

Three key areas — task index

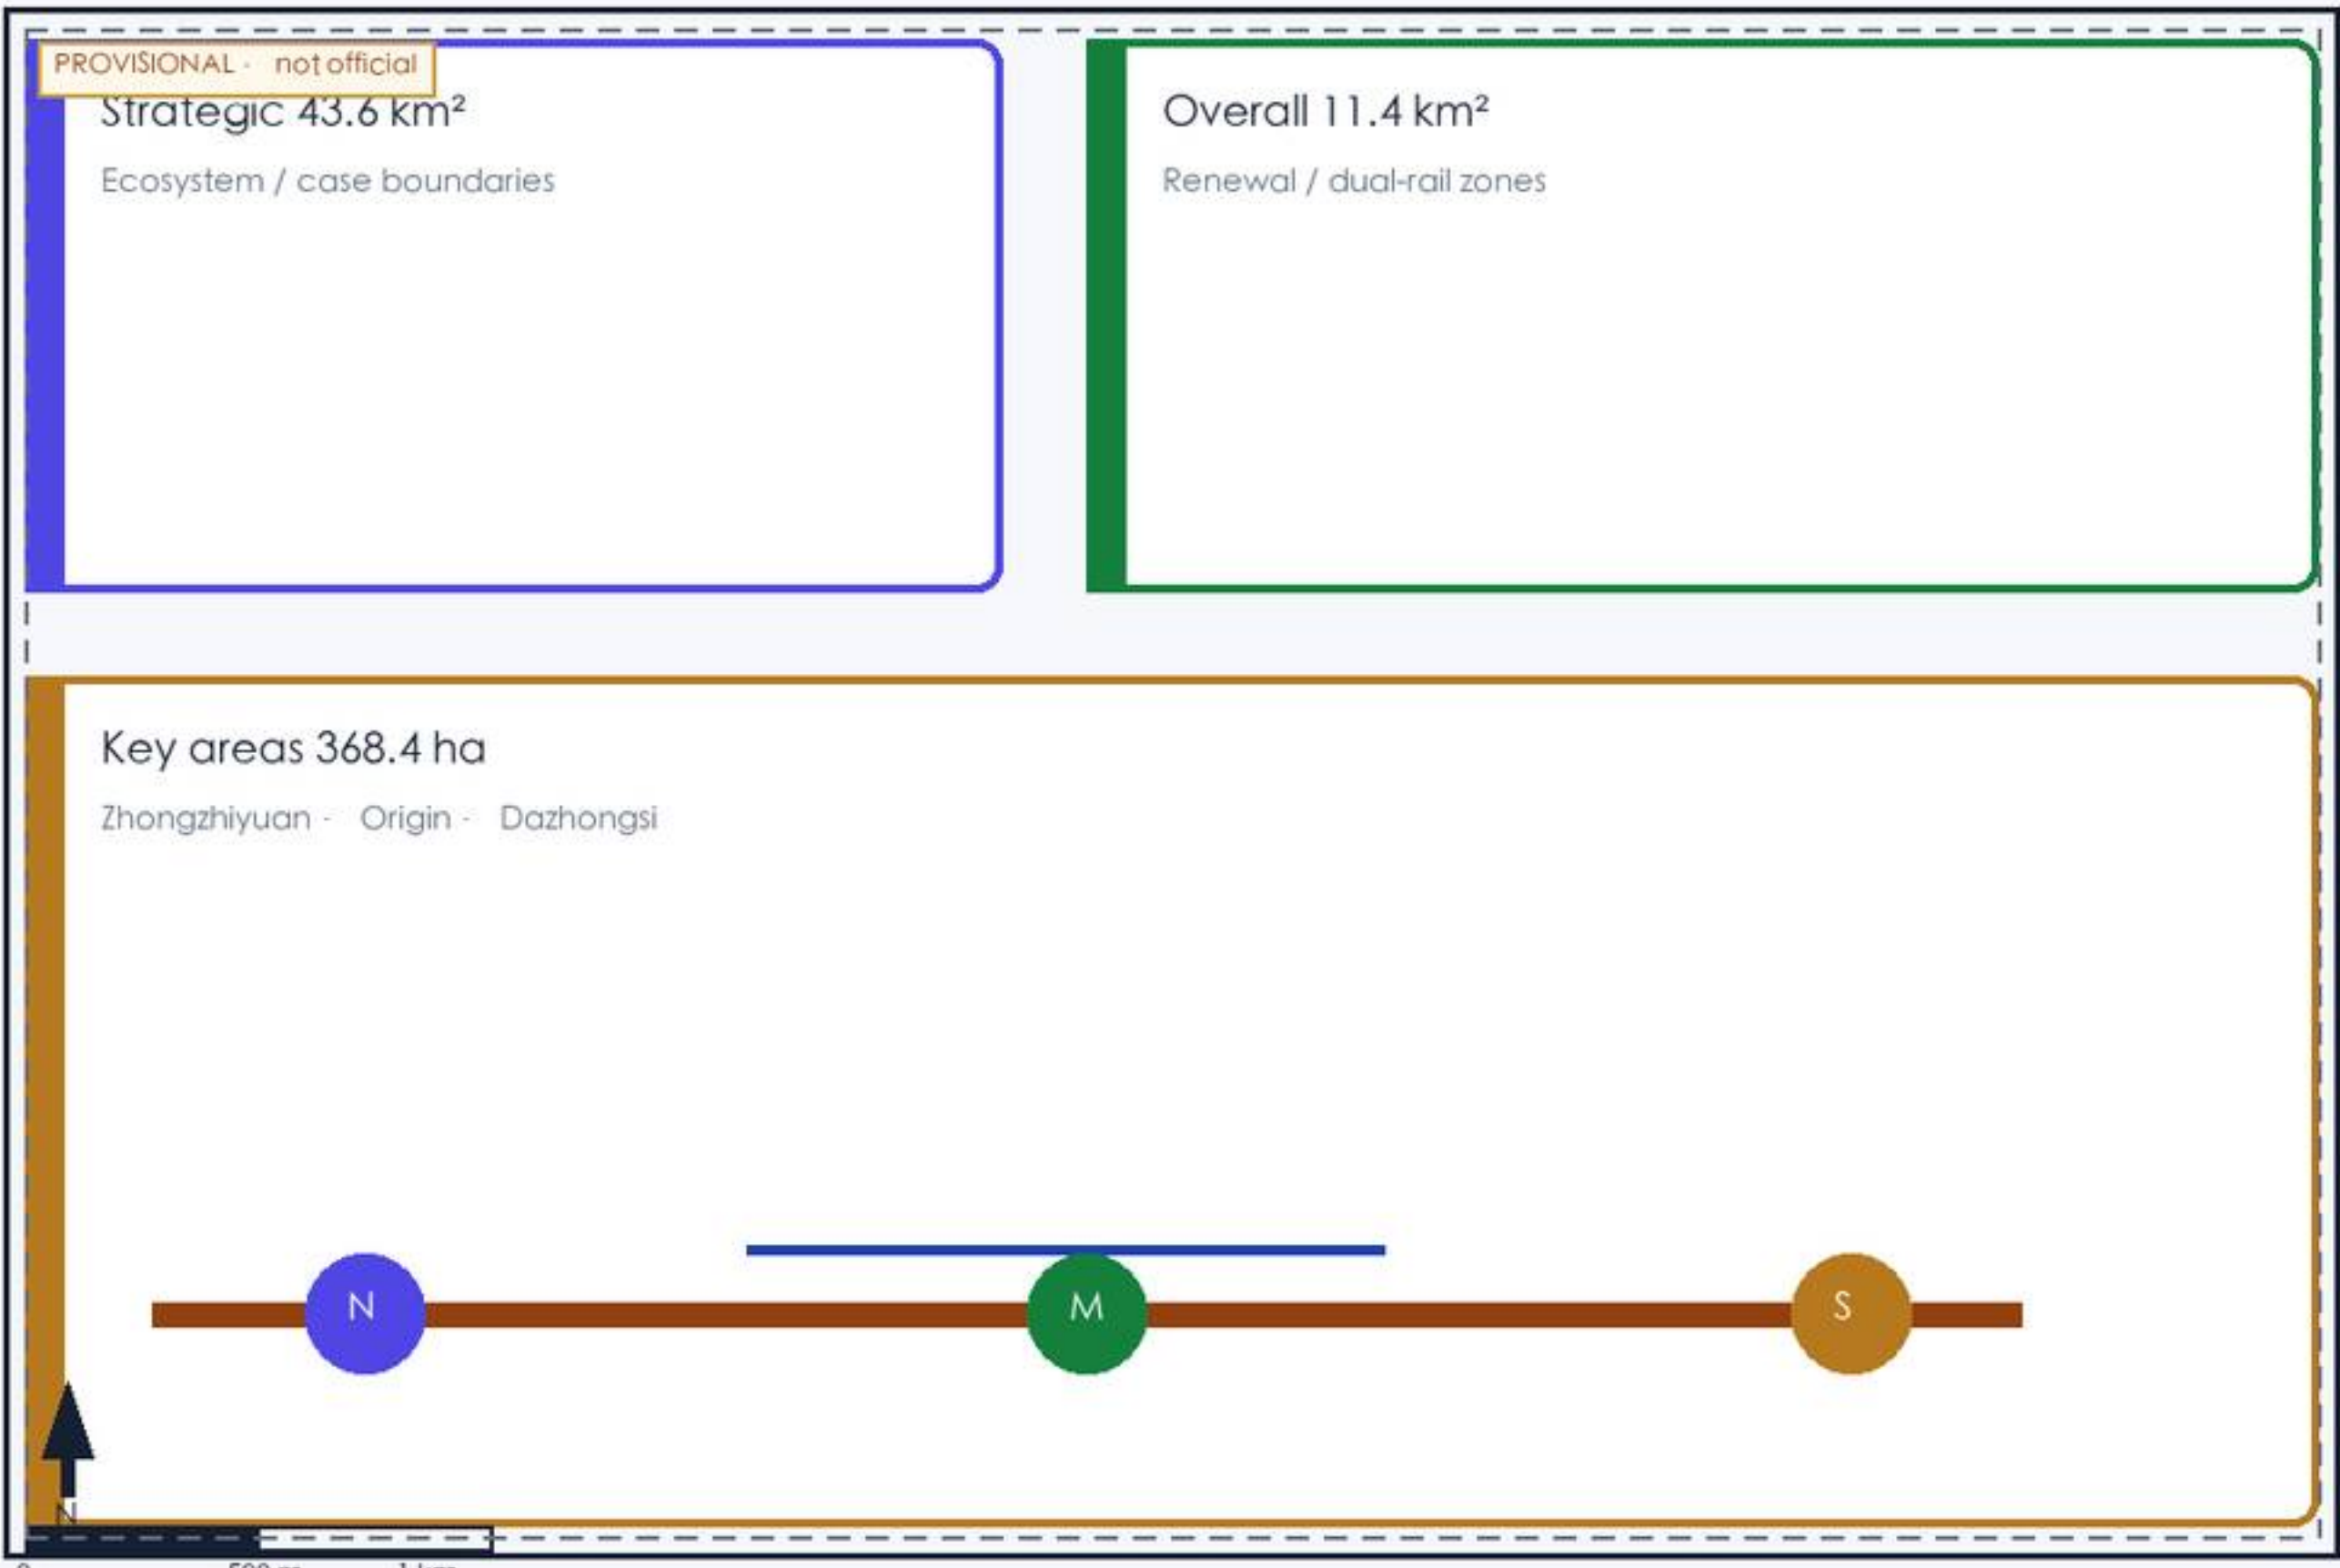

Forest Rail · provisional geometry · schematic

Source: geometry/key_areas.geojson · provisional_constraint · not for approval

Three-tier scope and rail-guided structure

Forest Rail · provisional geometry · schematic

LEGEND

- Strategic tier
- Overall tier
- Key-area tier
- Guiding rail
- Operating (concept)

Three tiers linked, not siloed

Source: geometry/*-geojson + metrics.json · provisional_constraint · not for approval

Core metrics recalculation & evidence chain

Forest Rail · provisional · discussion-grade only

metric	value	confidence	note
site_area_sqm	11412825.386	low	provisional boundary
building_footprint_area_sqm	310807.184	medium	provisional_constraint
green_ratio	0.123423	medium	green / site
public_space_ratio	0.073281	medium	public / site
floor_area_ratio	unknown	unknown	no official FAR
key_area_count	3	low	PROV-KEY-001...003

Do NOT label provisional as high confidence / Trusted official boundary

Recalculate the full package when official polygons arrive

N

n/a

table	schematic

EVIDENCE

GeoJSON → metrics

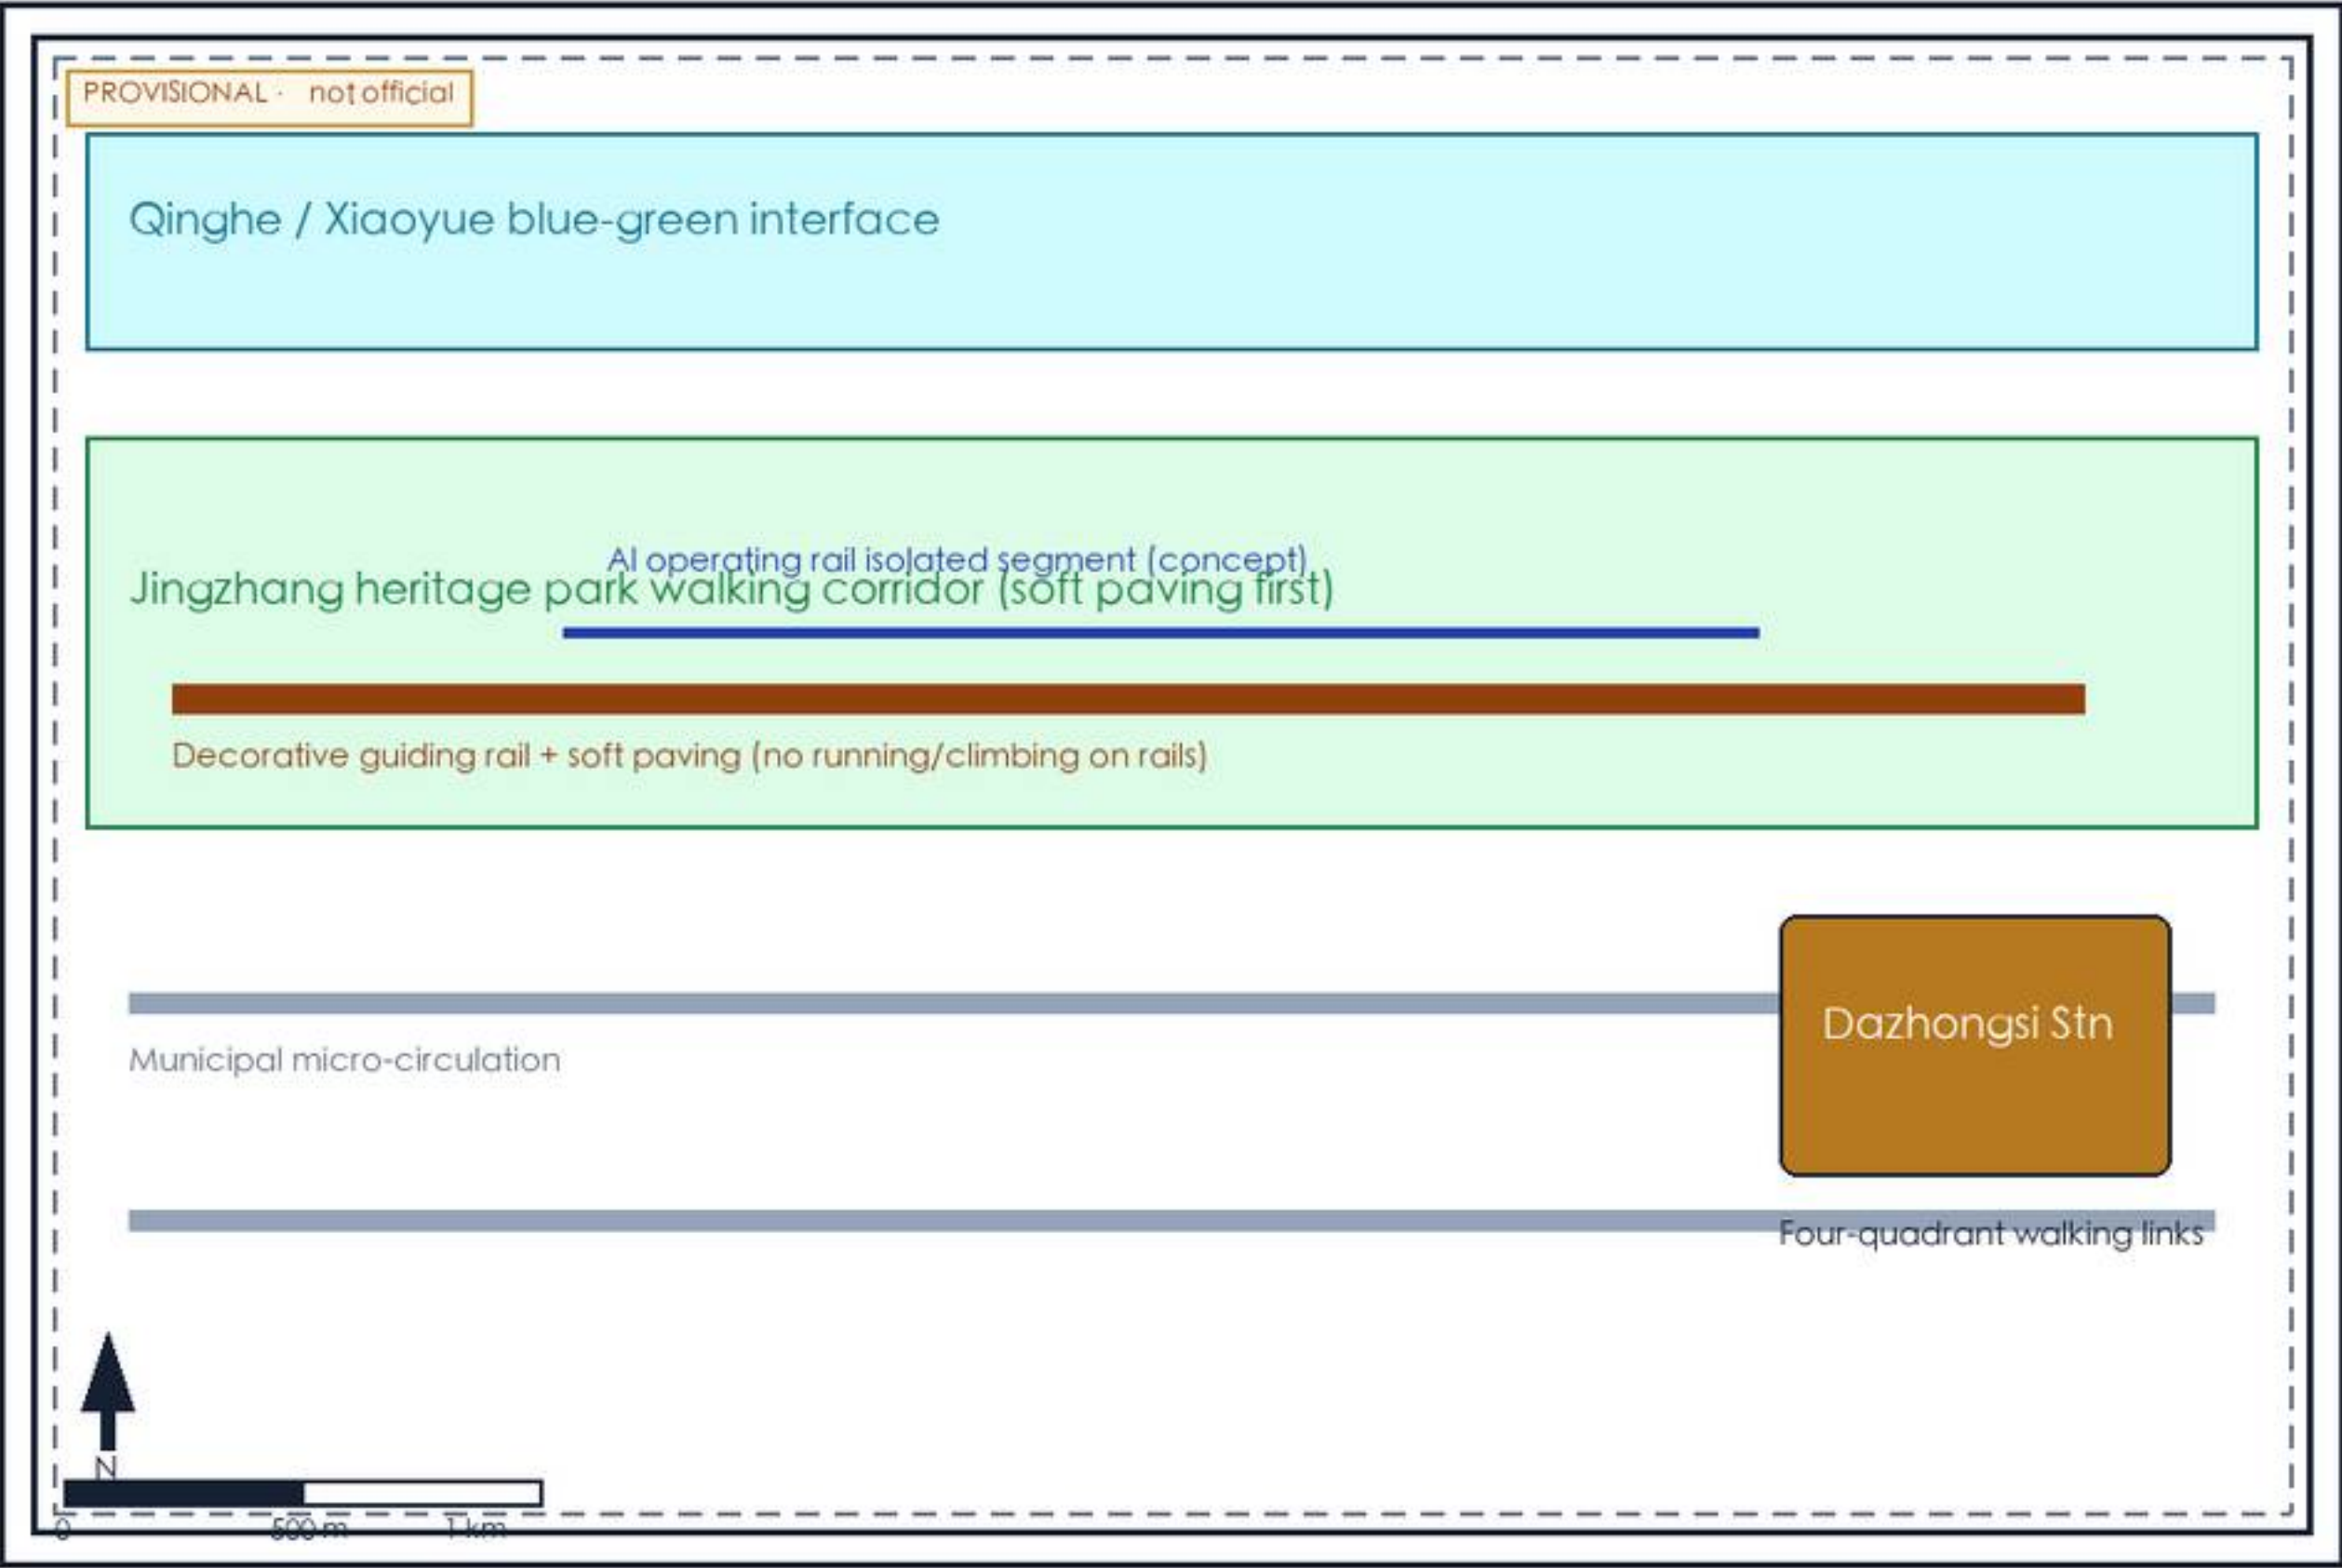

matrices → proposal

provisional warning

Concepts ≠ evidence figures
site_area confidence = low

Mobility, walking & blue-green public space

Forest Rail · provisional geometry · schematic

LEGEND

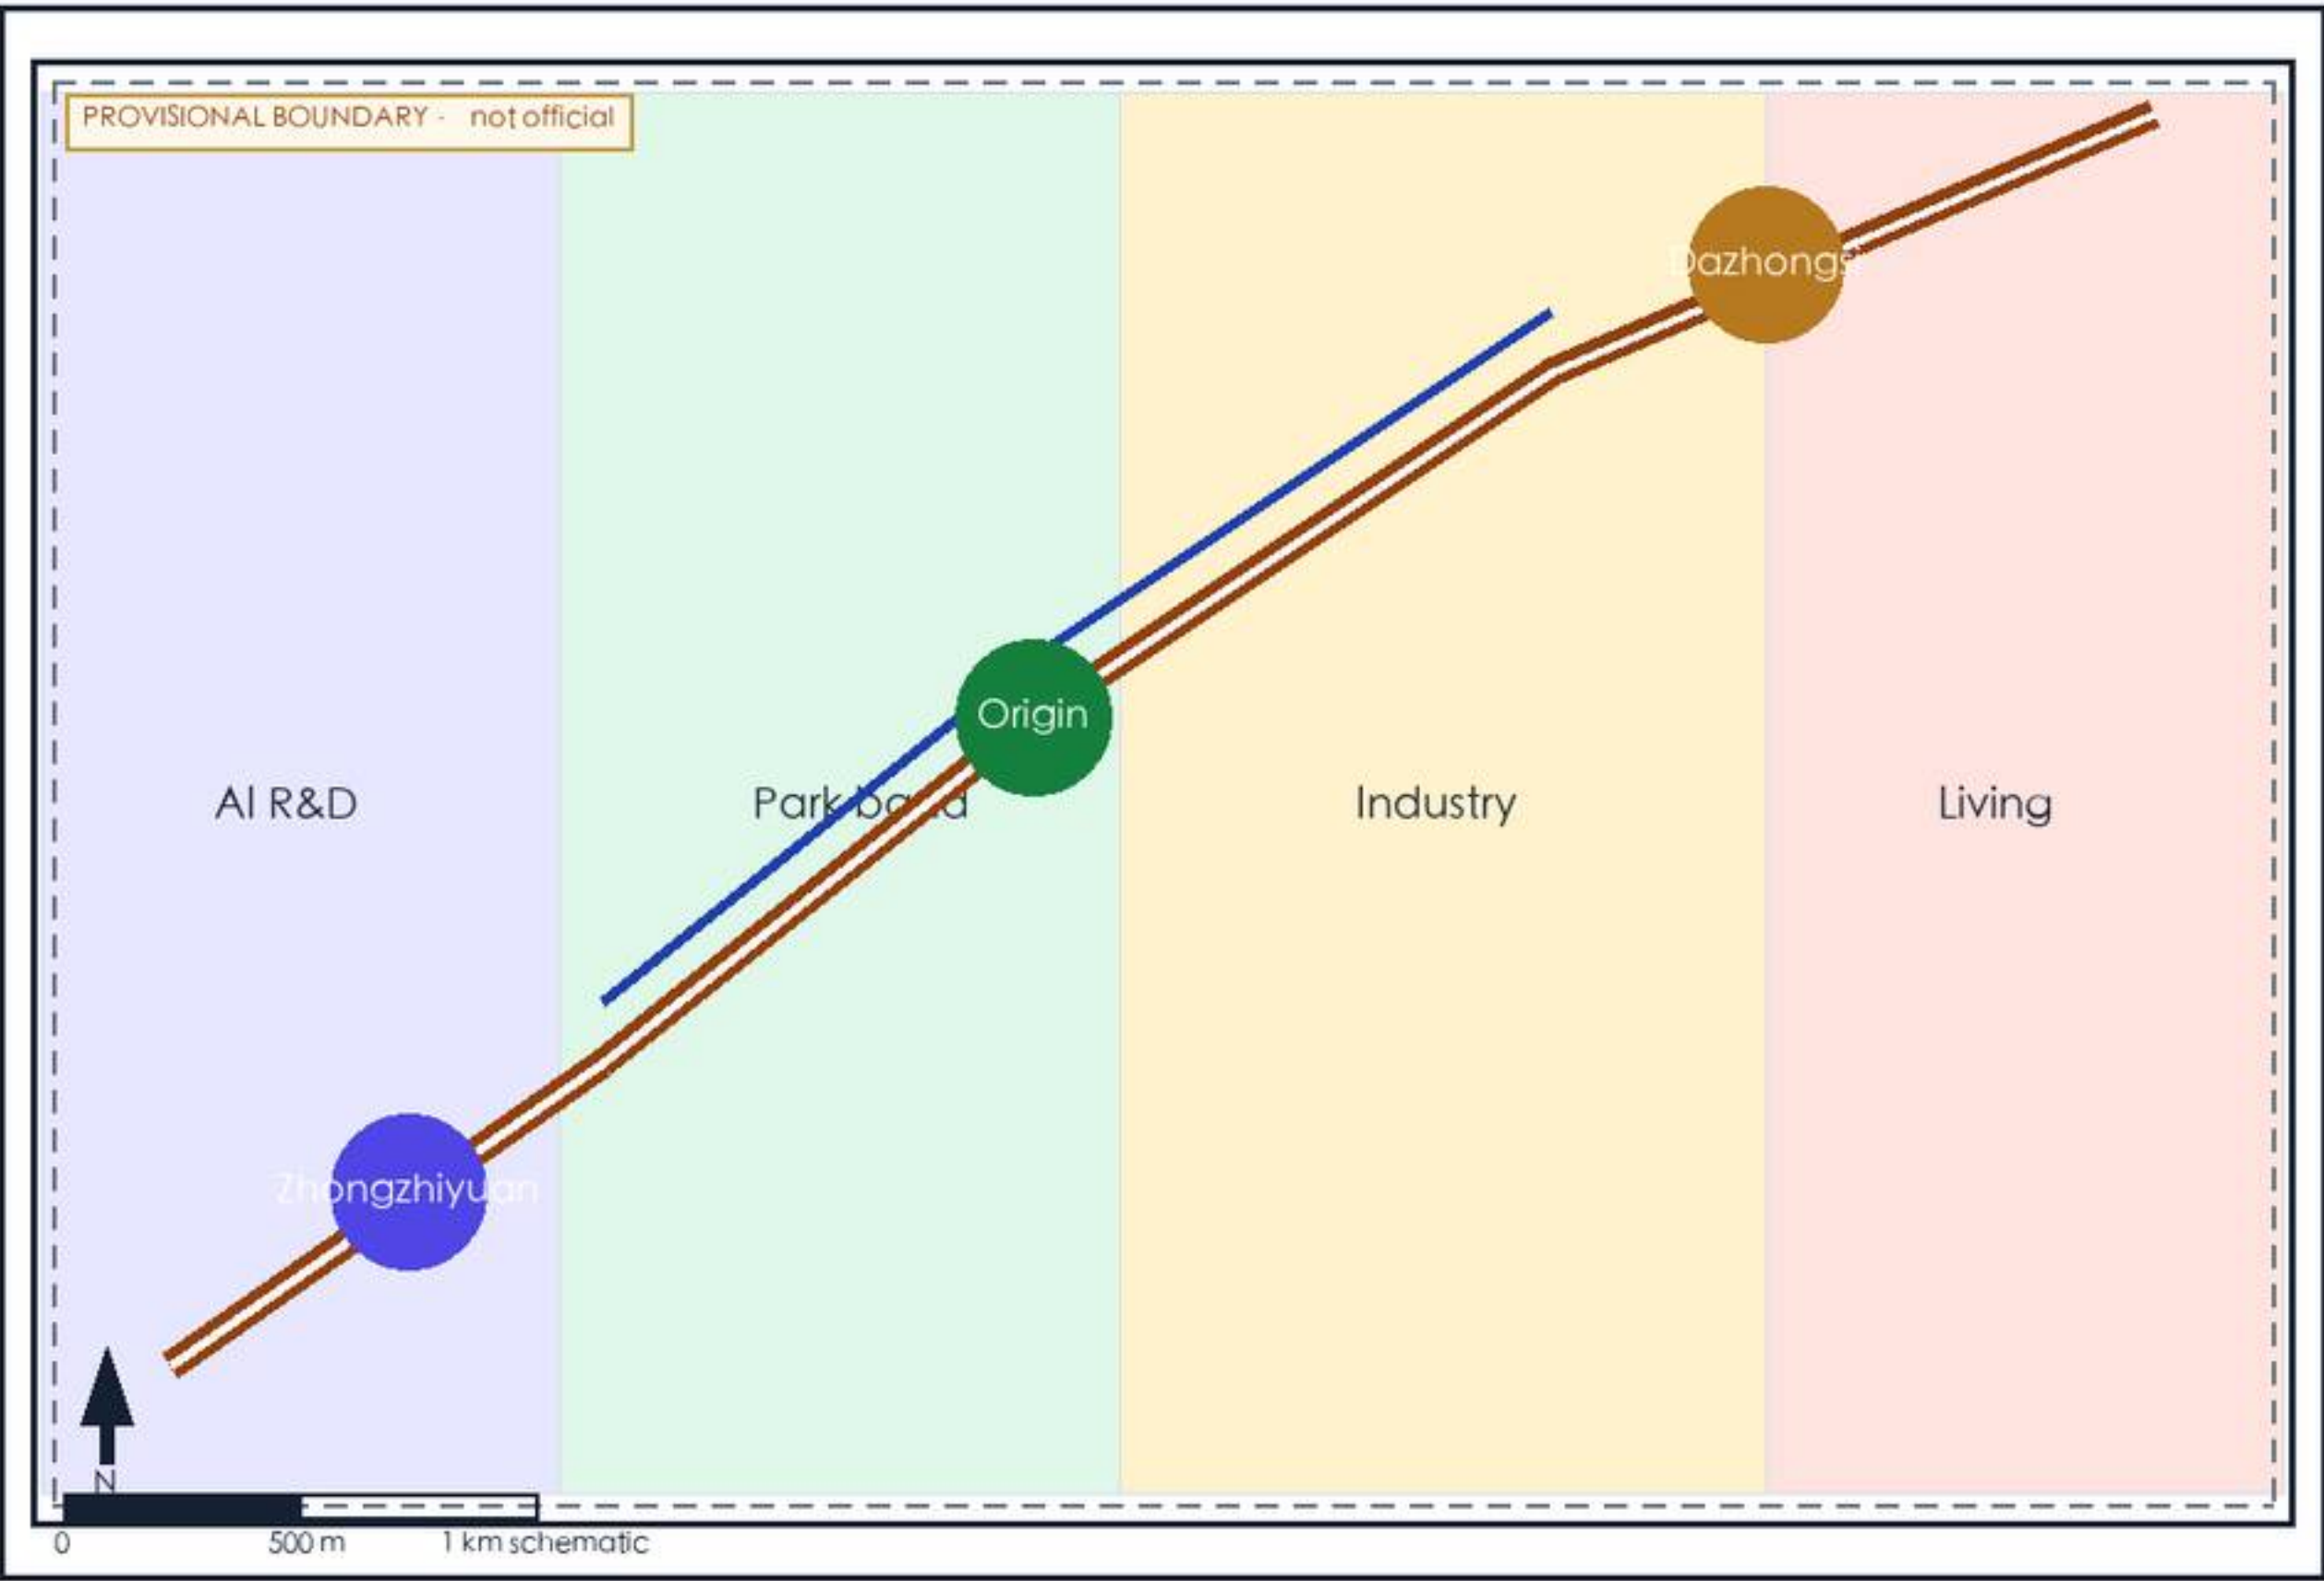

- Blue-green water
- Park walking
- Decorative guiding rail
- AI operating rail
- Rail station

Pedestrian priority at crossings
Operating rail separated from walking

Source: geometry/*-geojson + metrics.json · provisional_constraint · not for approval

Overview: Forest Rail park corridor & three key areas

Forest Rail · provisional geometry · schematic CRS

LEGEND

- Key-area nodes
- Decorative guiding rail
- AI operating rail (concept)
- Park band

Story: one park corridor links three key areas
Guiding vs operating rails separated; walk soft paving

Source: geometry/*-geojson + metrics.json · provisional_constraint · not for approval
