

Overall Design Overview - Shangdi SkyLink Living Circle (provisional concept envelope)

Provisional concept boundary; not an official redline

Legend

- Package concept envelope (~11.41 km², prov.)
- Key-area schematic (provisional)
- Concept green space
- Concept building mass
- Slow-mobility spine (Jingzhang heritage park)
- Stitching links (east-west)
- Landmark node
- Scenario node (10)
- Heritage attention zone (concept)

Three-Tier Scope Framework

Official: master study ~43.6 km²; overall design ~11.4 km²; key areas ~1.4 km². This package's provisional envelope (site_boundary recompute): ~1.41 km² (11.41 km² magnitude only, not a substitute; recompute after official geometry release).

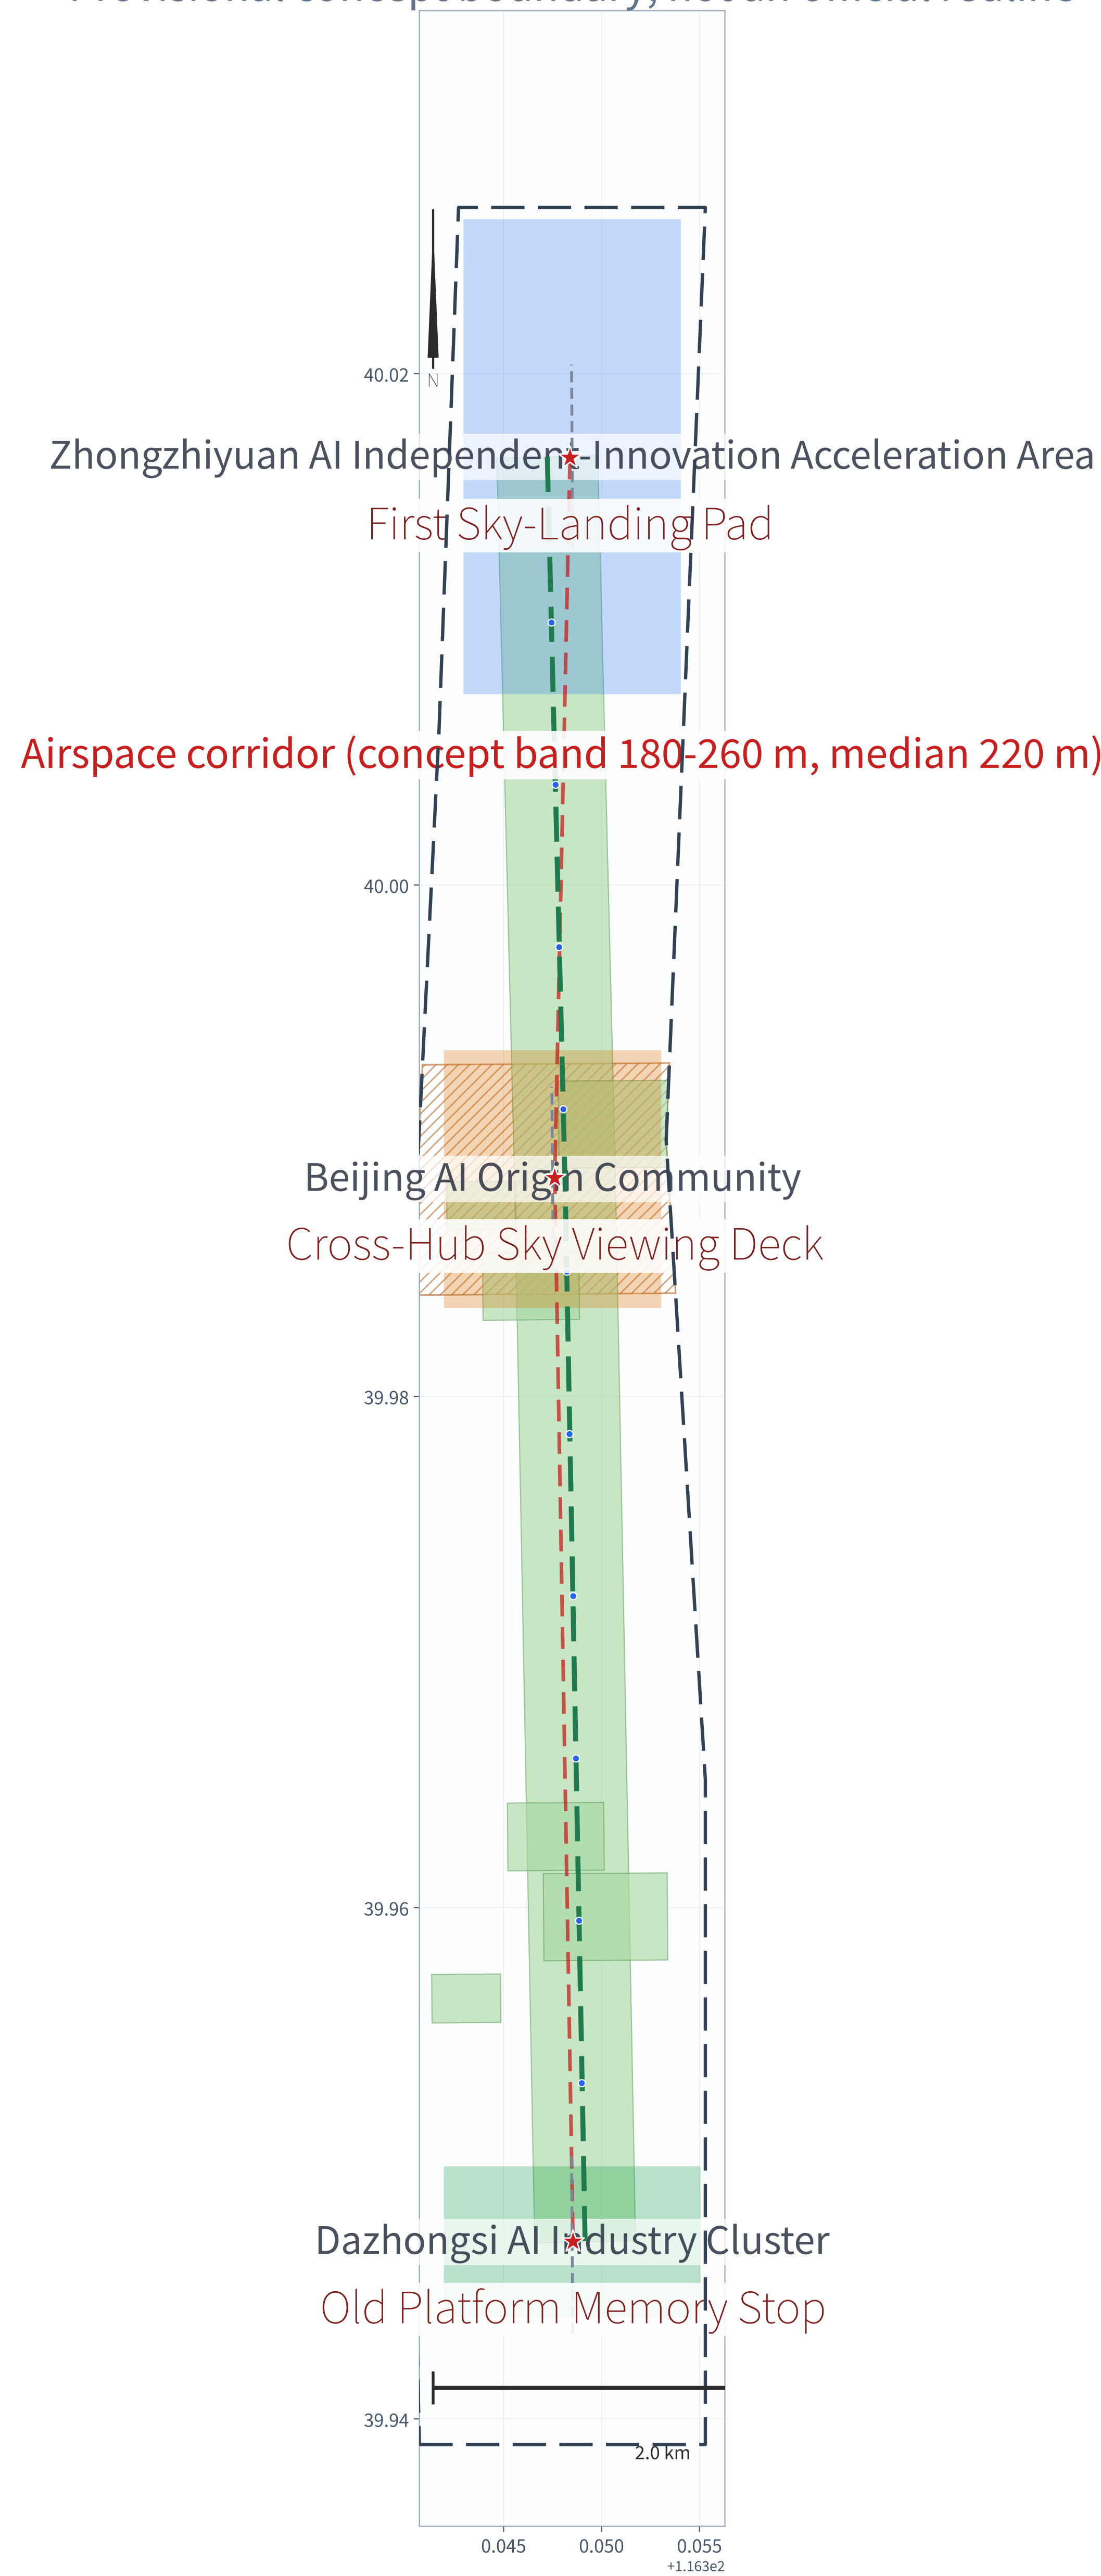

Core Metrics (recomputed)

green_ratio ~0.329; public_space_ratio ~0.007 (metrics.json basis).

AI concept representation from provisional package geometry; not an official drawing

Three-Node Index & Design Tasks (key-area schematic polygons, provisional)

Provisional concept boundary; not an official redline

Landmark node Scenario node (10) Airspace corridor Key areas Heritage attention zone (concept)

Node 1 - ZGC Software Park: delivery hub + landing demo - First Sky-Landing Pad

- Delivery hub / rooftop pad / O&M center; demo system
- Scale: 800-1500 m² (median 1200 m²)
- Pilot A: airspace permits, qualification first
- Stop: 2 incidents or complaints trigger review

Node 2 - Heritage Park Shangdi Section: science & leisure - Old Platform Memory Stop

- Science gallery, simulator, trial field, memory stop
- Official heritage/green boundary prevails; reversible
- Pilot B: heritage review, airspace permit, input
- Stop: heritage objection, incident, 3 cancellations

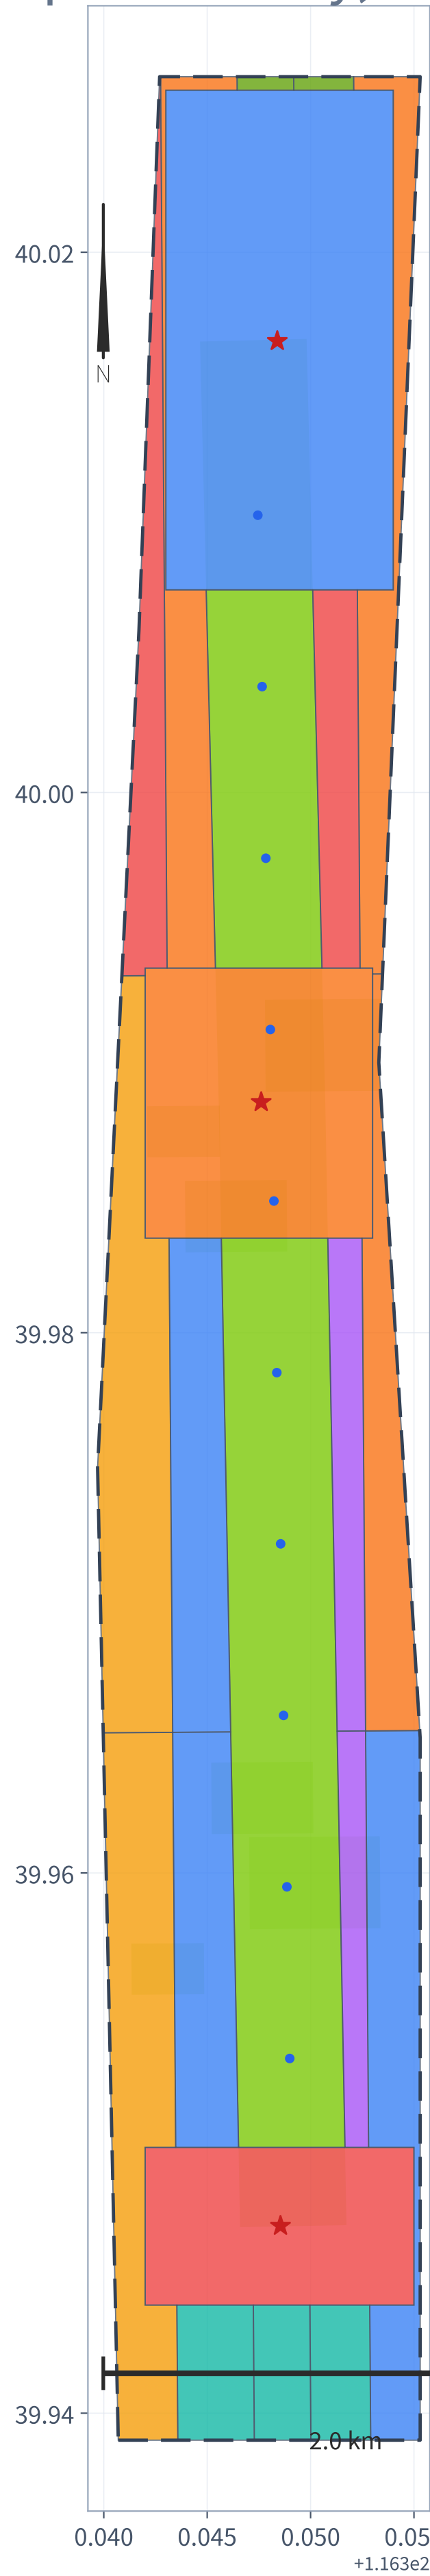

Node 3 - Shangdi Roundabout: commute link + emergency - Cross-Hub Sky Viewing Deck

- Link station, smart-pole pad, O&M screen, deck
- Non-passenger services + ground links; eVTOL long-term
- Pilot C: roundabout review, traffic impact, protocol
- Stop: traffic impact, incident, or complaint

Three nodes linked by airspace corridors: First Pad - Viewing Deck - Memory Stop

Conceptual Land-Use Structure (8 categories, +/-5 pp band; provisional)

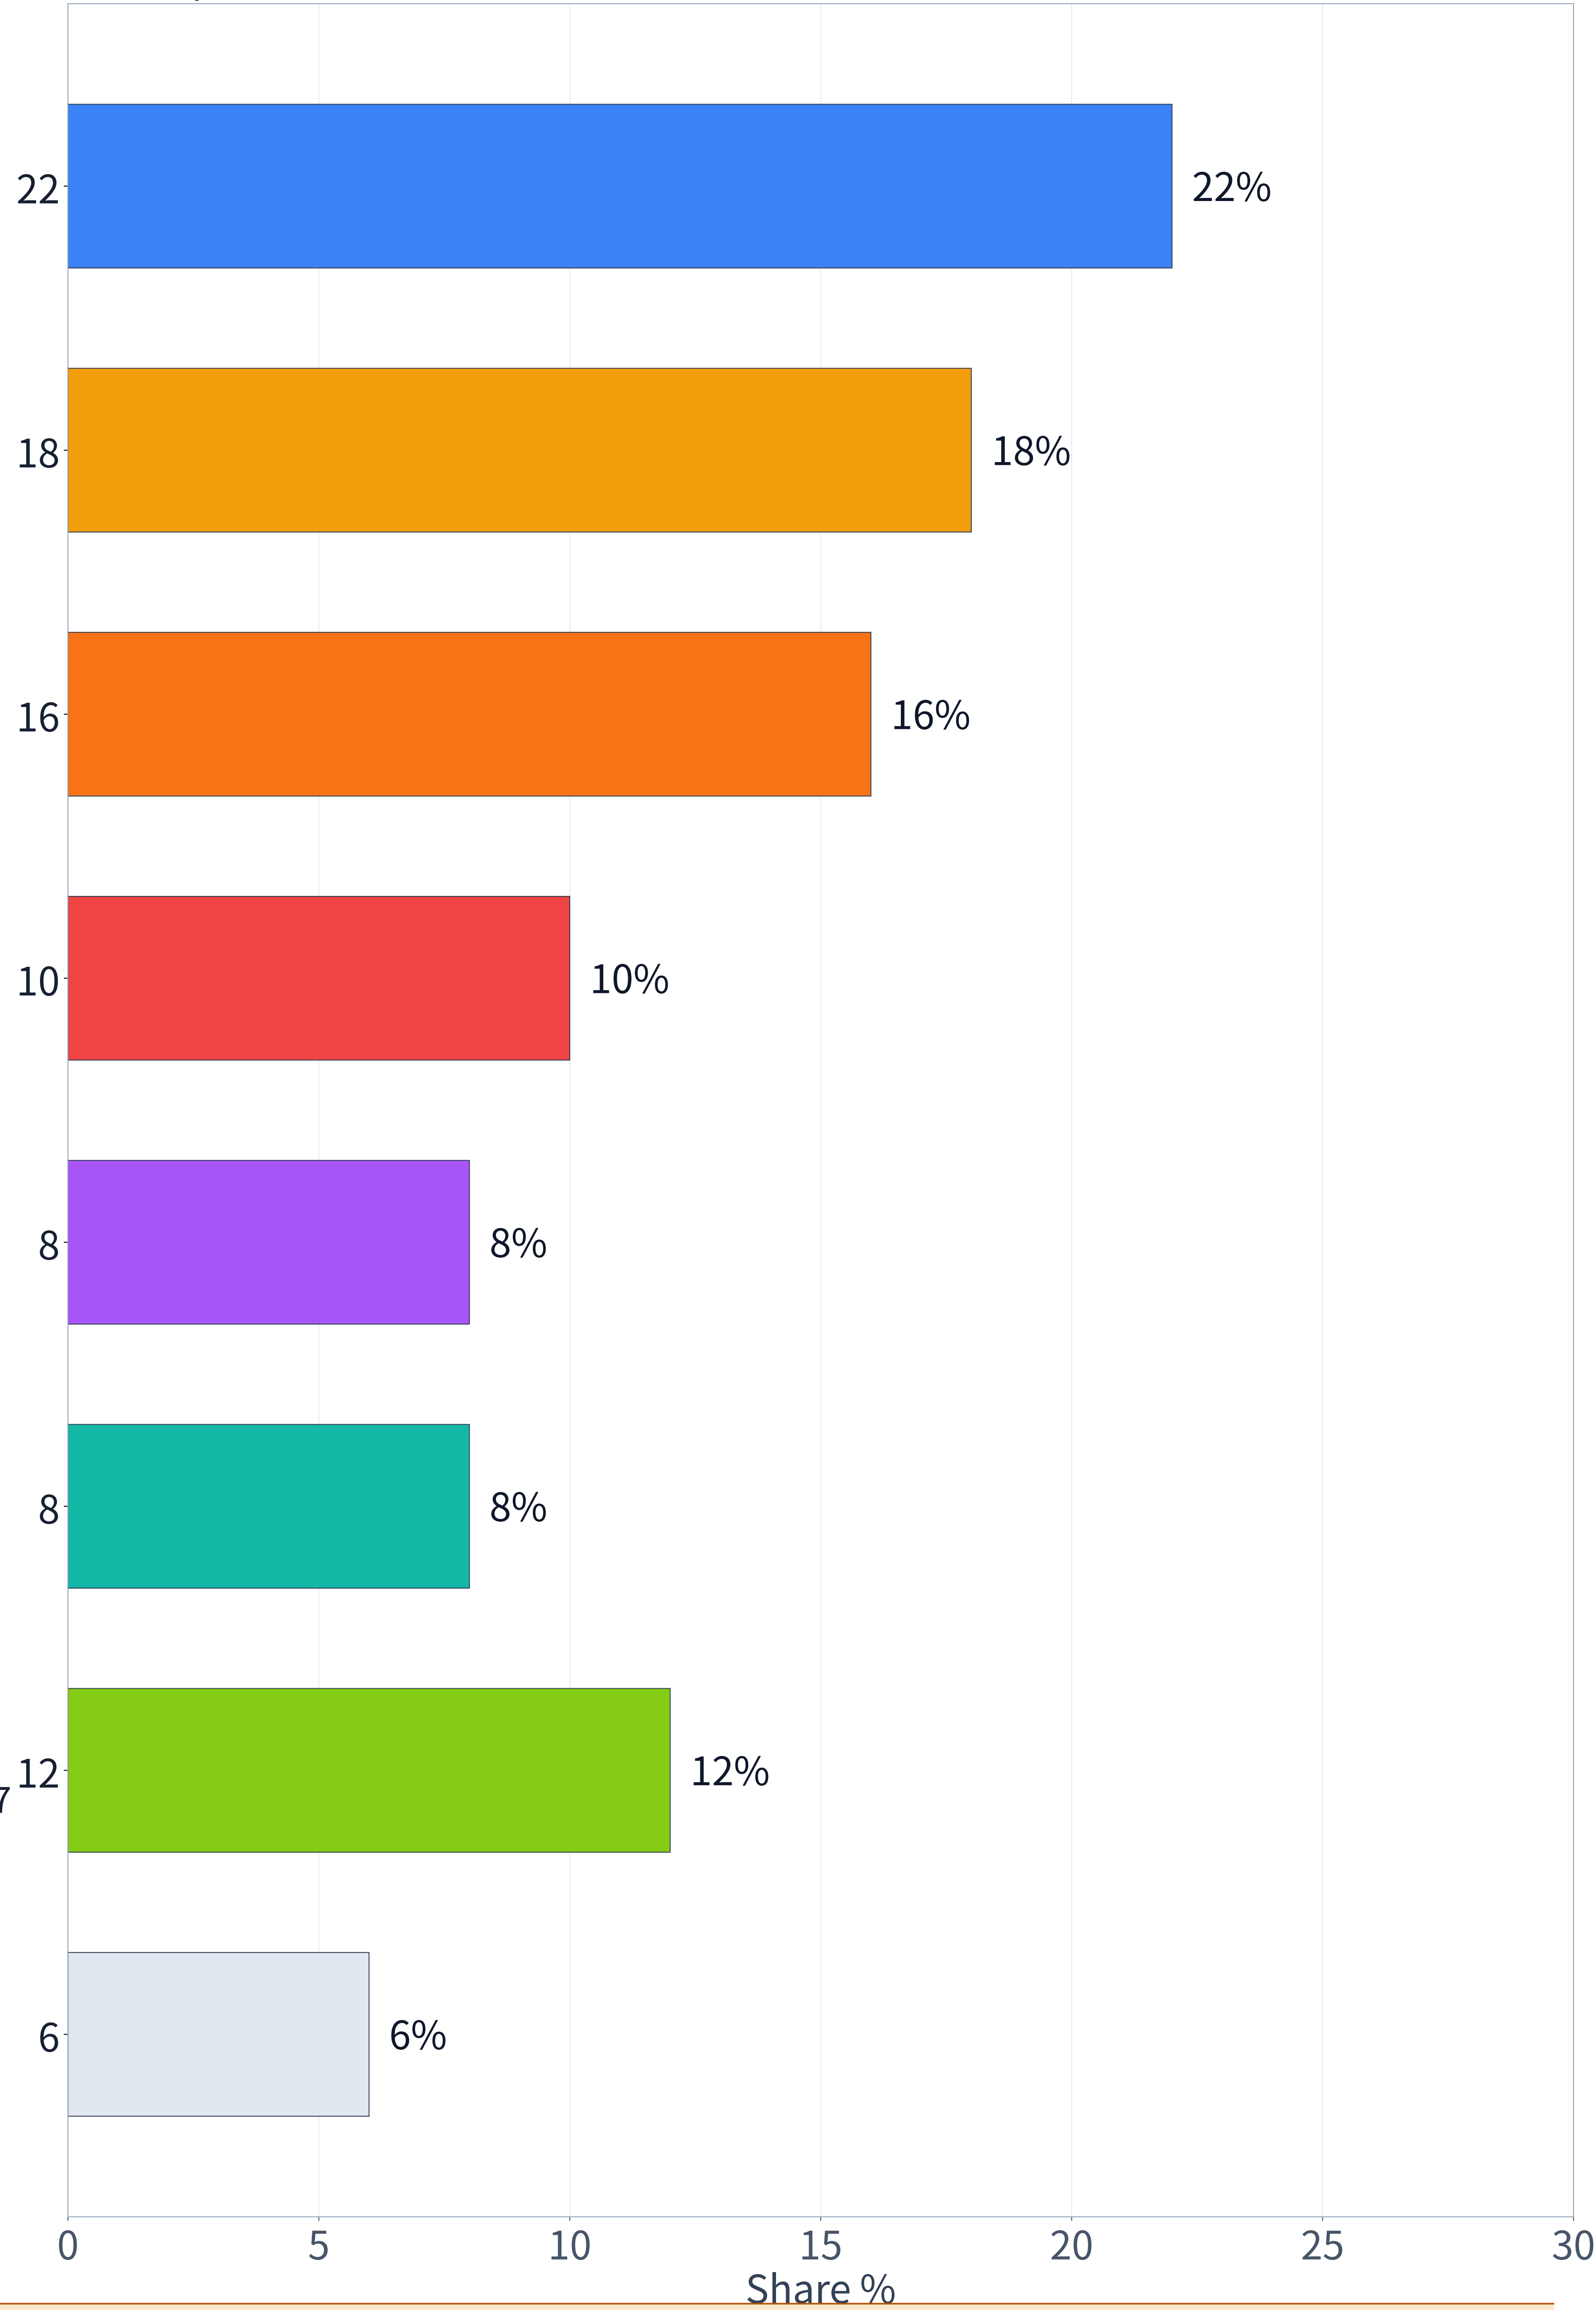

Provisional concept boundary; not an official redline

- R&D/Education (Code 0802)
- Business/Finance (Code 0902)
- Commercial (Code 0901)
- Urban Residential (Code 0701)
- Cultural (Code 0803)
- Logistics/Warehousing & Transport Terminals (Code 1207)
- Park Green Space (Code 1401)
- Buffer Green Space (Code 1402)

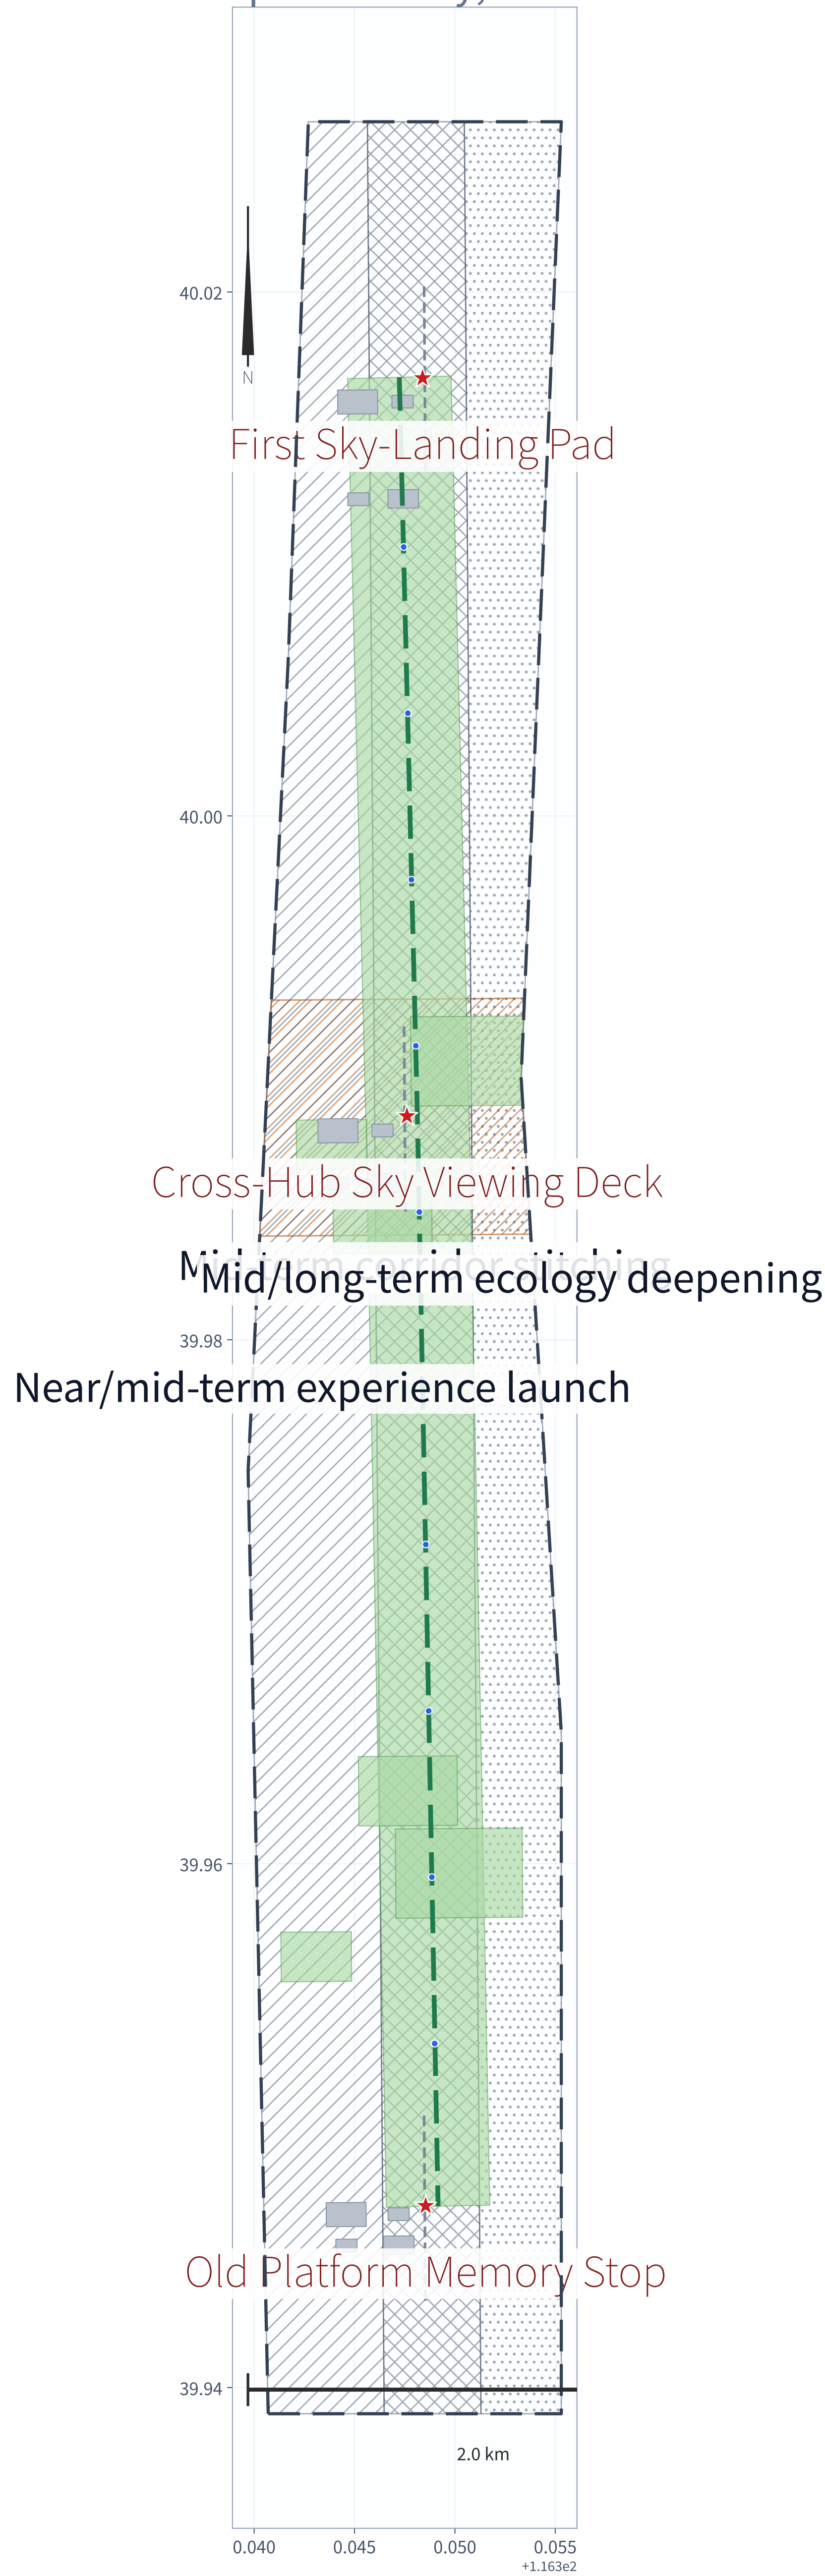

Concept assumption shares; reserved land is a direction, not drawn as a zone

Land-use shares (+/-5 pp band, provisional)
(recompute after official data release)

Slow-Mobility & Blue-Green Space Analysis (provisional)

Provisional concept boundary; not an official redline

Legend

- Slow-mobility spine (Jingzhang heritage park)
- Stitching links (east-west)
- Concept green space
- Near/mid-term experience launch / Mid-term corridor stitching / Mid/long-term ecology deepening
- Landmark node
- Scenario node (10)
- Heritage attention zone (concept)

One-corridor-three-node blue-green framework: the linear Jingzhang Railway Heritage Park greenway links the three nodes; landing facilities embedded into green texture in modular, reversible ways
Slow-mobility: spine + three east-west stitching links; blue-green: concept green corridors; phasing: near/mid/long-term staged implementation
Metrics: green_ratio ~0.329, public_space_ratio ~0.006 (provisional recompute); quiet belts and noise time-sharing follow published schedules

AI concept representation from provisional package geometry; not an official drawing
