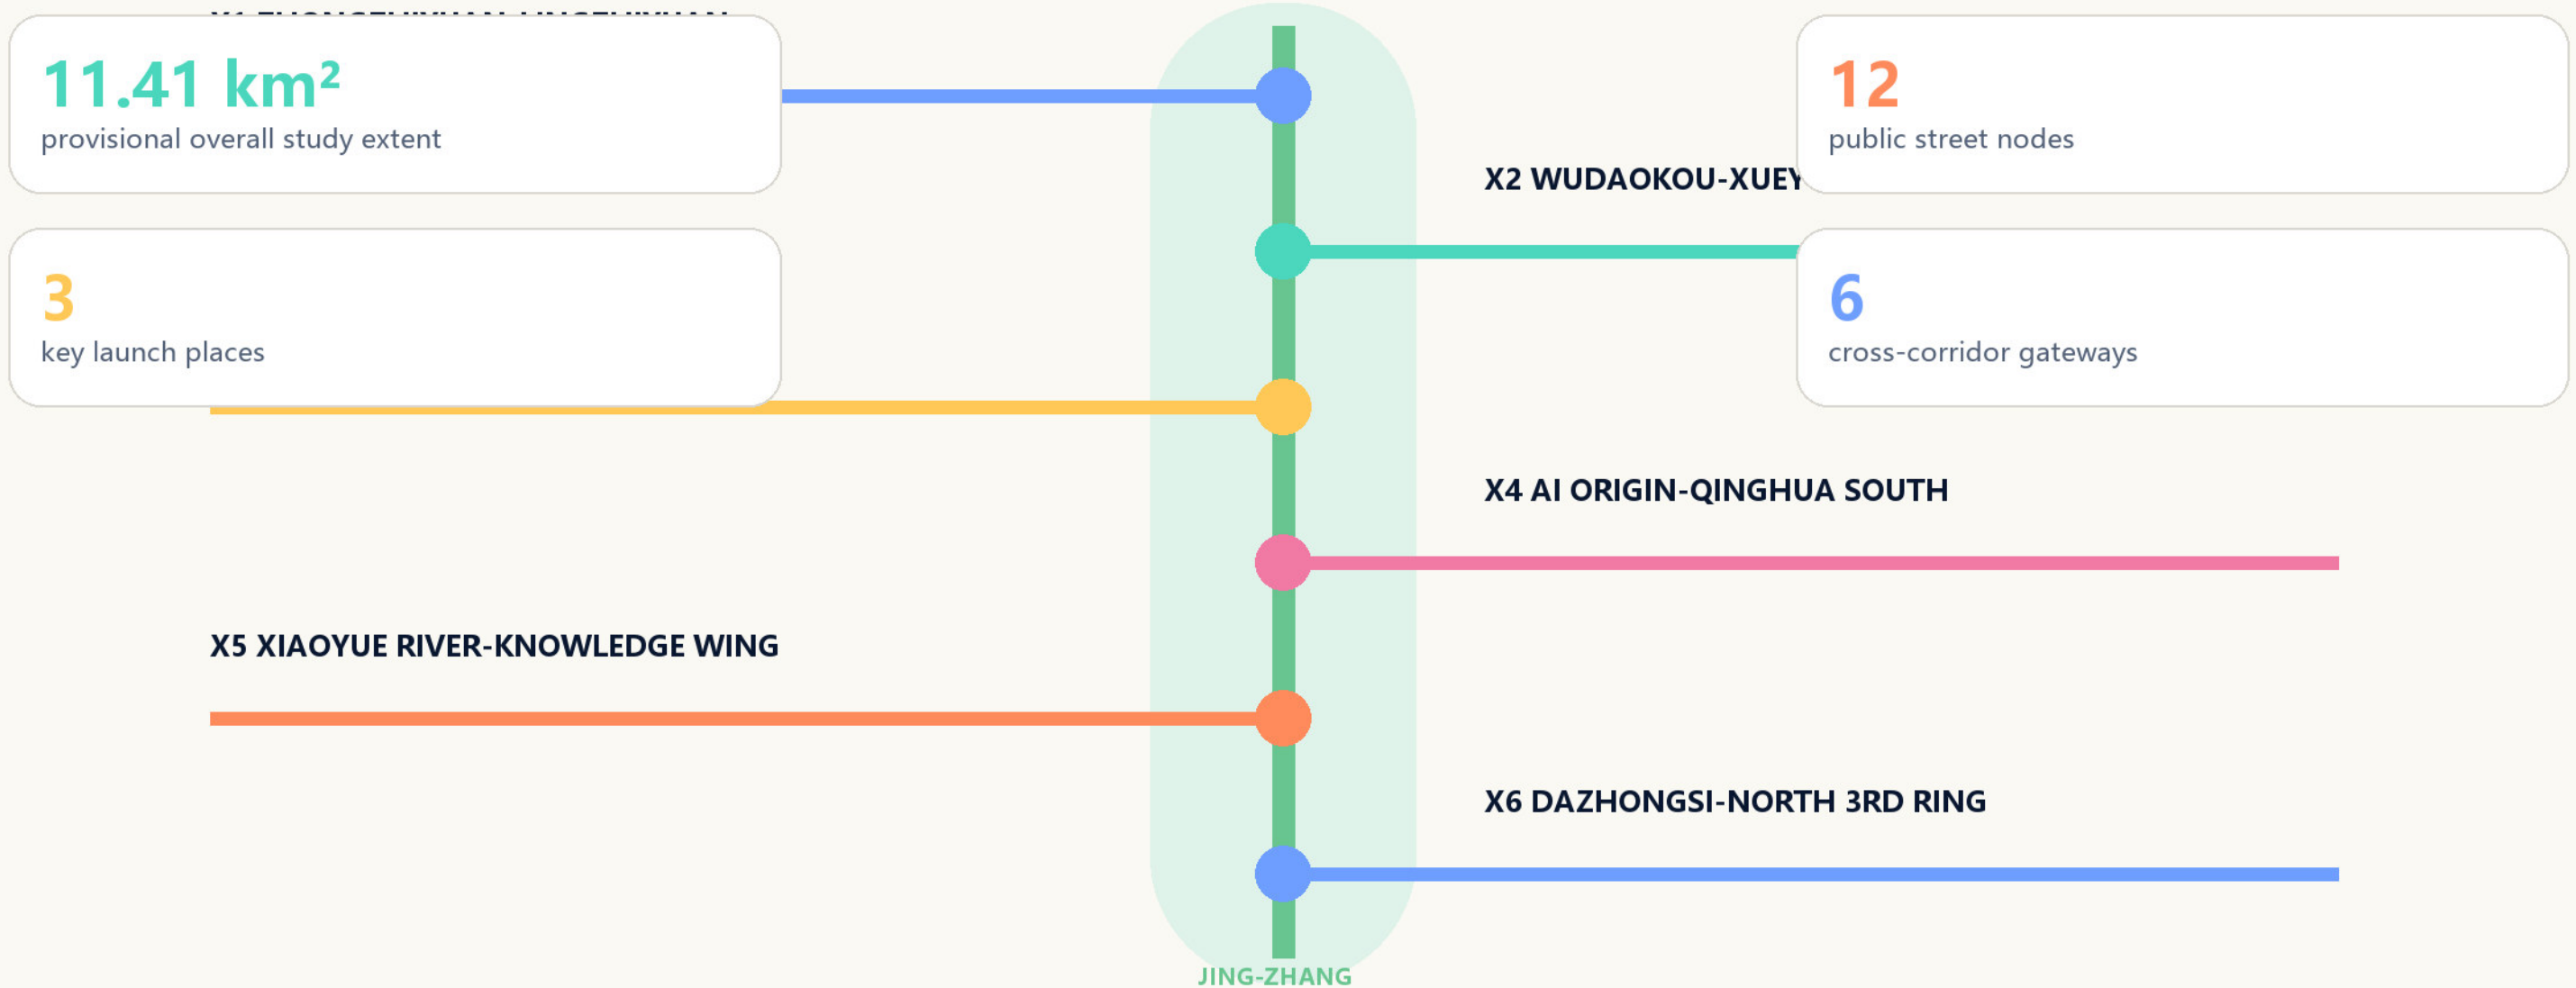

It carries verifiable records of safety, explanation, first use and disposition - not a publicity claim.

Ordinary urban service remains available; AI receives limited street access only after passing the evidence gates.

ONE NORTH-SOUTH PUBLIC BASE, SIX REAL CROSS-CORRIDOR GATEWAYS

The heritage park provides continuous public space; cross-corridor gateways connect universities, parks, communities, rail and renewal areas to one launch protocol.

THREE GROUPS OF PLANNING INTENT BECOME FOUR DELIVERABLE ACTIONS

The proposal aligns with the corridor draft plan, Haidian renewal, the heritage park Phase 2 and Beijing Garden City direction.

THREE KEY AREAS, ONE DECISIVE QUESTION EACH

One Street Pass connects the three places, without copying one spatial type.

PROVE

PROVE

ZHONGZHIYUAN: PROVE SAFETY IN A GARDEN

100m concept window: controlled loop + observation porch + staffed safety desk

AI-GENERATED CONCEPT ATMOSPHERE

1 ordinary garden remains continuous

observable, reviewable, recoverable

2 low speed / geofence / e-stop

observable, reviewable, recoverable

3 near-miss + takeover logged

observable, reviewable, recoverable

AI ORIGIN: TRANSLATE TECHNOLOGY INTO PUBLIC CHOICE

100m concept window: street house + courtyard + model cards + human explanation

AI-GENERATED CONCEPT ATMOSPHERE

1 publish model limits

observable, reviewable, recoverable

2 co-test with residents + small firms

observable, reviewable, recoverable

3 return needs to R&D

observable, reviewable, recoverable

DAZHONGSI: MAKE REAL ARRIVAL THE FIRST PUBLIC SERVICE

T0/T1/T2 relocatable interface: route, human desk and status board update with the site

FIELD OBSERVATION STILL • 2026-08-13

1 A-1733-D physical route

observable, reviewable, recoverable

2 seven arrival checks

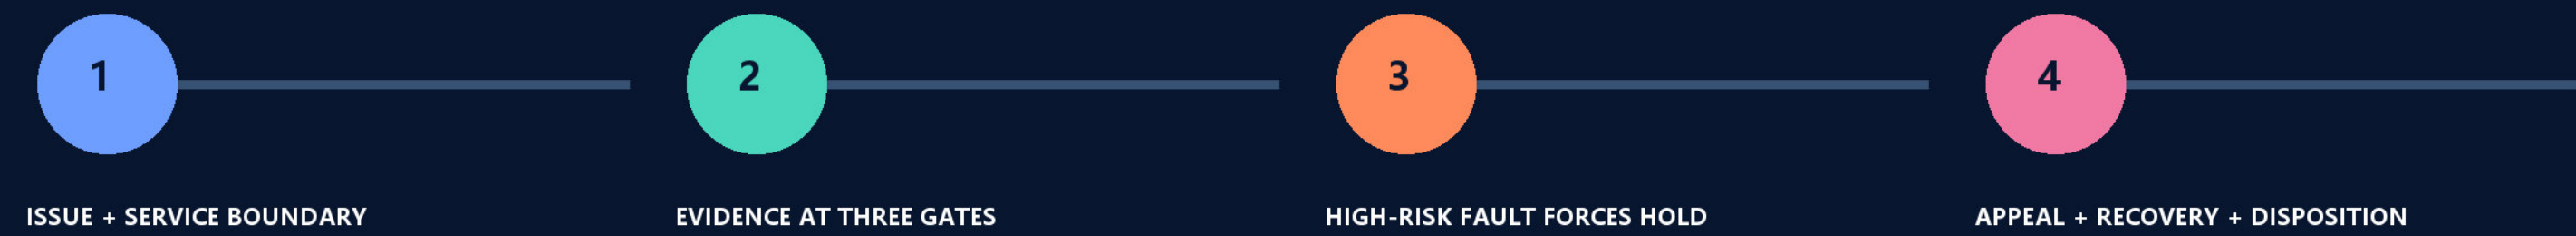

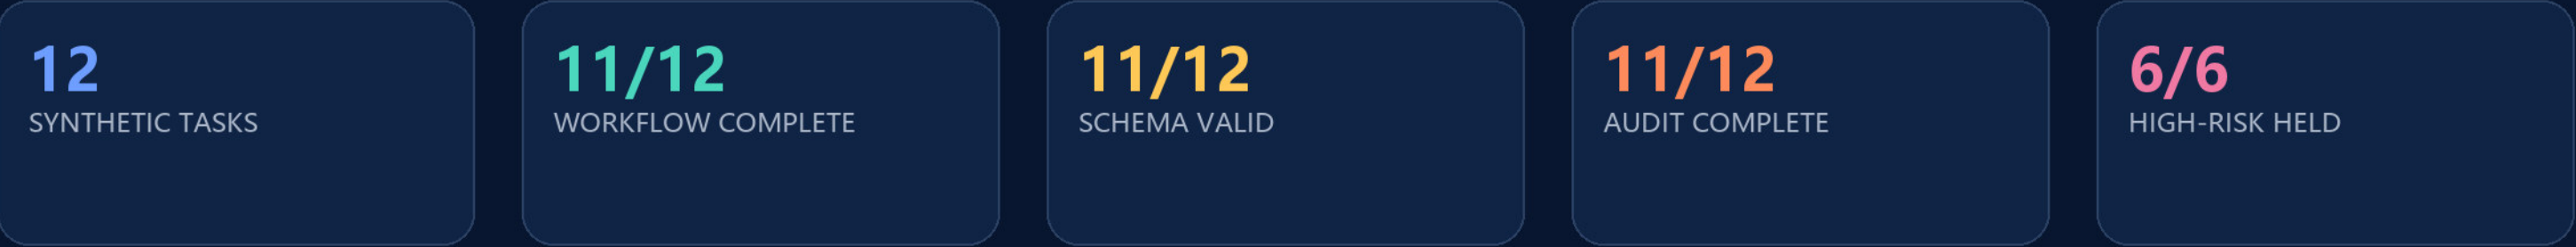

observable, reviewable, recoverable

3 ordinary transfer always restored

observable, reviewable, recoverable

RUN THE RULES FIRST; CONNECT MODELS AND FIELD OPERATIONS NEXT

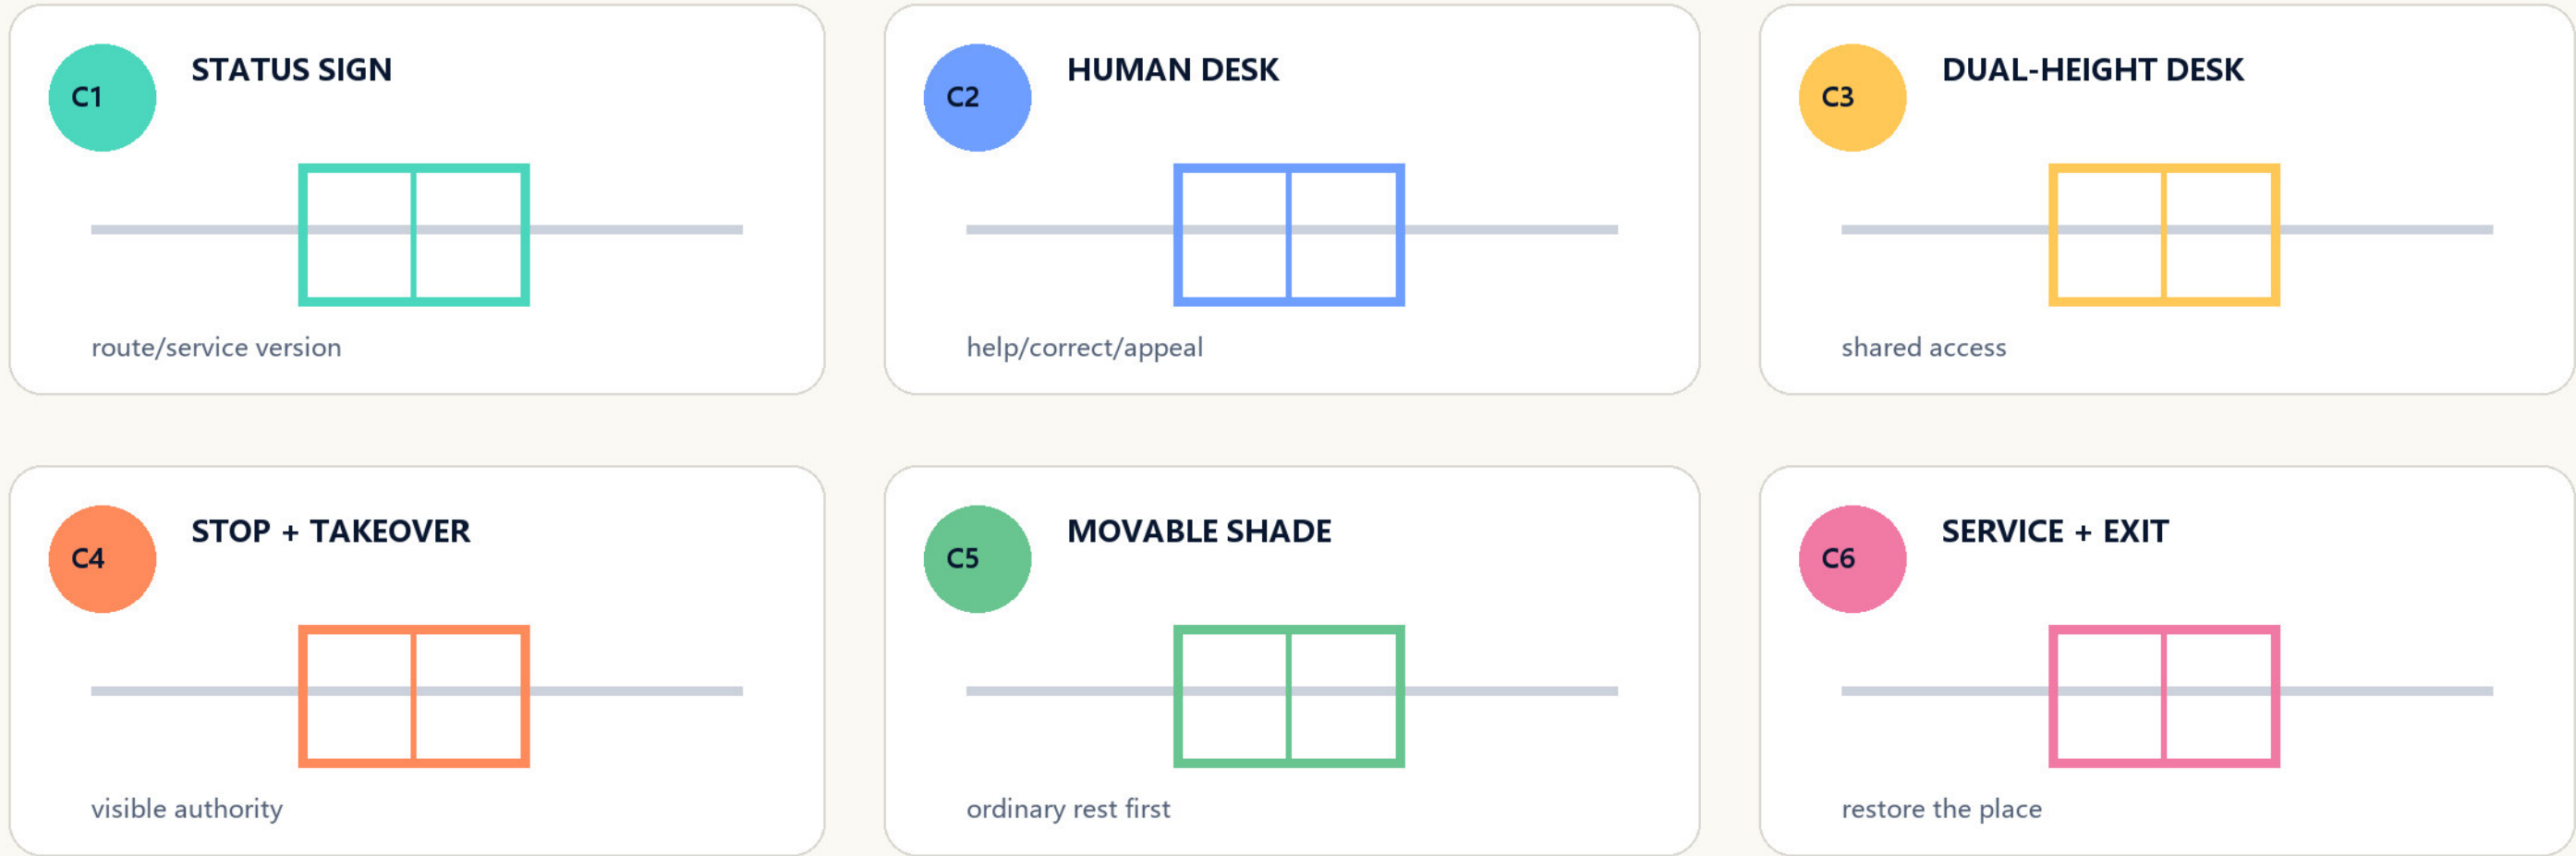

Fixed-seed offline synthetic tasks verify only Street Pass workflow, records and high-risk interception; an independent script recomputes the results.

SOLE FAILURE: MISSING APPEAL OUTCOME → CORRECTLY HELD

SIX REVERSIBLE COMPONENTS MAKE THE PROTOCOL VISIBLE ON SITE

Every component states who maintains it, how it degrades, when it leaves and how ordinary use returns.

WHO DOES WHAT ON DAY ONE, AND WHAT RETURNS AT DAY 90

The Dazhongsi first project puts responsibility, resources, decision gates and exit results on one delivery map.
