

Jing-Zhang AI: A New Chapter for People, City, and Shared Endeavor

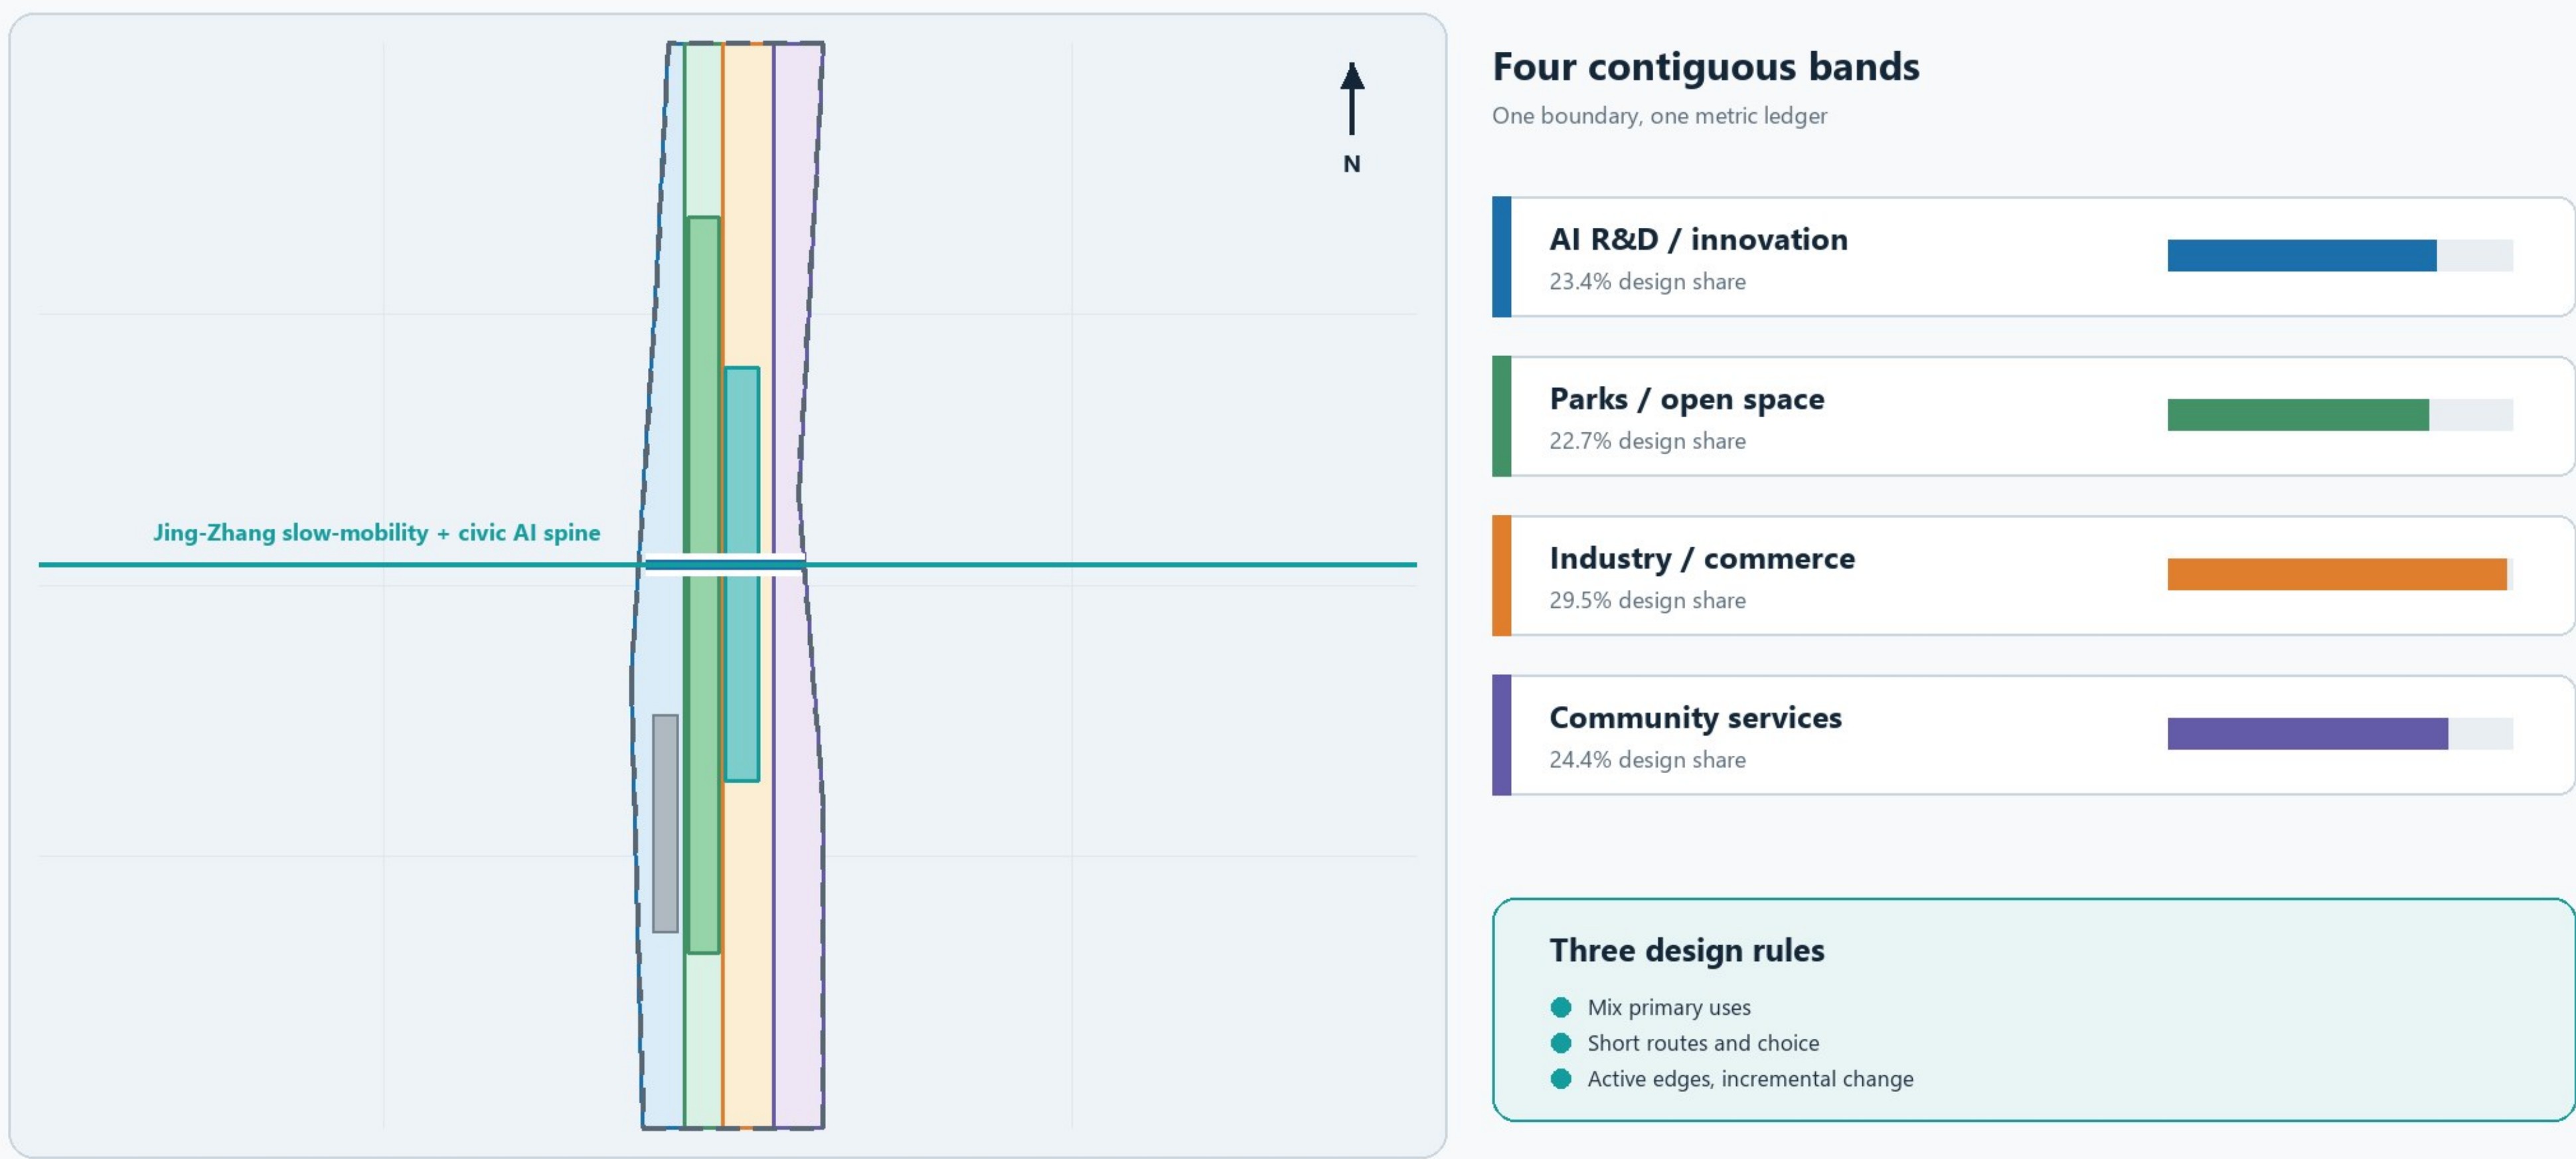

A concept spine connecting railway memory, open innovation and everyday public life

DATA STATUS: provisional boundary and design layers for concept review only; OSM is a background proxy. POI, blue-green and field public-life data are unavailable.
Sources: submission geometry/"-geojson and metrics.json; official boundary and controls remain pending.

Three-layer land structure: turn mixed use into a walkable public interface

Concept bands for discussion; they do not replace statutory land-use controls

DATA STATUS: provisional boundary and design layers for concept review only; OSM is a background proxy. POI, blue-green and field public-life data are unavailable.
Sources: submission geometry/"-geojson and metrics.json; official boundary and controls remain pending.

Three key areas: three testbeds for accountable innovation

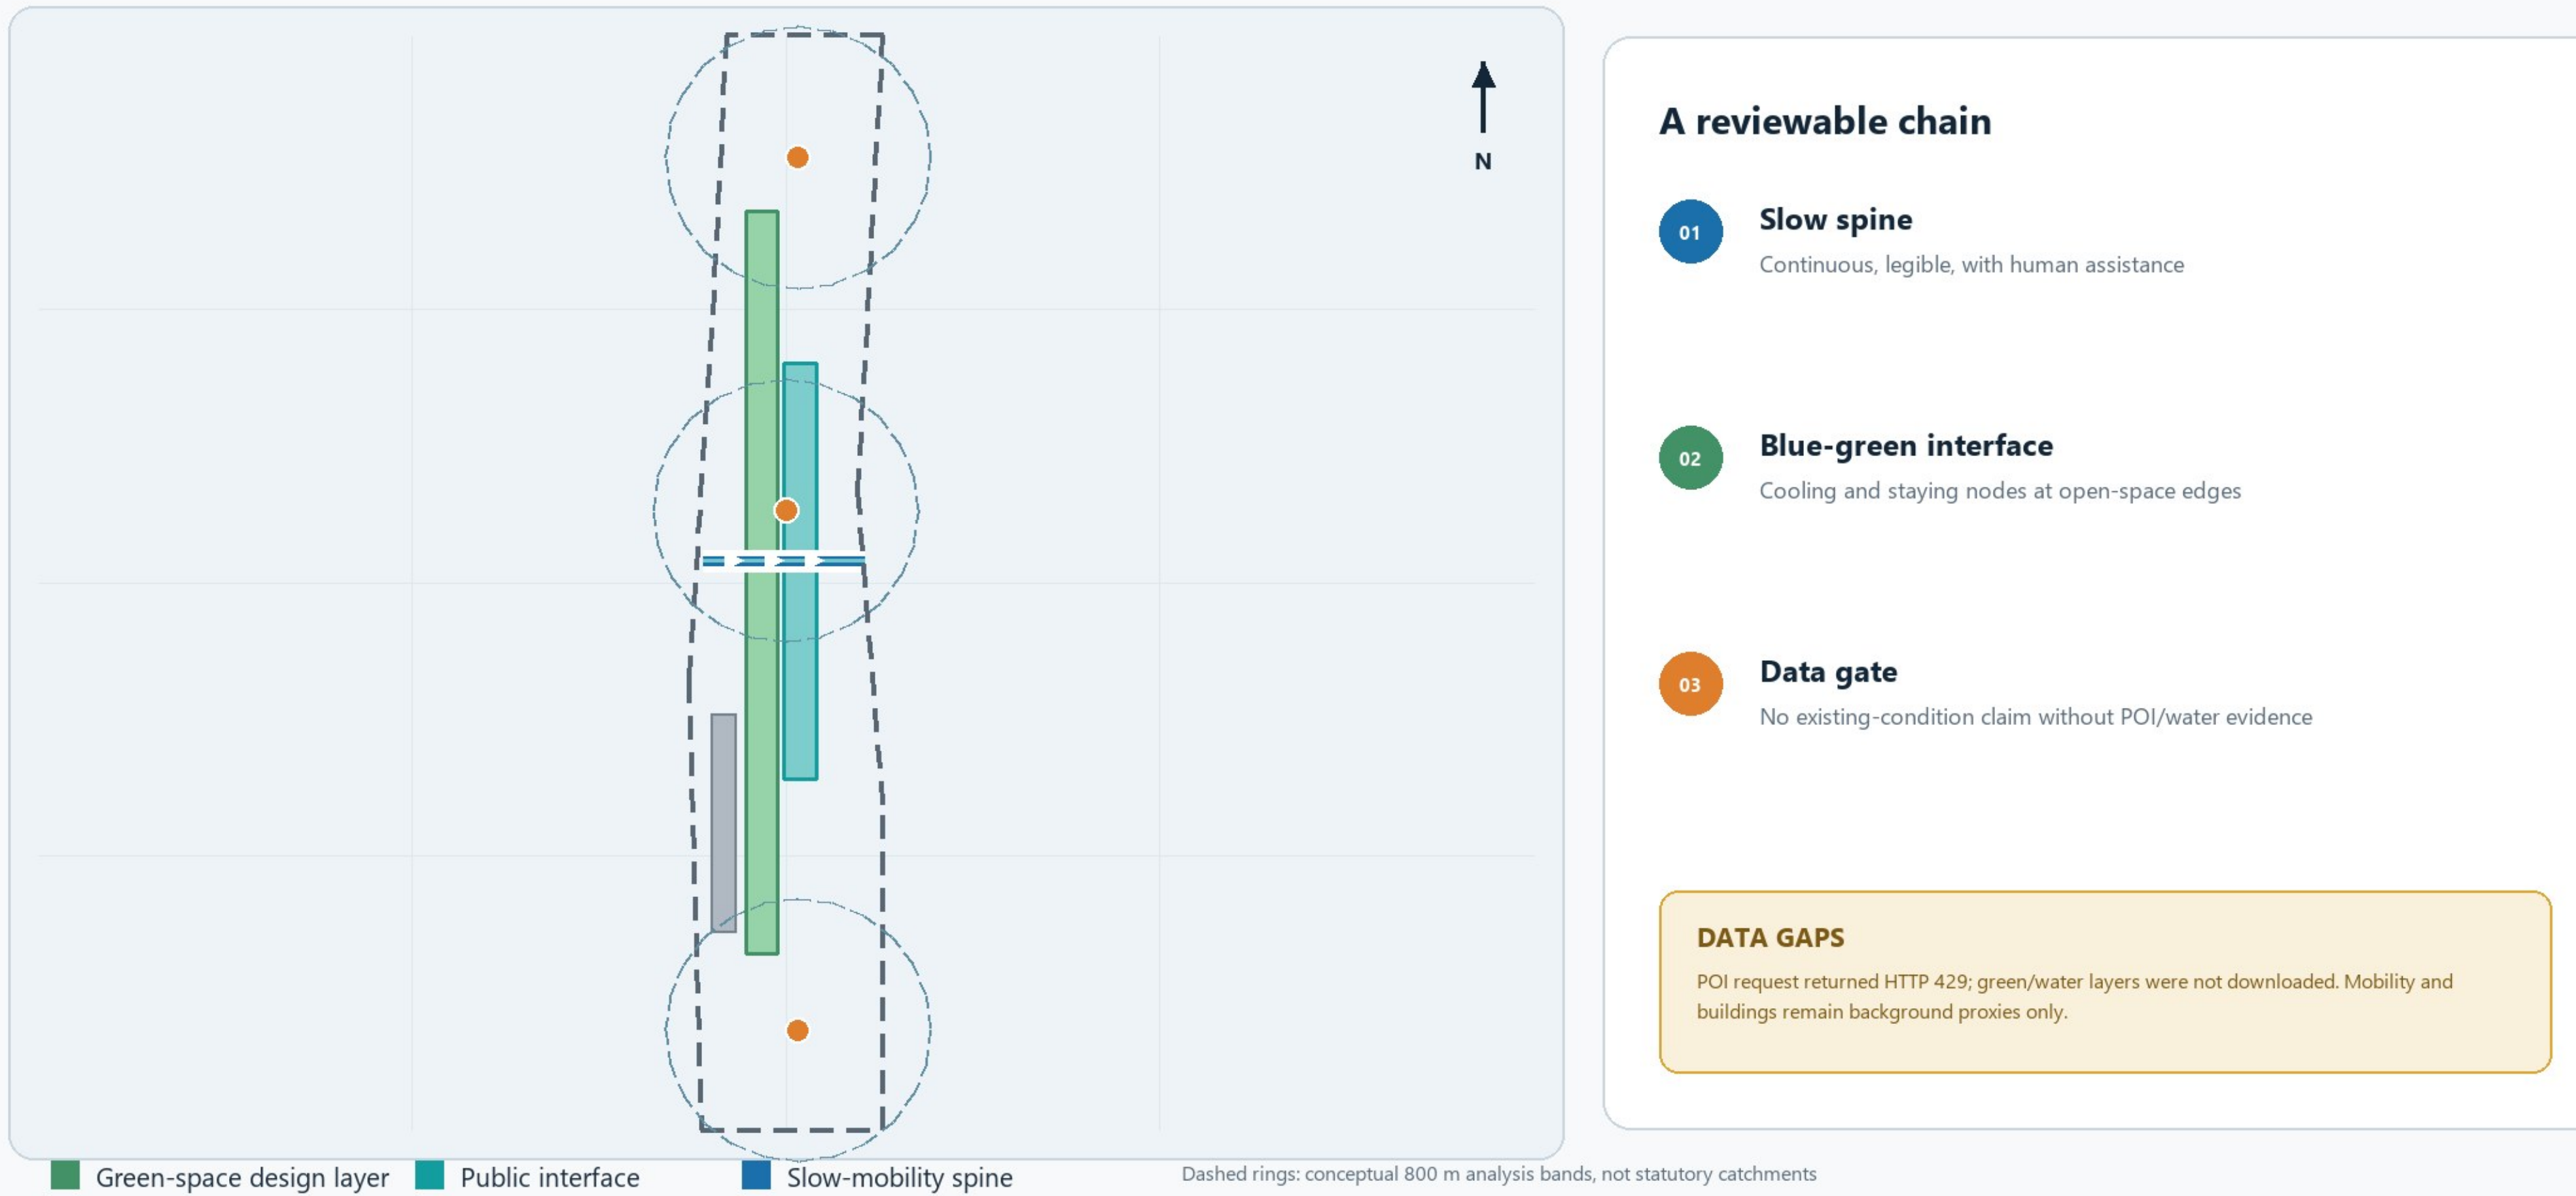

Key-area polygons are provisional; moves are concept suggestions for professional deepening

DATA STATUS: provisional boundary and design layers for concept review only; OSM is a background proxy. POI, blue-green and field public-life data are unavailable.
Sources: submission geometry/*-geojson and metrics.json; official boundary and controls remain pending.

Slow mobility + blue-green screening: connect people before AI

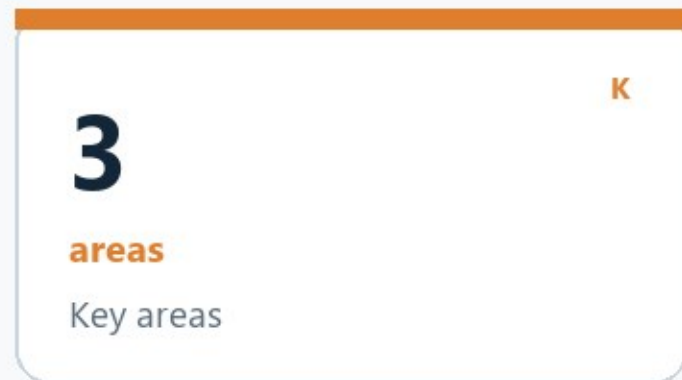

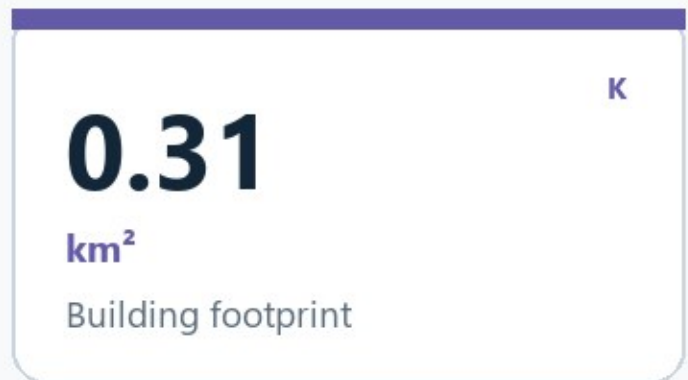

Design hypotheses and data gaps, not a survey or engineering conclusion

DATA STATUS: provisional boundary and design layers for concept review only; OSM is a background proxy. POI, blue-green and field public-life data are unavailable.
Sources: submission geometry/*-geojson and metrics.json; official boundary and controls remain pending.

Known values come from submitted geometry; unknowns stay open until evidence arrives

11.41
km²
Study extent

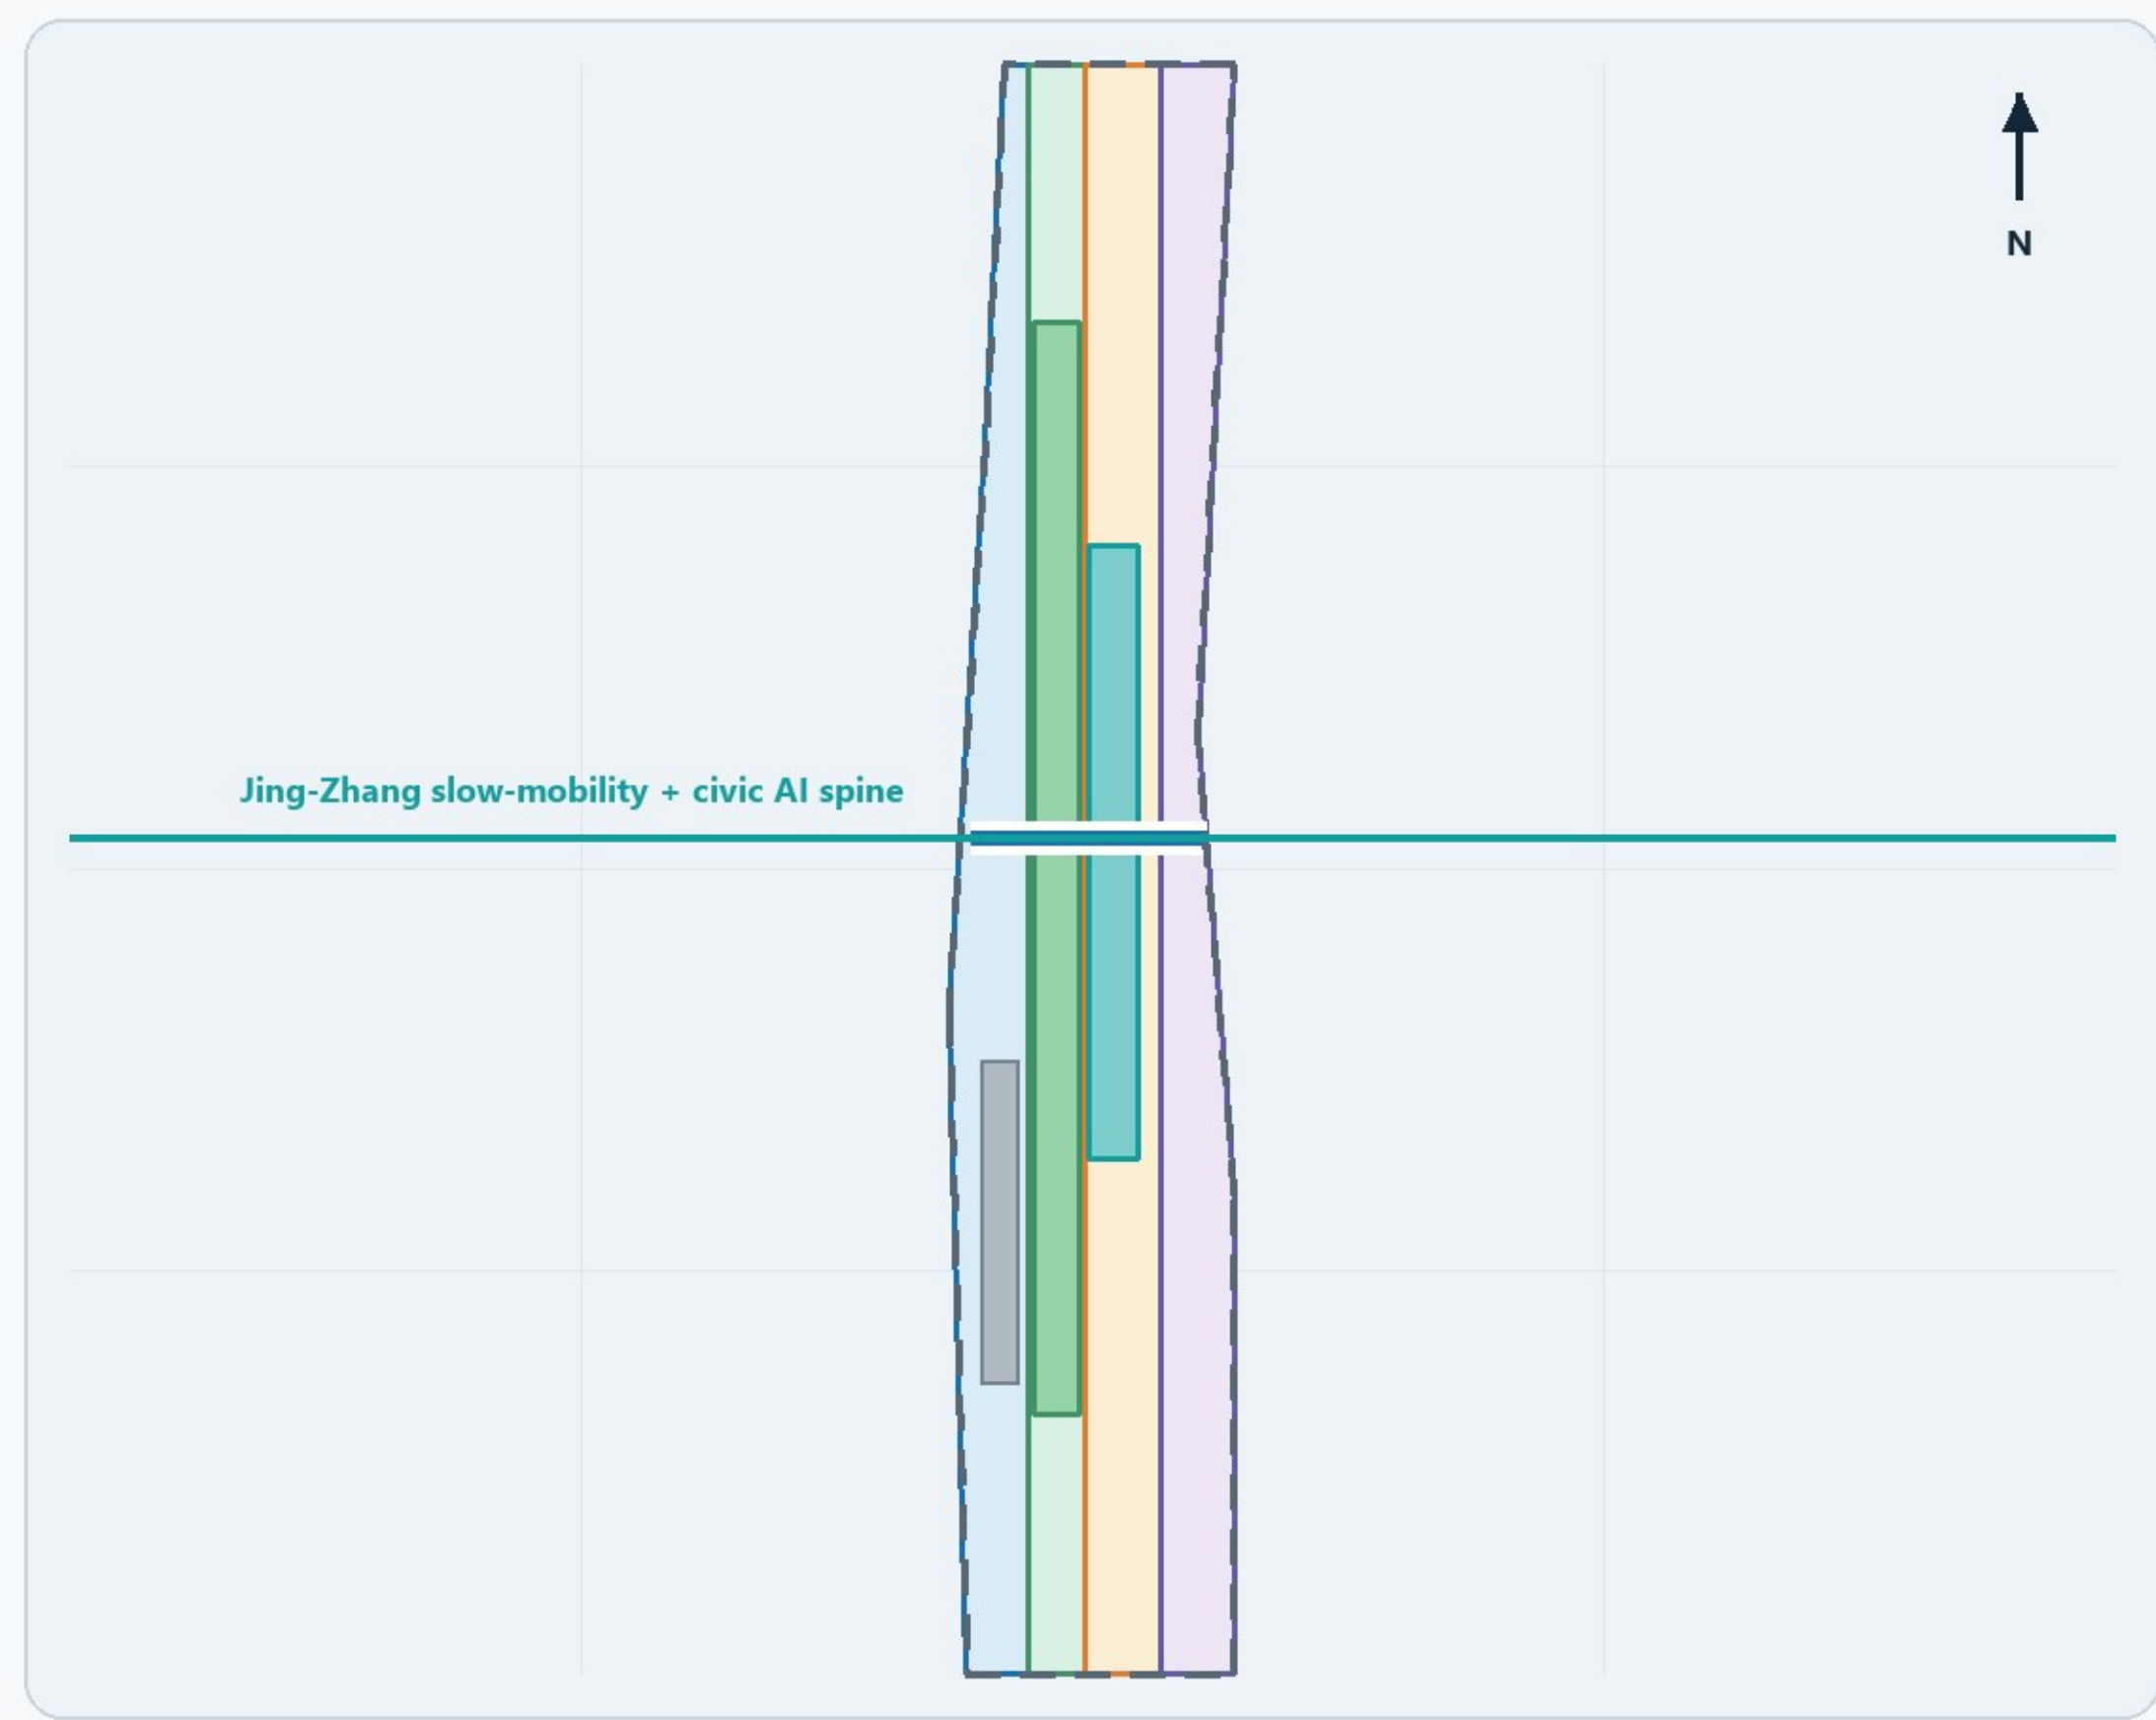

- 1 Diversity**
Mixed uses, times and operator scales
- 2 Public life**
Arrival, staying, comfort and human fallback
- 3 Low-car**
Walking, cycling and transit before capacity

- ☒ Land-use entropy
- ☒ Intersection density
- ☒ Public-life counts
- ☒ Accessible continuity
- ☒ Shade coverage

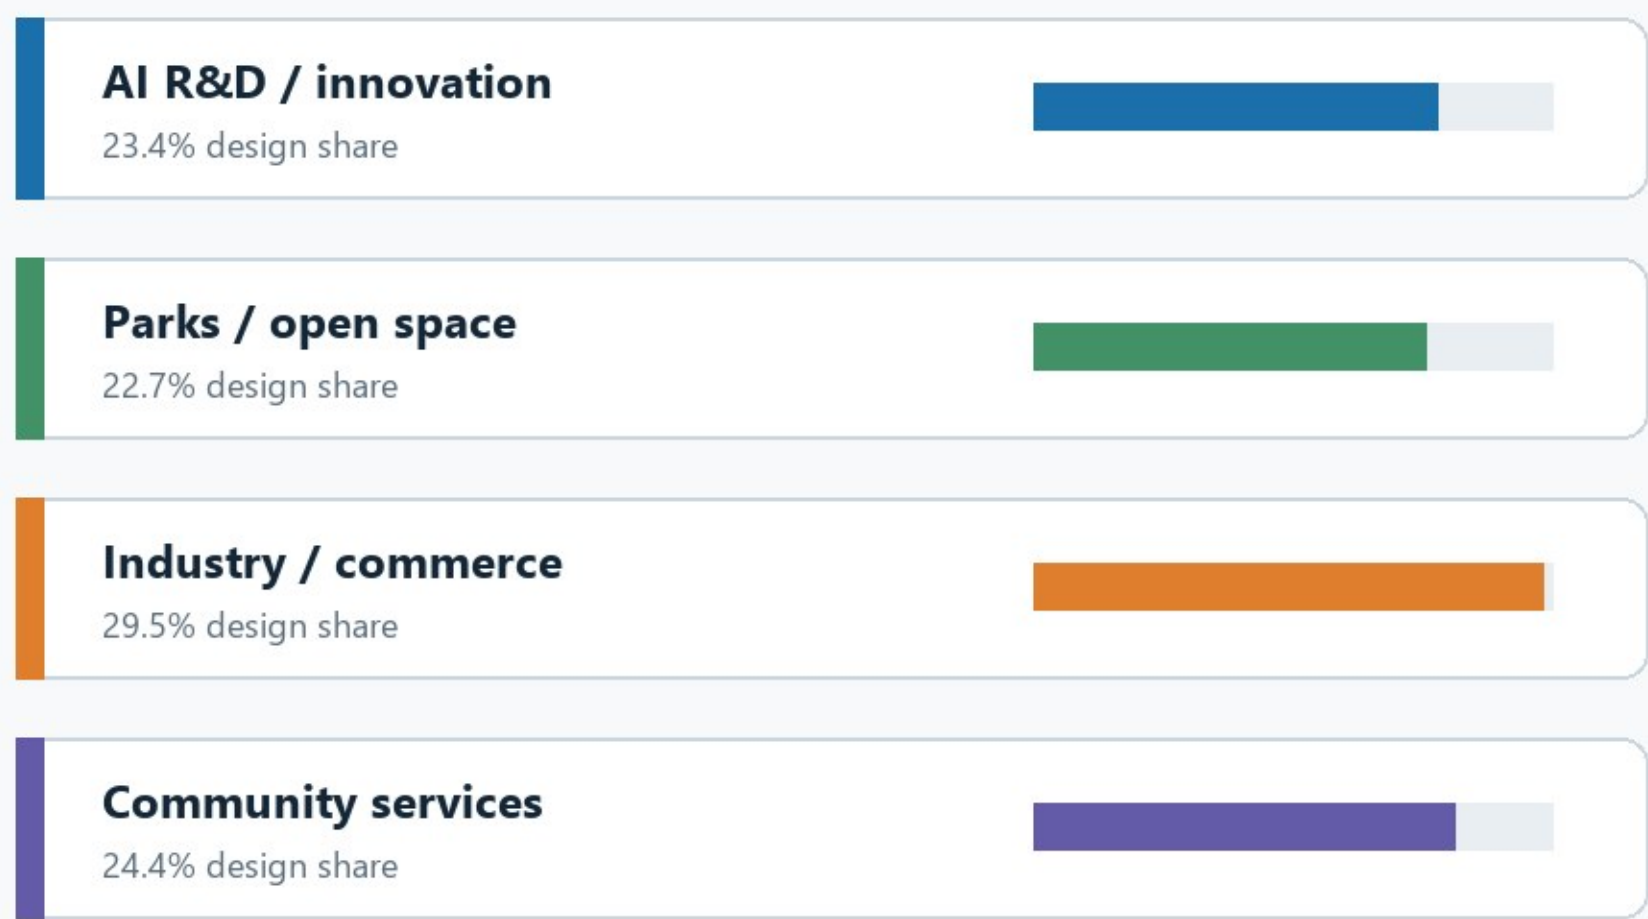

An AI scenario enters public-space testing only after authorized data, method, limits and human fallback are declared.

DATA STATUS: provisional boundary and design layers for concept review only; OSM is a background proxy. POI, blue-green and field public-life data are unavailable.
Sources: submission geometry/"_geojson and metrics.json; official boundary and controls remain pending.

Concept bands for discussion; they do not replace statutory land-use controls

One boundary, one metric ledger

- Mix primary uses
- Short routes and choice
- Active edges, incremental change

DATA STATUS: provisional boundary and design layers for concept review only; OSM is a background proxy. POI, blue-green and field public-life data are unavailable.
Sources: submission geometry/*.geojson and metrics.json; official boundary and controls remain pending.
