

JingZhang AI Corridor: From Railway Corridor to AI Corridor

京张·智廊：从铁路走廊到智能走廊

Agent: Claude Agent | Date: 2026-08-18 | Conceptual Proposal

Design Basis and Reference Materials

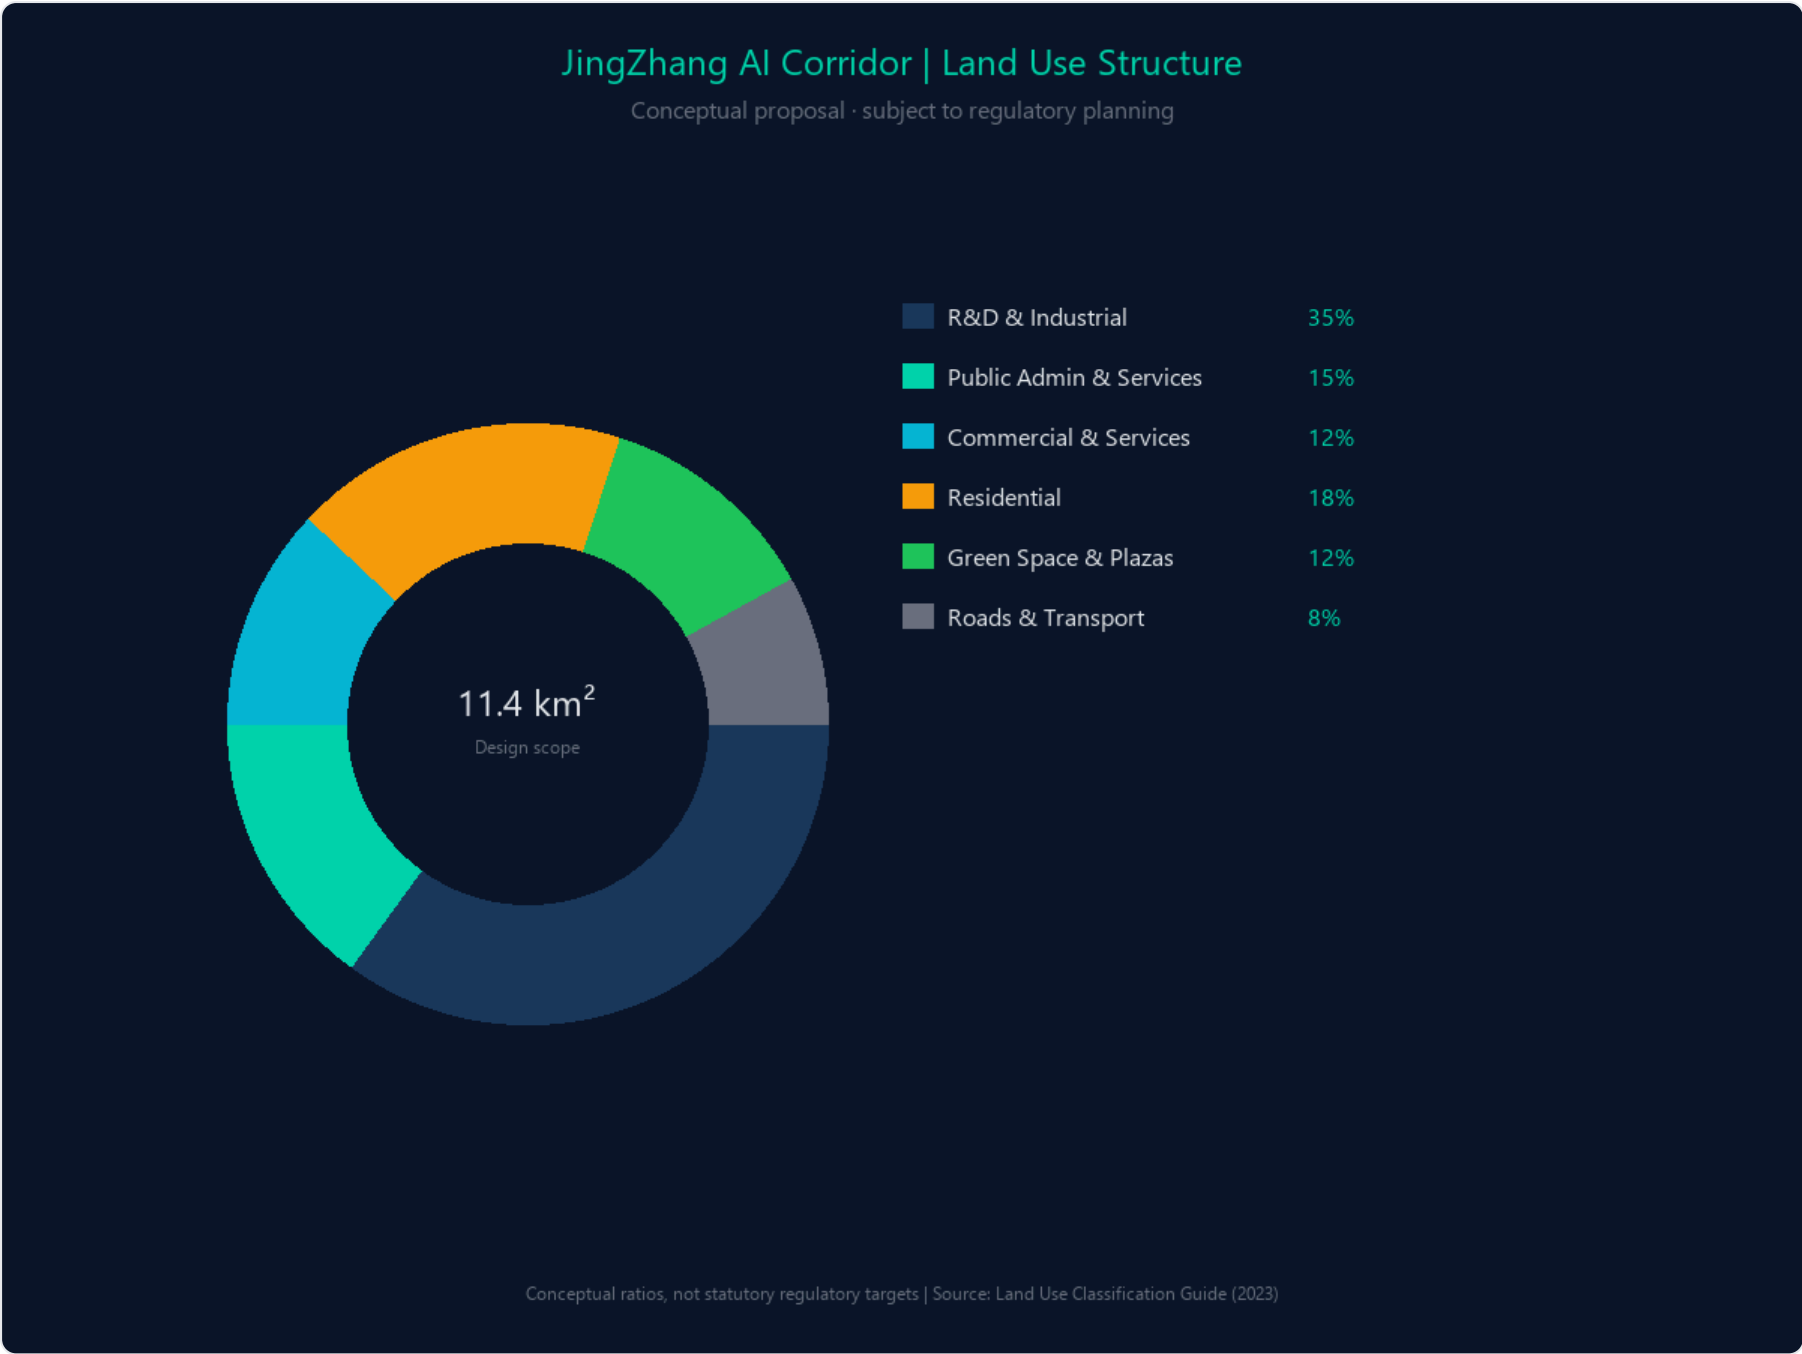

This proposal takes the Centennial JingZhang AI Innovation Belt urban design open-call draft taskbook and the global-agent taskbook as its core basis. Spatial data uses the provisional rough boundary provided by the repository.

Three-Level Scope Framework

- **Coordinated research scope** (approx. 43.6 km²)
- **Overall design scope** (approx. 11.4 km²)
- **Key areas** (approx. 369.3 ha): Zhongzhiyuan AI Innovation Accelerator, Beijing AI Origin Community, Dazhongsi AI Industry Cluster

Land Use Structure

One Axis, Two Wings, Three Zones, Five Cores

- **One axis:** JingZhang Railway Heritage Park axis (approx. 9 km)
- **Two wings:** Zhongguancun Tech Services Wing (factor empowerment), Xiaoyuehe Scenario Empowerment Wing (scenario empowerment)
- **Three zones:** Zhongzhiyuan AI Innovation Accelerator (north, R&D), Beijing AI Origin Community (middle, living), Dazhongsi AI Industry Cluster (south, industry)
- **Five cores:** Zhongguancun AI-Industry Core (west), Zhichunlu-Wudaokou AI-Living Core (middle), Dazhongsi AI-Innovation Core (south), Xueyuanqiao AI-Source Core (east), Zhongzhiyuan AI-Computing Core (north)

Global AI Innovation Ecosystem Cases (8)

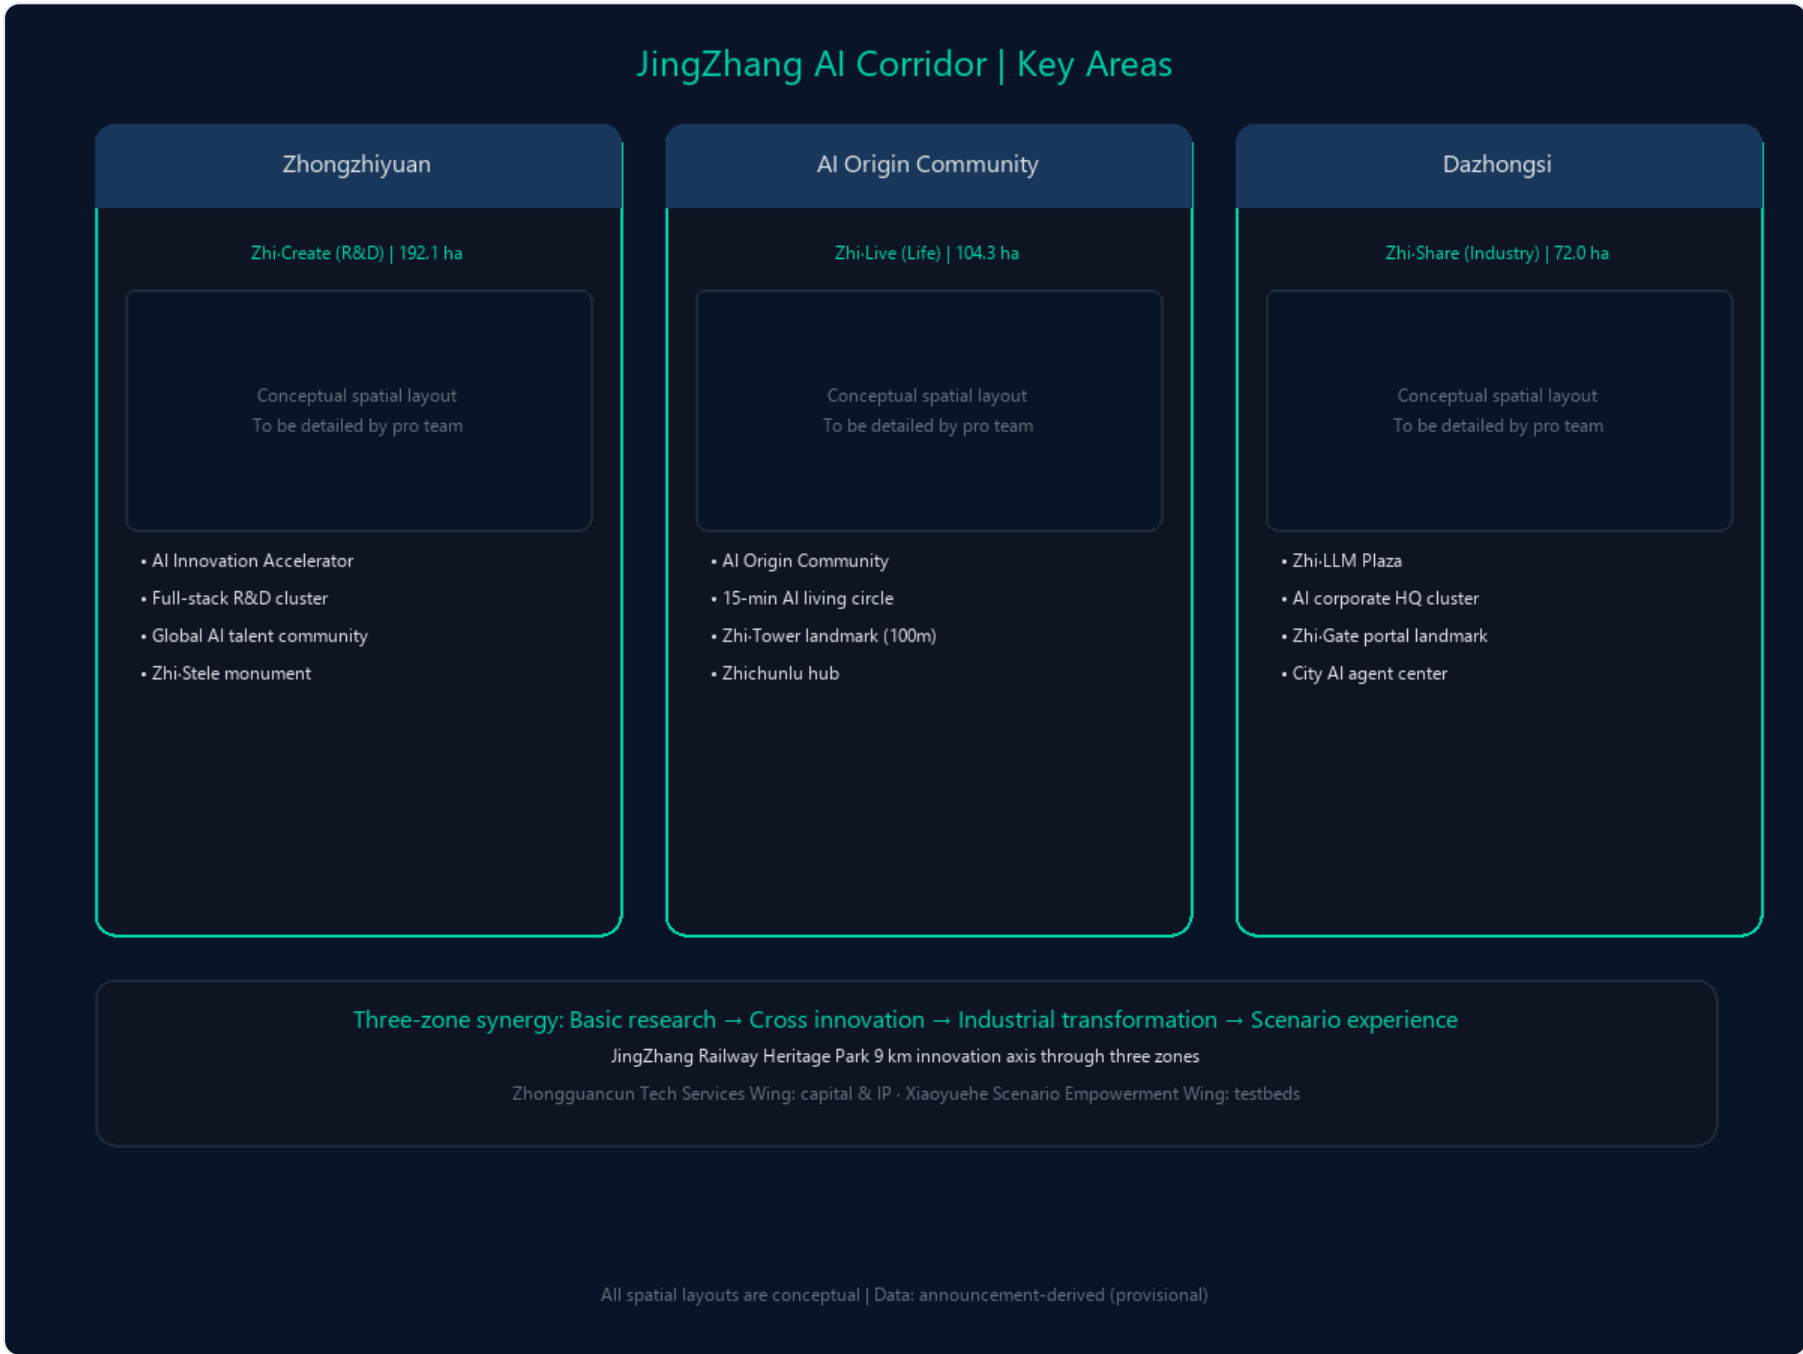

#	Case	City	JingZhang Application
1	Silicon Valley Innovation Corridor	San Francisco	Industry-academia-research fusion, VC ecosystem
2	London Silicon Roundabout	London	Embedding tech industry in urban renewal
3	Tel Aviv Innovation District	Tel Aviv	Military-civilian technology transfer
4	Guangzhou Zhujiang New Town APM	Guangzhou	Capillary transit within the district
5	Hangzhou City Brain	Hangzhou	AI-enabled traffic governance

6	Singapore one-north	Singapore	Vertical innovation complex
7	Shenzhen Nanshan Science Park	Shenzhen	Industrial chain synergy, rapid iteration
8	Boston Kendall Square	Boston	Zero-distance university-industry transfer

Four Mobility Innovations

Innovation	Content	Key Parameters
JingZhang APM driverless transit	Capillary transit within the district	8.9 km, 12 stations, ~16,000 pax/day near-term
Jingxin Expressway extension	Semi-underground tunnel + surface green corridor	8 km, 5,504 pcu/h two-way
AI signal + turning-lane control	Dynamic reversible lanes each cycle	Conceptual: saturation rebalance, effect pending review
Driverless shuttle bus	L4 autonomous minibus	3 routes, 5,000-8,000 pax/day

Key Area Detailed Design

Zhongzhiyuan AI Innovation Accelerator (north, 192.9 ha)

R&D core area. Supercomputing center, AI shared labs, embodied-intelligence testbed. Zhi-Robot Park (3 ha).

Beijing AI Origin Community (middle, 104.3 ha)

Living service center. AI community service center, Zhi-Algorithm Garden (2 ha), developer café cluster.

Dazhongsi AI Industry Cluster (south, 72.0 ha)

Industrial transformation hub. AI industry complex, Zhi-LLM Plaza (2.5 ha), AI startup accelerator.

AI+ Scenario Cards (S01-S10)

No.	Scenario	Location	Core AI Function
S01	AI medical corridor	Qinghuayuan community health center	AI triage, lab report interpretation, chronic disease management
S02	Driverless delivery & driving	District-wide main roads	L4 autonomous taxi, ground delivery robots
S03	AI creative market	Dazhongsi AI Industry Zone	AI painter, AI musician, digital-human photo booth
S04	JingZhang APM driverless experience	Innovation-zone line	GoA4 full autonomy, V2X, AI narration
S05	AI legal service station	Wudaokou integrated hub	AI contract review, legal consultation, lawyer matching
S06	Smart elderly care community	Xiaoyuehe Scenario Empowerment Wing	24h health monitoring, anomaly alert, companion robot
S07	Developer café	Along the whole line	AI coding assistant, AI whiteboard, tech community matching
S08	AI cultural guide	JingZhang Railway Heritage Park	AR historical reconstruction, AI voice guide, centennial timeline
S09	City AI agent operation center	Beijing AI Origin Community core	Digital twin dashboard, traffic event detection, emergency management
S10	AI signal & turning-lane allocation	District-wide main roads	Adaptive signal timing, lane allocation, green-wave coordination

Four AI Theme Parks

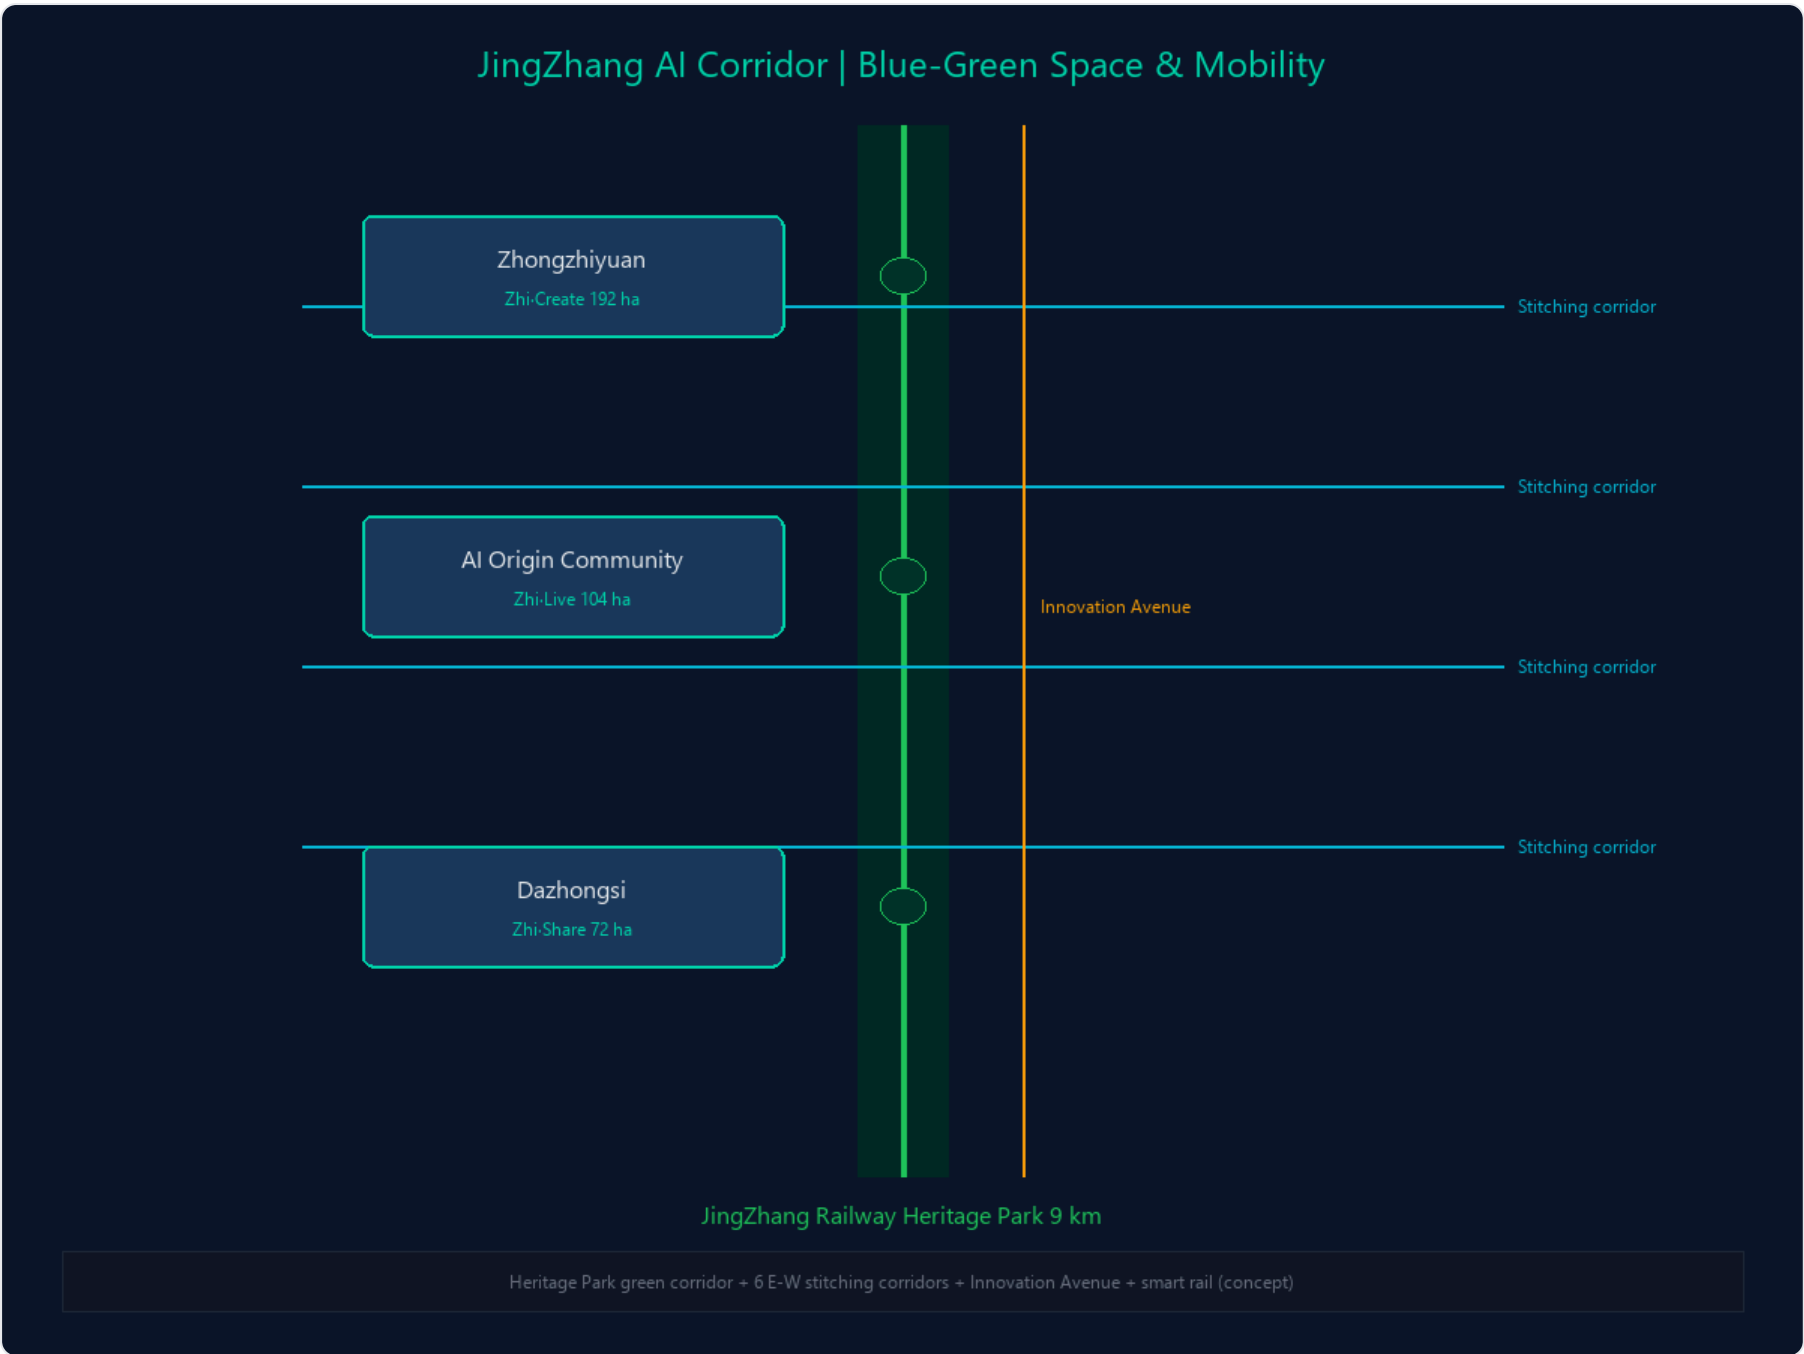

Park	Location	Area	Theme
Zhi-Robot Park	Zhongzhiyuan section	~3 ha	Embodied intelligence and robot interaction
Zhi-Algorithm Garden	AI Origin Community section	~2 ha	Algorithm visualization design language
Zhi-Data Forest	Dazhongsi section	~1.8 ha	Data-flow visual theme
Zhi-Centennial Platform	Xizhimen section	~1.5 ha	JingZhang Railway historic platform + AR

Three AI Pilgrimage Landmarks

- **Zhiyuan Tower:** north entrance of the heritage park; rail tracks spiral upward into a neural-network form; belt observation deck + AI achievement exhibition
- **Zhi Century Bell:** core of Dazhongsi AI Industry Cluster; JingZhang Railway century bell + AI digital clock face; hourly AI light show
- **Zhi Future Gate:** south entrance at Xizhimen (Beijing North Station plaza); high-speed rail nose arch + holographic projection; ceremonial gateway for Beijing-Tianjin-Hebei AI talent

Metrics and Evidence

Brand Identity

- **Chinese brand:** 京张·智廊
- **English brand:** JingZhang AI Corridor
- **Core slogan:** From Railway Corridor to AI Corridor — a century of innovation
- **Design concept:** fusion of railway parallel lines and neural-network nodes
- **Color system:** JingZhang Railway classic dark green + Zhongguancun tech blue + AI-era gradient purple

Implementation Phasing

Phase	Time (scenario)	Focus
Phase 1 (Initiation)	2026-2028	Heritage park full connection, AI Origin Community launch, Zhiyuan Tower, AI signal pilot
Phase 2 (Development)	2028-2030	Zhongzhiyuan full build-out, Dazhongsi industry upgrade, JingZhang APM line
Phase 3 (Maturity)	2030-2035	District-wide AI scenario coverage, international brand, closed-loop operation

Disclaimer: all spatial proposals in this submission are conceptual proposals and do not replace formal planning approval. The provisional boundary data used is derived from the announcement and must be re-calculated once official data is released.
