数据来源：六层 provisional 临时几何（公告四至推定）| 总体设计 11.413 km² · 重点区 3.693 km² · 12 用地多边形 · 道路 58.78 km · 绿地率 2.8958%（复算值）

aplaybox / jingzhang-ai-artery · P13 · 2026-08

Core metrics (metrics.json recalculation)

11.413 km²	3.693 km²
Overall design area (~11.4 announced)	Three key areas total (~368.4 ha)
12 polygons	58.78 km
Land use grid (3x4 provisional)	Road centerlines (11 recalculated)
2.8958%	0.80%
Green ratio	Public space ratio
4 landmarks	17 projects
AI pilgrimage landmarks (≥3 required)	Conditional renewal projects

Validation & evidence chain

· Announcement tasks	17/17 PASS
· Agent tasks	6/6 PASS
· Mandatory standards	5/5 PASS
· Design-depth items	15/15 PASS
· Provisional tagging	all layers
· Statutory conditions	unknown → pending

Boundary note: all boundaries and derived metrics are provisional (agent-inferred from announcement text), not official; concept, far = unknown; all indicators will be recalculated once official geometry and regulatory conditions are released. This is an open co-creation proposal, not a substitute for formal planning. Figure labels are in Chinese; see proposal.en.pdf for full English correspondence.
