

Shangdi SkyLink Living Circle

Centennial Jingzhang AI Innovation Belt | Low-altitude economy & workplace public space - Concept Design

Internal working codename NAME-CLEAR-PENDING - provisional concept envelope - not an official redline - recompute after official data release

- Node 1 - ZGC Software Park: delivery hub + landing demo - First Sky-Landing Pad
- Node 3 - Shangdi Roundabout: commute link + emergency - Cross-Hub Sky Viewing Deck
- Node 2 - Heritage Park Shangdi Section: science & leisure - Old Platform Memory Stop

Three nodes linked by airspace corridors: First Pad - Viewing Deck - Memory Stop

Overall Design Overview - Shangdi SkyLink Living Circle (provisional concept envelope)

Provisional concept boundary; not an official redline

Legend

- Package concept envelope (~11.41 km², provisional)
- Key-area schematic (provisional)
- Concept green space
- Concept building mass
- Slow-mobility spine (Jingzhang heritage park)
- Stitching links (east-west)
- Landmark node
- Scenario node (10)
- Heritage attention zone (concept)

Three-Tier Scope Framework

Official: master study ~43.6 km²; overall design ~11.4 km²; key areas ~368.4 ha

This package's provisional envelope (site_boundary recompute): ~11.41 km² (~11.41 M m²)

Same order of magnitude only, not a substitute; recompute after official geometry release.

Core Metrics (recomputed)

green_ratio ~0.329; public_space_ratio ~0.007 (metrics.json basis).

AI concept representation from provisional package geometry; not an official drawing

Three-Node Index & Design Tasks (key-area schematic polygons, provisional)

Provisional concept boundary; not an official redline

Node 1 - ZGC Software Park: delivery hub + landing demo - First Sky-Landing Pad

- Delivery hub / rooftop pad / O&M center; demo system
- Scale: 800-1500 m2 (median 1200 m2)
- Pilot A: airspace permits, qualification first
- Stop: 2 incidents or complaints trigger review

Node 2 - Heritage Park Shangdi Section: science & leisure - Old Platform Memory Stop

- Science gallery, simulator, trial field, memory stop
- Official heritage/green boundary prevails; reversible
- Pilot B: heritage review, airspace permit, input
- Stop: heritage objection, incident, 3 cancellations

Node 3 - Shangdi Roundabout: commute link + emergency - Cross-Hub Sky Viewing Deck

- Link station, smart-pole pad, O&M screen, deck
- Non-passenger services + ground links; eVTOL long-term
- Pilot C: roundabout review, traffic impact, protocol
- Stop: traffic impact, incident, or complaint

Three nodes linked by airspace corridors: First Pad - Viewing Deck
- Memory Stop

Conceptual Land-Use Structure (8 categories, Land-use shares + 5pp band, provisional)

Provisional concept boundary; not an official redline

(recompute after official data release)

- R&D/Education (Code 0802)
- Business/Finance (Code 0902)
- Commercial (Code 0901)
- Urban Residential (Code 0701)
- Cultural (Code 0803)
- Logistics/Warehousing & Transport Terminals (Code 1207)
- Park Green Space (Code 1401)
- Buffer Green Space (Code 1402)

Concept assumption shares; reserved land is a direction, not drawn as a zone

Slow-Mobility & Blue-Green Space Analysis (provisional)

Provisional concept boundary; not an official redline

Legend

- Slow-mobility spine (Jingzhang heritage park)
- Stitching links (east-west)
- Concept green space
- Near/mid-term experience launch / Mid-term corridor stitching / Mid/long-term ecology deepening
- Landmark node
- Scenario node (10)
- Heritage attention zone (concept)

One-corridor-three-node blue-green framework: the linear Jingzhang Railway Heritage Park greenway links the three nodes; landing facilities embed into green texture in modular, reversible ways

Slow mobility: spine + three east-west stitching links; blue-green: concept green corridors; phasing: near/mid/long-term staged implementation

Metrics: green_ratio ~0.329, public_space_ratio ~0.007 (provisional recompute); quiet belts and noise time-sharing follow published schedules

AI concept representation from provisional package geometry; not an official drawing

Metrics Evidence (recomputed per metrics.json; provisional)

Counting metrics (10 items, integer counts, basis in metrics.json)

Area metrics (3 items + building mass, 10,000 m2, provisional recompute)

Ratio metrics (2 items, ratios, provisional recompute)

Metric	Value (reduced)	Confidence	Use limit	Recompute trigger
site_area_sqm	~11.41 M m2	Medium	Concept ref, not a redline	Official boundary release
green_ratio	~0.329	Low	Concept value; not official	Green boundary data
public_space_ratio	~0.007	Low	Concept value; schematic only	Public-space data
geometry/site_boundary.geojson area (EPSG:4548); green_space_area_sqm / site_area_sqm; public_space_area_sqm / site_area_sqm
