

Vision and Overall Structure

01 JINGZHANG ENCOUNTER COMMONS

One Spine • Three Commons • Two Wings • Six Seams

Turn talent density into public tasks, open time, and shared output

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

OSM context • site_boundary • key_areas • roads • green_space • public_space • v1.1 / 2026-08-09 • Agent-generated original diagram

SCOPE READING • 范围

The Encounter Spine is a public-space, service, and programme sequence—not a new road or railway.

The three scope levels answer different questions and never merge into a statutory boundary.

BOUNDARY EVIDENCE • 边界

43.6 km² and the three key-area figures are announced; approx. 11.41 km² comes from provisional recomputable geometry.

Location supports orientation and concept checks only; it is not an official polygon.

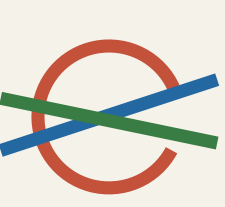

RECOMPUTE TRIGGER • 重算

If official boundaries differ, invalidate and recompute every spatial figure, metric, and claim.

Boundary determination transfers to planning, survey, and competent authorities.

- 01 One Spine, Three Commons, Two Wings, Six Seams, Twelve Scenes
- 02 AI matches public tasks and resources, never people
- 03 Provisional geometry supports concepts and checks only

Boundary: provisional rough • Location: concept only • Decision: human final

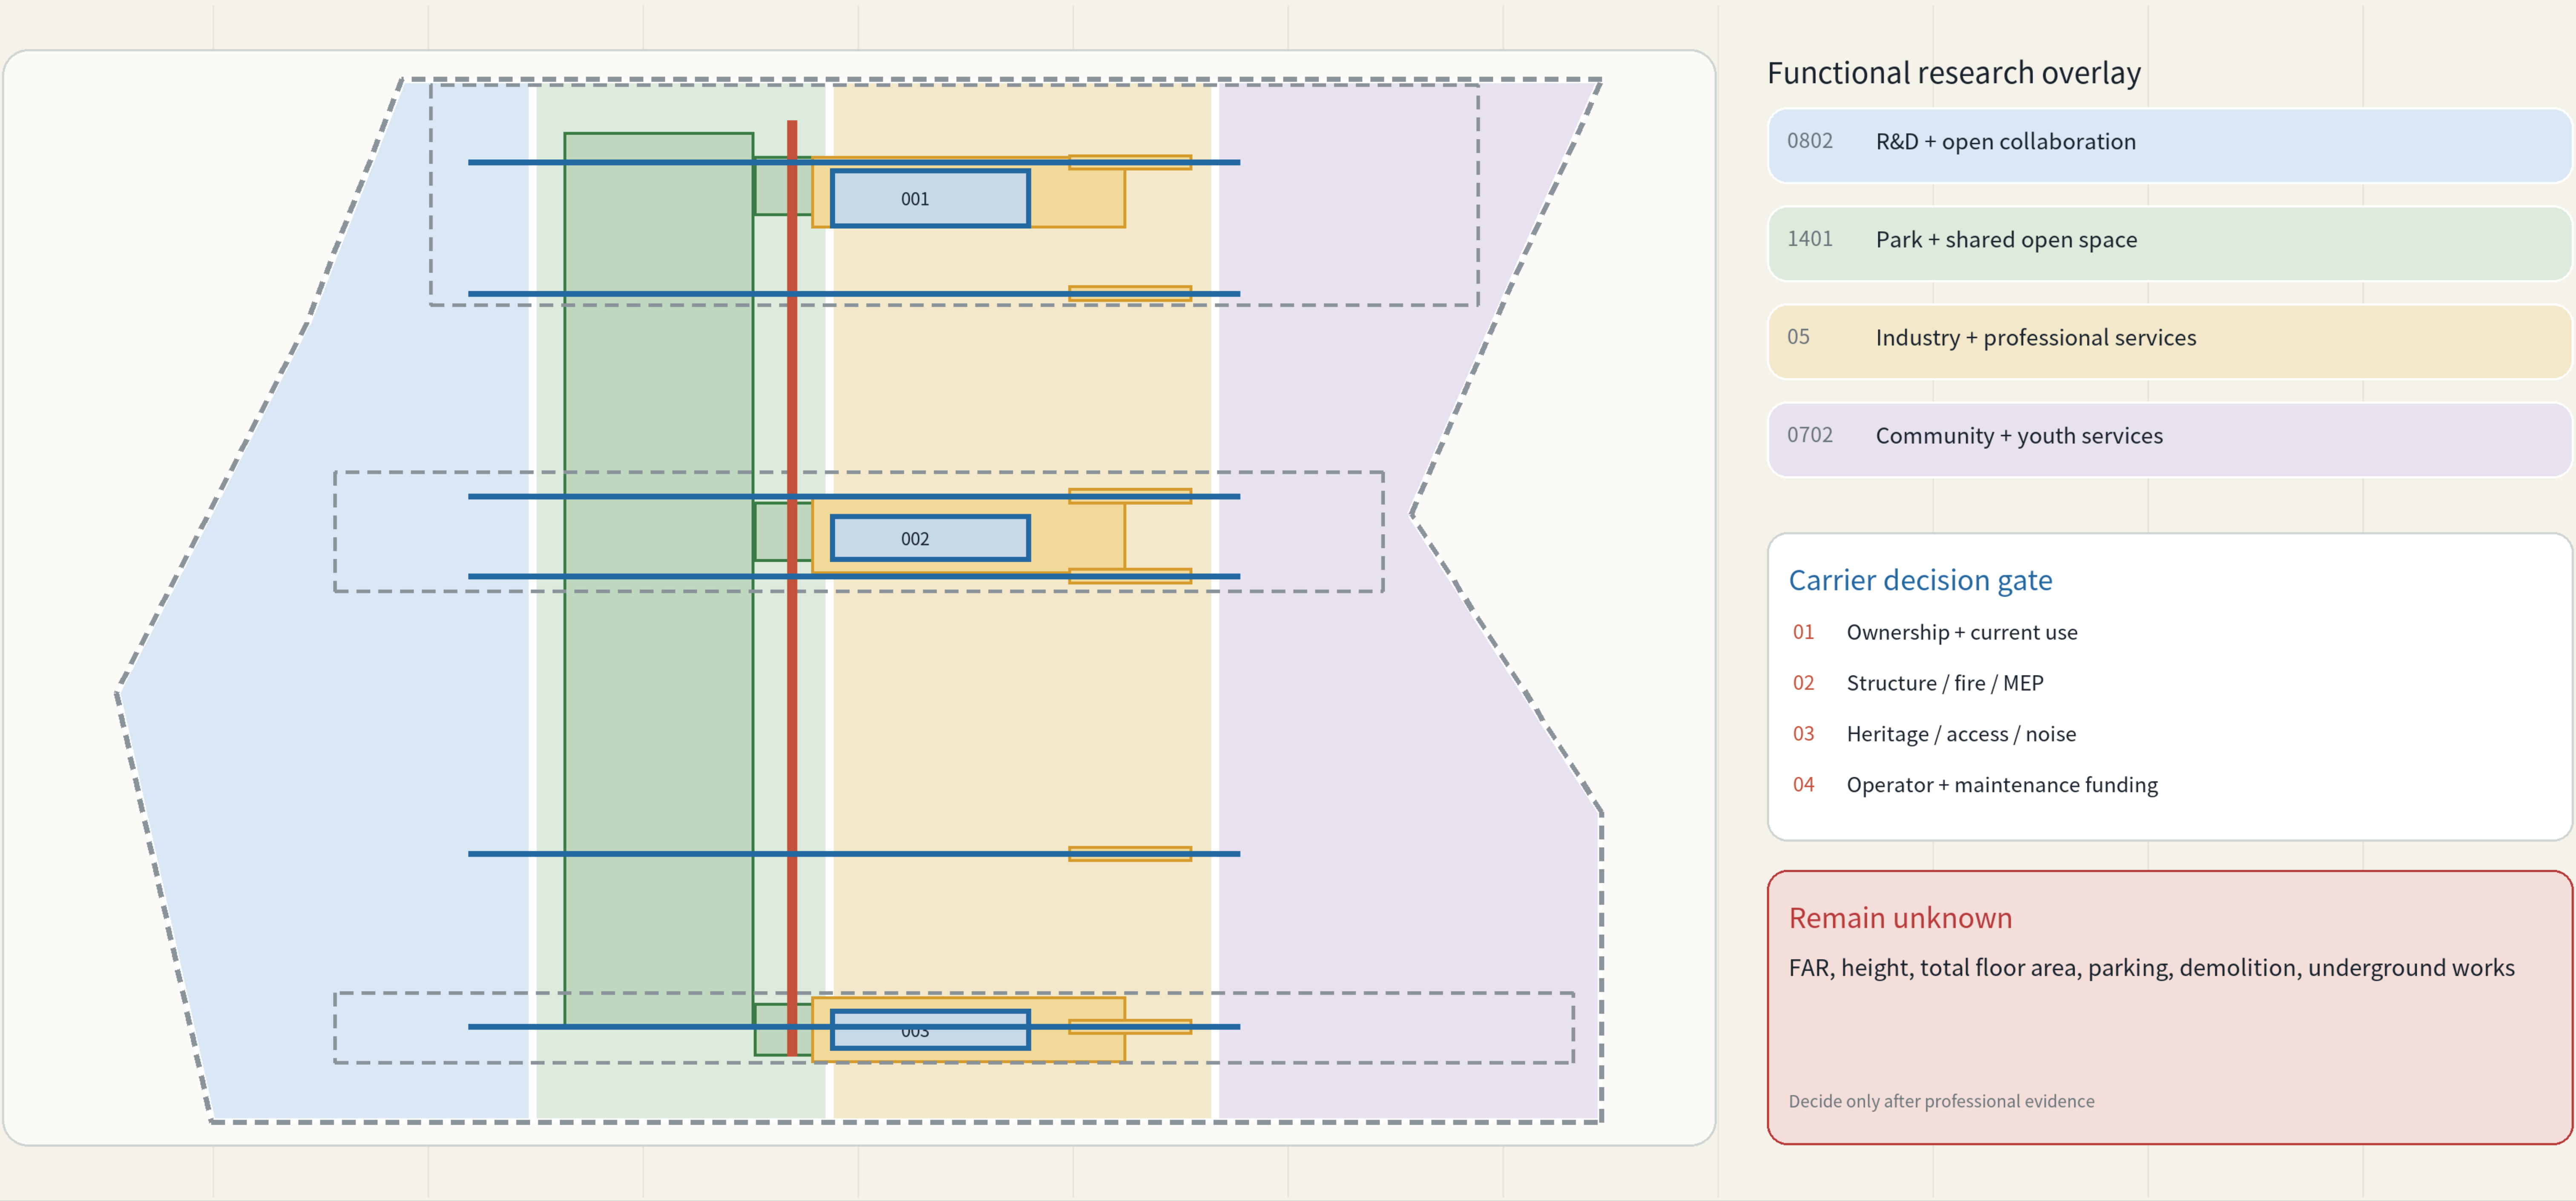

Land Use, Buildings, and Renewal

02 JINGZHANG ENCOUNTER COMMONS

Functional Overlay and Adaptive Reuse

Complete coverage for topology checks; not existing, ownership, or statutory land use

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

land_use • buildings • public_space • green_space • metrics • v1.1 / 2026-08-09 • Agent-generated original diagram

Functional research overlay

- 0802 R&D + open collaboration
- 1401 Park + shared open space
- 05 Industry + professional services
- 0702 Community + youth services

Carrier decision gate

- 01 Ownership + current use
- 02 Structure / fire / MEP
- 03 Heritage / access / noise
- 04 Operator + maintenance funding

Remain unknown

FAR, height, total floor area, parking, demolition, underground works

Decide only after professional evidence

- 01 Complete overlay is not existing/statutory land use
- 02 Building envelopes are unverified carrier types
- 03 Protocol first, light kit second, professional works later

Boundary: provisional rough • Location: concept only • Decision: human final

REUSE ORDER • 更新顺序

Validate the open protocol first, add reversible kit second, and discuss permanent works only after professional gates pass.

Reuse-first is not a retain/alter/remove determination.

CARRIER EVIDENCE • 载体

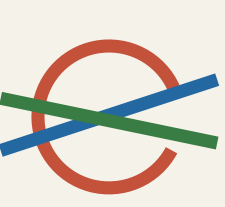

Four coverage layers and three building envelopes screen topology and carriers; they do not describe current ownership.

The graphic is an agent-design inventory, not a survey or statutory land-use map.

PROFESSIONAL GATE • 移交

Stop any retain/alter/remove decision while ownership, structure, fire, MEP, or access remains unchecked.

FAR, height, parking, and floor area transfer for specialist evidence.

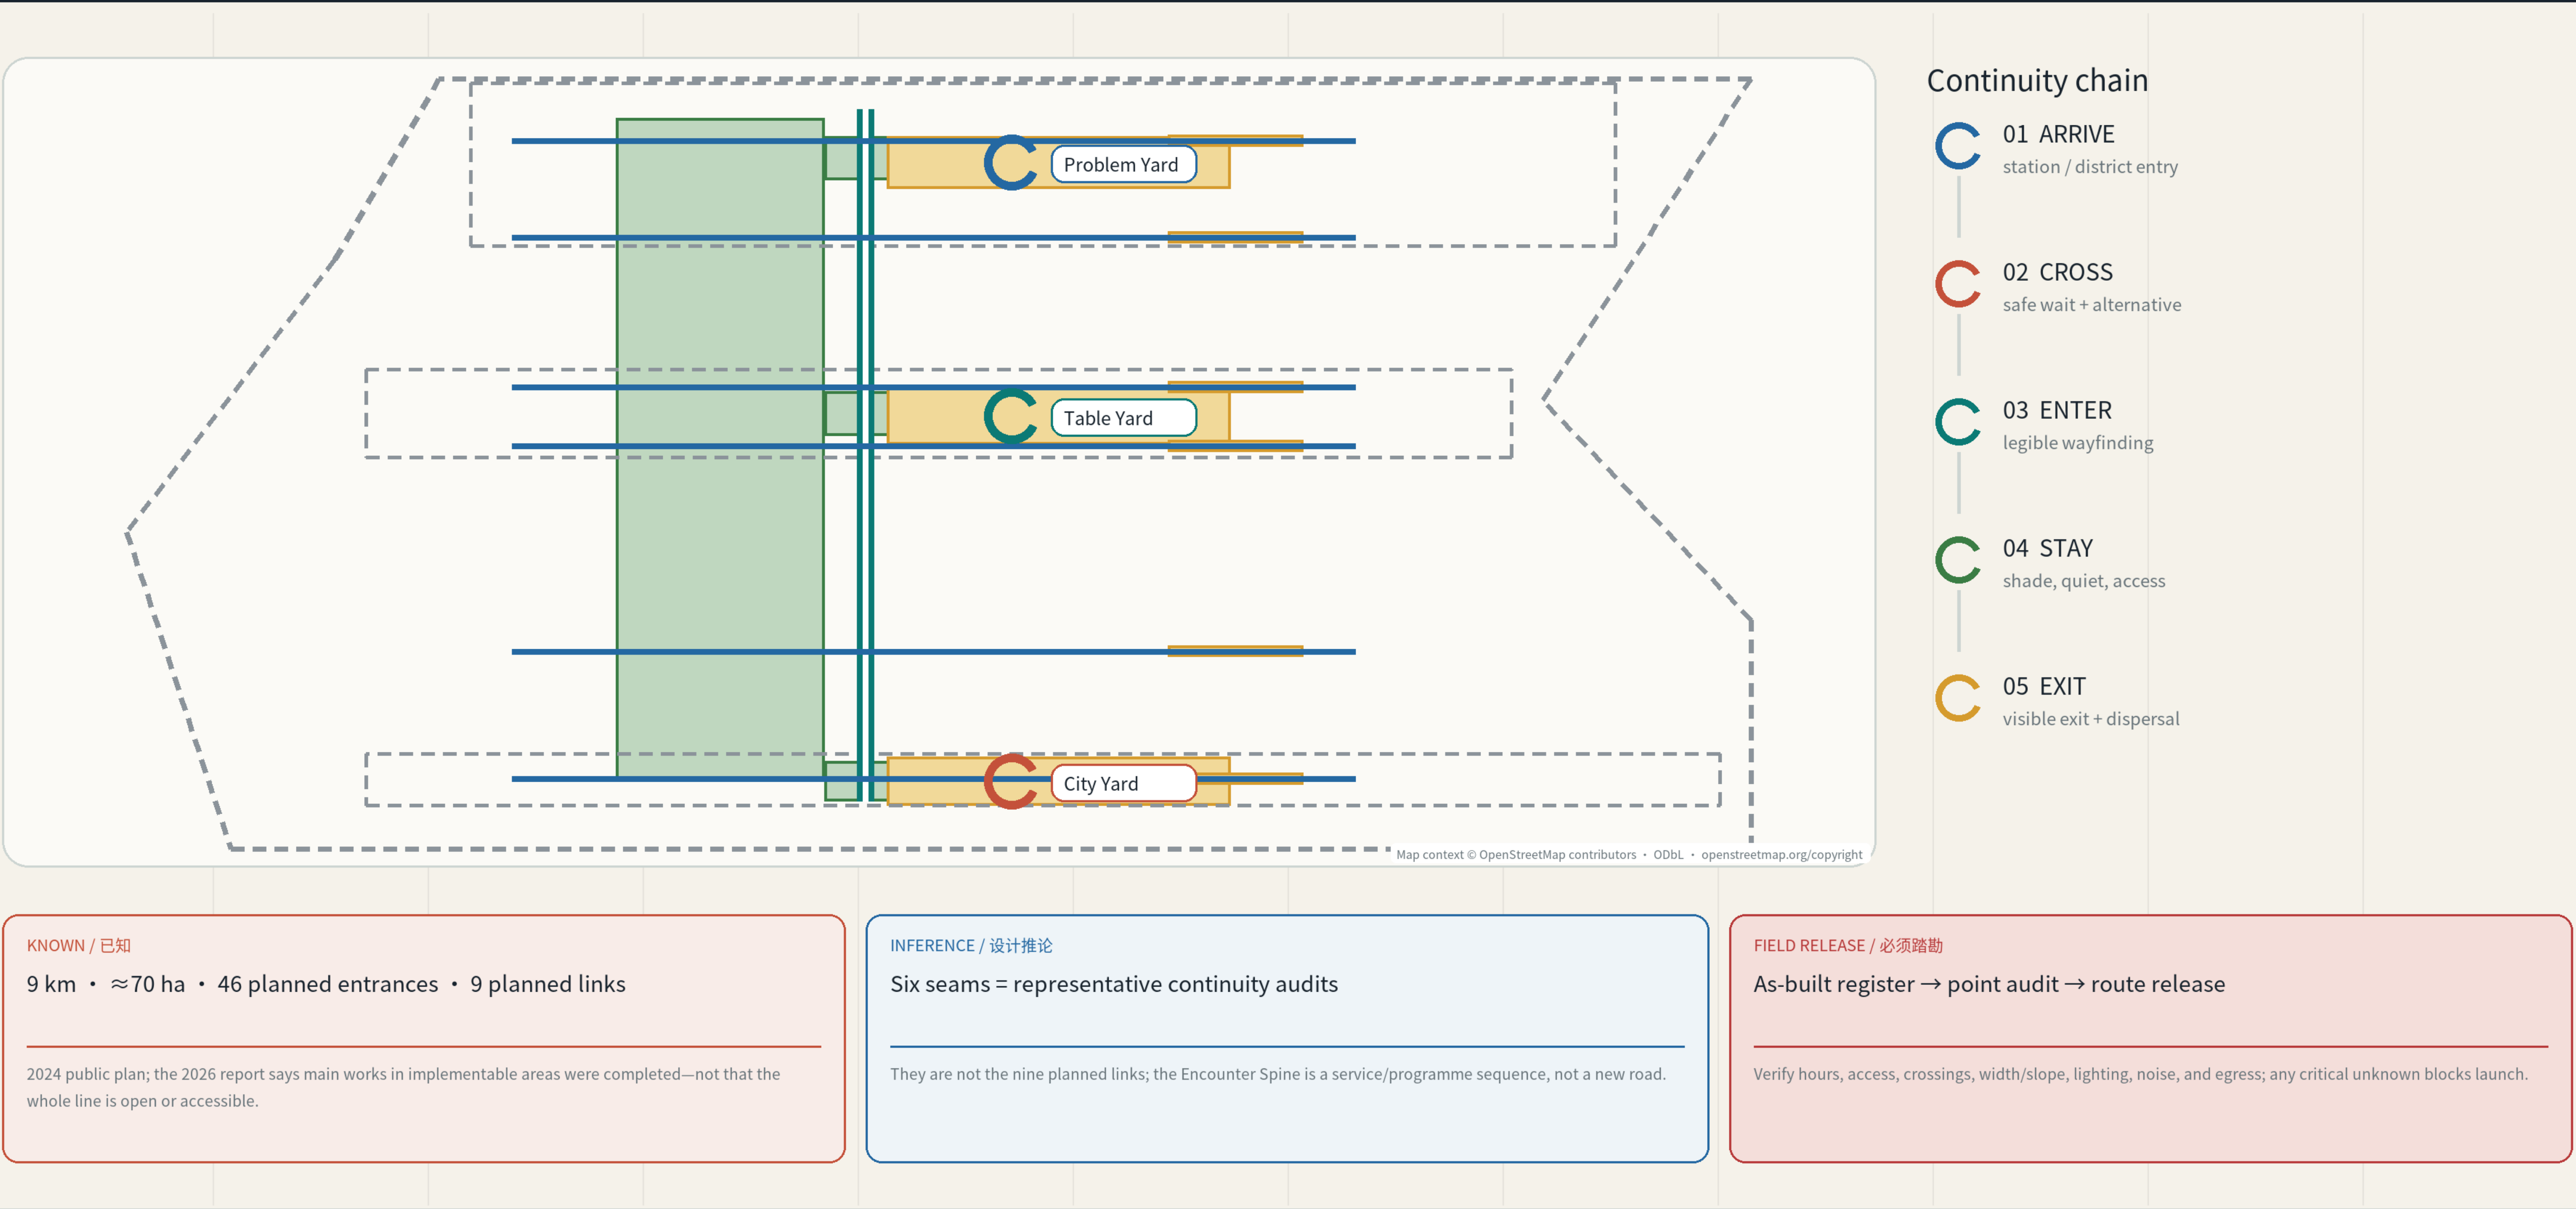

Transport, Rail, Walking, and Municipal Systems

04 JINGZHANG ENCOUNTER COMMONS

Arrive—Cross—Enter—Stay—Exit

One audit combines walking, blue-green comfort, accessibility, and event safety

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

PHASE1 • PHASE2-PLAN • HD-GOV-REPORT-2026 • site-baseline-audit.json • concept only • v1.1 / 2026-08-09 • Agent-generated original diagram

- 01 2024 plan baseline: 9 km, approx. 70 ha, 46 entrances, nine links
- 02 Six seams are representative audits, not the nine planned links
- 03 No route release before as-built register and point audit

Boundary: provisional rough • Location: concept only • Decision: human final

KNOWN • 已知

The 2024 plan describes 9 km, approx. 70 ha, 46 planned entrances, and nine planned links; the 2026 report records completed main works in implementable areas.

Neither proves that the full corridor, every entrance, or accessible route is open and operationally verified.

INFERENCE • 设计推论

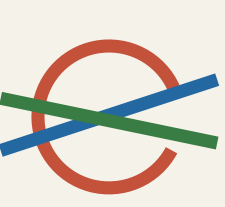

The six seams sample representative arrive—cross—enter—stay—exit audit transects.

They are not the nine planned links; the Encounter Spine is a service/programme sequence, not a new road.

FIELD RELEASE • 必须踏勘

Obtain as-built boundary and entrance registers; verify hours, access, crossings, width/slope, lighting, noise, and egress point by point.

Any safety-critical unknown blocks route publication and pilot launch.

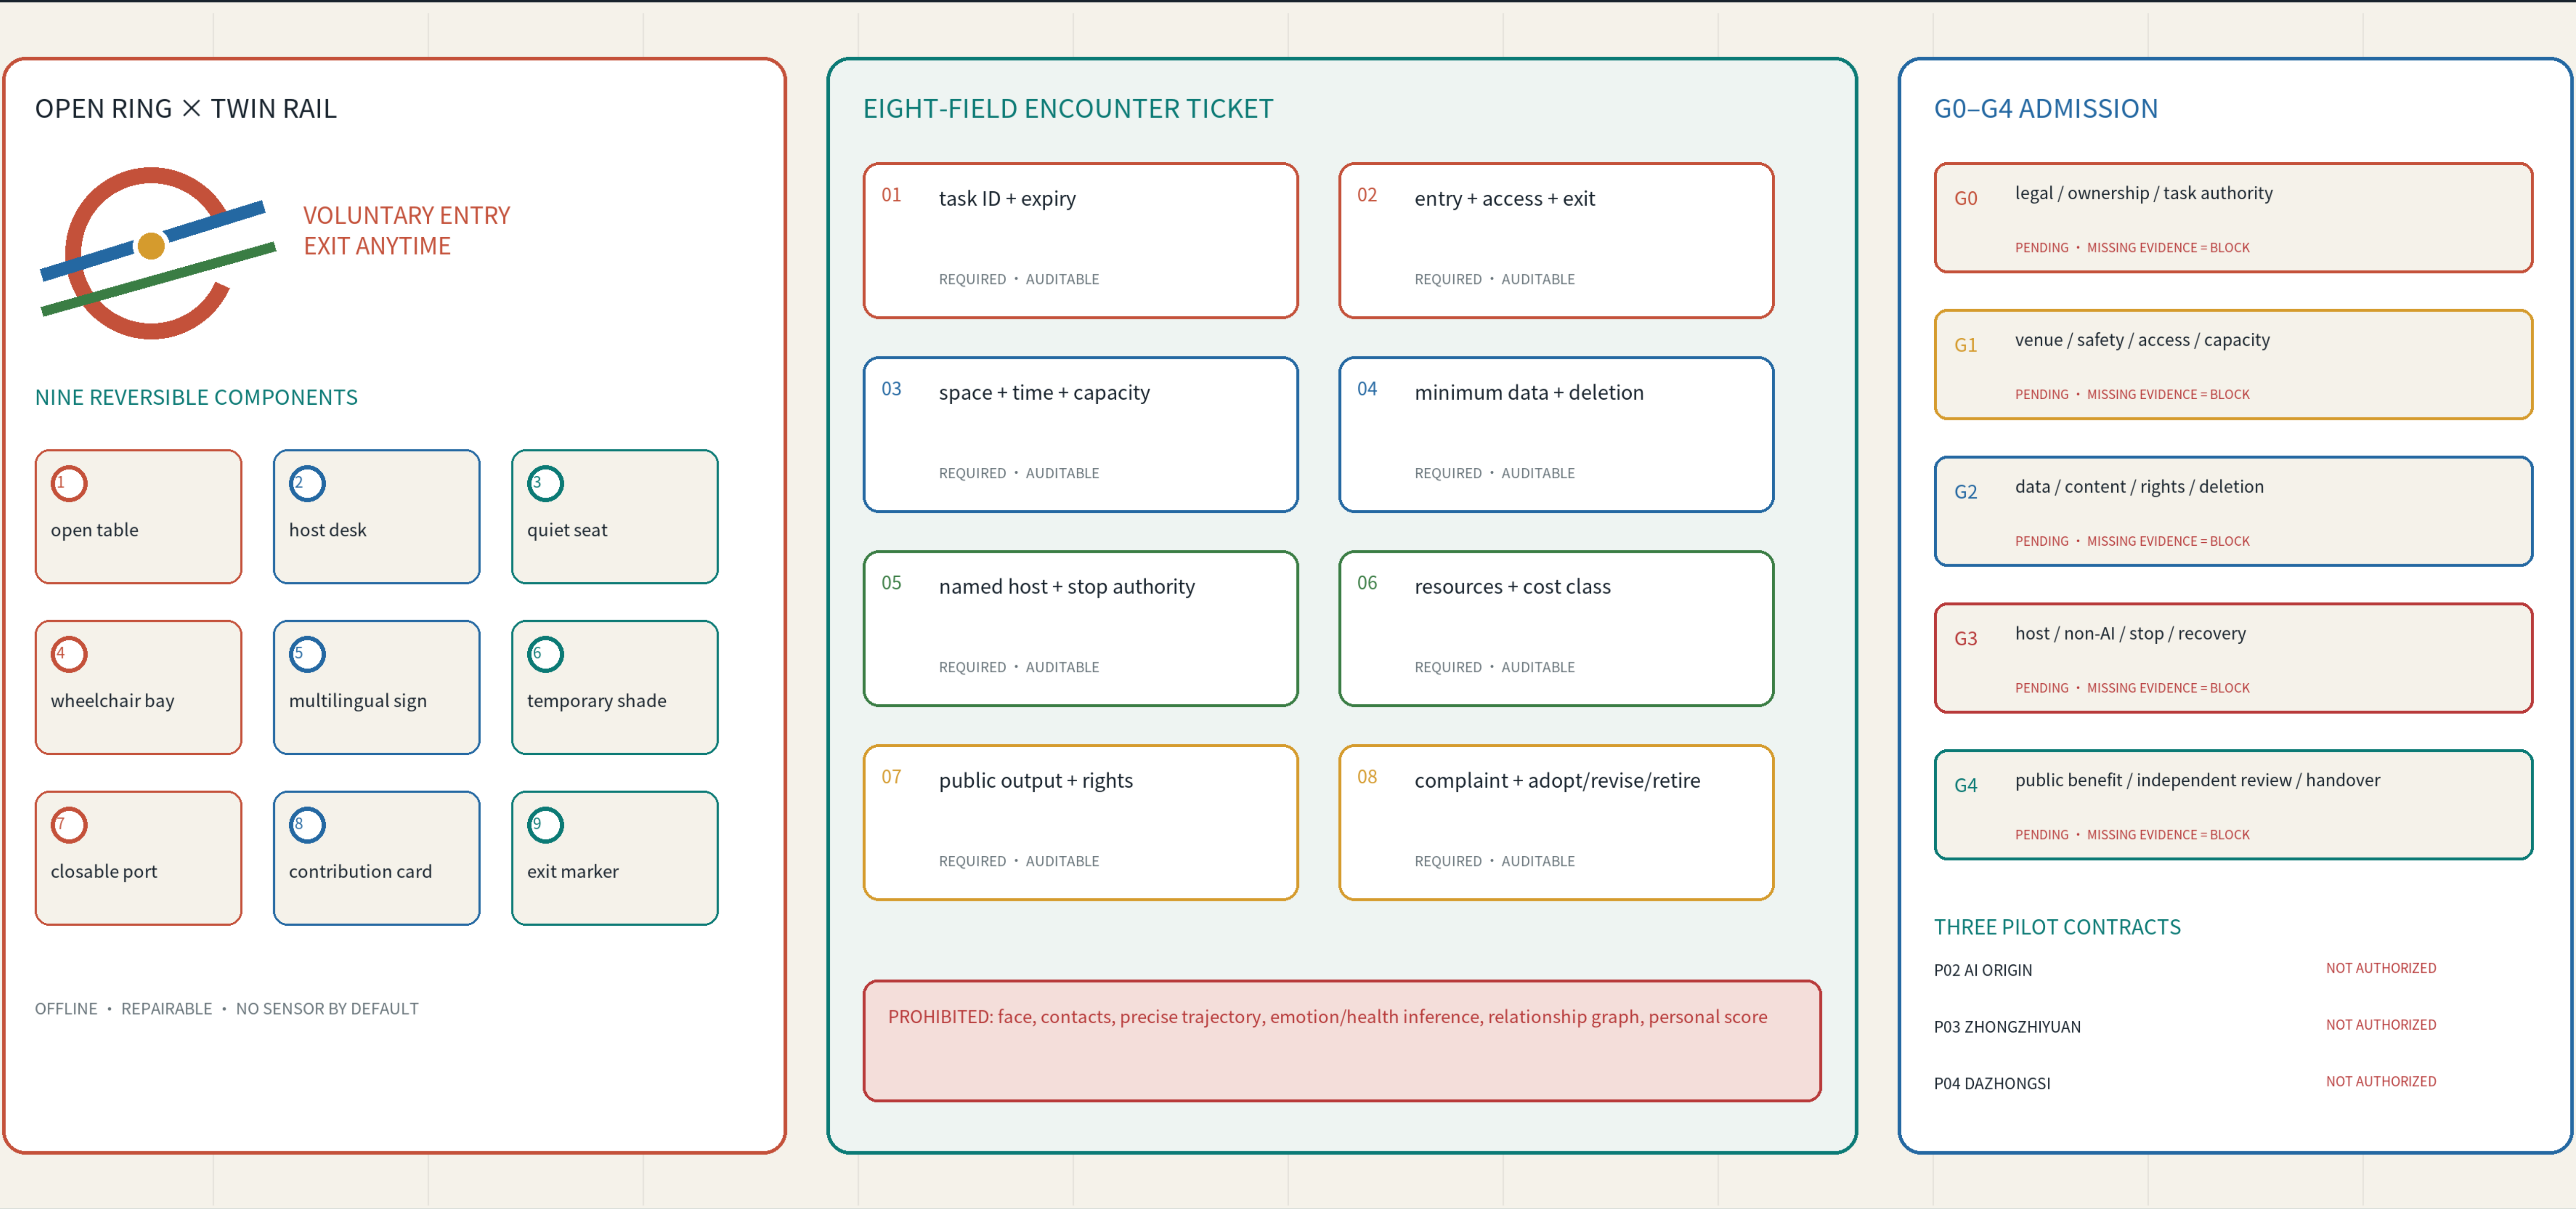

Encounter Protocol, Reversible Kit, and Admission Governance

Encounter Ticket 0.2 • Commons Kit • Five Gates

AI schedules authorised tasks–spaces–times–resources; humans release, stop, restore, and retire

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

encounter-ticket.schema • pilot-contracts • logo.svg • human final • v1.1 / 2026-08-09 • Agent-generated original diagram

AUDITABLE OBJECT • 相遇票

The eight-field Encounter Ticket records task, entry, data, A/R, stop, output, and exit as one auditable object.

AI may schedule authorised ticket resources only; it may not decide eligibility.

OFFLINE KIT PROOF • 离线证据

Nine components default to no sensor, remain human-operable, repairable, and removable, and preserve basic offline service.

Maintenance and removal logs are evidence for continued use.

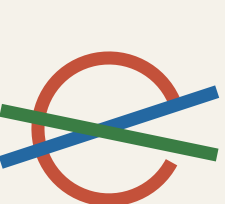

BLOCK / OWNER • 准入阻断

Any failed G0–G4 gate, missing named host, or missing non-AI equivalent blocks launch.

All three contracts remain unauthorised with null performance; owners are legal, fire, data, and operations.

- 01 Eight fields make task, entry, data, accountability, output, and exit auditable
- 02 Nine components work offline, remain repairable, and use no sensor by default
- 03 Any failed G0–G4 blocks launch; all three contracts are unauthorised with null performance

Boundary: provisional rough • Location: concept only • Decision: human final

Three Key Areas: Verify, Co-create, Exchange

03 JINGZHANG ENCOUNTER COMMONS

Three Commons • Three Stoppable Spatial Prototypes

Entry → threshold → core → human stop / exit; plans and sections are non-scaled concepts

01

ZHONGZHIYUAN PROBLEM YARD

CONTROLLED VALIDATION

PLAN

ENTRYTHRESHOLDCORESTOP / EXIT

HUMAN-SCALE INTERFACE / NTS • NO WIDTH OR LOCATION CLAIM

E1 FIRST EVIDENCE

Venue release record + named data / ethics / safety owners

STOP CONDITION

No host, no separation, unclear data boundary, or any safety event

→ PROFESSIONAL HANDOFF

Architecture, structure, fire, access, and venue operations

02

AI ORIGIN COMMON TABLE

90-DAY CO-CREATION PILOT

PLAN

ENTRYTHRESHOLDCORESTOP / EXIT

HUMAN-SCALE INTERFACE / NTS • NO WIDTH OR LOCATION CLAIM

E1 FIRST EVIDENCE

90-day duty roster + no-account, offline, multilingual equivalents

STOP CONDITION

No human host, overload, unchecked translation, or failed offline route

→ PROFESSIONAL HANDOFF

Public service, information access, staffing, and data governance

03

DAZHONGSI CIVIC EXCHANGE (CONCEPT)

TASK PLACEHOLDER • NOT STATION-ANCHORED

Do not infer station links or engineering siting

PLAN

ENTRYTHRESHOLDCORESTOP / EXIT

HUMAN-SCALE INTERFACE / NTS • NO WIDTH OR LOCATION CLAIM

E1 FIRST EVIDENCE

Event-by-event release + heritage, noise, egress, access checklist

STOP CONDITION

Crowd, noise, or egress gate fails; quiet or exit route is blocked

→ PROFESSIONAL HANDOFF

Heritage, fire, event safety, acoustics, and transport operations

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

key_areas • public_space • first_evidence • stop_condition • professional_handoff • v1.1 / 2026-08-09 • Agent-generated original diagram

01 Zhongzhiyuan: entry—problem gate—test core—stop / exit

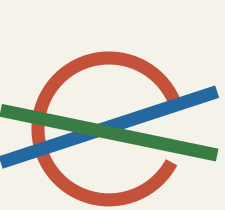

E1 venue release • STOP safety/data • handoff fire/access

02 AI Origin: entry—host gate—co-creation core—offline exit

E1 90-day roster • STOP host/load • handoff service/governance

03 Dazhongsi: urban entry—release gate—first-use core—quiet egress; frame not station-anchored

E1 event release • STOP crowd/noise • handoff heritage/event safety

AI Ecosystem, Personas, Twelve Scenarios, and Operations

S01

Orchestration Interop

public fixture entry • human A release • evidence JSON / rollback

S02

Grounded Multilingual

dated-source entry • bilingual host review • refusal / human transfer

S03

Accessible Event Sandbox

synthetic route and load • access host • stop / recovery record

S04

Cross-campus Project Clinic

published challenge entry • campus host release • 30-day output expiry

S05

Mentor Hour

public slot booking • mentor hosts personally • no private retention / exit

S06

OPC Compliance Clinic

public policy question • professional host • no legal conclusion / referral

S07

Talent/Health Navigation

anonymous service need • human navigator • links only / no health record

S08

Public Test Partners

ethics and safety precheck • venue owner hosts • no approval, no launch

S09

Community AI Co-design

public community issue • resident host confirms • preserve dissent / delete raw

S10

Cultural Guide Co-editing

traceable source entry • heritage sign-off • guide can be withdrawn

S11

Evening Open Demo

time- and noise-limited entry • site safety host • terminate on exceedance

S12

Annual Encounter Week

fresh authority each year • committee human release • output index / public review

- 01 All twelve scenarios remain indexed; S01–S03 replay offline
- 02 The side rail tests a ninety-minute journey for a newcomer with no local account
- 03 Ninety minutes is a target script, not observed performance

90-MINUTE COMPLETE JOURNEY • NOT OBSERVED

Newcomer with no local account: physical sign → human host → public task → output/deletion → visible exit

00ARRIVE

Physical bilingual wayfinding; no scan and no account.

HUMAN: confirms today's entrance, hours, accessible alternative • AI: none

10WALK-IN

A bilingual human explains task, minimum data, complaint, and exit.

Anonymous observation remains; ask language and access need only

20CHOOSE

Select a 45-minute table from authorised tasks; refuse recommendations.

AI filters task/space/time only • the host releases

30–75CONTRIBUTE

Use paper or speech; preserve minority views verbatim.

No profiling or excess collection • AI organisation needs human review

75SEE OUTPUT

Review bilingual output, source/date, and correction route.

A human shows rights state, deletion date, and complaint reference

90DELETE + EXIT

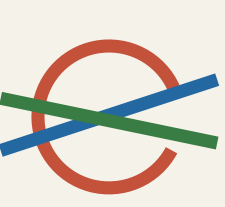

Request deletion of temporary preferences and leave visibly.

Operator restores site and deletes tokens • no persistent account

STOP: no host, critical mistranslation/no source, failed no-account equivalent, blocked accessible exit, or unavailable complaint/deletion.

PROVISIONAL • CONCEPT ONLY • NOT FOR SURVEY, APPROVAL, OR CONSTRUCTION

B06/07 • EN • v1.1 • 2026-08-09

Phasing, Metrics, Evidence, and Risk

05 JINGZHANG ENCOUNTER COMMONS

Metrics Are Traceable Decisions, Not a Number Wall

GeoJSON → formula → metric → drawings/HTML → four review gates

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

metrics.json • geometry/" .geojson • self_check • compliance matrices • v1.1 / 2026-08-09 • Agent-generated original diagram

- 01 Ten-day commissioning → ninety-day baseline → two-cycle review; all targets to test
- 02 Three contracts + five gates + eight handover artefacts; no evidence, no advance
- 03 FAR, height, investment, and municipal capacity stay unknown; recompute with official geometry

Boundary: provisional rough • Location: concept only • Decision: human final

PHASE GATE • 分期规则

Ten working days, ninety days, and two-cycle review are targets to test; only evidence gates release progress.

Elapsed time never means automatic passage or renewal.

AUDIT TRAIL • 证据链

Three contracts, five gates, and eight artefacts each bind A/R, status, evidence file, rollback, and review date.

not_authorized and null must remain explicit and never be reframed as progress.

RETIRE / HANDOFF • 退役 / 移交

No evidence, no advance; pause, roll back, or retire after two cycles without public value, controlled risk, or usable exit.

FAR, height, investment, municipal capacity, and quantities transfer to professional owners.
