

京张相遇公地

JINGZHANG ENCOUNTER COMMONS

Let dense talent create meaningful connections.

AI lowers the cost of encounter; people decide whether to travel together.

One Spine • Three Commons • Two Wings • Six Seams • Twelve reversible scenarios

Document Control and Boundary Status

- 01 Author directory: feixukeji / jingzhang-encounter-commons; version v1.1.
- 02 Chinese and English have isomorphic sections, claims, metrics, figure order, and page count.
- 03 The overall area and three key areas use provisional rough geometry; recompute the full package when official data arrive.
- 04 PROV-KEY-003 is not Dazhongsi Station-anchored and supports no station-route or station-area claim.
- 05 All pilot contracts remain not_authorized and real-world performance is null.
- 06 This open co-creation concept is not statutory planning, professional design, or a government determination.

An Intelligent Commons That Does Not Identify People

06 JINGZHANG ENCOUNTER COMMONS

Encounter Ticket 0.2 • Commons Kit • Five Gates

AI schedules authorised tasks–spaces–times–resources; humans release, stop, restore, and retire

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

encounter-ticket.schema • pilot-contracts • logo.svg • human final • v1.1 / 2026-08-09 • Agent-generated original diagram

JUDGMENT • 判断

AI schedules authorised public tasks, spaces, times, and resources only. It never identifies people, builds profiles, or decides eligibility.

01

EVIDENCE • 证据

The eight-field Encounter Ticket, nine offline-repairable components, and G0–G4 gates link entry, accountability, stop, and output into one auditable chain.

02

STOP / HANDOFF • 停止 / 移交

Block launch without a named human host, non-AI equivalent, hard stop, or recovery condition; hand off to venue, fire, and data-governance owners.

03

Evidence, Sources, and Gaps

01 Primary basis: public announcement, Agent taskbook, repository standards, and Haidian government pages.

02 Mechanism cases: Punggol, Varaamo, Seoul shared spaces, Quartier Jeunes, Kendall Square, and Paris UrbanLab.

03 Local baseline: AI Origin workforce/youth profile; Phase I open at 2.5 km/16.8 ha; the 2024 Phase II plan and 2026 construction status are registered separately.

04 Planned 9 km/approx. 70 ha, 46 entrances, nine links, three paths plus greenery, and eight community areas do not mean the full corridor is currently open or accessible.

05 Unknown: official polygons, as-built entrance register, controls, ownership, heritage/transport/municipal evidence, investment, and operating agreements.

06 Cases transfer mechanisms, never scale, authority, performance, or commitments.

Three-Level Scope: Strategy—System—Prototype

01 JINGZHANG ENCOUNTER COMMONS

One Spine • Three Commons • Two Wings • Six Seams

Turn talent density into public tasks, open time, and shared output

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

OSM context • site_boundary • key_areas • roads • green_space • public_space • v1.1 / 2026-08-09 • Agent-generated original diagram

43.6 km²

Coordinated research
announced

11.41 km²*

Overall design
provisional geometry

368.4 ha

Three key areas
announced

Five regional open interfaces

Methods and de-identified knowledge only; no endorsement

- R1 Beiwei Community
public problems / non-digital service
- R2 Future Science City
models / devices / test methods
- R3 Huairou Science City
measurement / calibration / review
- R4 Beijing E-Town
engineering / making / maintenance
- R5 Beijing-Tianjin-Hebei
schema / failures / version differences

* 11.41 km² = EPSG:4548 provisional polygon calculation

SCOPE JUDGMENT • 尺度判断

The coordinated, overall, and prototype layers answer different questions. Do not collapse 43.6 km², approx. 11.4 km², and the three key areas into one statutory boundary.

01

EVIDENCE STATUS • 证据状态

43.6 km² and 192.1/104.3/72.0 ha are announced figures; approx. 11.41 km² comes from recomputable provisional geometry, not an official polygon.

02

RECOMPUTE / HANDOFF • 重算 / 移交

If official boundaries differ, discard and recompute the whole spatial package; boundary determination belongs to planning, survey, and competent authorities.

03

Overall Structure: One Spine, Three Commons, Two Wings, Six Seams

01 JINGZHANG ENCOUNTER COMMONS

One Spine • Three Commons • Two Wings • Six Seams

Turn talent density into public tasks, open time, and shared output

43.6 km²

Coordinated research
announced

11.41 km²*

Overall design
provisional geometry

368.4 ha

Three key areas
announced

Five regional open interfaces

Methods and de-identified knowledge only; no endorsement

- R1 Beiwei Community
public problems / non-digital service
- R2 Future Science City
models / devices / test methods
- R3 Huairou Science City
measurement / calibration / review
- R4 Beijing E-Town
engineering / making / maintenance
- R5 Beijing-Tianjin-Hebei
schema / failures / version differences

* 11.41 km² = EPSG:4548 provisional polygon calculation

Provisional boundary • conceptual urban design diagram • not for surveying, approval, or construction

OSM context • site_boundary • key_areas • roads • green_space • public_space • v1.1 / 2026-08-09 • Agent-generated original diagram

STRUCTURE JUDGMENT • 结构判断

The Encounter Spine is a continuous sequence of public space, services, and programmes, not a new road, railway, or engineering reserve.

01

DESIGN INVENTORY • 设计证据

Three Commons, two wings, and six seams are agent-designed coordination and audit devices. Their IDs support traceability and do not denote existing facilities.

02

STOP / HANDOFF • 停止 / 移交

Withdraw any connectivity claim if a seam is not continuous and safe on site; transport, access, municipal, and operations teams must verify it.

03

Land Use, Buildings, and the Adaptive-Reuse Gate

02 JINGZHANG ENCOUNTER COMMONS

Functional Overlay and Adaptive Reuse

Complete coverage for topology checks; not existing, ownership, or statutory land use

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

Functional research overlay

0802 R&D + open collaboration

1401 Park + shared open space

05 Industry + professional services

0702 Community + youth services

Carrier decision gate

01 Ownership + current use

02 Structure / fire / MEP

03 Heritage / access / noise

04 Operator + maintenance funding

Remain unknown

FAR, height, total floor area, parking, demolition, underground works

Decide only after professional evidence

land_use • buildings • public_space • green_space • metrics • v1.1 / 2026-08-09 • Agent-generated original diagram

REUSE JUDGMENT • 更新判断

Test whether existing space can work through open protocols and reversible components before proposing new construction or irreversible removal.

01

EVIDENCE LIMIT • 证据边界

The four coverage layers and three building envelopes are agent-design inventories for topology and carrier screening, not current ownership or statutory land use.

02

STOP / HANDOFF • 停止 / 移交

Make no retain/alter/remove decision before ownership, structure, fire, MEP, and access checks; FAR, height, parking, and floor area remain unknown.

03

Walking, Rail, Municipal Systems, and Blue-Green Commons

04 JINGZHANG ENCOUNTER COMMONS

Arrive—Cross—Enter—Stay—Exit

One audit combines walking, blue-green comfort, accessibility, and event safety

KNOWN • 已知

The 2024 public plan describes 9 km, approx. 70 ha, 46 planned entrances, and nine planned links. The 2026 report records completed main works in implementable areas—not a fully open or accessible corridor.

01

INFERENCE • 设计推论

Six seams are representative continuity-audit questions, not the nine planned links. The Encounter Spine is a service/programme sequence, not a new road.

02

FIELD RELEASE • 必须踏勘

Obtain as-built boundary and entrance registers; verify hours, access, crossings, width/slope, lighting, noise, and egress point by point. Do not publish a route with a critical unknown.

03

Three Key-Area Prototypes

03 JINGZHANG ENCOUNTER COMMONS

Three Commons • Three Stoppable Spatial Prototypes

Entry → threshold → core → human stop / exit; plans and sections are non-scaled concepts

01

ZHONGZHIYUAN PROBLEM YARD

CONTROLLED VALIDATION

PLAN

HUMAN-SCALE INTERFACE / NTS • NO WIDTH OR LOCATION CLAIM

E1 FIRST EVIDENCE

Venue release record + named data / ethics / safety owners

STOP CONDITION

No host, no separation, unclear data boundary, or any safety event

→ PROFESSIONAL HANDOFF

Architecture, structure, fire, access, and venue operations

02

AI ORIGIN COMMON TABLE

90-DAY CO-CREATION PILOT

PLAN

HUMAN-SCALE INTERFACE / NTS • NO WIDTH OR LOCATION CLAIM

E1 FIRST EVIDENCE

90-day duty roster + no-account, offline, multilingual equivalents

STOP CONDITION

No human host, overload, unchecked translation, or failed offline route

→ PROFESSIONAL HANDOFF

Public service, information access, staffing, and data governance

03

DAZHONGSI CIVIC EXCHANGE (CONCEPT)

TASK PLACEHOLDER • NOT STATION-ANCHORED

PLAN

HUMAN-SCALE INTERFACE / NTS • NO WIDTH OR LOCATION CLAIM

E1 FIRST EVIDENCE

Event-by-event release + heritage, noise, egress, access checklist

STOP CONDITION

Crowd, noise, or egress gate fails; quiet or exit route is blocked

→ PROFESSIONAL HANDOFF

Heritage, fire, event safety, acoustics, and transport operations

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

key_areas • public_space • first_evidence • stop_condition • professional_handoff • v1.1 / 2026-08-09 • Agent-generated original diagram

PROTOTYPE JUDGMENT • 原型判断

The three key areas are not one programme copied three times: their cores are controlled verification, human-hosted co-creation, and event-by-event exchange.

01

FIRST-EVIDENCE CHAIN • 首证链

Each plan-section names entry, threshold, core, human stop/exit, and binds first evidence to venue release, a duty roster, or event-by-event approval.

02

STOP / HANDOFF • 停止 / 移交

Make no station-route or site claim before official scope and a real candidate venue; hand off respectively to building/fire, public-service governance, and planning/heritage teams.

03

Zhongzhiyuan Common Problem Yard

01 SPATIAL ROUTE

Route: public entry → published-problem threshold → controlled-test core → physical stop / exit.

E1 FIRST EVIDENCE

First evidence: venue release record plus named data, ethics, and safety owners.

STOP CONDITION

Stop condition: no host, no separation, unclear data boundary, or any safety event.

→ PROFESSIONAL HANDOFF

Professional handoff: architecture, structure, fire, access, and venue operations.

01

ZHONGZHIYUAN PROBLEM YARD

CONTROLLED VALIDATION

PLAN

HUMAN-SCALE INTERFACE / NTS • NO WIDTH OR LOCATION CLAIM

E1 FIRST EVIDENCE

Venue release record + named data / ethics / safety owners

STOP CONDITION

No host, no separation, unclear data boundary, or any safety event

→ PROFESSIONAL HANDOFF

Architecture, structure, fire, access, and venue operations

AI Origin Common Table Yard

Dazhongsi Common City Yard

03

DAZHONGSI CIVIC EXCHANGE (CONCEPT)

TASK PLACEHOLDER • NOT STATION-ANCHORED
Do not infer station links or engineering siting

PLAN

HUMAN-SCALE INTERFACE / NTS • NO WIDTH OR LOCATION CLAIM

E1 FIRST EVIDENCE

Event-by-event release + heritage, noise, egress, access checklist

STOP CONDITION

Crowd, noise, or egress gate fails; quiet or exit route is blocked

→ PROFESSIONAL HANDOFF

Heritage, fire, event safety, acoustics, and transport operations

01 SPATIAL ROUTE

Route: urban entry → event-release threshold → first-use / cultural-exchange core → quiet exit and egress; no station route is inferred.

E1 FIRST EVIDENCE

First evidence: official scope and a real candidate site, then heritage, noise, egress, and access checks.

STOP CONDITION

Stop condition: crowd, noise, or egress gate fails; quiet or exit route is blocked.

→ PROFESSIONAL HANDOFF

Professional handoff: planning, transport, heritage, fire, event safety, acoustics, and community.

One Ordinary Person's Complete Ninety-Minute Journey

Seven task personas • eight ecosystem elements • five open interfaces		
Composite scenario: a first-time international newcomer with limited Chinese, no local account, and an empty phone battery.		
Ninety minutes is a design script for a future pilot to test, not an observed service time or performance result.		
00	ARRIVE	Physical bilingual wayfinding; no scan and no account. HUMAN: confirms today's entrance, hours, accessible alternative • AI: none
10	WALK-IN	A bilingual human explains task, minimum data, complaint, and exit. Anonymous observation remains; ask language and access need only
20	CHOOSE	Select a 45-minute table from authorised tasks; refuse recommendations. AI filters task/space/time only • the host releases
30–75	CONTRIBUTE	Use paper or speech; preserve minority views verbatim. No profiling or excess collection • AI organisation needs human review
75	SEE OUTPUT	Review bilingual output, source/date, and correction route. A human shows rights state, deletion date, and complaint reference
90	DELETE + EXIT	Request deletion of temporary preferences and leave visibly. Operator restores site and deletes tokens • no persistent account
STOP: no human host, critical mistranslation/no source, failed no-account equivalent, blocked accessible exit, or unavailable complaint/deletion → stop and hand off to a human.		

Twelve Scenarios and Three Bounded Testbeds

- S01 orchestration interoperability, S02 grounded multilingual public service, and S03 accessible event operations are industry tests.
- Each fixes a public/synthetic fixture, version, human A, evidence JSON, hard stop, rollback, and review date.
- S04–S12 cover cross-campus projects, mentoring, OPC, public services, test partners, community co-design, culture, evening demos, and Encounter Week.

S01
Open problem

fixed fixture • evidence JSON • rollback

S02
Multilingual host

dated sources • refusal • human transfer

S03
Access/risk

synthetic route/load • stop • restore

S04
Cross-campus

public topic • human release • 30-day expiry

S05
Mentor hour

no chat retention • mentor confirms • exit

S06
OPC compliance

public policy • professional explains • not legal advice

S07
Service navigation

no diagnosis • links only • no health record

S08
Test partners

ethics/safety first • public result • no approval, no start

S09
Community co-design

preserve dissent • host confirms • delete raw text

S10
Culture co-edit

traceable sources • specialist sign-off • withdraw

S11
Evening demo

time/noise limits • human host • stop

S12
Encounter Week

new permission • output index • review

Ten Projects, Three Contracts, Five Gates, Eight Artefacts

05 JINGZHANG ENCOUNTER COMMONS

Metrics Are Traceable Decisions, Not a Number Wall

GeoJSON → formula → metric → drawings/HTML → four review gates

Provisional boundary • conceptual urban-design diagram • not for surveying, approval, or construction

metrics.json • geometry/"geojson • self_check • compliance matrices • v1.1 / 2026-08-09 • Agent-generated original diagram

PHASE JUDGMENT • 分期判断

Evidence gates, not the calendar alone, release each phase. The ten-working-day pack and ninety-day baseline remain targets to test.

01

AUDIT TRAIL • 可审计证据

Three contracts, five G0–G4 gates, and eight commissioning/handover artefacts form a machine-checkable accountability chain.

02

STOP • 停止

Do not advance without named A/R, every gate record, and rollback evidence. not_authorized and null can never be narrated as started or effective.

03

PROFESSIONAL HANDOFF • 专业移交

FAR, height, investment, municipal capacity, and engineering quantities stay unknown pending planning, engineering, cost, and operator evidence.

04

Risk, Rights, and Next Step

01 Privacy: prohibit face, contacts, precise trajectory, emotion/health inference, relationship graphs, and personal scores.

02 Spatial: all frames are provisional; PROV-KEY-003 is not station-anchored; replace the whole package when official data arrive.

03 Operations: named A/R, non-AI equivalent, emergency stop/recovery, two-cycle review, and explicit retirement.

04 Equity: free basic participation, multilingual plain text, quiet periods, accessibility, and community veto of exclusion.

05 Rights: the low-contrast OSM-derived vector context is attributed under ODbL, supports orientation only, and is not official evidence; no third-party raster imagery, photographs, or trademarks; Noto Sans SC uses the OFL.

06 Next: rerender, finalise, self-check, and preflight against latest main; refresh hashes after every content change.
