非官方红线

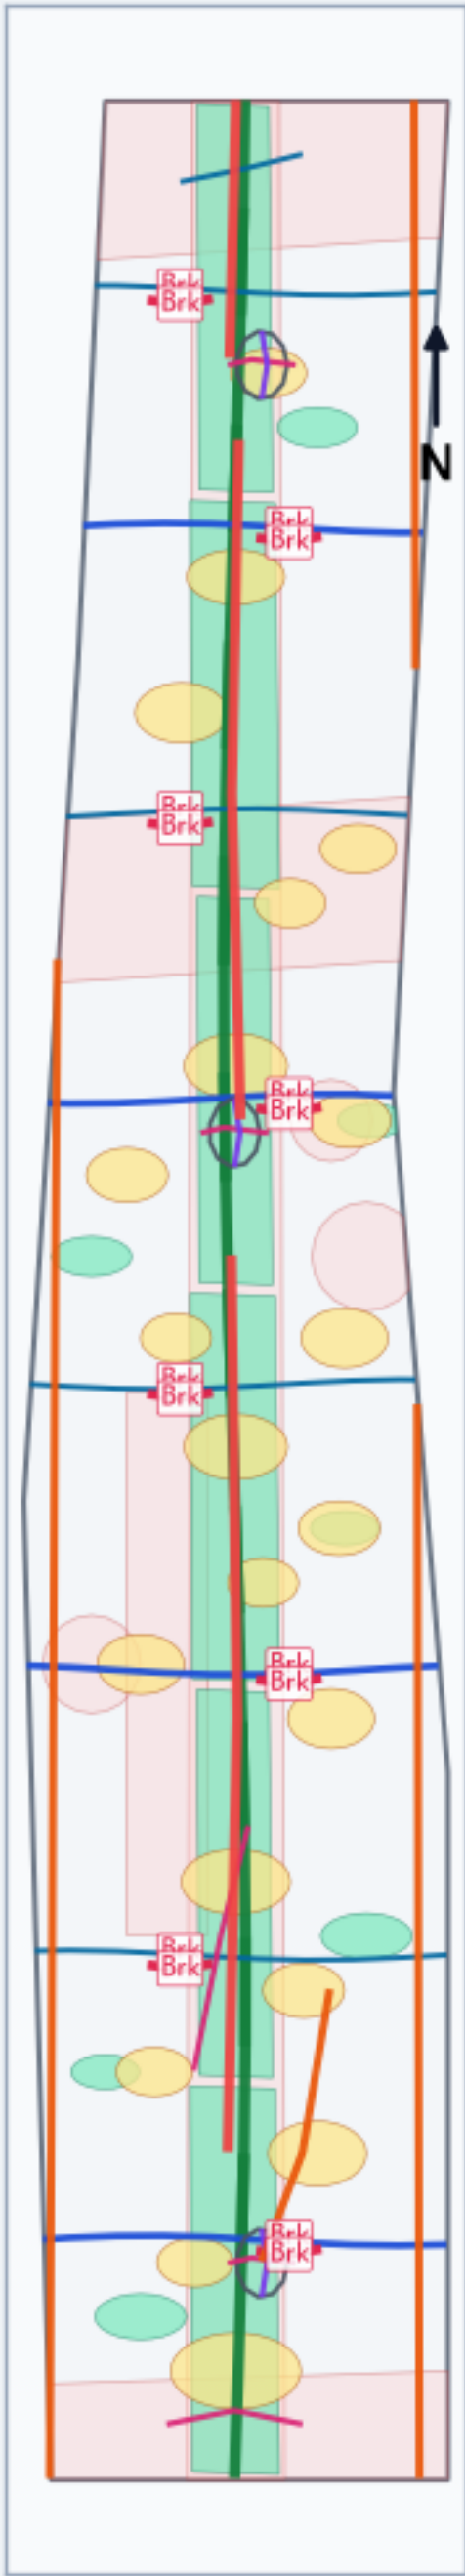

Open Protocol Spine = public spine as versioned City API.
Interface: 12 scenario endpoints; Permission: 4 data grades;
Rollback: pause tests / remove kits; Audit: honor wall + forum.
Buildings: courtyard clusters + spine interface bars.
Roads encode break-diagnosis and repair seams.
Provisional boundary; EPSG:4548 areas; conceptual only.

Schematic only | provisional non-redline | conceptual reference

非官方红线

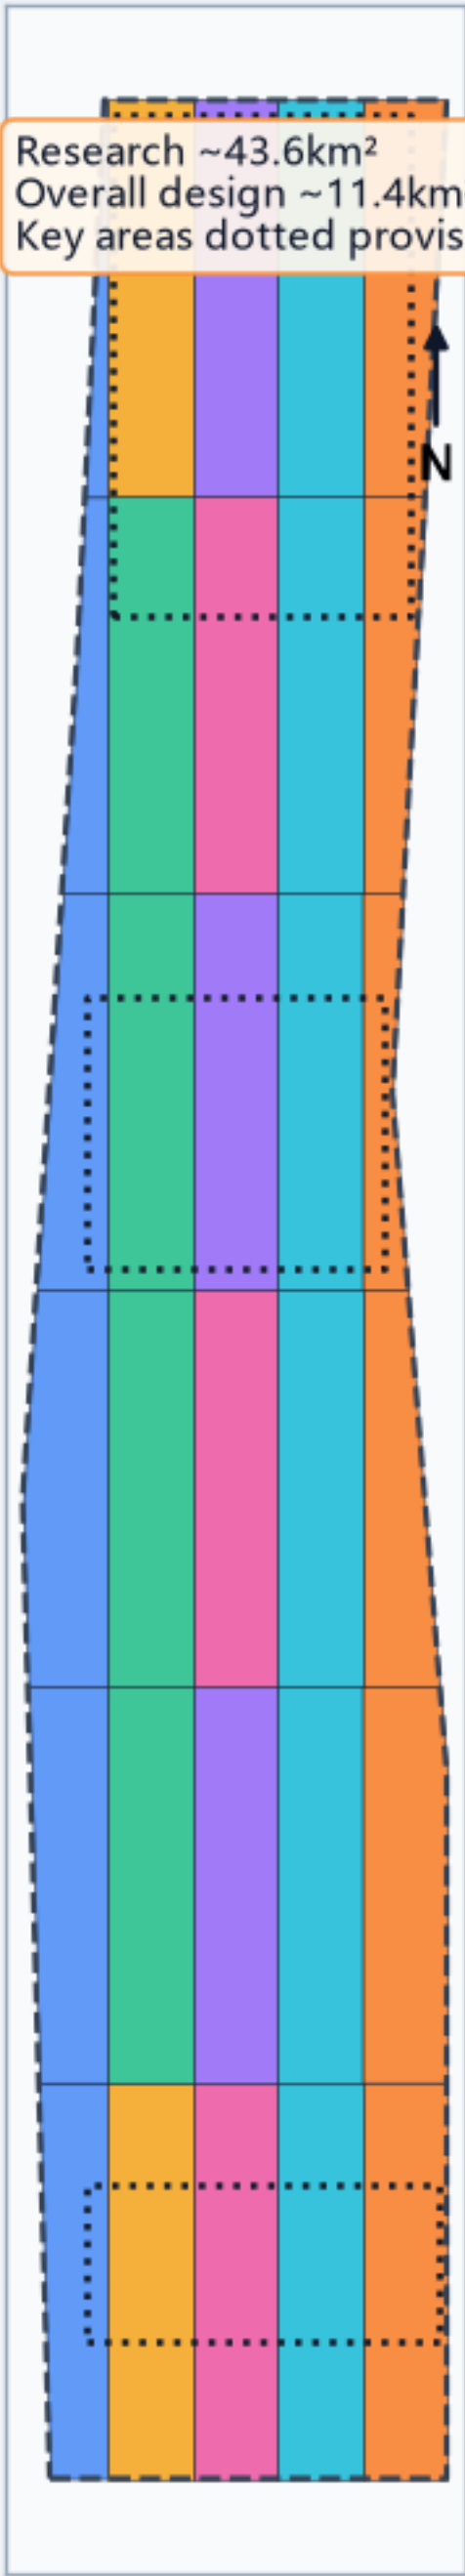

P01 spine severance → OS-01 · P02 station-city weak → OS-05
P03 campus edge locked → OS-04 · P04 test nuisance → SCN-02 rollback
P07 energy NIMBY → OS-06 · P08 heritage unknown → buffer
P09 robot conflicts → OS-14 yield rules
Red = pending constraints; pink = break diagnosis; paired repair segments.
All pending — not official control lines.

Concept centerlines, not redlines; robots yield to pedestrians/accessibility

非官方红线

Block/function units with central green spine.
Renewal: slow mobility + protocol nodes before deep rebuild.
RRD typology only — no plot verdicts without ownership.
Statutory FAR/height/setbacks remain unknown.

N-S greenway + E-W seams; concept centerlines not redlines.
Encoded: spine / seams / break-diagnosis / repair / station-city / robot trials.
Robots yield to pedestrians/accessibility; stop on failure.
Edge compute non-engineering without utilities evidence.

Three key areas — differentiated detail

Verify / Origin / Experience · detail layers + risk overlays

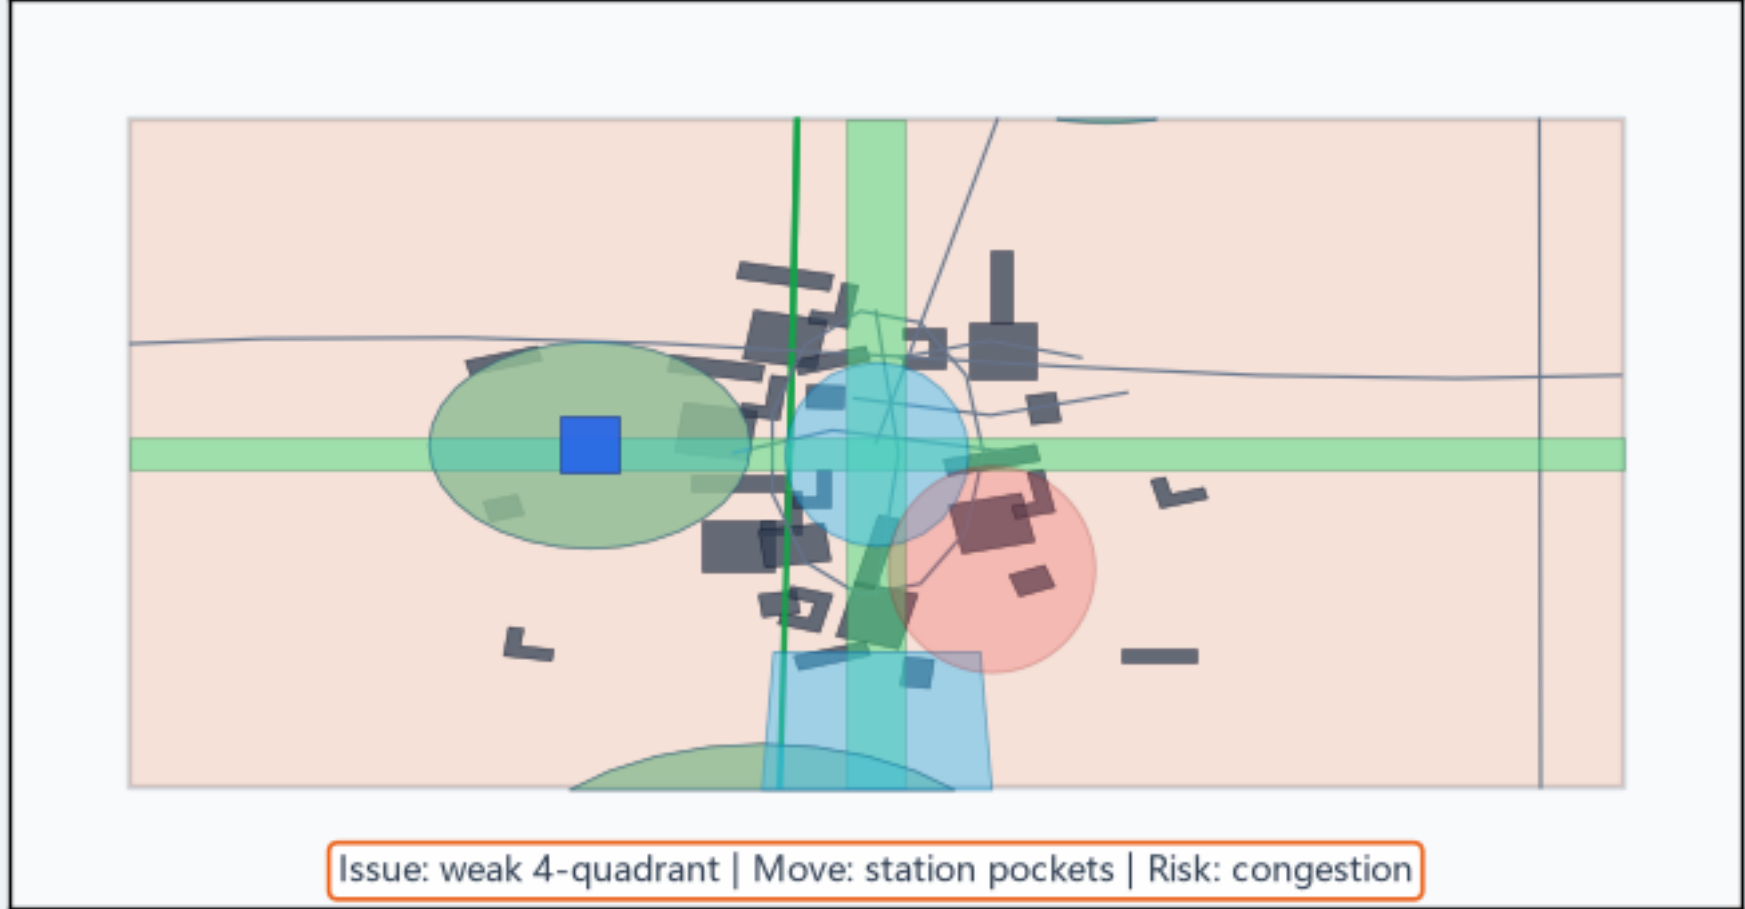

Zhongzhiyuan Verify

Origin Open-source

Dazhongsi Experience

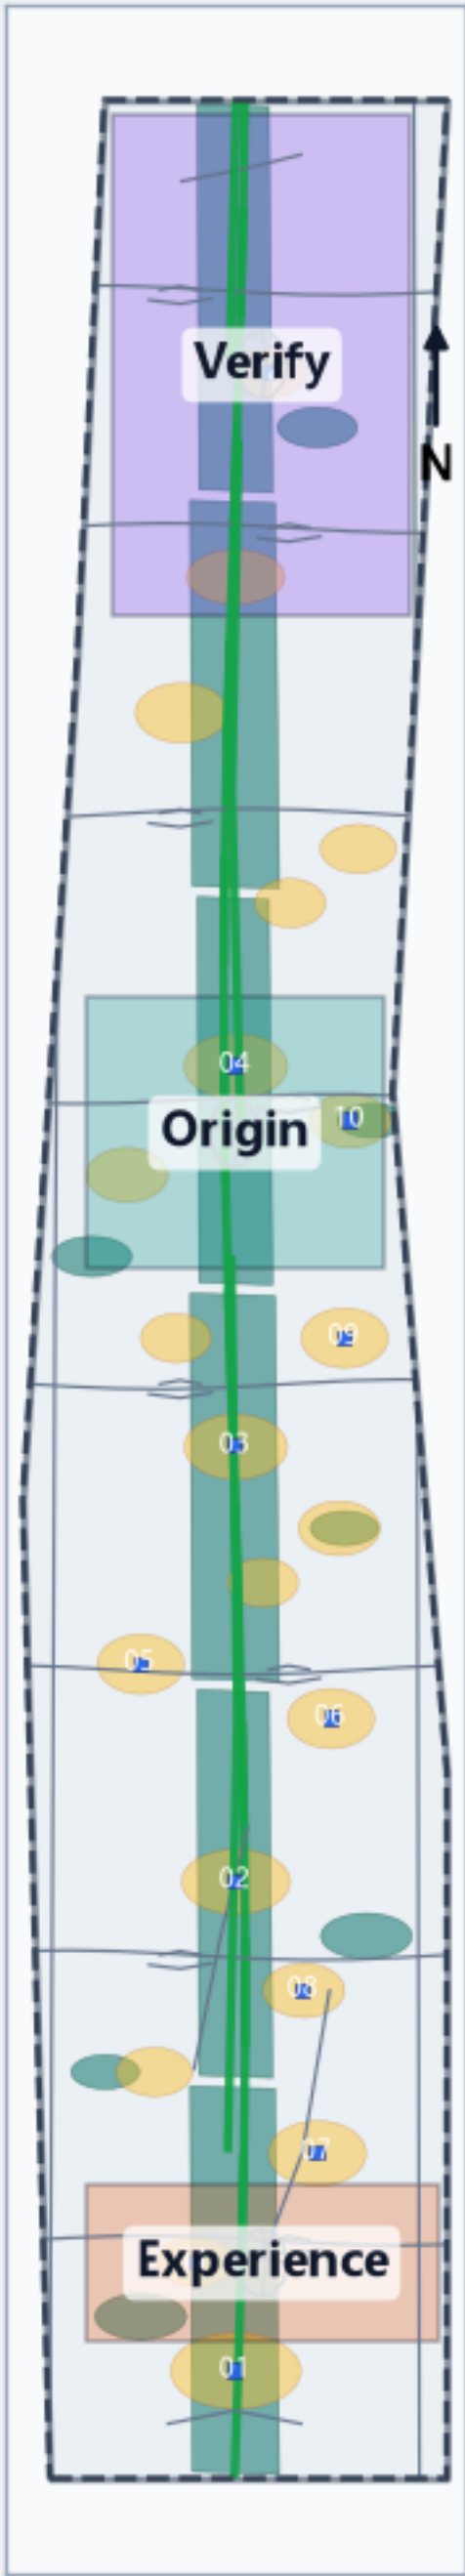

Each area: entry · spine · cross-seam · court · scenario anchors · risk overlay (pending) | conceptual

Zhongzhiyuan: waterfront sandbox + forum (SCN-02/04/12).
Origin: release-transfer-honor (SCN-01/06/11).
Dazhongsi: four-quadrant station-city (SCN-05/07/10).
Each detail pack is deepen-ready. KEY_AREA provisional.

11,412,825m²	0.2248	0.0933	156	54

Core metrics recalculation & evidence chain

EPSG:4548 · known/unknown · four gates · provisional medium confidence

Geometry evidence base

Metrics table (= metrics.json)

Site area m²	11,412,825.386	known · medium
Green ratio	0.2248	known · medium
Public ratio	0.0933	known · medium
Buildings	156	known · medium
Road segs	54	known · medium
Land units	30	known · medium
Footprint dens.	0.0143	known · medium
FAR	unknown	unknown · low

Chain: EPSG:4548 area → sum(layer) → ratio
Gates: deterministic / spatial / visual / professional
Statutory FAR remains unknown

4326 store → 4548 area → metrics.json; confidence medium.
FAR etc. unknown. Matrices navigate evidence.
All content is conceptual reference — not statutory planning.

medium confidence matches provisional boundaries; figures are not approval areas
